Mrs. Crawford Baptist and Mrs. Edenborough were Tofield delegates at the Annual Meeting of the Edmonton Diocesan Women's Auxiliary of the Church of England which was held from February 18th—21st. The services were held in All Saints pro-cathedral and the business sessions in All Saints' Parish Hall.

Mrs. Edenborough gave an interesting and lengthy report at our March 6th meeting which was held at the home of Mrs. Rose. Mrs. Baptist will give her report at our next meeting which will be held at the home of Mrs. Weatherill on April 3rd.

W.I. NOTES

The Women's Institute will hold their regular meeting in the W. I. rooms on Tuesday, March 12th, at three o'clock.

Mr. Pincott will address the meeting on the subject of "Wills, and how they effect the Women of Alberta."

The roll call will be answered by legal questions.

Please bring your receipts for "Drinks and Salads."

KINGMAN

Mr. and Mrs. W. Hartchen visited with Mr. and Mrs. O. Bray of Camrose on Wednesday.

T. Grahn made a business trip to Edmonton on Friday.

Mr and Mrs C. R. Blyckert visited with Mr. and Mrs. Joe Munson of Camrose on Saturday.

Mr. and Mrs. K. B. Olson and daughter of Dodds visited with Mr. and Mrs. E. Erickson on Sunday.

Mr. and Mrs. I. Erga were the guests of Mr. and Mrs. J. Boness on Sunday.

Hans and Palmer Boness made a trip to Kingman from Leduc on Sunday with a 1920 Ford. It takes the Ford to open the roads.

Mr. and Mrs. W. Oaness visited with Mr. and Mrs. R. Molvik on Sunday.

Mrs. T. Grahn and Mrs. H. Bray are staying with their father, Mr J. Nelson of Hay Lakes for a couple of days.

From the gutter to a palace. From the Bowery to Fifth Avenue. From the peaked cap to the silk topper. Gangdom and gangsters have undergone striking changes during the past few years.

Brains have replaced brawn, manicured nails have replaced gnarled fingers, calloused from the wear of brass knuckles.

The master mind of crookdom today is more liable to sign his income tax J. Boothby Alexander than to sign it by the old moniker "Humpty."

In only one respect does the underworld figure of today resemble that of yesterday- that is in disregard of human life.

The gangster of yesterday depended upon ward politics to save him from "the stir." The gangster of today places his reliance on the highest salaried criminal lawyer that money can procure.

The rat faced little gangsters who . . . a Maxim silencer has passed into the discard; if active at all in criminal way it probably is as a hi jacker.

Nothing, perhaps, exemplifies this striking change in crookdom and its methods more than "Dressed to Kill," an ultra modern story of the underworld brought to the screen by Fox Films and directed by Irving Cummings. This feature will be shown at the Variety Theatre on Saturday March 9th

KETCHAMOOT

The regular monthly meeting of the M.A.S. will be held next Wednesday afternoon, March 13th, at the home of Mrs. L. Carlisle. All are cordially invited to attend.

Mr. A. McMullen, Mr. and Mrs. C. Coombes and family, Mr. and Mrs. Odiorne and family were Sunday guests of Mr. and Mrs. W. K. Mitchell.

Mr. and Mrs. Wm. Splisted were guests of Mr. and Mrs. O. Barnes on Sunday.

Mr. and Mrs. Hill visited Mr. and Mrs. A. Harrison at their home Friday evening.

Mrs. L. Carlisle received a telegram on Sunday from Reinbeck, Iowa, stating her brother had passed away at that place. We extend sympathy to the family.

Miss Annie Bruha visited over Sunday a week ago with her sister, at the Piper home north of town.

Mrs. McMullen, Mrs. C. Coombes and children were guests of Mrs. G. W. Sears on Thursday afternoon.

Miss Mary Good who has been nursing Mrs. Hull for some time left on Thursday for Calgary, after which she will go on to Vancouver.

Mr. and Mrs. W. A. Mitchell and Mr. and Mrs. Hanson visited at the Soma home on Wednesday afternoon.

We are sorry to hear our new neighbor, Mr. Soma, is very ill at the Camrose hospital. It is thought he will have to undergo an operation for stomach trouble.

Mr. Paul McMullen returned home from Vancouver where he had been visiting his family.

Miss Viola Lee and brothers entertained the young people of the neighborhood to a whist drive at their home Monday evening of last week, eight tabels playing. Miss Annie Bruha and John Thompson were successful winners of the first prizes. Miss Mabel Lawson and Stanley Sears were awarded the consolation. A delicious lunch was served at midnight, after which music and social time was spent. A pleasant evening was reported by all.

A delightful evening was spent at the Henry McGinitie home on Friday when Mr. and Mrs. John McGinitie entertained about fifty guests to a whist drive, eleven tables playing. An unusual coincidence was the winning of gent's and ladies' firsts by Mr. and Mrs. Gill and both gent's and ladies' consolation prizes by Mr. and Mrs. J. Appleby. The prizes were alike in each case, a nice plate for the lady and a pair of pliers for the gent. A nice lunch was served at the finish of the playing, after which the guests wended their way home in the early hours of the morning

Spring Poets

Spring is the time of the year when poets—good and bad are abroad in the land.

Spring sunshine gives inspiration to many people to give vent to their feelings in language more beautiful than commonplace.

There are however, a number of spring poets around this year that have more than ordinary reason to give vent to their feelings in language different from the commonplace.

We refer to those who have left their cars stand around all winter and when they try to start it, find that it doesn't want to go. What they say we don't want to put into print, but if it is poetry we are sure it is not faultless rhyme.

Don't work yourself into a poetical frenzy when your car refuses to run right, but bring it to the

TOFIELD

P. M. HAUGEN PROP.

LINDBROOK

Everyone thought last week was the end of the winter, but seemingly winter has still a few kicks left yet.

Messrs. Leahy, Clarke and Hicks spent a few days in Edmonton on business last week.

Mrs. Hedley Burton was taken to hospital in Edmonton last Saturday, and was operated on almost immediately. To date the reports coming from the hospital state that she is doing as well as can be expected and we hope by now is on the road to recovery.

Lindbrook General Store changed hands last week. Mr. Leahy who started same in 1919 selling out to Messrs. Clarke and Hicks who will endeavor to carry on with the good work. Messrs. Clarke and Hicks are from Gloucester, England, both ex-service men, serving in the war with the Gloucestershire regiment, so last Sunday the Princess Patricia's C.L.I. in the person of J. Leahy marched out and the Gloucesters took over the fort.

Quite a crowd gathered on the station last Sunday night to see Mr. and Mrs. Leahy and Jean and Kitty off on the 9.50 train to Vancouver, B.C. We wish them all the best of luck

We hear that Geo. Weatherill has sold his farm here and also that the buyer has also bought the Swift quarter adjoining.

A work train unloading steel rails has been at work in Lindbrook last week. The present steel being exchanged for heavier.

Messrs. Glenn and Whibley shipped hogs last week and Mr. E. Lindberg shipped cattle.

To Mr. Lyndon Hooper comes the honor of being the first autoist to buck a car trail from Tofield to Lindbrook since the last bad drifts. He motored from Holden, but this last eight miles was the worst, but its open now so get busy the rest of you and improve on same.

Mr. Robert Scott spent a few days at Ardrossan last week with friends.

Mr. August Kortzman of High Prairie, Alta., paid a visit to his brother Frank and family of this district.

Mr. and Mrs. Carlson moved from here last Monday for Provost, Alta.

AMISK CREEK

Ladies' Aid held their meeting at Mrs. P. O. Flaaten on Wednesday of last week. Although the roads were not of the best, nearly all the members and many visitors were present. The next meeting will be held at the Mrs. A. Patterson home on Wednesday, March 13th.

The young people held their program in the church last Sunday evening. Quite a number were present. The program was short but good.

Margaret Moline was taken to the Royal Alexandra Hospital last week and opperated upon for appendicitis. She was getting along nicely the last we heard.

Mrs. E. A. Moen left for the City last Saturday to visit with Mr. E. Moen who is at the Hospital there.

Mr. and Mrs. I. Annobo visited at the R. O. Berg home on Monday afternoon.

Mr. Wm. Seale spent a couple of days in Edmonton last week.

The school meeting held on March 2nd was very well attended. Mr. C. H. Robinson, Inspector of Schools was present and it was decided to build a new school house as soon as the necessary formalities could be arranged.

Frederick Munro spent the week-end at the Phillip's home.

Radio Broadcasting In Canada

Tom [illegible] ment recently appointed a [illegible] to look into the whole subject of radio broadcasting in Canada. Tom [illegible] headed by Sir John Aird, is at present in [illegible] weeks engrossed in Great Britain and one of the purposes of [illegible] to discover what exactly the postmaster-general of the United States [illegible] exchanges of Canadian programs. The Commissioners mark one [illegible] over-whelming [illegible] broadcasting privileges [illegible] while the Imperial possibilities of the [illegible] importance as a means of [illegible] Canada is [illegible] demand that a well-defined policy [illegible] be formulated [illegible] the interests of the Dominion [illegible] be developed to the least possible delay.

[illegible] remains to be seen how far the needs of [illegible] in Canada can be dominated by [illegible] and powerful broadcasting [illegible] the United States [illegible] Canadian [illegible] will [illegible] programs [illegible]

[illegible] Canada has developed [illegible] broadcasting [illegible] Canada [illegible] Apart from the effect which [illegible] broadcasting [illegible] Canadian thoughts, the advertising [illegible] millions of dollars [illegible] the purchases of United States [illegible]

[illegible] broadcasting [illegible] the duties of the Government [illegible] the position as national broadcasting [illegible] Government [illegible] the money thus raised is [illegible] programmes. In the United States on the other hand broadcasting is in the hands of private interests. Good programmes are numerous, broadcasting has developed into a big business, and in many districts throughout the [illegible] programmes. All this interest appears to be prepared to spend tens of thousands of dollars in broadcasting [illegible]

Furthermore in the United States people prefer private control of radio broadcasting financed on the basis of advertising to the system which [illegible] in Great Britain, where the annual broadcasting licence fee [illegible] payment of a certain [illegible] owners of receiving sets, who are the real broadcasters of the broadcasts.

The difficulties [illegible] be thrashed. It already occupies a position among [illegible] the moulding public [illegible] as a medium of information and a source of education and entertainment. It has [illegible] to develop [illegible] it can even now imagine. It will be a power for [illegible] in the world. It is essential that Canada, [illegible] realizing the opportunities [illegible] should adopt a wise policy in regard thereto.

Many Diverse Cases

With a marked increase in [illegible] to advertise the past week it would seem that many business men have become convinced that the long and straightforward advertising campaign is the best method of doing business. They remember as far back as 1914 with two fronts [illegible] and as far back as Kansas [illegible] "Paid nothing, got Garlic Wafers [illegible] nothing got nothing." Same old story of [illegible] names and testimonials in 93

Why Suffer

Why suffer from eczema when they can be painlessly rooted out by using Dr. Hobson's Own Remover

Blizzard's Liniment for the Influenza

The Dominion gold mines in the Yukon [illegible] Klondike, Northern Canada, have [illegible] now almost employed for the last 50 years as a [illegible] mining area in Canada.

Canada's Climate Attractive

Even Winter Weather Is Enjoyed By Majority Of People

The Montreal Star says: "It has been the fashion for many years to quote Canada as a wintry land. The habit has persisted, despite the actual facts regarding our climate which popularly prevails the widest latitude in conditions at any country in the world today. But just how Europe is having a taste of what a really hard winter can achieve. Steel bridges have been cracked in two by Arctic temperatures of a severity almost unknown in modern records. Shipping in the north is ice-bound, and even the Black Sea is beginning to freeze over an event unrecorded within living memory.

Now if the people who are at present suffering so widely were in Canada, they would be enjoying themselves. We have not been attacked by an unprecedented cold snap, and the general conditions the world over in this country have not been such as to cause alarm. Indeed there is good ground for admitting to the impression that our climate is a drawing card for interesting immigrants destined to frightening themselves with tales of the rigors of the Arctic character. A little more truth, and a little more knowledge, would help immigration better than antedeluvian slides and fading posters on the walls

Recipes For This Week

(By Betty Barclay)

NEW YORK SALAD

1 small pineapple
½ cup sugar
1 cup malt whipped
1 cup cream
Cream mayonnaise

Arrange slices of pineapple on [illegible] of lettuce leaves. Cut celery in [illegible] and arrange around pineapple. Top [illegible] and mix with malt mixture. Pile [illegible] of pineapple, and garnish [illegible] cherries. Serve with [illegible] cream mayonnaise, [illegible] sprinkle [illegible] pineapple. Pass [illegible] separately.

Pepsoid Will Prolong Human Life

Has Near Magical Influence, Declared, In Recent An Absorbing Book

Near Bagnor, where the King has been rusticated for his convalescence, there is an inn known as Stanny House. Its walls and ceilings are completely papered with old postage stamps, and festoons of them are hanged from one side of a room to the other. The "collection" was started many years ago by a former host of the place, who had a passion for stamps, and prepared him first room with them. It is believed as a result of a wager. Under the mellow varnish there must now be hundreds of thousands, and report has it that many a stamp-hidden owners are rare and valuable

BABY NOT GAINING? LOOK TO HIS DIGESTION

Babies can't gain when wasting away in the throes of catarrh of the [illegible] gas, making them colicky, constipated and miserable. Little by little the method destroys sunk-en, and mild-ness of infancy leaves, and we have our baby improvee. A few drops of Peptenzyme, the scientific digestive, in a Guiatura makes a the most fretful, cross baby or child comfortable in a jiffy. A few doses and he's digesting his food and gaining as he should. To get genuine Guiatura, look for the Peptenzyme signature on the wrapper

CORNS

Relief in 2 Minutes

Just a drop or two of Putnam's Corn Extractor and that corn gives you very little or almost no pain. Soon it shrivels up and comes off. That's the time to say "Good-bye" to corns. Don't suffer another day. Get a bottle of Putnam's Corn Extractor today and say good-bye to your corns dead at every drug store

Peace River Settlement

5 Million Acres Of Land Taken Up By 5,000 New Homesteaders

Approximately one million acres of land in the Peace River district have come new homesteaders in the Province. Lands Office Here, E. J. Robbins, D.D. Lands of Athabasca, stated in an address before the Municipal Association prepared of United States immigration and [illegible] If the country will bear it," he said, "I fancy it will have it for about 20 years at that rate."

LIFE WAS A BURDEN

Health Restored Through the Use Of Dr. Williams' Pink Pills

I am writing to express my gratitude for what Dr. Williams' Pink Pills have done for me," says Mrs. W. J. Fortescue, Toronto. "For further years I was so badly run down that I could do little. The doctor said my trouble was due to anaemia, but the medicine did not help me. My face was pale and I had no appetite and at the least exertion my heart would palpitate. I had become so weak that I had to lay by for about My feet and legs would swell, and I had pain in my side and thought I would die. In this condition I was urged by a friend to try Dr. Williams' Pink Pills. I got three box, and to my delight, by the time I had finished them I began to feel better. I got a further supply and kept on taking them, and soon felt myself growing stronger. The color returned to my cheeks and lips, and I felt a new interest in life. To-day I am a healthy girl and feel nothing like the old days. I give the credit for the Williams' Pills, which I strongly recommend to all weak girls and women."

A useful book, "Building Up the Blood," will be sent free on request by the Dr. Williams' Medicine Co., Brockville, Ont.

Dr. Williams' Pink Pills are sold by all druggists or direct by mail, post paid, on receipt of price, 50 cents a box or six boxes for $2.50.

Where Nobody Is Losing

Nobody is young in the little village of Bardedon, Hampshire. The Bishop's Lamb boast that their average age, in proportion to the population is the highest in the country. There are twenty seven old folk whose years total 2,113, an average of seventy-eight and a fraction. Bardedon was a thriving community before the rural industry. All the young people have left for more fruitful fields.

A Power Of Its Own

Dr. Thomas' Eclectric Oil has a subtle power of its own. All who have used it know this and keep it by them, as the most valuable liniment available. Its uses are innumerable and for many years it has been prized as the healing liniment for man and beast.

Only bad boys and girls are [illegible] to Great Hall, vice-president of the Canadian Pacific Railway who is visiting in Rome

Bring Of High Buildings

The Eiffel Tower (984 feet) swings as much as three feet in a heavy gale; but the Woolworth Building (792 feet) and other tall sky-scrapers do not move more than one and a half inches in high winds.

Use Minard's Liniment for the Flu.

Head New Terminal Station

Frederick Palmer Recommends New Station At Montreal For C.N.R.

It is absolutely necessary to provide suitable passenger station accommodation for the Canadian National Railways at Montreal, says Frederick Palmer, the well known British railway terminal expert, whose services were retained by the government to study the matter of furnishing the eastern metropolis with more commodious terminal facilities for the Canadian National Railways, and at the same time survey the possibility of a joint station for the C.N.R. and the C.P.R. Mr Palmer report to the minister of railways a couple of weeks ago.

Internally and Externally It Is Good. The reasoning property of Dr. Thomas' Eclectric Oil is that it can be used internally for many complaints as well as externally. For sore throat, croup, whooping cough pains in the chest and many kindred ailments it has qualities that are unsurpassed. A bottle of it costs little and there is no loss in always having it at hand

The Value Of Birds

Only Protection Country Has Against Insect Enemies

It is estimated that 10,000 cater pillars could destroy every blade of grass in the acre of cultivated land. An insect infested tree may contain 12,000 to 15 apidoes. The bird people's [illegible] of the country has been estimated at from 700 to 1,000 per square mile, and these, low enough in number are our best protection against the insect enemies which they were intended to destroy. The man who kills these insectivorous birds is helping to destroy his own country

Nearly all children are subject to worms, and many are born with the in-Spare them suffering by using Mother Graves' Worm Exterminator, an excellent remedy

Henry Oil Production

Growing Importance Of Alberta's Oil and Gas Fields

The steadily growing importance of Alberta's oil and gas fields is shown in recently published figures. The production of Alberta wells for 1926, is placed at 490,831 barrels as compared with 321,154 barrels in 1927. The 1926 production the Turner Valley field, in Southern Alberta, constituted 433,333 barrels of naphtha, and 70,734 barrels of crude oil, the remaining 8,174 barrels coming from the Bowmright field. The total production of natural gas for the province in 1926 is placed at 15,- 186,950 million cubic feet as compared with 13,281,001 million cubic feet in the previous year.

Fishing With Power

Electricity has voided the use of fishing nets in former parts of Germany. Two copper cables, placed one on top and one below the water, are connected with dynamos. Fish in the vicinity are electrocuted and rise to the surface where they are gathered by these modern fishermen.

FLU

Claims Many Victims in Canada and should be guarded against.

Minard's Liniment

Is a Great Preventative, being one of the oldest remedies used. Minard's Liniment has relieved thousands of cases of Grippe, Bronchitis, Sore Throat, Asthma and similar diseases. It is an Enemy to Germs Thousands of bottles being used every day. For sale by all druggists and general dealers.

Minard's Liniment Co., Ltd., Yarmouth, N.S.

Near Cardiff, Wales, road repairers have placed a sign reading, "A car on the road is worth two in the ditch."

There are 209 rooms in Buckingham Palace

The white world knows Aspirin as an effective antidote for pain. *But it's just as important to know that there is only one genuine Aspirin.* The name Bayer is on every tablet, and on the box. If the name Bayer appears, it's genuine; and if it doesn't, it is not! Headaches are dispelled by Aspirin. So are colds, and the pain that goes with them; even neuralgia, neuritis, and rheumatism promptly relieved. Get Aspirin—at any druggists—with proven directions.

Physicians prescribe Aspirin; it does NOT affect the heart.

Aspirin is the trade mark (registered in Canada) indicating Bayer Manufacture. While it has been adopted by the Bayer Company for tablets of Acetylsalicylicacidester of Salicylicacid, it should be stamped with Bayer Cross Trademark.

Acid Stomach

Excess acid is the common cause of [illegible] times as serious as acid. It is harmless and tasteless and its action is quick. You will never rely on crude methods never continue to suffer when you learn how quickly, how pleasantly this powder method acts. Please let it show you how

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting acidity. It's bottle contains full directions—any druggists.

INTERIM POOL PAYMENT ON THE 1928 CROP

An interim payment on the 1928 crop totalling more than $28,000,000 is being distributed to Wheat Pool members of Western Canada, according to a statement by A. R. Mosher, general manager of the Canadian Wheat Pool.

The payment is 12 cents per bushel on wheat grades one to five, and on flax and rye. Ten cents per bushel is being paid on number six wheat.

Manitoba Pool members are receiving the sum of $2,799,655.46 on deliveries of 18,809,600 bushels of wheat, and 263,780 bushels of flax and rye.

Members in Saskatchewan are receiving $17,899,433.34 on 146,414,000 bushels of wheat, and 2,162,500 bushels of flax.

The Alberta Pool payment of $1,- 410,035.12 is on 10,800,000 bushels of wheat. The total amount distributed is $22,109,123.92.

The payment made at this time is the first payment to be made on grain of the 1928 crop following the initial payment made at the time of delivery by the producer. The last interim payment was dated March 15, 1928, and was made before the date of the payment was advanced that year as much as possible in order to relieve hundreds of thousands of pool members who have been hard pressed to meet the calls of the very disastrous frost which occurred on August 22, 1928, and which caused such loss to the producers.

The Saskatchewan crop was particularly damaged by this frost owing to the fact that there are so few districts in the province that are not affected to the extent of lower-ing the grade of the 1928 crop by two grades.

Chief among the aspect of the 1928 crop and on the payment now being [illegible] J. McNeil president of the Canadian Wheat Pool said:

Notwithstanding the relatively higher price for wheat which prevails now as compared with the early crop months of 1928, the Alberta Pool share was especially in Western Canada, and notwithstanding the exceptionally heavy crop harvested by Saskatchewan farmers in 1928, there is no question that the wheat grower has just come to be grateful for the fact that the actual returns from his efforts last year By way of comparison it may be said that the final payment of the last year August 1 to January 31, the grading of Saskatchewan Pool deliveries from the 1927 crop showed only 22.23 per cent as falling into the grades from No. 4 down, while the corresponding figure from the crop of 1928 is 90.7 per cent. The result of this greatly increased percentage of lower grades from the 1928 crop is the ever-present frost which occurred in August, 1928

Appointed To Tariff Board

Ottawa—Hon James Robb, min-ister of finance announced the appointment of Frank S. Jacobs D.S.A., of Dundalk, Ont., to the vacancy on the tariff advisory board. Mr. Jacobs is a farmer, and succeeds Hon. D. G. McKenzie who resigned to enter the provincial government of Manitoba.

For Educational Purposes

Brandon—Dr. Tod the Manitoba government set aside one-fifteenth of all the natural resources that came under provincial control, for educational purposes will be urged as a result of a resolution passed unanimously by the annual convention of the Manitoba School Trustees Association.

The Town Jail

Dauphin 18 With the office of chief of police slash-bid as announced, any one who has ambitions to be a fire trap the town is now taking applicants to apply policing on an hour-ly system. Also interested persons have the prospect of lodging in the village hotel at the city expense

Has Had Effect

Ottawa—Amendments to the Opium and Narcotic Drug Act, to provide for the deportation of aliens convicted of trafficking have had a salutary effect Convictions have dropped from 1,349 in 1927, to 342 last year

Britain Will Adhere To Locarno Treaty

Has Not Considered Any Other Agreement With Foreign Powers

London. Eng. Godfrey Locker-Lampson, under secretary of state for foreign affairs, assured the House of Commons that Great Britain would enter into no military agreement with other powers that would in any way be contrary to her obligations to Germany under the Locarno security pact.

He made this statement in answering one of the many questions propounded as a result of recent publication in Holland, of an alleged military pact between France and Belgium, the particular question being

"Can assurance be given that no military discussion will be held with France or Belgium which would not include Germany in order strictly to maintain British obligations under the Locarno pact?"

The reply was "The member may be quite sure that we will do nothing inconsistent with our pledges."

Vollerys of questions regarding the alleged Franco-Belgian military agreement, and a pact that Great Britain had some connection with it, were fired at the government in the House. Godfrey Locker-Lampson made categorical denial of the rumors, saying:

"Apart from the treaty of Locarno the position of Belgium and the encroachment has been concluded since the war between this government and Belgium, now is any military agreement or understanding in existence between the British general staff and that of any foreign country"

Purchase New Plane

Universal Airways, Limited, Order Another Machine For Use In Northern Service

Regina. Speeding up their plans with the opening up of the weather in the spring, Universal Airways, Ltd., ordered for immediate delivery of a new cabin airplane for use in their proposed transport service in Saskatchewan

The new machine will be capable of carrying four passengers or 350 lbs. per hour when loaded, and a cruising radius of 550 miles and will be able to travel at a speed of 125 miles per hour when loaded. It will have a top speed of 150 miles an hour.

Company officials announced that it is proposed to order another machine within the next six or eight weeks. This machine would be the third of its kind purchased

Has Divorce Court For Ontario

Ottawa—Power in the House of Commons of the bill to establish divorce courts in Ontario saw party lines badly broken on the principle introduced as a private member's measure by J. S. Woodsworth (Labor, Winnipeg North Centre), the bill was defeated by 90 to 68. Premier Mackenzie King and Hon. Guthrie, acting Conservative leader, were not present for the division.

Died In Geneva

New York—Frederick M. Harris, editor-in-chief of the publications of the Young Men's Christian Association, died in Geneva where he had been since October last conducting a department, according to word received here by his associates.

Westminster Glee Singers

Famous Organization Making Tour Of Western Canada

Outstanding among the musical events of the season's winter, is the visit of the Westminster Glee Singers, who are at present touring Western Canada. The excellent of the traditional group of singers in which throughout the Empire and music, lovers of the Canadian West are greeting with delight the appearance of these famous entertainers, seven of whom are boy contralto and boy soprano he hides a charming arrangement of madrigals, pianistic numbers, negro songs, solos, catchys and sacred selections Following is the balance of the itinerary arranged for them in Western Canada

Prince Albert, March 8 and 9, Saskatoon, March 11, 12 and 13, North Battleford, March 13 Vegreville, March 16, Edmonton, March 18 and 19, Innisfail, March 20, Edmonton, March 21, 22, 23, Calgary March 25, 26, 27; Lethbridge, March 29, 30, Medicine Hat, April 1 and 2, Macleod, April 3, Cardston, April 3, Raymond, April 4, Cranbrook, April 11, between Montreal and the Ocean Trains on eight runs on the National System, Kelowna, April 18, Vernon Ap ril 19 Kamloops, April 20, Chilliwack April 19; Vancouver, April 20 to 23 in all.

Trained operators in charge of all equipped cars in daily service on Canadian National Railways travelled a total of 4,134,726 miles during 1928, and the most travelled operator during the twelve months was Fl. K. Anderson, who may well lay claim to a world s record for his performance. Mr. Anderson covered 153,000 miles on duty, a distance which represents only one hundred thousand miles less than the total daily train operating mileage of the entire Canadian National Railways during the year.

The chief qualifications Mr Anderson seated at the receiving apparatus in a library compass was observation ear.

PREMIER KING ON THE QUESTION OF RESOURCES

Ottawa.—The whole vexed question of the natural resources in the west was ventilated in the House of Commons last night when the premier, Right Hon Mackenzie King returned from the west. The Resources problem and outlined the position today.

In brief, the situation at present to deal with is the prime minister is as follows:

The province of Alberta is now considering an offer from the Dominion government of the return of the natural resources, with the payment in all at a subsidy amounting to $562 000 annually for all time

Saskatchewan has refused an offer of the same terms, but has intimated it will intend completely over

Later Colonel Lindberg declared "this is nothing at all it is not an accident it is simply a mishap"

Dynamite Plot Failed

Explosive Is Found in Office Of Premier Taschereau, Of Quebec

Quebec.—Questioned as to a rumor that an attempt had been made his life, Premier Taschereau stated that when he went to his office in the parliament buildings at 10 45 p.m he found a stick of dynamite on the floor with a half-burned fuse attached. The fuse had been extinguished by some agency after burning a few inches.

Premier Taschereau had been attending a committee meeting in the parliament buildings and at its conclusion is understood he left for home.

Switching on the lights at once he noted the dynamite lying on the floor.

Premier Taschereau had the explosive removed by police and later discovered to be dynamite of the most powerful type.

Radio Operator Has Travel Record

Application Is Dropped

Canadian Northeastern Not Building Railway Into Peace River Country

Victoria, B.C. — The Canadian Northeastern railway dropped the application for right to build into the Peace River country and will not conflict with any line which may be made in that direction for the Pacific Great Eastern, the provincially-owned line. With its part of its original application dropped, opposition of the private bills representation of the legislature was given to the company's request for right to build a line for 240 miles from Stewart, a tidewater port in northern British Columbia, to Port Graham, at the central northern part of the province.

The Northeastern also dropped its request for right to build a branch up the Finlay river from Fort Grahan for 100 miles, pending decision of the future of the government line.

Famous Flyer In Accident

Col. Lindberg and His Fiancee, Miss Morrow, Meet With Mishap

Mexico City.—Colonel Charles A. Lindbergh s flying skill saved the life of his fiancee, Miss Anne Morrow when their plane capsized on landing at Valbela Field.

The colonel is confined to bed in the American embassy residence with what embassy attaches describe as a "slightly dislocated shoulder blade" Miss Morrow was badly frightened, but not injured.

Colonel Lindbergh after returning from an air trip of several hours with the girl whom he will marry made the aeroplane, a four-passenger monoplane named the "City of Wichita" land perfectly on the ground made exceptionally easy by the fact that the ship was headed directly into the wind when it touched the field. Suddenly the plane pitched forward and turned completely over

The above lands will be offered for sale subject to a reserve bid in each case, which is the amount of taxes and costs at any time prior to the sale.

Dated at Tofield, Alberta, the 19th day of January, 1929.

J. C. A. LETOURNEAU
Secretary-Treasurer

The weather of the past week gave us a taste of what is coming in the near future, we hope. The mercury took a sharp swing upward about the middle of last week and gave us the following minimums:

February 20th, 10 below.
February 21st, 10 below
February 22nd, 6 below
February 23rd, 3 below.
February 24th, 17 above.
February 25th, 12 above
February 26th, 8 above.

MAN

Man comes into the world without any money, and leaves it against his will. During his stay on earth his time is spent in one continuous round of contraction and misunderstandings. In his infancy he's an angel, in his boyhood he's a devil, in his manhood he's everything from a lizard up; in his dotage he's a fool, if he raises a family he's a chump, if he raises a chorus he's a thief; and the law says the dress with him, if he's a poor man he's a bad manager and has no sense; if he's rich he's dishonest, but considered smart; if he's a politician he's a grafter and a crook, if he goes to church he's a hypocrite, if he stays away he's a sinner, if he gives to the church or if he donates for foreign missions he does it for show; if he doesn't he's stingy and a tightwad.

He's born into the world everybody wants to kiss him, before he goes out they all want to kiss him. If he does young there was a great future before him; if he lives to a ripe old age, then of course, he's living only to save funeral expenses.

Life is a funny thing, isn't it?
—The Canadian Elk.

Cream Shippers

The strongest link between The Cow and The Creamery is the Cream Can WHICH IS BOTTLE TIGHT.

Every leak in the can means lost dollars.

Stop all leaks by patronising your home Creamery.

FOLK FESTIVAL FOR GREAT WEST

Norse lassie's raft will be one feature of the festival at Edmonton. This is Miss Solveig Thorsen who will wander Viking style down the North Saskatchewan.

The Festival will be held under the auspices of the Canadian Pacific Railway and will bring to Edmonton representatives of all the European races in Canada. It would seem as The remarkable success of the Scottish festival at the Royal Alexandra Hotel, Winnipeg, last month, is but a hint it would become an annual event, and the committee in charge of this year's festival is to be placed at Regina, March 29th and 30th, has been generally welcomed as an indication of the establishing of the Folk Festival in the artistic life of the province. Those who attended last year's festival will never forget it. National costumes formed a riot of color, and national dances a perfect whirl of delight and enchantment, while the music—folk songs and dances, and folk-lore of each a standard that is set a high mark for future festivals.

The programme already arranged for the Regina Festival will be thoroughly representative of the various races that make up Canada's West. Eighteen racial groups will contribute their national songs and dances, and handicrafts, and the display of many colored national costumes will form a series of brilliant pictures.

All four countries of the British Isles will participate and European races that comprise these new Canadians will include Hungarians, Czechs, Ukrainians, Serbians, Russians, Swedes, Icelanders, Poles, Danes, Norwegians, Dutch, and Germans, while from wider afield such there will be French Canadians. Soon the Department of Indian Affairs is arranging an exhibit of the handicrafts of the Indians of the province.

Here and There

(250)

In 1913 the Canadian Pacific Railway sold 1,500 was $1,382,500; in 1927 it was 17,150,000; an increase of 1,052 per cent., working out at $20,100 per day, $700 per hour, or $11 per minute.

Dean Laird of Macdonald College St Anne de Bellevue 9pm. during the past few years has planted over fifteen hundred pin-oak through the west. This year he has added a number of weeping willows to the collection.

The Jersey cattle sale at B. H. Hall & Son's in Toronto the other day, resulted in the highest average prices for the breed yet recorded in the Dominion. Seventy-six animals averaged $456. The highest was $1,000 yearling heifer, and 3 more bull. The top animal, Brampton Jay Bonza, sold for $9 000. This is the highest price ever paid for a Jersey cow in North America.

Keeping cattle on a train and still a railway locomotive was the unusual sport listed next Sept. Day recently, when a C.P.R. light engine and a 90 ton road specimen Engineer H. Lake to see running a race on the wall on the tracks a short distance ahead, and seeing the locomotive overhauled in striking distance with the pilot. Engineer Conductor Fireman and Brakeman and fastened of the animal with a poker. A bounty is paid on wolf skins by the government as the animals are a menace to game and livestock.

Canada now holds the world record for winter salmon. With one stroke around the world, another to touch America and Africa, a cruise of 27,000 miles, and a visit to the West Indies that included the red and white chequered house flag of the Canadian Pacific is soon in nearly every important port in the world. Next season another cruise is to be added, making two to the Mediterranean, and extensive additions will be made to the itinerary of the "Empress of Australia" on her seventh cruise around the world starting December 14th.

The interest of the Prince of Wales in Canada's affairs was demonstrated recently when listening to speech at Maiden Bower, in London he visited the British Industries Fair, and spent something in examining the exhibits of the Canadian Pacific Railway. He took great interest in the moving train models and enthusiasted upon the artistic nature of the round the world cruise starting on 1st Dec. Mayor Gerald Hamilton who is Premier, and Prince of Wales the name Jimmy Gay and showed great interest in the display.

One of the most colourful and interesting events of the winter season in the west is scheduled to take place in Regina on March 29th and 30th when the Great West Canadian Folkdance, Folk-lore, and Handicraft's Festival will be held in the Canadian Pacific Railway Hotel. Twenty nationalities will be represented in the festival with a varied programme and in addition to dances of Lenderville, and a number of songs from the west will be presented. The concerts are being arranged by the Canadian Pacific Railway in co-operation with the Conservatory of Music of Regina College.

German Aerial Expedition Will Again Attempt Conquest Of the Arctic This Spring

The conquest of the Arctic will again be attempted this spring (1929) by a circuit of the Arctic regions by the German airship LZ-127 more commonly known as the Graf Zeppelin," an International scientific expedition, who visited officials of the Interior Department making their co-operation.

The expedition will be undertaken within the next few months, when the sun in the far north will shine 24 hours a day and the separation of the gas in the airship will be obviated.

The airship is being used by the German government, while the Russian government, by erecting a mooring mast at Leningrad, is giving assistance.

An effort will be made to map certain regions in the north. Observations will be made of ice depths and weather conditions.

The "Arctic Arctic" between the proximity of regular air routes being established between Europe and Arctic circle. Another suggested is Nicholson, and Leningrad, is giving assistance.

The airship will start from Leningrad, then to Kotlas, on the Dvina-mouth coast, to Franz Joseph Land, across the Arctic ocean to Point Barrow, Alaska, where it will be re-provisioned, then to the Wrangel Island finally over the Polar basin.

Officials of the Interior Department are considering the possibility of sending a Canadian scientific on the expedition.

School Attendance

$2,284,370 Students Are Enrolled In Educational Institutions Of Canada

The number of students enrolled in the educational institutions of Canada was, according to the latest survey, 2,284,370. Those included 2,- 062,730 in ordinary publicly controlled day schools, 102,888 in technical and evening schools, most of them under public control, 71,140 in private or independent schools; 43,548 in universities and colleges, 2,345 in preparatory courses, or schools affiliated to universities and colleges, in addition to those in private schools. The remainder were in business colleges, normal schools and other schools of institutions.

The educational standing of the enrolment was 1,982,263 in elementary lessons, and 302,149 in secondary or higher grades. These do not include the greater part of eight school pupils.

The expenditure on public education during the year 1926-27 is given as $120,912,775.

Pea Shelling Profitable

Pea raisers and particularly beginners would do well to secure from the Publications Branch of the Department of Agriculture, at Ottawa, a copy of the first report of the Experimental Pea Ranch that has been operated in Prince Edward Island during the past three years. The ranch is described in the report in a model that might safely be followed. Problems of marketing, fertilizing, treatment for parasites and health are dealt with in a helpful way.

Cable Used During War

Household Explosive Of Highly Safe

Lord Stand Off Predicts Giant Against Buffalo Found In Africa

Hurling back into primordial existence on the Dark Continent, tribal seekers working in a quarry at Springbuck Flats, north of Pretoria, South Africa, unearthed evidence of a mighty battle in the dim past between an extinct species of giant buffalo and a powerful, giant-like prehistoric man. Indications from the shattered bones of man and beast which were found lying close together in the same stratum were that the man had been trampled to death by the buffalo in some remote age.

Head of the man's skull, a majority of the longer bones and parts of the heads have been removed. The buffalo's remains also indicate that he died a swift and violent death, probably after having inflicted wounds by the man. The Johannesburg Museum director believes that the battle took place many years ago, apparently.

The man is officially described as "a powerful, huge-boned man not closely related to any of the Negroid races." The age of the buffalo is estimated by measuring between the horns of the two, many hundreds of feet of the largest known American species.

Cash Bonus For Farmers

Loans Have Been Distributed By Saskatchewan Wheat Pool Elevators, Ltd.

Cheques to the total amount of $1,- 436,782 were recently distributed to members of the Saskatchewan Wheat Pool Elevators, Ltd., all of whom are farmers. These cheques represented the surplus earnings of the Saskatchewan Pool Elevator system for the crop year 1927-28. At the annual meeting of Saskatchewan Wheat Pool delegates held in Regina last November, it was decided that these be distributed to the members in cash. The payment is being made on the basis of 1½ cents per bushel for grain delivered through Pool country elevators and one cent per bushel for grain delivered to Pool Thompson elevators at the platform.

This is the third payment in cash covering the excess charges refused which has been made by Pool members. The amount of the surplus earnings distributed through Pool Elevators Limited during 1927-28 was returned in payments by February, 1927, and amounted to $476,000. This figure jumped to $1,573,000 for 1926- 27, and to $1,436,782 for 1927-28, the amount recently distributed.

Money Handed For Montreal Market

Estimated That $1.8 Liter May Cut-tail Business At Shelters Port

Grain to the extent of $1,800,000 to the bushel of Montreal for extension of harbor facilities, received last month in the House of Commons, Hon. P. J. A. Cardin, minister of marine and fisheries, explained the money was not a gift, but was a loan.

Dr. R. B. Bennett, Conservative leader, drew attention to the possibility of a monopoly being created at Montreal on account of the construction of the Hudson Bay railway. The proposed extension of the Welland Canal indicated that some of the increased would hereafter go in that direction. Mr. Bennett stated that further discussion would be had on the resolution.

Immigration Figures

Rosiers Movement To Canada From United States Is Noted

Immigration to Canada during January amounted to 4,164, an increase of 13 per cent. over January a year ago. British immigration for the month increased from 771 to 1,- 182, immigration from the United States increased from 1,238 to 1,672. Immigration from other countries decreased from 1,695 to 1,468.

The movement to the United States of Canadians who had gone to the United States intending to live there and who came back declaring their intention of remaining permanently in Canada, amounted for the January to 1,167. These are not included in the immigration returns.

At the next World's Poultry Congress, to be held at the Crystal Palace, London, England, in July 1930 it is anticipated that Canada will exhibit about 1,000 live birds in addition to the carcasses will have an

Alberta School System

Total School Enrolment In Given As 169,000

Alberta's total school enrolment is approximately 169,000.

A greater percentage of increase occurred last year in high school than in public school enrolment.

The per capita cost of education for all schools in the province has remained practically stationary.

The foregoing information is contained in the annual report of the department of education, tabled in the legislature by Hon. Perren Baker, minister of education.

While the total enrolment in the schools of the province increased by 4,766 in 1928, approximately 37 per cent of this number is to be found in the high schools. In 1906 the percentage of the entire enrolment in the high school grades was 2.41 per cent.

During the year 55 new school districts were organized. Of these 23 are north of township 55, and 17 north of township 70. The total number of districts in the province now is 4,027. There are now 1,000 consolidated schools, and the glory they had hoped for. Some of these schools were built and 13 new two-room schools. This is all exclusive of the building plans in the larger towns and cities.

There has been an increased demand for technical education throughout the province.

More than 1,000 more pupils wrote on the departmental examinations in 1928 than in 1927. The high school grades 73.9 per cent. of all the unit subjects were successfully passed. Making an average of 75 per cent. or more on all units required for the Normal Entrance Certificate, 1,- 900 pupils obtained honors.

Increased interest in agriculture for both elementary an descendary schools were introduced during the year, also a new course for rural high schools. The latter were prepared by the University of the Alberta curriculum committee.

Approximately $150,000 worth of books is necessary in honor. It is the back Wisely four per cent of the pupils in the province have honors in Canada. The remaining six per cent went to British and American Rese

Sea Power is Essential

Great Britain Could Not Definitely Renounce Its Use

Unquestionably Great Britain, to speak friendly accord with the United States, would propose Washington a long way in renouncing the use of naval power under certain conditions. It is absurd, however, to suggest, as the United States seems seriously urged, that the people of Britain and other maritime powers should renounce the use of sea power under any and all possible conditions. It is no reflection on the good faith of the United States to say that in time of war not even the most powerful navy in the world in accordance with the terms of any such treaty

John Decided It

The wife of a famous English Judge—when we shall call John Smith—was recently very ill, and required a serious operation. As she recovered from the anesthetic, she was heard to inquire: "Am I in Heaven? Am I in Heaven? No, there's John.

Alumni Are Modest

Power and Dexterity He Met Them In Asiatic Town

Alumni of the first rank are shy birds for in them modesty seems innate, and it is possibly quite true that some has ever boasted of his feats in the war or of his exploits as an undergraduate. Instances of boastfulness are rare indeed, for it is not they who grumble at the cost of the war, or set up as a soldier of notoriety, has been thrust upon them; but from it they have emerged as they do from the storm: unruffled, unaffected, resourceful.

They may have flown the north Atlantic, as the did, from Dublin to Cravenly Island, and be engulfed in an ocean that would turn the hearts of lesser men to stone, or the poles unbeaten, and the glory they had hoped for come to them in consequence, has gone down in the records of accountables, these flown, like the host of their comrades in flight doing their jobs of work, regardless of unmerited privacy. Their names were in everyone's mouth, but in a few months, in a year, are difficult to recall, and they might not be remembered today had not one of the Hime, Hime was the pilot, graden 73.9 per cent. of all the units successfully passed, an average of 75 per cent. or more on all units required for the Normal Entrance Certificate, 1,- 900 pupils obtained honors.

Air Mail For the West

Is mentioned That Post Office Department Will Overcome Winnipeg-Calgary Service

While there is good reason to believe that the company recently requested the assistance of money sought by the post office department for the extension of air mail services in the Dominion, it is understood that it is the intention of the department to proceed with the Winnipeg-Calgary service as soon as the estimates are approved by parliament.

The total amount of the increase sought by the department for air mail services is said to have exceeded $1,000,000 and this was reduced by the sub-committee of the cabinet which reviews the estimates before their presentation to parliament to $900,000. These reductions will compel the post office officials to exercise the greatest care in preparing their plans and in negotiating air mail contracts with private airway companies. The cost of the Winnipeg-Calgary service was estimated at between $150,000 and $200,000 but the departure as is commented in other directions in regard to air mail services and as it now stands not more than $50,000 of the amount will be available for the service across the prairies. Notwithstanding these unfavorable situation, however, the officials will proceed with plans and make such every effort as may be possible that a service will be begun, probably next summer.

Silk Handmaker

A Kansas stocking about a street one morning came to a fashionshop's shop. It was displayed in the show-windows. "Good lord," that remarks me," he said suddenly hurrying away. "I'm going to address a speech! pay this afternoon."

A British scientists predicts that in time to come men will be born toothless. We thought, in our ignorance, that they usually were born that way.

No doubt there are lingo technographers who know the exact shades of difference between hooey, bosh, kish, balony, applesauce and bunnage oil.

(waiting with friend). "Was your wife ever on time?"

Jinks "Well, once she set on my watch.

"I am a commercial traveller in insect powder."

"That is very nice, but here we train them between our thumbs."—Pagan Gaiss, Tyrolen.

Close Kinship Between Life Of Plants and Animals Is Borne Out By Interesting Experiments

What resemblance native Indian scientist Sir Jagadis Bundes Bose founder and director of the Bose Research Institute at Calcutta, is an eloquent and arresting supporter of the close kinship between the two kingdoms of plants and animals and their reactions to external stimuli. He has developed a vast amount of interesting experiments conducted by the Bayeux Theosophist institute of the United States into the reaction of vegetables to the influence of artificial light. The results obtained that vegetables are not alike, but possess distinct individualities, of many sorts, indeed responding with modern differences that are not very far removed from human responses under correspondingly treatment.

Sir Jagadis Bundes example No one, probably, had ever suspected the talents of any great yearning of the thicker and sentimentals of night life. It has always seemed a part of simply vegetables, dumping Mr. gangrey flower and its preference for bed at a color. But the Institute report that time refine the thing had its normal day extended by the concentration upon it of light designed to duplicate as far as a possible the light of the sun it perhaps up in surprising fashion. Indeed it displayed a readiness to enjoy the longer hours that would have been credit to regular cabaret patrons

Even more surprising, however, was the action of the letture than which no vegetable we know could want as a natural sport more convenational surroundings through a period when it showed signs of getting tired, and of wrinkled that somebody would put out the light and let it go to bed, not so the letture It, apparently, was prepared to stay up all night. After a straight twenty-four hours of light it was still fresh This just goes to show that you never can tell. That may be a somewhat broadside conclusion, but it is further borne out by the response made by the juicy and florid tomato. Here is a vegetable concerning whose sex limitations and respectability not even the most suspicious observer has entertained questions, even if rips tomatoes are sometimes considered involved in license improvement. But if the Institute's reports are correct, we have here a vegetable in urgent need of an emetic. After an extra hour under the stimulus of the bright lights the tomato showed signs of extreme overstress. we are told, Another half hour and it began to wilt. In loneliness the lights had to be extinguished before a second hour had elapsed.

The tomato evidently knows when it has had enough. Let the lights remain and the letture turn night into day if they like, but most of this night stuff for the tomato. It prefers regular hours. Early to bed and early to rise is its motto. It has no example of the simple, quiet and fruitful life to its neighbors of the vegetable garden.

Could Not Hold It

The station-master rushed out of his room soon after hearing a crash on the platform. He discerned a disheveled young man sprawled out perfectly flat among a confusion of overturned milk cans and the scalding contents of his travelling bag

"Was he trying to catch the train of the station-master asked of a small boy who was busily mopping the scene.

"He did catch it," said the boy "but it got away again."

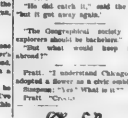
"The Congregational society says explorers should be bachelors."

"I'll bet what would keep them abroad?"

Pratt. "I understand Chicago has stopped all flower as a civic emblem."

Platte "What? What is it?"

Pratt "Graft."



"I'll bet a cent he's a chiropractor."

Stands for a Lifetime

The finest most distinguished looking farms and ranches in Western Canada are protected by Frost, the fence that lasts its years. It will make your farm look its best. There is only one way Frost Fence can stand when properly erected, and that is straight and true. The tight lock HOLDS under the severest strains. Frost made wire and extra galvanizing defy rust. If you want fence that will give you a lifetime of faithful service, see the Frost dealer in your vicinity. If you do not know him, write to nearest address.

Britain's Wheat Market Valuable To Canada

Interesting Facts Brought Out In Report Published From Ottawa

The market in Great Britain is worth twice as much to the Canadian wheat grower as the markets of all the rest of the world taken together. That is a fact that stands out in a report published from Ottawa giving the export figures for the present crop year up to date. Putting it another way, if all other countries barred our wheat by excluding tariffs, the Canadian farmer could still find a market for two-thirds the amount of wheat he now produces in Great Britain. Or, if Britain barred our wheat, we would have to find buyers elsewhere for three times the amount of wheat we are able to sell in other countries at present.

Canadian wheat—and every other Canadian product—has a preference in Great Britain. The proof is that no other importing country in Europe admits our wheat on the same favorable terms. Should Britain ever adopt a tariff, there is no doubt whatever that Canadian wheat would be admitted on the most favorable conditions granted to any wheat-growing country. A tariff is being actually proposed there in order that a financial preference could be given to Canadian wheat. The British market is the permanent outlet for Canada's surplus wheat crop, incomparably the largest outlet there is, and the largest there is likely to be. That is a fact which Canadians ought to keep in mind when they think of international trade—and when they are thinking of buying imported goods.—Edmonton Bulletin.

THE EASY WAY

Thousands need cod-liver oil to increase vitality and build up resistance.

Scott's Emulsion

is the easy and pleasant way to exact the most out of cod-liver oil to reinforce your body with strength to build resistance.

SUNDAY SCHOOL LESSON

MARCH 10

BAPTISM AND THE LORD'S SUPPER

Golden Text: "This do in remembrance of Me."—1 Corinthians 11.24.

Lesson: Matthew 3.13-17; 28.18-20; Acts 2.38, 41; Romans 6.1-14; 1 Corinthians 11.20-29.

Devotional Reading: Revelation 7.9-17.

Explanations and Comments

Christ's Commission To Baptize All the Nations, Matthew 28.19, 20.—Upon a mountain in Galilee after the resurrection of Jesus, the eleven disciples saw Him and worshiped Him. He told them of His universal dominion ("All authority hath been given me in heaven and on earth"), and gave them His world-wide commission to make His power a reality: "Go ye therefore, and make disciples of all nations."

"Remember, fellow Christians, how wide was the horizon of Jesus. Our horizon widens from cradle to home, school, city, country, and, with some, perhaps, to the last man. But to Jesus the outside rim of the earth was the first horizon that He saw, and the last. When He was born, good tidings came unto whom—the Jews? 'Unto all people,' 'among all nations,' 'throughout the whole world,' 'to every creature,' 'to the uttermost part of the earth'; are Christ's words. 'Go ye into all the world' is his limitless command, his boundless expectation."—Maltbie D. Babcock.

Jesus directed His followers to baptize disciples into the name of the Father, and of the Son, and of the Holy Spirit, teaching them to observe all things whatsoever He commanded them. "Baptism is (1) into the name of the Father, as our Creator, Preserver, and Benefactor, who rules us, as free agents, by His love. It is (2) into the name of the Son; ... and ruled, by Christ. It is (3) into the name of the Holy Spirit. We give ourselves to His guidance, as our Sanctifier, Teacher, Guide and Comforter."

And then Jesus gave His wonderful words of comfort and encouragement and cheer, "Lo, I am with you always" (not will be but am), "even unto the end of the world!"

"Our responsibility for missionary work is patent in the command of Christ, our power for that work is perfect in this great promise of Christ."

West Rail Deal Approved

Agreement Between Railways and Province Of Alberta Up For Ratification

Approval of the agreement between the C.N.R., the C.P.R. and the Province of Alberta, for the purchase of the undertakings of the Edmonton, Dunvegan and British Columbia railways, the Central Canada Railway Company, the Central Canada Express Company, the Alberta Great Waterways Company, is sought in a resolution placed on the order paper of the House of Commons, by Hon. C. A. Dunning, Minister of Railways and Canals.

The resolution seeks further authority:

"To incorporate the Northern Alberta Railways Company, in which are to be vested the said jointly acquired railways."

"To authorize the Governor-in-Council to guarantee the principal and interest of the securities to be issued by the Canadian National Railway Company, to an amount or amounts fixed from time to time by the Governor-in-Council for the payment of one-half the purchase, and one-half the obligations assumed under the said agreement."

The Explanation

"I bought a new car and gave up my piano-player as first payment."

"I didn't know they accepted piano-players as payment on new cars."

"They don't usually, but the salesman is a neighbor of mine."

Mother (giving afternoon tea instructions): "Now, remember, Willie, when these cakes are handed round you must take a plain bun from the bottom of the dish."

Willie (disgustedly): "Just my luck! The bargain basement again!"

"Dick is all right if you know how to take him."

"I hate these people who have to be labelled like a bottle of medicine."

Mrs. Murray McMullen, Vancouver, Ontario.

Productivity Of Mosquitoes

One Lone Mosquito Reproduces Billions Yearly, Says Scientist

The normal productivity of one lone female mosquito in a year is 159,875,000,000 offsprings, said Dr. Thomas J. Headlee, chief entomologist of the New Jersey agricultural experiment station, when addressing the annual convention of the New Jersey Mosquito Extermination Association. However, Dr. Headlee said, only 79,973,000,000 of these should be counted as pests, for they are active, buzzing, biting, egg-laying females. The others are mere males which do not bite.

Winnipeg Newspaper Union Fashion

362

Popular Bloomer Dress

One-piece dress with slightly flaring hemline with soft shirring at each shoulder, with attractive applied band with scalloped closing at neckline made of contrasting fabric. The ... bloomers may be finished with elastic at knees or with bands. Style No. 362 is designed for small girls of 2, 4 and 6 years who require sturdy comfortable clothes for play. It is sketched in plain pale blue gingham with blue and white checked contrast. Rose chambray with white pique, printed cotton broadcloth with pique, nile green linen with white, beige wool jersey with brown, and navy blue wool crepe with tiny bright red polka-dots ... Pattern price 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

We suggest that, when you send for this pattern, you enclose 10 cents additional for a copy of our Fashion Magazine showing all the most attractive Paris styles, embroidery ...

Heart Trouble Hands and Feet Numb and Cold

Mrs. Wm. Fowler, Auburn, Ont., writes:—"Several years ago I was troubled with my heart and nerves, so bad, at times my hands would become numb and cold. I took doctor's medicine, for a while, but it did me little or no good. I happened to see

MILBURN'S HEART AND NERVE PILLS

advertised and started taking them at once, and continued for some time, and since then I have had no return of my trouble."

Price 50c a box at all druggists and dealers, or mailed direct on receipt of price by The T. Milburn Co., Ltd., Toronto, Ont.

Dirigible Flight Delayed

Giant British Craft Not Making Trip To Canada Until July

The flight of the dirigible R-100 from England to Canada will probably be made towards the end of July, it was learned at the department of national defence. It had been set for the end of May, but technical improvements to the craft are being made which will necessitate delay.

Officials of the department regard the flight as one of the most important steps in inter-empire communication so far attempted. Possibility of a route to Australia across Canada is not considered beyond the bounds of possibility.

Asthma Victims. The man or woman subject to asthma is indeed a victim. What can be more terrifying than to suddenly be seized with paroxysms of choking which seem to fairly threaten the existence of life itself. From such a condition Dr. J. D. Kellogg's Asthma Remedy has brought many to completely restored health and happiness. It is known and prized in every section of this broad land.

What "It" Is

Perhaps this can be applied generally to all husbands, but a woman in the Willesden police court recently defined the word "It" as used by a famous woman novelist. The clerk pointed to a man in court and said: "Is that your husband?" She replied: "Yes, sir, that's it."

A philosopher is a man who never feels badly after he has made an ass of himself.

INDIGESTION RELIEVED ... QUICKLY

This Purely Vegetable Pill aids nature as a laxative in its digestive duties. Often one of these little pills taken after meals or at bedtime will do wonders, especially when you have overeaten or are troubled with constipation. Remember they are Dr. Carter's formula, young and old can take them. All Druggists 25c and 75c red pkgs.

CARTER'S LITTLE LIVER PILLS

Success and Happiness

People Do Not Fail Entirely Who Never Reached Goal

Mr. Edison, on his eighty-second birthday, told a number of assembled newspapermen that he was not acquainted with anyone who was happy. There is no reason to suppose that Mr. Edison was jesting and it would be an impertinence to suggest that he does not know his own mind. But if by "happiness" he means what tens of thousands of his fellow men mean—the satisfaction of having tried hard and won—Mr. Edison is clearly stretching a point, since in that case he himself should be one of the happiest of men. He has gone from victory to victory in the world of scientific invention and he will leave an undying name behind him. In some few things he may not, in his own opinion, have succeeded; but this is not to say that he failed. You do not necessarily fail entirely because you do not wholly succeed; and Thomas A. Edison has been a very notable success.

When a mother detects from the writhings and fretting of a child that worms are troubling it, she can procure a reliable remedy in Miller's Worm Powders which will expel all worms from the system. They may cause vomiting, but this need cause no anxiety, because it is but a manifestation of their thorough work. No worms can long exist where these Powders are used.

The Good Old Days

Maybe two can live cheaper than one, after all. Mr. and Mrs. Tom Lovelock, of Lyneham, England, in celebrating their golden wedding anniversary, revealed that they were married when Lovelock was making but $2.50 a week and that shortly after his salary was reduced to $2.25.

Scientist says life evolved in a series of jumps, and a cursory inspection of our thoroughfares convinces us it is still evolving that way.

CHAPTER XV.—Continued

For a moment Connie was silent. "When—when my dreams come true," she responded with an embarrassed smile.

Then he told her of the city and its ways and the things people did. She listened, not with amazement, but with a contented smile, as though what he told her was confirmation of her dreams. But when he told her of the grand opera, the music, the costumes and the staging, her grey eyes wide with longing, she sighed deeply.

Donald's voice trailed to a drowsy close; his chest rose and fell regularly, his features relaxed. He felt as though he were floating, exquisitely floating, on a sea of fleecy clouds that was bearing him softly away. A delicious langour enthralled him—an enchantment drowsy and dim. He felt himself drifting, drifting ... He was asleep.

The willows at the lower end of the meadow were pushed cautiously aside, and Hand's head appeared in the opening. For two days he had lain hidden awaiting an opportunity to waylay Donald. The day after the fight he had boarded the train for the coast, but had slipped from the car at the station below.

His face—unprepossessing at its best—was now a horrible sight. The thick lips were swollen and cracked, the eyes discoloured and puffed and the broken teeth bared in a snarl as he saw Donald lying by the stream. Every hour since the fight Hand's hatred for Donald had grown blacker. He would show him that he, Old Hand, deserved his reputation as a fighter. He would hold this crippled man helpless while he showered blows on his unprotected face, make him cry out for mercy on bended knees; perhaps kill him. His hatred grew hotter and deeper as he watched him lying peacefully beside the girl who had been the cause of the fight in which he had been ignominiously whipped.

Connie sat gazing down on the sleeper. A sudden thought seized her, bringing a warm flush to her cheeks. Why not? No one would ever know. Would she dare? She glanced timorously about her, then leaned slowly over, her curls falling about her face, and touched her soft lips to Donald's cheek.

A bluejay screamed derisively. Connie came to her feet, her face crimson. Donald stirred, opened his eyes, and painfully raised himself.

"I'm sorry, Connie," he apologized. "It was very rude of me to go to sleep."

A moment later he walked down the hill. Connie accompanied him a short distance, then turned up a steep path, and from a high, rocky ridge she watched his retreating figure as he turned toward the dam.

A huge bucket on a cable, that had been used during construction for carrying men and material across the roaring chasm below the falls, still hung above the boiling waters.

For Donald there was a certain thrill, a keen exhilaration, in swinging in mid air in this crude conveyance. He stepped into the bucket and with his one good arm pulled it along the rusty cable.

The Breed, hidden near the trail, saw Donald as he walked toward the dam. The venomous look in his eyes gave place to one of strained interest as he saw the two men skulking menacingly after the unsuspecting man. With a feeling of malignant exultation, as he sensed disaster to the man he hated, he hobbled to the trail and furtively followed.

From the heights above Connie saw the sneaking figures as they crouched low against the edge of the dark spruces and at once divined their murderous object. For an instant she was paralyzed with terror. Her lips refused to move and her limbs grew numb.

The men moved cautiously as they approached their intended victim, fearing that he might be armed. As Hand saw Donald suspended over the river a look of fiendish elation crossed his features. Here was a chance to dispose of his enemy with no trace of the crime. He tore a fire-axe from the wall of the tool house and ran to the swaying cable.

"Joe! Joe! Stop them. Stop them!"

Screaming again, she plunged straight down the hillside in a mad race to reach the scene of action. Running like a deer, stumbling and falling, her breath coming in short gasps, she ran wildly on. Snarls of the thorny crabapple tore at her, devil's-club lacerated her face and hands, but she felt no pain. "O God," she prayed aloud, "help me to save him! Help me save him!"

Donald's face blanched at the sound of the axe as it bit into the heavy cable. He looked down at the jagged rocks and seething waters below. Then with closed eyes and a prayer on his lips he tore in mad frenzy at the rope. Desperately he tugged with both hands, although the pain from his broken wrist sent a wave of torment up his arm that sickened him.

No man can measure the speed of thought in a crisis; even the sluggish brain of the Breed functioned rapidly. Connie was not for him. Her happiness was bound up in the man working feverishly at the hand-back. There was not one chance in a million that he would gain the safety of the cliff before the strands parted to plunge him to eternity. As he heard the crashing of Connie's slender body as she tore down the hill, a softness crept into his eyes. With a speed incredible in one with his pitiful deformity, he ran in a series of bounding steps to the edge of the bluff. The noise of tumbling waters drowned the sound of his approach. Just as Hand raised his axe for the final blow, the muscular arms of the Breed were flung about him. Emitting a startled curse, the big man turned and with a twist of his powerful shoulders flung his dusky assailant to the ground. As he rose Hand swung viciously at him with the axe.

With a quick movement the Breed dodged, and the weapon flashed over his head, flew from the big man's hands, and struck his confederate a glancing blow on the shoulder that brought from him a howl of pain. Again the Breed's arms closed about his adversary's waist. Mad with the pain in his shoulder, the foreigner drew a long, keen knife, circled warily about the two wrestling men until he found an opening, then plunged the knife to the hilt in the Breed's left side. The stricken man slithered from his opponent's arms and fell a crumpled heap to the ground.

Sick and giddy, Donald stumbled from the bucket, seized the axe and advanced weakly toward Hand. Hand's accomplice, taking one look at the prostrate body, turned and fled terror-stricken to the woods. Hand hesitated for a moment, then followed heavily after.

At this moment, Connie, with clothes torn and hair dishevelled, broke from the woods, and with a cry of pity flung herself to the ground by the Breed's side and placed his head on her lap. The eyes of the wounded man flickered slowly open. He tried to speak, but a strong convulsion shook his frame from head to foot and he writhed in desperate agony.

Connie's face as she lifted it to Donald was drawn with grief. "Get me some water, please," she said brokenly.

The dying man's lips moved. Connie leaned closer.

"I—I—love you," he whispered faintly. "I—saved him—for you."

A ghastly pallor spread over his features and his lips were widely parted in a struggle for breath. Again his lips moved in a fluttering whisper. "Connie—will—you—kiss me?"

As Connie pressed her tear-wet face to his the pain-contorted features relaxed in a smile of wonderful peace and his eyes closed.

When Donald returned Connie's head was bowed and she was weeping softly.

"How is he, Connie?" he questioned gently.

"He's dead."

Donald removed his hat and knelt with bowed head.

"He died for me," he choked.

"And for me," she whispered inaudibly.

CHAPTER XVI.

Lest we tire of monotony, Nature gives us a change of colour for each of the flowering seasons. Flowers of every hue may be found through the different months. Pink for May, red for June, blue and pink for July, and during August royal robes of gold and purple clothe the hills and valleys.

The last week of August brought to Summit Lake a pageantry of colour that the Coast region is denied owing to the persistent rains that retard the ripening of the leaf. The deciduous trees were already withdrawing their life-giving fluid from the leaves to store it in their roots until spring. The willow, vine maple, birch and alder along the creeks and take-shore held touches of autumnal colouring, while on the hills the yellowed leaves of the cottonwood were brilliant in their setting of sober dark green conifers.

A gaudy red were the vine maples but there was a leafy beauty greater than theirs. The flowering dogwood blazed from every nook and cranny. The ripening of the dogwood gives to its leaves a flame that burns with a fierce glow; a glow that further ripening deepens until its crimson flush becomes the loveliest hue of the British Columbia woods.

The fireweed, or willow herb, that in July gives to the open spaces a gorgeous tint of bluey pink, were now loosing a flock of seeds to float away like tiny parachutes. Each small bit of fluff held a minute germ of life that would build a plant as large as its parent when, dropped by the friendly wind, it reaches a fertile spot. The stately cottonwood were sending out a life-fluff as tiny as that from the smaller plants. Thistles, cat-tails and asters hurried to join the silken clouds until the air was misty with these germ balloons seeking their winter's rest. The red elderberry and its magenta neighbour, the thimble berry, with its truculent Scotch cap, gave to the woods a maternal theme.

A curious timidity had come over the birds; not only were they quiet but they were no longer to be found in their usual haunts. In some retired spot they were moulting. While the weather was at its best, and food was the most plentiful, they were dressing themselves in a new set of feathers for their long flight to the south. The tops of the tall pines were filled with sweet twitterings, of flutterings out and in, wing trails and quick short flights. A flock of warwings had gathered for the migration. They would not leave for some time yet, but the change had come. Birds from the north had arrived creeping south by easy stages, taking plenty of time in their journey—the freest creatures that live, staying or going as they feel inclined.

(To Be Continued.)

What League Has Cost Canada

The League of Nations has cost Canada $1,626,315.70 since its inception to the present, was the reply in the House of Commons to a query by T. L. Church, Conservative, Toronto, N.W.

When a carefully considered plan promises success, never hesitate to take the chance.

Little Helps For This Week

"And Jesus saith unto them, How many loaves have ye?—Matthew xv. 34.

So still, dear Lord, in every place
Thou standest by the toiling folk
With love and pity in Thy face,
And givest of Thy help and grace
To those who meekly bear the yoke.
The lives which seem so poor and low,
The hearts which are so cramped and dull,
The baffled hopes, the impulse slow,
Thou takest, touchest all,—and lo!
They blossom to the beautiful.
—Susan Coolidge

"How many loaves have ye?" It is the Lord's first question; and the hands of those who really want His help search their robes to see what they have hidden there. One brings his joy; another brings his pain, another brings his helpless desire, another brings his poor resolution, another has nothing to bring except just his sorrow that he has nothing. It is a poor collection,—only seven loaves and a few little fishes,—but it is enough: His blessing falls upon them, and they come back to the souls which gave them up to Him multiplied into the means of healthy, holy happy life.—Phillips Brooks

Savings Certificates Popular

That Alberta Government Provincial Savings Certificates are recognized as a sound investment is indicated by the fact that sales during 1928 reached a total of $515,960 over and above all withdrawals. The net purchases during the year were more than double those of 1927. A report for the year by the Treasury Department places the total amount of outstanding savings certificates at $11,-364,940. These certificates are held largely by farmers of the province.

"Laugh heartily, speak kindly, and serve willingly," are among a list of health rules issued by Dr. W. A. Daley, Hull, England, medical officer.

No Ground For Pessimism

Statistics Show Large Percentage Of University Graduates Remain In Canada

An independent survey of figures dealing with the whereabouts of our university graduates is somewhat enlightening in the way of refuting exaggerated statements to the effect that they are flocking to the United States. The latest available statistics show that 82.8 per cent of the living graduates of the University of Toronto are resident in Canada and only 13.6 per cent in the United States, the University of Western Ontario has retained 80 per cent., while 80 per cent. of the University of Manitoba's graduates have remained in their native country. This story finds a repetition in almost every college in the Dominion. Moreover, many graduates have found their way elsewhere only temporarily and will return in due course. Evidently there is not so much room for pessimism as many have imagined.

STORMY WEATHER HARD ON BABY

The stormy, blustery weather which Canadians experience during February and March is extremely hard on babies and young children. Conditions make it necessary for the mother to keep them confined to the house, whose rooms may be overheated or badly ventilated. The little ones catch cold and their whole system becomes racked. To guard against this a box of Baby's Own Tablets should be kept in the home and an occasional dose given the baby to keep him fit, or if a cold suddenly grips him to restore him to health again and keep him in good condition till the brighter, warmer days come along again.

Baby's Own Tablets are just what the mother needs for her little ones. They are a mild but thorough laxative which regulate the bowels, sweeten the stomach, break up colds and simple fevers, banish constipation and indigestion and make the cutting of teeth easy. The Tablets are sold by medicine dealers or by mail at 25c. a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Only the office with no salary attached is obliged to seek the man.

The Northward Trek

Homesteaders Show Preference For Land In Northern Districts

More than half of all the homesteads taken up in Canada last year were in central and northern Alberta; more than one-third were in the Grande Prairie and Peace River land districts. New settlers coming into central and northern Alberta last year increased the population by more than 25,000, while the 6,586 entries represent about 1,273,760 acres of land. The significant feature of all these figures is the northward march of the man intent on taking up land. Much has been said in the last two or three years of the northward trek of the miner, the electrical engineer and the pulp and paper man. But the farmer is heading that way too. And all indications are that 1929 will beat 1928.—Edmonton Journal.

You can't judge a man's status in this country, except to know that if he acts important he isn't.

DIPTHERIA IS PREVENTABLE

On two occasions recently spectacular flights in an air plane have been made to carry precious [illegible] Toxin to diphtheria patients [illegible] first one [illegible] and [illegible] to their families [illegible] carry the [illegible] go to the far north. On the second [illegible] vine and Anti-Toxin were taken to a Strachan family, only some sixty miles from Edmonton.

The story of the far north is well known [illegible] and needs no recapitulation. The story of the farm home near Westlock is raw tragedy. A winter storm, drifted roads, a whole family stricken with Diphtheria.

FARMERS!

We are in receipt of a list of preferred British families who are coming out to this country within the next two months.

Some are young married couples without children and others have from one to six children. They have all had farming experience and the women in most cases are good domestics. If you are in need of a good domestic and a man for outside work this is your opportunity to get an excellent class of settler. For further information apply at our office and we will go over the list with you.

General Automotive Work

There are very few cars in the district, which after winter storage or use would not be the better for a spring overhauling. If you place any value upon your car, the cost of a spring overhauling is money well spent, the improved service being worth more than the work costs. We are thoroughly experienced and suggest you bring your car in early.

LAKESHORE

Little Alice Noland is very ill with bronchial pneumonia. Mrs. Thos. Shaks of Deville is assisting in nursing her.

Lloyd Wood and his mother, Mrs. E. Wood were visitors on Sunday at the J. H. Johnston home.

Card parties were in order Friday evening, there being three in the district.

Mr and Mrs. T. A. Jones entertained a number of friends at their home at whist. Four tables played Joe Jones, who was playing in a lady's place won 1st prize while Colin Lennie won gent's first. Mrs. Everett Noland won ladies' consolation and R. C. Phillips and Herman Tiedeman tied for the other consolation, Mr. Tiedeman winning on the cut. Mrs. Jones served a dainty lunch and a most enjoyable evening came to a close.

Mrs. T. E. Seale entertained a few friends and relatives at Bridge also on Friday evening.

The young people of the neighborhood were entertained at the T. W. Ferguson home at court whist. Six tables played. Miss Dalla Fry won one first prize and George White the other while May Jones and ——— ——— won the consolations. Lunch was served at midnight and the young people repaired to their homes after a most enjoyable evening.

Miss Pearl Gray is assisting Mrs. R. C. Phillips with her house work.

Retiring Mayor Banqueted

LARGE CROWD ASSEMBLE TO DO HONOR TO EX-MAYOR McCAULEY—PRESENTED WITH ILLUMINATED ADDRESS AND PURSE

Mrs. McCauley Presented With Beautiful Boquet in Silver Flower Vase

One of the most notable gatherings held in the history of Tofield took place on Wednesday night of last week, when some 125 Tofield and district citizens gathered at the local curling rink to do honor to Ex-Mayor McCauley and Mrs. McCauley.

A committee of ladies had prepared one of the largest banquets held here, probably the largest, and compliments on the excellent appearance of the tables were numerous and free.

As a mark of his ten years service as Mayor of Tofield, ten candles were burning on the tables during the evening.

After a repast which can truthfully be described as splendid, Mayor Swift, who presided, addressed those present.

He referred to the days of 22 years ago when Mr. McCauley came to Tofield and for a short while had his office with him. He jokingly referred to the fact that business for a time was slow and that when young men are idle, bad habits creep in. He said that he taught Mr. McCauley all he knew about gambling and Mr. McCauley taught him all the bad language he knew. Anyway after awhile business improved and they were too busy thereafter to get into mischief. He referred to Mr. McCauley's sterling qualities, both as mayor, business acquaintance and friend.

Mr. Bruce, speaking on behalf of the town council, said that it had been his privilege to serve with Mayor McCauley for some years. During part of that time it was necessary for the council to re-arrange the financial condition of the town. Today the town was in a good financial condition much of the credit of which should go to Mr. McCauley.

Mr. Rowe spoke on behalf of the business men and was very frank and eloquent in praising Mr. McCauley's excellent qualities.

Rev. Gordon spoke on behalf of the church and praised the honored guests unfailing regularity. He said he would be as much surprised to not see the organ there, as not to see Mr. McCauley at the organ and Mrs. McCauley among the congregation.

Mr. and Mrs. Murray then effectively rendered a duet.

W. Chapman, then in a few well chosen words presented Mr. McCauley with an illuminated address and a well filled purse.

Little Gwenn Firth then presented Mrs. McCauley with a beautiful boquet of flowers in a silver flower vase.

Mr. McCauley, responding, spoke very feelingly and it was evident that he appreciated to the full the honor bestowed upon him. He said that it had been a pleasure as well as a privilege to serve as mayor and praised the council who had served with him. He thanked the people for the great honor they had bestowed upon him.

Mrs. McCauley was very much affected by the kindness shown and it was with some difficulty that she spoke expressing her thanks for the great kindness shown.

Mrs. Pincott then rendered two very excellent violin solos.

Then followed addresses by Mr. J. W. Cookson and Mr. Sherlock, both of whom had known Mr. McCauley for many years and who testified his many good qualities.

Mrs. C. W. Rowe then rendered two solos, these being followed by addresses by Mr. Rogers, Mr. Pincott, Mr. Hannan and Mr. Chapman.

The singing of the national anthem brought the notable gathering to a close.

Much credit is due the committee of ladies and gentlemen who were responsible for the event.

The ladies committee comprised Mrs. Firth, Mrs. J. W. Chapman, Mrs. E. W. Rogers, Mrs. H. T. Ward, Mrs. Geo. Bruce, Mrs. L. C. Hay, Mrs. W. C. Swift, Mrs. T. R. Murray.

The gentlemens committee comprised Mr. W. C. Swift, Mr. L. C. Hay, Mr. A. A. Beirnes, Mr. Geo. Bruce, Mr. W. Bellamy, Mr. W. Chapman, Mr. E. W. Rogers, Mr. J. Chapman.

LOCAL AND PERSONAL

Born.—To Mr. and Mrs. A. H. Wideman, on February 28th, a son.

Born.—To Mr. and Mrs. Lester McGinitie on March 9th, a daughter.

Born.—To Mr. and Mrs. Geo. Bridges, on March 11th, a daughter.

Mrs. Tofield of Edgerton is visiting friends and relatives in Tofield.

Mr. A. P. Harrold met with an accident while playing broomball on Wednesday. He collided with an opposing player and fractured a rib.

Mrs. F. M. Webb, teacher of piano and organ wishes to announce that she will discontinue teaching until further notice.

Don't forget the United Ladies' Aid tea at Mrs. Firth's on Friday afternoon.

Spring Poets

Spring is the time of the year when poets—good and bad are abroad in the land.

Spring sunshine gives inspiration to many people to give vent to their feelings in language more beautiful than commonplace.

There are however, a number of spring poets around this year that have more than ordinary reason to give vent to their feelings in language different from the commonplace.

We refer to those who have left their cars stand around all winter and when they try to start it, find that it doesn't want to go. What they say we don't want to put into print but if it is poetry we are sure it is not faultless rhyme.

Don't work yourself into a poetical frenzy when your car refuses to run right, but bring it to the

TOFIELD

GARAGE

P. M. HAUGEN PROP.

LOCAL AND PERSONAL

Owing to a heavy demand upon our space this week, coupled with a larger number of sale bills than usual, [illegible] we are compelled to omit some news matter that otherwise would be inserted.

Mr. and Mrs. Wm. Thompson entertained a number of young folk to a whist party at their home on Tuesday evening of last week. There were five tables playing and the first prizes went to Miss [illegible] Johnston and Mr. Bigland. The consolations were taken by Mrs. J. Lee and [illegible] Gray. The hostess and daughter served a dainty lunch after the cards and about 1:30 the guests departed reporting a pleasant evening spent.

On Friday evening Mr. and Mrs. J. Munro welcomed a number of card players to their home to play court whist. There were enough for five tables and the prizes went to Mrs. Carl Blake and Mr. Bigland and the low prizes to Mrs. J. Appleby and John Thompson. After the cards playing a bountiful lunch was served by Mrs. Munro and Mrs. Neal. The occasion being Frederick M[illegible] birthday, a lovely birthday cake wended its way among the guests and was done full justice to. Some of Fred's chums took him unawares and gave him the royal bumps but he appeared to be none the worse. The party broke up shortly after midnight and everyone declared they had a very good time.

The Misses Mabel Thompson, [illegible] athy and Jean Baptiste, Mr. C. Blake, Jack Blake and John Thompson spent last Sunday with Mr. and Mrs. Carl Blake.

For Saturday, at the Variety Theatre, Manager Wood has booked "The Main Event." For those that like to see love, fighting, daring and doing, all beautifully intermingled in to one delightful story, this picture will be a real treat. In addition, there will be a [illegible] in the shape of a [illegible] all in all Saturday evening could not be more pleasantly spent than at the Variety. The prices too have been lowered, and will remain at the present low levels if the increased patronage throughout March warrants it. Make Saturday night a Variety night.

Miss [illegible] is holding her spring [illegible] opening on Saturday March 16th. [illegible]

Mr. R. J. Giffen of Stettler spent Sunday [illegible] Bissett home.

Mrs. T. Shultz of [illegible] spent a few days visiting friends here this week.

The Holy Trinity W.A. are holding a Silver Tea and Sale of Home Cooking, also [illegible] sale in the Institute room on Saturday, March 30th. We wish to [illegible] the [illegible] C.G.I.T. leader and the girls for their [illegible] in postponing their date of [illegible] to show our appreciation [illegible] their tea and turn [illegible] to help their funds [illegible] and incidentally add to their camping fund.

LAKESHORE

[illegible] Nathaniel, infant son of Mr. and Mrs. Lester Noland passed away [illegible] March 10th after a brief illness [illegible] pneumonia. Although [illegible] months old was [illegible] and will be greatly missed [illegible] grandparents, uncles and aunts [illegible] as well as by the bereaved parents [illegible] little sister Alice, who has [illegible] very ill with the same [illegible] now improving.

The sympathy of the entire community [illegible] out to the bereaved ones [illegible] loss. The funeral was held on Monday, March 11th and interment made in the Tofield cemetery.

Mr. and Mrs. R. C. Phillips were guests of Mr. and Mrs. J. H. Johnston on Sunday.

Neil and Lynn Phillips attended the whist drive at the Munro home east of [illegible] on Friday evening.

Mr. and Mrs. Herbert Tiedeman were host and hostess to a number of [illegible] Friday evening. Whist was the order of the evening. Eight tables [illegible] Mr. Ed Brabe and Miss [illegible] were the prize [illegible] and Maggie Wood [illegible] A tempting lunch was served at midnight after which dancing was indulged in.

Russell Ferguson spent last week assisting Mr. John Bailey of Landbrook who is preparing to move to his new farm.

The Lakeshore Ladies' Aid Society met at the home of Mrs. Phillips on Tuesday afternoon.

HARDO

The Ladies' Aid meeting held at the Hagen home last Wednesday was very well attended. During the afternoon Mr. and Mrs. Harbut were presented with a sum of money and several nice gifts. Mr. and Mrs. Harbut are soon leaving for their homestead at Sturgeon Lake.

There was a very large attendance at the Bible Class held at Hendricksons last Friday evening.

[illegible] Yoder [illegible] of Mr. and Mrs. Jake Yoder is in the Camrose hospital recovering from an appendicitis operation.

Mrs. Olfrid M[illegible] spent several days of last week in Edmonton.

The Misses [illegible] and Alice [illegible] spent the week end at home.

[illegible] at the home of A. M[illegible] Friday afternoon. Quite a number were present and an interesting afternoon was spent. The Wood situation was the chief topic for discussion.

The services [illegible] held last Sunday were [illegible] well attended. There was [illegible]

Twenty-six [illegible] in a shooting match at Iver Moen's on Tuesday. [illegible] Moen came first with the total [illegible] of a possible 100 points.

Musical Concert Coming!

The [illegible] of the season will be put on [illegible] Variety Theatre on Friday March 22nd when [illegible] Polmatier [illegible] of which Mrs. Pincott [illegible] will give [illegible] of their most [illegible] concerts, consisting [illegible] numbers [illegible] the readings. Many people and the [illegible] will remember the Polmatier [illegible] having played here [illegible] In addition [illegible] Tofield will have [illegible] pleasure of hearing Mrs. Cockburn [illegible] Gordon Johnston [illegible] again each of whom played here [illegible] ago with such success and added much to the program. This concert is given for the benefit of the W.I. to assist in their new project of helping some needy girl to enter Normal School and [illegible] will [illegible] but will give those attending an evening's entertainment not often heard in Tofield. [illegible] glance at the following program will prove this.

1.	March	"The Observatory"	Lincoln
2.	Overture	"The New Era" Polmatier Sisters Orchestra	[illegible] Hood
3.	Soprano Solo	"Come to the Fair" Mrs. R. Cockburn	
4.	Cornet Solo	"Down in the Deep Cellar" Helene Polmatier Hewett	Kroeffsch
5.	Cello Solo	"The Phantom Melody" Gordon A. Johnston	Ketelbey
6.	Reading	Selected [illegible] Polmatier Pincott	
7.	Trombone Solo	Selected Eva Polmatier Wright	
8.	Soprano Solo (Violin Obligato)	Selected Mrs. Cockburn	
9.	Concert Waltz	"Toreador" Polmatier Sisters	Royle

Canada's Financial Position

[illegible] of the Dominion of Canada's [illegible] Hon. J. A. Robb in [illegible] presented by him to the House of Commons on March [illegible] the source of great satisfaction to all citizens, because [illegible] party affiliations every Canadian is intensely interested in the [illegible] subjects of Dominion finances and taxation.

During the [illegible] Canada piled up a huge debt for a nation of less than [illegible] people. The people assumed the heavy burden without [illegible] be absolutely necessary, and a price that must be [illegible] of the world including their own. As war [illegible] increased and the debt piled up. It of course, [illegible] much new and heavier taxation, not only to [illegible] possible, but in order to meet heavy annual [illegible] that debt.

[illegible] was seen it was necessary to still further increase [illegible] out a tales home from Europe [illegible] the [illegible] make provision for huge sums to be paid annually [illegible] the debt continued to increase and [illegible] almost seemed that instead [illegible] increasing from year to year.

[illegible] however been most encouraging and more more [illegible] After meeting all expenditures on both [illegible] a surplus of $7,000,000, [illegible] And this surplus for 1928-29 [illegible] in the preceding year. The [illegible] the Finance Minister is in the happy [illegible] pay them off in cash and not forced to borrow by [illegible] the debt is being steadily, even rapidly, [illegible] Mr. Robb paid off $53,000,000, and [illegible] which falls due next August. [illegible] $111,000,000 is paid off the national debt, and [illegible] in interest.

Mr. Robb [illegible] years ago on April 1, 1922, the annual interest charge [illegible] public debt amounted to $133,482,113, whereas on April 1, 1929, the [illegible] charge would be $117,112,100, a decrease of $16,369,012.

This very [illegible] has been brought about not by [illegible] contrary in the face of a steady lessening [illegible] sales tax which a few years ago was [illegible] the rate of postage has been reduced [illegible] the size of incomes exempt from taxation has been increased and the taxes on others reduced, the stamp taxes on receipts abolished and on cheques largely reduced, numerous reductions in customs tariff schedules have been made, and now taxes on telegrams, [illegible] insurance policies, railway and steamship tickets are to go.

It is not possible of course to remove taxation as rapidly as it was imposed during the war years, but every year sees some advance in the right direction made. And every such reduction has had a beneficial effect on the business of the country with the result that the lower rates have brought in revenue only slightly smaller.

[illegible] have been made possible through three main [illegible] First, the [illegible] exercised by Mr. Robb over all expenditures, which he has [illegible] to the lowest possible point consistent with efficiency [illegible] of the country. Economy has [illegible] when development of the country was checked [illegible] have been kept to a minimum [illegible] whereas in 1920, 1921 and 1922 the Canadian National Railway [illegible] in those three years to no less a sum [illegible] the C.N.R. not only paid all operating expenses [illegible] bonds and debentures held by the public [illegible] Third, the substantial [illegible] in the trade and [illegible] Canada assisted by reductions in taxation and [illegible] development in all branches of industry [illegible] larger revenue to the Government.

And the bright [illegible] feature of the situation is that all [illegible] point to a continuation of these same favorable conditions throughout the next fiscal year so that the people of Canada can look forward with a large degree of confidence to next year's Budget disclosing another large reduction in the national debt and still further decreases in taxation.

Not Waste Of Time

Investigating Breathing Of Bees Discloses Interesting Facts About Health

To spend time investigating the question of the bee's breath may seem superfluous, but scientists have determined that besides giving a clue as to the health of the hive in the winter time and in the summer, the breathing is an index to other interesting facts about the colony. Professor G. H. Vansell, of the University of California, rigged an apparatus by which he could measure the carbon dioxide and the water vapor given off by a colony of bees in both winter and summer.

Sore Corns Drop Off If You USE "Putnam's"

When you notice any sign of callous on the feet or toes, that's the time to paint on a few drops of PUTNAM'S CORN EXTRACTOR. Do this and you prevent corns. No matter if the corn is hard or soft. Let it be on top or between the toes, Putnam's will remove it without pain. Insist on PUTNAM'S CORN EXTRACTOR. It does the work—and roots out the corn, quickly and with out pain.

Predicts Library Of Aerial Photographs

May Be Created Within Ten Years Says J. W. Pierce

The creation of a library of one million aerial photographs within the next 10 years to constitute a reference inventory of Canada's natural resources was predicted by President J. W. Pierce, D.L.S., at the annual convention of Dominion Land Surveyors at Ottawa when he said that already 250,000 aerial photographs covering areas from coast to coast had been assembled and placed in use for this purpose under the Topographical Survey of Canada, Department of the Interior.

BABY'S OWN TABLETS WIN GREAT PRAISE

Many Mothers Always Keep Them In the House

Thousands of mothers state that they know of no other medicine for little ones to equal Baby's Own Tablets—that they always keep the Tablets in the home as a preventive of childhood ailments, or if sickness does suddenly grip their little ones they feel safe with such a remedy at hand.

Concerning the use of the Tablets Mrs. Donat Plourde, Tingwick, Que., writes:—"I have nothing but praise for Baby's Own Tablets. They are the only medicine I have ever given my two little ones and I am glad to state that the Tablets have always kept them in perfect health. I feel so safe with the Tablets that I always keep a box in the house."

Baby's Own Tablets are a mild but thorough laxative. They regulate the bowels, sweeten the stomach and thus banish constipation and indigestion, break up colds and simple fever and make the cutting of teeth painless. The Tablets are absolutely safe being guaranteed free from all injurious drugs. They are sold by all medicine dealers or by mail at 25 cents a box from The Dr. Williams Medicine Co., Brockville, Ont.

Our Natural Resources

Wonderful National Heritage Of Untold Wealth Awaiting Development

The natural resources of Alberta are an immense treasure trove. Great industries will some day grow up in the Canadian west. Coal, oil, minerals, lumber, water power, as well as rich agricultural land await the coming of capital and organizing ability to open the Aladdin's cave of untapped natural resources. In the years ahead, before the end of this present century, agriculture may itself have been transformed into something like a manufacturing industry operated largely by industrial chemistry. In the meanwhile, there is any amount of work ahead of the provinces to make the most productive use of the resources which the Dominion government are handing over as part of the west's share of a wonderful national heritage.—Ottawa Citizen.

George Washington's second inaugural address contained 134 words, and is regarded as the shortest in the history of such occasions in the United States.

New Land Under Cultivation

Extensive Areas In Western Canada Are Annually Taken Up

Additional extensive areas are annually brought under farm cultivation in Western Canada. Last year it was estimated a total close to 2,[illegible] acres of Canadian Government free homestead lands were taken up by settlers in the four Western Provinces, a total of 15,566 homesteads being filed upon, each of 160 acres, compared with 6,357 in 1927.

There is now one motor vehicle for every 21 of the population of Great Britain.

Mother Graves' Worm Exterminator will drive worms from the system without injury to the child, because its action, while fully effective, is mild.

Without Comment

A California authoress sent a manuscript to Ambrose Bierce, with the request that he give her "a criticism in one sentence, and drop further comment." Something was heard to drop all up and down the Pacific coast when he replied: "The covers of your book are too far apart."

Not only does the girl in some districts of Indo-China make the proposal, but with her also lies the initiative for divorce.

Western Canada Air Mail

Vote In Parliament Foreshadows Important Development

The main estimates tabled in parliament almost certainly foreshadow the establishment this year of an air mail service in western Canada. Bearing in mind the probable cost of the Winnipeg-Calgary air mail service, the increase in the appropriations to be sought by the post office department and the national defence department can be interpreted in no other way than as foreshadowing this most important development.

The vote on the air mail service in the estimates of the post office department is increased from $450,000 to $1,250,000 and this is more than sufficient to cover all contracts needed in the western services, likewise the increase in the vote for the establishment of air routes, in the defence department, of $313,432, is about twice the amount required to construct light beacons and emergency landing fields along the 1,200 mile route from Winnipeg to Calgary and north from Regina to Saskatoon, and from Calgary to Edmonton.

In other respects the main estimates are of great interest to the west. The items for the department of agriculture show very substantial increases. There is an additional vote of $437,000 for cold storage warehouses, $250,000 for seed grain control and grants to seed farms, $150,000 for experimental farms, $160,000 for health or animals, $10,[illegible] [illegible] branch in the department, and $25,000 for Canada's share in the newly organized empire bureau of research.

Where Living Is Cheap

Fiji Islanders Work Little and Pay No Rent For House Or Land

Fiji Islanders have a pretty easy time, little work and no rent to pay.

The placid life of the Islanders brightens the heavy reading of the annual colonial report for 1927, which has just been issued by the British government.

"Labor conditions do not exercise any considerable influence on the Fijians as a whole," declares the report, "apart from affording additional social amenities. Every Fijian is a member of a land-owning unit, and has the right to use a portion of the tribal lands for planting crops for food and profit, or for raising cattle.

"If he remains in his village, he is provided with a house of native construction, built by the community of which he is a member. Beyond performing his share of the work done for its benefit by the community as a whole, he pays no rent either for his land or his house."

Going Upstairs Had to Sit Down Breath So Short

Mrs. H. Brousseau, Magog, Que., writes:—"For many years I suffered with shortness of breath; then four years ago I had palpitation of the heart, and was so bad I had to sit down two or three times when going upstairs. I read about

MILBURN'S HEART [illegible]

so I got a box, and in no time I felt better, so I took three boxes more and I have never had shortness of breath since."

Price 50c. a box at all druggists and dealers, or mailed direct on receipt of price by The T. Milburn Co., Ltd., Toronto, Ont.

His Worry

"I hear you are going to California with your husband, Jane," said Mrs. Jones to her maid, who was leaving to get married. "Aren't you nervous about the long voyage?"

"Well, mum," was Jane's reply, "that's his lookout. I belong to him now, and if anything happens to me it'll be his loss, not mine."

Marshall Stillman Movement In States Helps Discharged Convicts To Reform

Possibly few persons could say offhand what the Marshall Stillman Movement is, and yet it is grappling with, and greatly aiding in the solution of, one of the most pressing social problems in the United States, that of taking care of the convict on his discharge. It strives to catch the former convict just as he leaves prison in a mood of uprightness and to give that mood an opportunity to [illegible] itself. Its "clubs" have [illegible] as perhaps the most important feature of its work until recently, but during the last year the question of jobs for its wards has been answered more successfully than ever before by the establishment of enterprises where former convicts alone are employed. The plan has succeeded beyond expectation, and to date, has to its credit a 100 per cent. record of achievement; that is, there have been no backsliders.

Society has in the past been responsible for many first-time offenders becoming habitual criminals. This movement is an effort to enable men who earnestly desire to do so, really to straighten out.—Chicago Science Monitor.

Buffalo Shipped To Italy

Three buffaloes from the government park at Wainwright, have been sent to Italy, where they will be placed in one of the state parks. Prior to their long journey overseas they were segregated for three weeks, during which time they underwent a taming process. The animals were shipped to the Royal Italian Government.

YOU CAN'T DYE with Good Intentions

You can get results—after a fashion—with any old dye; but to do work you are proud of takes real anilines. That's why we put them in Diamond Dyes. They contain from three to five times more than other dyes on the market! Cost more to make? Surely. But you get them for the same price as other dyes.

Next time you want to dye, try them. See how easy it is to use them. Then compare the results. Note the [illegible] of that re-dyed look; of streaking or spotting. See that they take none of the life out of the cloth. Observe how the colors keep their brilliance through wear and washing. Your dealer will refund your money if you don't agree Diamond Dyes are better dyes.

The white package of Diamond Dyes is the original "all-purpose" dye for any and every kind of material. It will dye or *tint* silk, wool, cotton, linen, rayon or any mixture of materials. The *blue package* is a special dye, for silk or wool only. With it you can dye your valuable articles of silk or wool with results equal to the finest professional work. Remember this when you buy. The *blue package* dyes silk or wool only. The *white package* will dye every kind of goods, including silk and wool. Your dealer has both packages.

Diamond Dyes *Easy to use* *Perfect results* 15¢ AT ALL DRUG STORES

YOU'LL FIND A hundred vital, saving uses for Para-Sani Heavy Waxed Paper in your home. Comes in handy, sanitary, knife-edged package. For less exacting uses: "Centre Pull" Waxed Tissue (flat sheets). At grocers, druggists, stationers.

WOULD BAR U.S. FARM PRODUCTS FROM CANADA

Ottawa.—Parliament received a suggestion as to how Canada can meet increased United States tariffs against Canadian farm products.

The method, suggested by Hon. Hugh Guthrie, acting Conservative leader, would be in the first instance, to stop the importation of farm products into Canada.

Secondly, to supply those agricultural products which are now imported into the Dominion from Canadian farms.

Mr. Guthrie, in making this suggestion to the government, stated that the Dominion is now importing agricultural products from the world to an annual value of approximately $80,000,000. To the United States, he said, Canada sells annually farm products valued at slightly over this sum. If the United States closes its doors on Canadian agricultural products, Canada could close hers on similar products from the world. The Dominion is in a position to supply her own home needs.

"To accomplish that," declared Mr. Guthrie, "all we need is a government with some courage; all we need is a government with some resolution, all we need is a government that has the real interests of the people, of the farmers of Canada, at heart."

The acting Conservative leader submitted to the house that "there is something seriously wrong in regard to the trade of this country with the United States." The Dominion was now buying too much from the country to the south and selling too little. Canada found herself with an adverse trade balance insofar as her transactions with the republic were concerned, amounting to $3[illegible]. Mr. Guthrie said he realized that the United States market [illegible] the most convenient for Canada and in many respects the very best market in which to sell Canadian farm products.

"But," he added, "if the tariff of that country is raised so high that we cannot enjoy that market, then we will have to shape ourselves to enjoy the Canadian market to the fullest extent and at the same time to seek other markets throughout the world. In order to do this, however, we shall need to have a fair application of the principle of protection in our customs tariff."

Receives Medal From King

Red Cross Insignia Personally Conferred On One Of His Nurses

Bognor, England.—King George personally conferred the insignia of the Royal Red Cross, second class, on Nurse Davis, one of the five who attended him during his illness.

His Majesty had the medal of the order specially sent down from London, so he could present it as a token of his appreciation for the unremitting care and attention of Nurse Davis, who is leaving on her holiday.

Attempt To Salvage Plane

Copenhagen.—Four members of the Hobbs' expedition in Greenland have left Mount Evans, Greenland, on an attempt to salvage the aeroplane of Bert Hassel and Parker Cramer. The 'plane came down last summer 12 days' walking distance from Mount Evans, where the Hobbs' expedition is wintering. Word of the salvage attempt was radioed to the newspaper Ekstrabladet.

Bank Receives Charter

Ottawa.—Approval has been given by the banking and commerce committee of the House of Commons to the charter application of Barclay's Bank (Canada, Limited). The headquarters of the bank, which is capitalized at $500,000, will be in Montreal. Sir R. L. Borden, former premier of Canada, will head the institution.

A Record Production

Ottawa, Ont.—Mineral production in Canada reached a net record in 1928 with a total of $273,446,684. This surpasses the 1927 figures by $26,000,169 or 10.5 per cent. Advances were general in all fields, metals, non-metals, fuels and structural materials. Figures were made available at the Dominion bureau of statistics.

Smallpox In Bombay

London, England.—An epidemic of smallpox which has caused 247 deaths in 500 cases since the beginning of the year has alarmed Bombay. Twenty vaccination stations have been established and 6,000 vaccinated since January.

May Enable Women To Keep Nationality

Bill Introduced In British House Regarding Marriage With Aliens

London, England.—A bill to enable a British woman marrying a foreigner to retain her nationality unless she declares her desire to assume the nationality of her husband was introduced in the House of Commons by Miss Ellen Wilkinson, Labor member for Middlesborough East.

The bill is only retroactive with regard to British women who have married aliens and they would automatically become British citizens again unless they declare their wish to retain the nationality of their husbands.

Master Mariner Dies

Captain William Sanderson Came To Vancouver In the Eighties

Vancouver.—Death of Captain William Sanderson, pioneer Canadian Pacific Railway Company master mariner, has broken a link between the present and an earlier shipping era on the Pacific Coast. Captain Sanderson, for whom funeral services were held in Vancouver, was a native of Liverpool, and came to Vancouver in the 80's, a boatswain of the old "Empress of India" on the liner's maiden voyage. He remained in the employ of the Canadian Pacific here until his retirement some years ago.

Prince Given Power To Invest Knights

Will Conduct Two Ceremonies On Behalf Of King This Month

London, England.—The King by royal warrant has authorized the issue of letters patent empowering the Prince of Wales to confer the honor of knighthood at royal investiture ceremonies at St. James' Palace, March 26.

The Prince of Wales has been empowered to conduct two investiture ceremonies on behalf King George at St. James' Palace on March 26 and 27.

Farm Loans For B.C.

Loans May Be Made Available For Agriculture By First Of May

Victoria.—Farmer loans should be available to British Columbia agriculturists by May 1, according to an announcement given out here by Dr. J. D. MacLean, chairman of the Canadian Farm Loan Board.

The chairman of the board stated that nominations for places on the provincial loan board had been made by the provincial government and will be considered by him and his colleagues immediately. The names of the provincial nominees were not revealed.

Would Retain Dole

London, England.—First reading has been given in the House of Commons to a bill which makes migrants from Britain still entitled to unemployment insurance benefits. The bill provides that a migrant who goes overseas but remains within the Empire, should receive unemployment pay for a period up to two years.

Accepts Radio Agreement

Ottawa.—Word has been received by Alex Johnston, deputy minister of marine, that Newfoundland has accepted the radio agreement concluded by Canada, the United States, Newfoundland and Cuba, covering the short waves. Cuba and Mexico have yet to be heard from.

Appeal Is Dismissed

Toronto.—The appeal of Arvo Vaaro, editor of Vapaus, Finnish newspaper published at Sudbury, Ont., from a conviction in that city on a charge of publishing seditious libel, was dismissed in second divisional court.

Ex-President Will Write

New York.—Curiosity as to what Calvin Coolidge would do on returning to private life was at least partially satisfied by announcements that contributions from his pen would appear in two magazines.

Celebrates Birthday

Toronto.—Toronto celebrated its 95th birthday March 6, having been incorporated as a city by act of the legislature, which received royal assent March 6, 1834. In 1834 Toronto had a population of 9,251.

France Bans Trotsky

Paris.—It was learned here that the French cabinet at a secret meeting, refused to grant an application from Leon Trotsky, for permission to reside in France.

Oppose Intervention

Premier Baldwin Against Direct Governmental Intervention In Mining Industry

London, England.—Direct governmental intervention in the mining industry would not be advantageous, Premier Baldwin told a deputation from the Miners' Federation, according to the joint report of the proceedings at the meeting recently issued. Mr. Baldwin expressed the opinion that amalgamations and other forms of re-organization in the industry were progressing satisfactorily.

The most urgent matter requiring attention, he said, was the transference of the surplus miners to other industries. He appealed for the co-operation of the Miners' Federation with the government schemes in this matter.

To Ban Poison Gas

Germany Prepared To Sign Agreement Prohibiting Use Of Gas In Warfare

Geneva.—Germany, which introduced the horrors of poison gas on a large scale during the world war, has announced to the world that she is prepared to sign a protocol prohibiting the use of asphyxiating gas in warfare.

The announcement by Dr. Gustav Stresemann, German foreign minister, sent the regular March session of the League of Nations council off to an auspicious start in its efforts for world peace.

Stresemann said Germany would ratify the protocol shortly. August Zaleski, Polish foreign minister, announced that Poland also would ratify the protocol.

RESOLUTION ON RESOURCES IS FINALLY ADOPTED

Ottawa.—After a stormy career, the Woodsworth resolution on natural resources, in amended form, finally passed the House of Commons. Debate on the resolution and on the numerous amendments which followed its introduction, has held up consideration of the budget for several days.

The resolution finally emerged, after the buffeting which it has received, in a very different form from that which its mover intended. As originally drafted and presented to the House by J. S. Woodsworth, Labor member for Winnipeg North Centre, it set forth "that in the opinion of this House, no disposition of the natural resources, under the control of the federal government, shall be effective until ratified by Parliament."

The resolution as approved by Parliament, reads as follows:

"That, in the opinion of this House, no further disposition of water powers under the control of the federal government in the provinces of Manitoba, Saskatchewan and Alberta, shall be made under the Dominion Water Powers Act, but the said water powers shall be administered by the respective provinces under powers to be granted by this Parliament similar to the powers granted to the province of British Columbia to administer the water powers in the railway belt, as set forth in the railway belt water act of 1912."

RECEIVES CONGRATULATIONS

Dr. Donald MacGillivray, pioneer missionary in China, who is receiving congratulations on the fortieth anniversary of his entrance into the Chinese mission fields.

Hoover Is Starting Prohibition Drive

New President Plans To Clean Up National Capital

Toronto.—A special despatch to the Mail and Empire, from Washington says:

President Hoover will begin his prohibition enforcement drive in Washington. He will confer at an early date with the commissioners of the district of Columbia and urge them to clean up the national capital. Another step will be to appeal to all public officials to refrain from patronizing boot leggers and drinking. His drive here may result in stopping many hosts and hostesses from serving drinks at dinners attended by public men and women.

During the Coolidge regime Washington entertainers gradually curtailed use of strong drink at parties but Mr. Hoover will further discourage the custom."

Wins Dog Derby

St. Goddard First To Cross Line In Northern Manitoba Classic

The Pas, Man.—In the most sensational finish ever witnessed in any dog derby, Emile St. Goddard, youthful musher" of international fame, finished in the renewal of The Pas dog derby association 200-mile non-stop derby.

St. Goddard reached the finishing line on the Saskatchewan river at 11.09 p.m. His time for the 200-mile course to Flin Flon and return was 34 hours 59 minutes.

Earl Brydges, another local entrant, finished second only three minutes behind the famous St. Goddard, after fighting an uphill battle during the early hours of the night.

Killed By Avalanche

Erivan, Russia.—Thirteen persons were killed and many injured in an avalanche in the Armenian village of Zangiur, advices received here recently stated. Several houses were destroyed by the avalanche, which was reported due to heavy snowstorms in the region.

Ice-Bound In Baltic Sea

Copenhagen.—Christian X., King of Denmark, Queen Alexandrine and Prince Knud, arrived here after spending the night aboard a ferry ice-bound in the Baltic Sea. The ship took twelve hours to make what ordinarily is a two-hour voyage from Warnemuende to Gjedser.

To Picture Score of Cultures

Eighteen racial groups will contribute to the Great-West Canadian folk-song folk-dance and handicrafts festival which is to be held in Regina, March 20-23. Serbians will dance the Kola; Charles Marchand will lead the Bytown Troubadours in French Canadian folk-songs, Poul Bai, Danish baritone will render Viking songs. Jean Gould and her pupils will represent Scotch and Welsh varieties. Who looking at the picture above of Walter Yeuberg and Lina Gaertz in the Dutch scene would think this move for the blending of national cultures other than worth while?

Compulsory Voting Law Is Considered

Workings Of Australian Law Being Studied By Committee

Ottawa.—Compulsory voting has been under consideration by the special committee of the House of Commons which is dealing with amendments to the Dominion Elections Act and the Corrupt Practices Act. No decision as to the principle involved will be made until sections are drafted suitable to Canadian conditions.

Dr. T. E. Kaiser, Conservative Ontario, read to the committee the sections of the Australian act which he said was working satisfactorily. In the last election in that country 91 per cent. of voters on the lists had attended the polls as compared with 78 per cent. in the previous election. With the assistance of W. A. Boys, Conservative, Simcoe North, Dr. Kaiser is to draft sections suitable for inclusion in the Dominion Elections Act.

The Australian Act provides a penalty of £2 for failure to vote, if no reasonable excuse can be given for such failure.

Question Validity Of Pension Law

Quebec Opinion Considers Federal Pensions Act Ultra Vires

Quebec.—Legal opinions furnished to the premier of Quebec as to the federal old age pension law raised the constitutional question as to whether or not the Dominion government has power to use its monies to pay to the provinces a part of the cost of such a scheme as the old age pension law.

This is the information which Premier Taschereau gave to the Quebec legislative assembly when debate was resumed on a motion for production of documents relating to the pensions scheme.

Mr. Taschereau has consulted three constitutional authorities in the matter, Eugene Lafleur, K.C., Aimee Geoffrion, K.C., and Louis St. Laurent, K.C. Mr. St. Laurent gave it as a definite opinion that the federal law is ultra vires, the premier said.

Seek Potash Deposits In British Columbia

Prospectors Being Encouraged By Smelter Company At Trail

Victoria.—The Consolidated Mining and Smelting Company which wants potash for its new fertilizer industry on which it is entering on a large scale at Trail, B.C., announced measures here for the encouragement of prospectors in the unearthing of potash deposits believed to exist in British Columbia.

The Consolidated will make a free analysis of samples for prospects and to aid in the identification of samples deposits are being placed on display here and in Vancouver. A booklet on potash and its occurrence will also be sent from Trail to anyone desiring it.

EARLY END OF MEXICAN REVOLT IS PREDICTED

Mexico City.—A speedy end of the rebellion against the administration of Provisional President Portes Gil was predicted in an official government bulletin recently.

The bulletin said that General Jesus M. Aguirre, leader of the revolt at Vera Cruz, had been deserted by most of his soldiers, who had returned to the support of the government and were fighting their former leader.

Announcement also was made that the federals had re-captured Monterey, the strategic centre in Nuevo Leon, had taken Cordova, in the State of Vera Cruz, and would in a few days be in full possession of the gulf port of that name.

Washington.—The Mexican government situation is causing more anxiety in Washington than anything else since the Nicaraguan revolt. Men in high government and senate circles state frankly that the revolt has a very good chance of overthrowing the Mexican government.

This might result in the United States having to undertake another expedition with marines into a Latin country. The Nicaraguan experiment proved so unpopular with the average American that the government is not anxious to repeat it. But the protection of American nationals and their property in Mexico will be the first consideration.

PLANES ASSIST IN OPENING UP NORTH COUNTRY

Winnipeg.—The exploration of hundreds of thousands of miles of Canada's northland in the search for minerals, both by aeroplane and by waterways, with interesting details of the vast country traversed and the hardships encountered, was vividly related by John E. Hammell, internationally known mining man, George M. Douglas, mining engineer of Lakefield, Ont., and L. L. Bolton, assistant deputy minister of mines, Ottawa.

These three men, eminent in the field of mineral development, addressed the afternoon session of the annual meeting of the Canadian Institute of Mining and Metallurgy.

The great part being played in the exploration and development of mineral areas by the aeroplane was [illegible] by Mr. Hammell, who is a director of the Northern Aerial Mineral Exploration Company. Planes of his organization had covered one hundred thousand miles of flying from Ungava to the Yukon without a single air casualty, he said.

There are four outstanding advantages of aeroplane travel which he outlined as follow: Safety, affording communication by field parties with district engineers, increased morale because worry and labor of transportation is removed, and fourth, with aerial observation geological boundaries could be outlined by engineers and experienced prospectors.

Mr. Hammell dramatically told of the great future awaiting those bold enough to strike deeply into the new areas where rich mineral finds could be made, and of the possibilities afforded young Canadians in the northland.

Mr. Douglas dealt with an exploration trip made along the little known southwestern shores of Great Slave Lake which he traversed in 1928.

The trip was disappointing from the viewpoint of economic geology, said Mr. Douglas, but it served a useful purpose in eliminating the necessity of further prospecting in the areas known to be barren of economic minerals.

The forest reserves, however, were vast, and with great power resources, sawmills and paper mills were a matter of certainty in the near future he said.

New Scholarships Offered

Acceptance To Be Considered By University Of B.C.

Vancouver.—A $1,000 scholarship in economics, effective for three years, with a free study trip to the Orient, will be possible for students at the University of British Columbia, through an offer by H. R. MacMillan, Vancouver exporter. The offer will be considered by the board of governors of the University shortly. By means of the scholarship Mr. MacMillan hopes to promote the study of Oriental trade and business conditions on the Pacific.

Wants Churchill Site

Winnipeg, Man.—The Manitoba government has opened negotiations with Ottawa for taking over the Churchill townsite. Hon. D. G. McKenzie has left for the capital to talk over the question with officials there. He will also visit Toronto to discuss rural hydro electric rates with officers of the Ontario hydro system.

Radio Helped Unemployed

Berlin.—The first German attempt to get employers and unemployed together by radio succeeded beyond hopes of those fostering it. The municipal employment offices had more jobs than men. In answer to appeal over government radio station for workers several thousand jobs were filled.

Huge Seizure Of Narcotics

New York.—Narcotics worth $[illegible] at the peddlers' prices were seized as they were being shipped by express to distributors of the underground drug trade in the south and west. Four [illegible] one of them said to be a professional bodyguard to gangsters, were arrested and held in high bail.

Too Hot In India

London, England.—It is learned here that Lord Burnham, member of Sir John Simon's Royal Commission on Indian constitutional reforms, has been overcome by heat and is returning to England from India where the commission has been sitting for some months.

THE TOFIELD MERCURY

Published Every Wednesday at Tofield, Alberta
Week Ending March 16th, 1929
W. Worton, Publisher

FIRST INTERIM PAYMENT 1928 POOL

Under date of March 1st distribution was made of First Interim Payment on deliveries to 1928 Pool amounting to 15c per bushel on practically all grades, except No. 6 where the amount was 10c per bushel. In Alberta this distribution to Pool members aggregated approximately $4,500,000.

In setting this payment a number of features must be taken into consideration by the Central Selling Agency. Since the first year's operation of the pool it has been the policy to make the first interim payments sufficiently conservative to permit the Selling Agency to continue a selling policy that in their opinion may procure ultimately the highest returns to the grower unhampered by any turn the market may take, when a large volume of the crop remains unsold. To pursue such a policy consistently throughout the whole season, the Selling Agency must be at all times in a strong financial and market position. Should we at any time make too large an initial or interim payment on any grade the net returns to the grower would probably suffer as a consequence.

Further it is necessary to fix the amount of payment several weeks in advance of actual date in order to take care of the enormous labor required in balancing and checking the accounts of each grower and completing cheques for payment. The Alberta Pool alone has many thousands of individual accounts, and with this recent payment issued over 38,000 cheques, and the greatest care must be exercised to insure accuracy.

It is absolutely essential that the Canadian Wheat Pool proceed carefully and on sound lines to insure the safety and security of its members. Many farmers in this province have only recently joined because of the fact that the Pool's first five years of operation convinced them that the organization was being administered and conducted along sound business lines, and further realized that the Pool's system of orderly marketing was sound in principle.

Our Pool directors had a difficult situation facing them at date of setting this interim payment with Argentine coming on the market with the very large crop announced in its marketing, and Australia producing Fifty Million bushels more wheat than last year. It has happened before where over-optimistic leaders of Pool organizations in other countries have gone ahead with liberal early payments, only to find that they were forced to sell heavily on falling markets in order to maintain the required margin which excessive payments had impaired. Should the Canadian Wheat Pool be forced at any time to liquidate any considerable part of their holdings, readers can well imagine what effect it would have on market levels.

The Pool is functioning splendidly and when the crop season closes our members will have received the best average price obtainable on the world's markets for their wheat.

Any delivery checking coupons still held by Pool members should be forwarded immediately to Head Office of Wheat Pool, Calgary.

NINE SILVER FOX KILLED

Nine silver fox, valued at $10,000 were killed and their carcasses stolen from the fox farm operated by Thurston & Dare near Barrhead, on Wednesday night of last week, and although provincial police under Sergeant Watt, of Westlock, have scoured the district since that time, no trace of the thieves has been found.

The investigation is still to be carried out, and a close watch is being maintained to prevent the skins being shipped out of the country.

Two men took part in the daring raid on the farm, and from tracks in the snow which led from the roadway into the fox kennels, it would appear as though they operated on foot, though it is just possible a car was hidden on the highway nearby in which the thieves made a successful getaway.

One of the clues upon which the police are working is a blood-spattered club which was found near the door of the fox kennels and which the thieves used to kill the animals before placing them in a gunny sack.

The raid carried out on the Thurston & Dare ranch is one of the most daring robberies of this nature carried out in the district.—Edmonton Bulletin.

THE DOMESTIC ANIMALS ACT (Municipalities)
SALE AND REDEMPTION OF IMPOUNDED ANIMALS (Sec. 48)

Notice is hereby given under Section 48 of the Domestic Animals Act (Municipalities) that cow or heifer, invisible brand was impounded in the pound kept by A. J. Young, located on the N.W. 1-51-19-4, on Tuesday, the 26th day of February, A.D., 1929, and that said animal was sold on the ninth day of March 1929 to (no offer) and that said animal may be redeemed by the owner or on his behalf within a period of thirty days from the publication of this notice in The Alberta Gazette, upon payment of all fees and costs due to the municipality and the purchaser of said animal.

For information apply to the undersigned.

Graphic Story of Manner In Which Record Crop of 1928 Was Conveyed to Markets

Six tons of grain a second!

Canada's greatest grain crop was on its way to the four corners of the world. Motor trucks and especially constructed horse drawn wagons were rolling from the harvest fields to the country elevators along the lines of the Canadian Pacific Railway. And on September 21st, last, they delivered 6,060,547 bushels representing 181,816 tons or six tons every time a watch ticked. That was a record day in a record breaking shipping season. That was grain. That was also a glimpse, a cross section, of the manner in which the record crop of 1928 was handled from the fields to the elevators, and from the elevators to the markets. The crop of 1928 was the largest in the history of Canada and the Canadian Pacific Railway smashed every existing grain hauling record in getting it to market. The Company used more cars and more engines more times, loaded more grain, ran more trains, gave employment to more men than ever before in its history, and even managed during the crop moving period from August 1st to December 14th to move the largest and longest grain train of all time when one engine steamed into Arcola yard dragging 125 loaded cars behind it.

From August 1st to December 14, the farmers in the prairie provinces marketed 300,282,933 bushels of grain on Canadian Pacific lines, a gross of 82,2[illegible] bushels more than during any previous season. It came in by the millions of bushels a day and it was up to the railway to keep it moving. The railway did by loading thousands of cars a day until on December 14, the total cars loaded reached the amazing number of 152,[illegible], surpassing the totals of previous years by 32,975 cars. Railwaymen from the vice-president down to the junior apprentice in the shops knew that the average grain haul was being exceeded and they worked reaching the peak of their labors during the nine days preceding October 21st when 18,425 cars were [illegible] and moved away, an average of [illegible] a day and the old records dropped one by one until at the close of navigation on the Great Lakes eighty-five per cent of the grain entrusted to the Company for transportation was loaded and rolling east to the Atlantic or west to the Pacific Coast. The cars loaded if placed end to end would have made one tremendous argosy of grain 1,160 miles long.

Preparation, organization of the best kind alone enabled the Canadian Pacific Railway to cope with the terrific rush of grain. This preparation commences weeks ahead of time with a close check up of equipment, and general tightening of the belts by those scheduled to do the job. The next step is found in the pre-season distribution of empty box cars from the Winnipeg terminals to the sidings alongside the country elevators. The empties and the exact number of empties do not arrive at the different sidings by accident. They are placed in keeping with estimates of the amount of grain which will be delivered. On August 1st, last year, approximately 41,000 box cars were on lines west of the Great Lakes, and all during the fall movement they were hauled down to the Head of the Lakes or to the Pacific Coast, loaded and back empty to the prairies. The return movement of empty grain cars constitutes one of the major problems of the rush period. On the average the Canadian Pacific, in addition to the exceptionally heavy loaded movement, hauled from 1,200 to 1,500 empties west out of Winnipeg daily. The peak of this empty movement serves to illustrate the magnitude of this phase alone. During the seven working days, October 15th-21st, twenty-two trains of empties each composed of seventy cars were rushed west daily in order to meet the marketing demands of the farmers. Canadian Pacific Railway grain cars are much travelled pieces of equipment. The distances in the west are great, and the cars are kept busy. When they weaken Weston shops in Winnipeg, Ogden shops in Calgary, and the Vancouver shops repair them immediately and send them out to the road again. The travelledness of a grain car is well illustrated by the following facts. A total of 45,980 cars were loaded in the province of Alberta. Of these, sixty-five per cent, or 30,054 moved east to the Head of the Lakes with an average road haul per car of 1,000 to approximately 1,200 miles. The balance 15,[illegible] cars moved west to Vancouver, with an average haul per car of from 642 to 836 miles. The loadings in Saskatchewan up to December 14, totalled 76,[illegible] cars and each car had an average haul of 915 miles, while the cars loaded in Manitoba had an average journey of 383 miles. When it is remembered that each car made several round trips a general appreciation of the total mileage will be gained.

The magnitude of the whole undertaking is indicated when it is understood that from August 1 to December 14, the Canadian Pacific delivered 110,811 cars of all grains containing 169,017,007 bushels at the Head of the Lakes, and in addition delivered 16,070 cars containing 24,105,[illegible] bushels at the Port of Vancouver, or a total of 132 [illegible] cars, containing 193,122,[illegible] bushels delivered to terminal elevators for storage.

Will Use Canadian Coal

Products Therefrom Will [illegible] Future Markets Says Expert

Coal and the products therefrom, will hold predominant position in the economic world within the decade and Canada with its predominance of one-tenth of the world's coal deposits is in a position to dominate the markets of the western hemisphere. Such is the opinion of Sir Arthur Duckham, head of the British mission to Australia, on Empire trade, who is travelling through Canada in a special car on the Canadian National Railways from Vancouver to Toronto.

Sir Arthur, who is an expert on the utilization of coal and its by-products, is emphatic that an era of manufacture, economic utilization of Canada's coal products will place her in a predominant position in the manufacturing world, during the coming decade. Empire production affecting Australia from where he has recently come, Canada, South Africa, India and other sections of the British Commonwealth is in the melting pot and solutions of the problems of the Empire trade are not only discernible but imminent.

Encourage Careful Driving

Suggested That Insurance Companies Allow Rebate Where No Claim Is Made At End Of Term

"Drive carefully and receive a bonus." This was the principle which was endorsed at the recent annual convention of the Saskatchewan Insurance Agents' Association. The convention dealt with the recent enormous increases in the rate for automobile insurance and went on record as favoring the Great Britain plan whereby the assured are allowed a bonus provided at the end of the term no claim for damages had been made. The Saskatchewan delegates felt that the adoption of this plan would encourage more careful driving and would also increase the popularity of automobile insurance.

A Doubtful Compliment

Mr. Hardfax: You seem to be growing prettier each day.

Miss Muggs: Thank you for the compliment. I'm glad you think so.

Mr. Hardfax: Yes, if you keep on this way you stand a chance of being a fairly good looking old woman if you live long enough.

Why choose the lesser of two evils dodge them both.

Wife (singing): "I would that I were a little bird."

Husband: "Yes, then I would bring the cat in."—Humoristicke Listy, Prague.

Mother: "Rupert, darling, when you divided those five sweeties with cousin Eleanor, did you give her three?"

Rupert: "No: I knew they wouldn't come out right, so I ate one, and then began to divide!"

The Girl: "You don't know who I am, do you?"

The Child: "Yes, I do—you're the back part of my brothers motor-bike."

A New Race Of Beef Animals

A Mixture Of Yak, Buffalo and Domestic Cattle

The yak, a native of the plateaus of Thibet, is being used by the experimental farms in a hybridizing experiment to mingle the blood of the buffalo and ordinary cattle. After many attempts to make direct crosses between cattle and the buffalo, failure was the result owing to reproduction difficulties. The yak has been introduced as an intermediary and hopes are entertained that a hardy beef producing animal will be evolved for grazing in northern territory. The report of the Dominion Animal Husbandman for 1927, published by the Department of Agriculture, at Ottawa, contained an account of the work so far accomplished. This breeding work is being carried on at Wainwright, Alberta. The Dominion Animal Husbandman states in his report that the experiment, in so far as it has gone, has been remarkably successful as shown through the numerous excellent individuals combining the blood of the yak and buffalo, the yak and domestic cattle, and their offspring now coming combining the blood of buffalo, yak, and domestic cattle.

World's Biggest Banks

Out Of the Twelve Most Important Two Are Canadian

Which are the biggest banks in the world? Most people, we suppose, would be inclined to say that these would be found in the United States. But they would be wrong. Information on the subject has been obtained in France showing the relative position, according to deposit liabilities, of the largest banks of the British Empire and of the United States. The figures, which are compiled mainly from American sources, show that out of the 12 most important banks in the world eight are British (two Canadian), and out of the six great banks with more than £[illegible] in deposits the first five are British, the sixth on the list being American.

Prefer Trial By Judge

Few Japanese Take Advantage Of New Jury System

The surprisingly few defendants who have taken occasion to ask for trial by jury and the fact that appeals from the jury verdicts have been based on the claim that the judge was prejudiced are two of the outstanding results of the five months' trial of the jury system in Japan.

Only 26 cases have gone to the jury since October 1, when trial by jury became effective in all parts of Japan. The defendant is not required by law to be tried by jury, but is given his option of this form or the older form of trial by judge.

Wanted Her Change

A woman travelling northward from Banbury pulled the communication cord when the train had left the station some distance. The train was stopped, and when the guard made inquiries the woman stated that she tendered a boy sixpence for an apple on Banbury station platform and wanted her change.

Indication Of Prosperity

The purchasing power of the people of Canada increased by $500,000,000, during 1928, when the revenue from the productive industries reached the record total of $6,040,272,000, an increase of about $500,000,000 over 1927.

Health Is a National Asset, More Valuable Than Crops, And Must Be Conserved

Alteration In School Lands Sales Policy

Little Demand For Them At Present Says Minister Of Interior

A change in the policy of Hon. Charles Stewart, minister of the interior in regard to the sale of school lands has been announced. The statement issued by the department reads as follows:

The Minister of the Interior has recently received representations from stock associations to the effect that the Saskatchewan ranchers should be allowed the same measure of consideration as the Alberta ranchers received in connection with school lands which form an integral part of their ranching operations.

"The minister says that from the results of the Alberta sales held last fall, it is quite apparent that there is very little demand for such lands at present at the minimum upset price which is $7 per acre, and under the circumstances it has been arranged with the provincial authorities that on the request of the holder school lands will be withheld from the forthcoming spring sales where they abut on two or more sides the holdings of permittee of the school lands.

"Apparently some ranchers have been using school lands surrounded by their Dominion lands grazing leases without taking out school lands grazing permits and in order to qualify under the arrangements they will have to pay the accrued back rental on these parcels. [illegible] arrangement will cause no hardship to the rancher and will add materially to the revenue of the school [illegible]

These school lands will be offered for sale when there is a better demand, and when there is chance of obtaining better price."

Ship Eggs To South America

Sample Shipment From Vancouver Goes To Buenos Aires

In a belief that egg shippers in Canada and more especially those along the Pacific coast, should secure a large share of the Argentine import trade, the Dominion Livestock Branch has just made a sample shipment of fresh extras and fresh firsts to the Canadian Trade Commissioner, at Buenos Aires who will present samples to the importers in that city. The fact that all shipments are Government inspected is taken as an important factor in capturing a share of this trade.

Proved To Be Right

Sandy Gordon was getting married, and as the wedding day drew near he began to find that it was costing him more than he bargained for, so he asked a crony what the minister charged for officiating at due ye for that?" "Oh," he replied, "Weel, Sandy, after I got married I asked the minister, 'Hoo much am I due ye for that?' 'Oh,' he replied, 'just what ye think she is worth.' So I handed him a shillin'. 'You're far too generous,' said he, and handed me back a saxpence. An' d'ye ken, Sandy, he was richt!"

British M.P.'s were first paid a salary on April 1, 1911

(By Dr. Gordon Bates, General Secretary, Canadian Social Hygiene Council)

Is the life of a farmer worth as much to Canada as the life of a stockbroker in a big city?

I think so.

Then, why is it that so much more money is spent on safeguarding the stockbroker's life and health than the farmer's?

Why is it that to keep the stockbroker healthy, the big city has an efficient medical health officer, working all day every working day in the year and an excellent health department while the farmer has only an overworked part-time county medical health officer to advise him about what to do in order to keep from getting sick?

Of course, it is an excellent thing that the city people should have their big health organization to protect them against typhoid, smallpox, diphtheria and all the other diseases that kill many thousands of Canadians every year long before they have lived out their three score and ten.

For it has been proven beyond a doubt that in Toronto, for just one instance, there would be 2,700 more deaths every year if it were not for the activities of the Toronto Medical Health Officer and his staff in keeping sickness down and saving lives from them.

But if that is the case and it undoubtedly is, then why shouldn't people in the country and in towns and villages share in all these life-saving advantages? They are just as important to Canada as the lives of city dwellers. We are all Canadians. Yet every year in rural and semi-rural Canada thousands of lives are lost that could have been saved, if these places had the same public health work done for them, that the cities have.

The answer is that public health work, though it saves lives, costs money. And the big cities have the money to spend while the rural counties have not.

But is that altogether fair? Already many prominent Canadians are beginning to decide that it is not. More and more, people are beginning to think that health is a national asset, more valuable than gold mines or railways, and as valuable as crops and rain, and that it must be conserved.

In Quebec where people began to feel this way some time ago they organized "County Health Units," small full-time medical health departments. Since then the counties protected by the County Health Units have had fewer deaths and fewer cases of sickness than ever before. Their health has improved amazingly. Hundreds of lives have been saved.

What has worked in Quebec will work equally well all over Canada. Some day every part of Canada will have County Health Units. Even now a plan is being worked out, and it is hoped that it will be adopted whereby the Dominion and the provinces will combine to help the counties to pay full time County Health Units.

Some such plan must inevitably be put into effect. Until it does, valuable lives are being lost each week in rural Canada, lives that the country can ill afford to lose. Lives that could be saved, if country people had the same chance that city people have.

Swedes Receive Radium

Six grams of radium, valued at $303,000, have just arrived in Stockholm from Belgium. They were purchased with a part of the Million Dollar Jubilee Fund, which was collected by Swedes at home and abroad as a gift to King Gustaf on his 70th birthday.

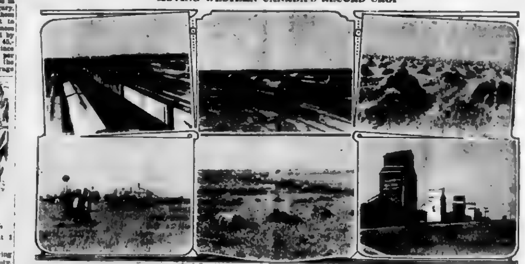
"Did you notice that man with his hat down over his nose?"

"Yes, it makes it easier for him to talk through it at once."

"Once a week I am going to play whist in the luncheon hour."

"There you go! I can see you dying a miser's death at Monte Carlo."—Juge [illegible]

MOVING WESTERN CANADA'S RECORD CROP



Busy scenes during the moving of Western Canada's record crop over the lines of the Canadian Pacific Railway. The Company smashed all existing grain hauling records this year in rushing the crop to world markets. The views show concentration of grain cars and locomotives and typical scenes in the wheat fields during the harvest.

Ever Pure
Makes Pastry Delicious—Ensures Success

WORLD HAPPENINGS BRIEFLY TOLD

The French Parliament has ratified France's signature to the Kellogg renunciation of war pact by a vote of 570 to 12.

There were 2,5... unemployed in Germany on February 15, an increase of ... since the end of January, official figures show.

The year 1928 was a disastrous one for Canadian hail insurance companies, the loss ratio being 100.80 per cent. of the premiums, according to official figures released at Ottawa.

... made by the Canadian Bank of Commerce that arrangements have been made to open a branch at Fort Churchill, Man., the eventual terminus of the Hudson Bay Railway.

France notified the League of Nations that she is in favor of a British proposal for an opium inquiry in the far east by a committee of experts. She will contribute $5,000 to the expenses of the inquiry.

The question of the provision of a submarine telephone cable between England and the United States, Canada and Newfoundland is likely to be a matter of early consideration by the British postal authorities.

Edmund J. Massicotte, well known Canadian artist, died at his home at Sault Aux Recollets, Que., after a short illness. He was 53 years of age. Massicotte was known chiefly through his pen and ink sketches of Canadian subjects.

A total of $9,814,531.65 was spent in 1928 in grading, track laying, and ballasting on the Canadian National Railway lines according to a report tabled in the House of Commons by Hon. Charles Dunning, minister of railways.

Newly Married Man (agitated and apprehensive): "I wonder what my wife will say when I get home."

His Friend: "When you've been married as long as I have, old man, you'll know beforehand."

Examination Of Mine Prospectuses Likely

British Columbia Will Legislate To ...

Legislation designed to protect investors in British Columbia mines is being introduced in the Provincial Legislature by the Government. It will force all new mining companies to file copies of their prospectuses with the mines department as soon as they are issued so that the department may act immediately against any misleading statements about mineral properties.

The new law is designed to speed up the issuance of official statements and so prevent "wild cat" promotions from obtaining the public's money before they can be quashed.

It's Simple—Smart

World's Poultry Congress

Canada To Be Well Represented At Big Event In London In 1930

Canadian poultry breeders will exhibit in the neighborhood of 1,000 birds at the World's poultry Congress to be held at the Crystal Palace, London, in July, 1930, according to F. C. Elford, Dominion Poultry Husbandman and president of the World's Poultry Science Association. Canada will also enter an educational exhibit also. Dr. W. R. Motherwell, Minister of Agriculture, has named an executive committee, composed of the various Provincial Ministers of Agriculture, with H. B. Donovan, internationally-known poultryman, as chairman. There will also be various sub-committees with their respective chairmen.

ABOUT YOUR NERVES

Headaches and Other Troubles Follow When the Nerves Give Way

Nerves are delicate fibres running from the brain to all parts of the body. Some of them give us the sense of touch and feeling, others convey the will to our muscles and enable us to move. When we have an "attack of nerves" it means that the body is in some way out of order and the nerves have become over-sensitive so that we get neuralgia, nervous headache, sciatica, or some other nerve trouble. Sometimes the nerves get too weak to do the will of the brain, and we get trembling hands or limbs, or perhaps St. Vitus dance. The whole nervous system is fed and kept healthy by your blood. If that is thin and poor nervous weakness follows. In that case a tonic is needed to build up the blood, so that it may in turn feed the nerves, spine and brain. The very best medicine for enriching the blood is Dr. Williams' Pink Pills. You cannot take them without feeling the uplift they give. Your appetite improves, your brain is clearer, you feel full of new life. One sufferer, Miss Margaret R. MacDonald, Catalone Road, N.S., tells what this medicine did for her. She says:—"I suffered for a long time from severe headache and nervous exhaustion. I tried several kinds of medicine but got no relief until I used Dr. Williams' Pink Pills, and these, before long, gave me complete relief. From my own experience I feel that I cannot praise Dr. Williams' Pink Pills too highly, and would advise anyone who is suffering from headaches or nervous exhaustion, to give them a fair trial, as I feel sure the results cannot be anything but satisfactory."

Take these pills as a tonic if you are not in the best physical condition and cultivate a resistance that will keep you well and strong. You can get these pills through any medicine dealer or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Christie's Sultanas

Packed full of plump Smyrna Sultanas, all seedless, (a Christie special secret) and retaining the natural flavor of fruit fresh from the sunny vineyards. That's just one reason why Christie's Sultanas are so exceptionally delicious.

SUNDAY SCHOOL LESSON

MARCH 17

THE CHRISTIAN SABBATH

Golden Text: "For the Son of man is Lord even of the sabbath."—Matthew 12.8.

Lesson: Genesis 2.2, 3; Exodus 20. 8-11; Matthew 12.1-14; 28.1-10; John 20.19; Acts 20.7; Romans 14.4-6; Revelation 1.10.

Devotional Reading: Psalm 92.1-5, 12-15.

Explanations and Comments

Reverence the Sabbath, Exodus 20. 8-11. Remember the Sabbath day, to keep it holy: The root meaning of the word rendered "hallowed" in verse 11, is "to separate"; the Sabbath day is to be separated from other days by the way it is spent. Six days shalt thou labor, and do all thy work.

There are many persons whose difficulty in keeping this fourth commandment lies right there—they are too lazy to work the six days. The commandment lays stress upon working as well as upon rest. "Every man is as lazy as he dares to be," is an oft repeated saying which is not without some measure of truth. "Life without industry is sin," declares Ruskin. The tragedy of many a life is that time is not felt to be a trust for whose use he must render account. "'Tis the measure of a man—his apprehension of a day."

"You keep the sabbath in imitation of God's rest. Do by all manner of means, and keep also the rest of the week in imitation of God's work."—Ruskin.

The seventh day is a sabbath unto Jehovah thy God: in it thou shalt not do any work. The seventh day is to be distinguished from other days by the cessation of labor. "The sabbath was made for man," Jesus declared. The needs of body, mind and ...

Noted Explorer Dies

Surgeon-Captain Edward Atkinson, commander of the Antarctic expedition that found Captain Scott and his companions and brought back the records in 1912, is dead at the age of 46 years. He served with the Grand Fleet in the war at Gallipoli and with the Howitzer Division in France, earning the D.S.O. and mention in despatches.

New Form Of Identification

Tooth prints have been added to finger prints and foot prints as means of identifying criminals. When inquiring into a burglary at a priest's house at Odense, Denmark, the police found teeth marks in a sweet in the form of a marzipan pig. A suspect's teeth were examined and found to tally with the marks on the candy.

ACHES

WHEN a cold or exposure brings aches and pains that penetrate to your very bones, there is always quick relief in Aspirin. It will make short work of headaches or any little pain. Just as effective in the more serious suffering from neuralgia, neuritis, rheumatism or lumbago. No ache or pain is ever too deep-seated for Aspirin tablets to relieve, and they don't affect the heart.

Aspirin is a Trademark Registered in Canada

Asthma No Longer Dreaded

The dread of renewed attacks from asthma has no hold upon those who have learned to rely upon Dr. J. D. Kellogg's Asthma Remedy. So safe do they feel that complete reliance is placed on this true specific with the certainty that it will always do all that its makers claim. If you have not yet learned how safe you are with this preparation at hand get it today and know for yourself.

One of the world's largest dams has been constructed on the Indus river, in India, for irrigation purposes.

Internal parasites in the shape of worms in the stomach and bowels of children sap their vitality and retard physical development. They keep the child in a constant state of unrest, and, if not attended to, endanger life. The child can be spared much suffering and the mother much anxiety by using a reliable worm remedy, such as Miller's Worm Powders, which are sure death to worms.

The Japanese alphabet possesses two sets of characters—katanaka for the use of men, hiragana for women.

The Oil Of The People.—Many oils have come and gone, but Dr. Thomas' Eclectric Oil continues to maintain its position and increase its sphere of usefulness each year. Its sterling qualities have brought it to the front and kept it there, and it can truly be called the oil of the people. Thousands have benefited by it and would use no other preparation.

At Broussa a Turkish captain has been sentenced to a year's hard labor for opposing the new alphabet introduced by Mustapha Kemal.

Sores Flee From It.—There are many who have been afflicted with sores and have driven them away with Dr. Thomas' Eclectric Oil. All similarly troubled should lose no time in applying this splendid remedy, as there is nothing like it to be had. It is cheap, but its power is in no way expressed by its low price.

The first patent for the manufacture of wallpaper was taken out in 1692.

Minard's Liniment prevents Flu.

Turkey possesses important forest resources, chiefly in the northern districts of Anatolia.

When Pain Comes

What many people call indigestion very often means excess acid in the stomach. The stomach nerves have been over-stimulated, and food sours. The corrective is an alkali which neutralizes acids instantly. And the best alkali known to medical science is Phillips' Milk of Magnesia. It has remained the standard with physicians in the 50 years since its invention.

One spoonful of this harmless, tasteless alkali in water will neutralize instantly many times as much acid, and the symptoms disappear at once. You will never use crude methods when once you learn the efficiency of this. Go get a small bottle to try.

Be sure to get the genuine Phillips Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

CHAPTER XVI.—Continued.

Wild berries, dead ripe, hung on lush drooping branches.

A soft "prut-prut-kwit-kwit" came from the leader of a covey of willow grouse that were feeding on the tiny fruit of a crab-apple tree. The call was answered by a shyer note from one of the young birds, who probably was being taught the scale.

The summer had been one of exceptional dryness. For weeks there had been no rain, and a blazing hot sun had poured its fiery rays from a cloudless sky. The heavy mountain dews could not penetrate the close standing timber, and the carpet of needles and moss became dry as tinder. A pall of smoke, from fires raging on the Coast, hung over lake and mountain.

For Wilkinson and his men these were anxious days. They covered the section between the mill and Squamish twice a day, scanning the hillsides and valleys, ever watchful, ever on the alert; pleading and exhorting the settlers and loggers to greater vigilance, and all the while praying fervently for rain.

Donald had posted a notice that any employee found smoking in the woods would be immediately dismissed. Logging creates a vast amount of debris, or "slash," as it is known to the men of the woods. With the assistance of the Forestry men, Donald's crew had piled enormous heaps of slash on the hillside, awaiting a favourable opportunity to burn. These menacing piles of brush, extending along the main road for a quarter of a mile, were a constant source of danger. Every precaution, therefore, was taken. The spaces between the mounds of brush were raked clean, the road was patrolled day and night, and pails filled with water were placed at regular intervals. Special notices stating the great danger of fire, and warning not to smoke in this area, were posted conspicuously on tree and stump.

... drift from behind a fir tree at the edge of the clearing. Without comment, both men broke into a run.

Aroused by the crashing footsteps, a young man, who had been lying stretched lazily on the soft moss, came quickly to his feet, a cigarette held in his fingers. His companion, also smoking, lay with his back against the bole of a tree a few feet distant. Fishing rods, creels, landing-nets and the remains of a lunch lay scattered on the ground.

"Don't you know better than to smoke here?" blazed Wilkinson.

The fisherman brazenly replaced the cigarette between his lips. Wilkinson's arm shot forward like a flash to pluck the offending weed from the mouth of the astonished youth. "I wish we had a law to prevent smoking in the woods. I would take great pleasure in arresting you," he growled savagely as he pinched the fire from the cigarette and ground it under his heel.

Unnoticed by the Forest Ranger, the second man removed his cigarette furtively and with a flirt of his hand threw it behind him as he rose to his feet.

"You are too damned officious! You have no authority to prevent us smoking," he said angrily, as with clenched fists he advanced belligerently.

Wilkinson was near the breaking point. The weeks of worry, the long hours of arduous toil, and the lack of sleep had frayed his nerves. "Damn you!" he flared, "if it's a fight you want——" He broke off suddenly, his eyes wide and staring. "My God! look!" he shouted. A flare of flame shot from the spot where the cigarette had fallen. A breeze rustled through the trees to fan the flame to a drumming roar as a pile of slash caught fire. The Red Terror was loosed.

"The alarm!" cried Wilkinson.

"Fire!.. shouted Donald as he stumbled to the road.

"Fire!" repeated the nearest patrolman.

"Fire!" rang the cry down the line until the call reached the mill, and every whistle was loosed in a screaming bedlam of sound to blanch the cheeks of these hardy men, who knew the awful terror of this devastating, devouring, fiery scourge that blasts the wilderness with smoke and ashes and takes its toll of both man and beast. Men dropped their tools ...

Recipes For This Week

(By Betty Barclay)

ECONOMY PUDDING SAUCE

- 1 tablespoon cornstarch.
- Few gratings lemon rind.
- ½ cup sugar.
- 1 cup boiling water.
- 2 tablespoons butter.
- 2 tablespoons lemon juice.
- Few gratings nutmeg.
- Few grains salt.

Mix cornstarch, lemon rind and sugar; add water, gradually, stirring constantly, and boil five minutes. Remove from fire; add lemon juice, butter and seasonings.

BOW-MAN'S BAKED HAM

- 1 thick slice of ham.
- 2 apples.
- ½ cup nectars raisins.
- ¼ cup brown sugar.
- ½ cup water.

Place ham in baking dish, cover with raisins, then with apples, cut in slices. Sprinkle sugar on top, add water, cover and bake in moderate oven 45 minutes or until ham is tender.

Corns are painful growths. Holloway's Corn Remover will remove them.

SOME SIMPLE PRECAUTIONS AGAINST INFLUENZA

SUN LIFE ASSURANCE COMPANY OF CANADA

A TOWER OF STRENGTH

1928

Assurances in force (net) An Increase of $406,925,000	$1,896,915,000
New Assurances Paid for An Increase of $112,836,000	441,244,000
Total Income An Increase of $41,972,000	144,747,000
Surplus earned during the Year	40,264,000
Payments to Policyholders and Beneficiaries	49,920,000
Surplus and Contingency Reserve An Increase of $9,157,000	66,938,000
Total Liabilities (Including Paid up Capital)	422,020,000
Assets, at December 31st, 1928 An Increase of $87,652,000	488,958,000
Rate of Interest earned on mean invested assets (net)	6.58%

DIVIDENDS TO POLICYHOLDERS INCREASED FOR NINTH SUCCESSIVE YEAR

The Company has also inaugurated the practice of paying a special maturity dividend on participating policies, five or more years in force, terminating by death or maturity.

EXTRACTS FROM DIRECTORS' REPORT

... After deducting amounts re-assured, the total assurances in force now amount to $1,896,915,934.57, an increase of $406,925,134.48. Policies in force number 633,240, and in addition 136,293 certificates of assurance are held by employees of corporations and firms under the group plan.

While every field of operation contributed its full share to these impressive advances, the rapid development of our business in Great Britain and the United States is especially noteworthy.

The surplus earned during the year, based on the values given in the accounts, amounted to $40,264,068.32.

$10,000,000. has been deducted from the already heavily marked-down value of securities, as additional provision against possible fluctuations.

SUN LIFE ASSURANCE COMPANY OF CANADA

Three Hazardous Jobs

Railroad Worker, Steel Worker, and Miner Are Great Chances

The three most hazardous jobs in America are those of the steel worker, the railroad yard worker, and the miner, reports the Bureau of Labor Statistics. Other hazardous occupations are glass blowing, slaughtering, and meat packing, and work in lumber planing mills.

During the last year the number of accidents were reduced in almost every industry. However, one worker in 16 suffered injury, losing an average time of 71 days. For every fatal accident there were 135 minor ones. The total time lost during the year due to accidents was more than 10,263 years.

Mrs. Sam Speers Tells How Cuticura Healed Her Baby

"When baby was three days old he seemed to break out with eczema. It began with very small pimples which later festered and broke and then scaled over. When he was twelve days old he was almost entirely covered with eruptions. The affected parts seemed to itch and burn so that I had to put mittens on his hands to prevent him scratching his face.

"My mother advised me to try Cuticura Soap and Ointment. He seemed to get relief after the first treatment, and in two months he was completely healed." (Signed) Mrs. Sam Speers, Innisfree, Alberta.

Cuticura Soap, a world-famous aid to beauty, cleanses and purifies the skin and hair, restoring them to their natural, fresh and wholesome beauty. Its daily use maintains them in a delightfully healthy condition.

Little Helps For This Week

"Truth shall be thy shield and buckler."—Psalm xci. 4.

Get but the truth once uttered, and it is like
A star new-born that drops into its place,
And which, once circling in its placid round,
Not all the tumult of the earth can shake.
—James Russell Lowell.

Delight no less in truth than life.
—Shakespeare.

Goldsmith: For my part, I'd tell the truth and shame the devil.

Johnson: Yes, sir; but the devil will be angry. I wish to shame the devil as much as you do, but I should choose to be out of the reach of his claws.

Goldsmith: His claws can do you no harm when you have the shield of truth.—Boswell's Life of Johnson.

A total of 6,030 miles of road was constructed during 1927, and 44,416 miles were maintained under provincial patrol or gang maintenance systems.

There is coal in almost all of the islands of the north and much of that area is favorable to mineralization, in the opinion of George P. Mackenzie, former gold commissioner ...

Hurricanes which blow at a rate of 80 miles per hour exert a pressure of 32 pounds per square foot.

Success is not made by lying awake at night, but by keeping awake in the daytime.

FRANK O. BALL, AUCTIONEER

That Tired Feeling

May be nothing more than the natural re-action of the human organic system due to the change of seasons. At this time, the change-over period from winter to spring, a good tonic will be found to be of much benefit—both as regards keeping well and improving ones condition when unwell.
A good tonic taken at this time of the year is worth more than it costs, and will in the big majority of cases result in improved health, greater vigor and increased energy.

A jolly evening was spent at the home of Mr. and Mrs. Baptiste when they entertained a number of young folk to a whist party on Friday. Those that earned the prizes with high score were Mrs. A. Bigland and Arthur Francis. The consolations were taken by Mr. and Mrs. Carl Bist. Mrs. Baptiste and daughters served a dainty lunch about midnight, after which all had an hour's [illegible] then departed for home. Everyone reported an enjoyable time.

A very successful whist drive was held on Monday at the Curling Rink. Prizes were won by Mr. L. Gill, 1st; and H. T. Ward, consolation; Miss Edna Campbell, 1st, Mrs. Wm. Lee consolation. A pleasant feature of the evening was the presentation to Mr John Morton for services rendered during the bonspiel a smoker from the men and a fountain pen from the ladies.

THE DIFFERENCE

Buy a pound of TOFIELD CREAMERY BUTTER and Note the smooth creamy, clean flavor.

Note the wavy, even, texture not found in all butters.

Note the even color throughout and then decide on having the best.

Tofield Creamery butter is made from Clean, Sweet Cream pasteurized daily under the most sanitary conditions.

All equipment connected with its manufacture is thoroughly sterilized daily.

TOFIELD CREAMERY BUTTER is made in your own town but put up in a new wrap.

The name on the new wrap stands for quality.

Try it. [illegible] By all means have [illegible] cost no more.

W.I. NOTES

The Women's Institute held their regular monthly meeting in the Institute rooms Tuesday, March 19th. Unfortunately the attendance was poor and on that account the speaker for the day, Mr Pinnott kindly agreed to postpone his address until our [illegible] meeting when we hope a large crowd will be able to take advantage of the opportunity to hear Mr Pinnott speak on the subject of "Wills and how they affect the women of Alberta."

After the business had been disposed of the President read a letter she had received from Mrs Pinnott offering [illegible] of the "Polmatier Sisters" [illegible] on a concert for the benefit of the Institute. This should prove [illegible] the community and a [illegible] of enjoying oneself and helping a worthy cause at the same time. Tickets [illegible] concert will be sold by the [illegible] members.

A resolution was passed to enlarge the bookcase in the library to accommodate [illegible] new books received recently.

R[illegible] for salads and drinks were collected.

A delicious lunch was served by the [illegible] Mrs. Jubb and Mrs. Clatterham.

DEBATE TO BE HELD

The [illegible] Local of the U.F.A. and the U.F.W.A. will hold a debate on Thursday, March 28th, at the town hall, [illegible]. The subject will no doubt prove of much interest to many being a live present day topic, viz: Resolved that prohibition is preferable to the present system of government control of liquor in Alberta."

There will be five debaters on each side and the affirmative will consist of T. R. Murray, E. Googlein; V. Moss, Mrs A. N. Booth; Mrs. R. C. Phill[illegible]. Negative J. Ferguson, J. McMullen; Reg Beatisto; Mrs. Gray; Mrs. Warner.

PUBLIC SALE OF LANDS

Notice is hereby given that, under the provisions of the Tax Recovery Act 1922 and amendments thereto, the Municipality of the Town of Tofield will offer for sale by public auction, at the Town Hall, Tofield, Alberta, on Saturday the 6th day of April 1929 at 2 o'clock p.m. the following lands:

Block	Plan
6	[illegible]
8	do.
10	do.
14	do.

The above described lands will be [illegible] subject to a reserve [illegible] the [illegible] contained in [illegible] certificates of title. Redemption may be effected by payment [illegible] arrears of taxes and costs at [illegible] time prior to the sale.

Dated at Tofield, this 20th day of March 1929.

J. W. CHAPMAN,
Secretary Treasurer

Spring Poets

Spring is the time of the year when poets good and bad are abroad in the land.

Spring sunshine gives inspiration to many people to give vent to their feelings in language more beautiful than commonplace.

There are however, a number of spring poets around this year that have more than ordinary reason to give vent to their feelings in language different from the commonplace.

We refer to those who have left their cars stand around all winter and when they try to start it, find that it doesn't want to go. What they say we don't want to put into print, but if it is poetry we are sure it is not faultless rhyme.

Don't work yourself into a poetical frenzy when your car refuses to run right, but bring it to the

TOFIELD GARAGE
P. M. HAUGEN PROP.

BARDO

A large number of Bardo people attended the funeral of Miss Clara Matheson, which was held at Round Hill on Wednesday.

A pie social was held at the Bardo school last Friday night. An excellent program was first rendered, after which Mr. Korem auctioned off the pies. The sum of twenty-three dollars was raised, and is to be used in supplying the school with sport equipment.

M[illegible] Martin spent the week end at her home in Edmonton.

Miss Irene Rude spent the last week end visiting her mother and sister Nora in Edmonton.

A large number of friends gathered at the [illegible] Anderson home last Tuesday evening to remind Ben that it was his birthday again. Several games were played and everyone seemed to thoroughly enjoy themselves. At midnight a delicious lunch was served, and after the singing of a few songs the party came to close.

Mr. Vernon Yoder arrived from the [illegible] with a bride recently. Mrs. Yoder was the former Miss Phoebe Roth of Nebraska. They will make their home on the Dave Yoder farm.

Mrs. Jacobson spent several days of last week visiting friends in Amisk Creek.

Mr. and Mrs. Axel Lindley visited with Mr. and Mrs. R. Eide on Sunday.

Mr. and Mrs. I. M[illegible], and Mr. and Mrs. [illegible] Finseth attended the shower given for Miss Clara Annebo, at the Annebo home on Sunday.

There was the usual large attendance at the bible Class last Sunday evening.

Mrs. G. Hendrickson will entertain the U. F. W. A. on Wednesday March 27th.

LINDBROOK

The evening of the 17th of March, St Patrick's day, a surprise party visited Mr Otto Landgren (the name doesn't sound Orish does it, but then Mr L[illegible]dgren hails from Sweden) at his home here to celebrate his ? birthday. Music and singing were the amusements and later his daughter, Vada, who along with others had planned the party, provided a dainty supper. [illegible] birthday cake gave no clue as to his age but on some cookies were [illegible] his initials and reversing this some said he was 70 [illegible] Otto." Anyway all enjoyed the party immensely and may we see lots more 17th's of [illegible].

Mrs. M. Swain is visiting her daughters, Mrs. W. Glenn and Mrs. A. Whibley of this district this week.

Mrs. Whibley was a visitor to Edmonton this last week.

Mr. Bert De Witt of Ardrossan visited Messrs. Robert and Sandy Scott last week end.

Mr. C. K. Kortman and son Walter were pleased to see their wife and mother, Mrs. Kortman last week end on a visit from Edmonton.

Mr. and Mrs. Gill held a whist drive at their home on Friday. Twelve tables were played. Mrs. Stine won the ladies' first prize and Mrs. Brau[illegible] secured the booby. Mr. H. McGun[illegible] won gents first whilst our old friend H. Creseling sneaked up on the booby. After a dainty supper all went home thoroughly enjoyed with a pleasant evening.

The J. Bailey jr. family moved on to their new place, late the Foss quarter, [illegible] March 5th. Welcome to [illegible].

NOTICE OF PREPARATION OF ASSESSMENT ROLL.

Town of Tofield Assessment Roll 1929

NOTICE is hereby given that the Assessment Roll of the Town of Tofield for the year 1929 has been prepared and is now open for inspection at the office of the secretary treasurer of the town from ten o'clock in the forenoon to four o'clock in the afternoon on every day which is not a public holiday, except Saturday, and on that day from ten o'clock in the forenoon to two o'clock in the afternoon, and that any person who desires to object to the entry of his name or that of any other person upon the said roll or to the assessment of any property or to the assessed value placed upon any property, must within thirty days after the date of this notice lodge a complaint in writing with the Secretary Treasurer of [illegible].

Dated at Tofield this 21st day of March 1929.

J. W. CHAPMAN,
Secretary Treasurer

KINGMAN

O. Bard and R. M. Thompson were in Edmonton a couple of days last week.

W. Wideman shipped a carload of cattle on Tuesday.

J. K. Dettweiler and L. Ovelson have been busy unloading two carloads of lumber for the local yard.

Mr. and Mrs. Aas of Tofield visited with Mr. and Mrs. A. Bertness on Thursday.

John Nelson of Hay Lakes visited with Mr. and Mrs. Thor Grahn for a couple of days before leaving for the United States.

Mr. and Mrs. Dahl of Hessler and Mrs. A. Klemp of Camrose visited with Mr. and Mrs. W. Jardie over the week end.

A very enjoyable evening was spent when a number of Kingmanites gathered at the home of Mr. and Mrs. Nels Jardie on Saturday evening. Mr. and Mrs. Jardie were married a few days ago his bride recently arriving from Oslo, Norway.

KETCHAMOOT

The first field work started on Monday. J. H. Ingram was discing. No doubt others started too as the fields are in exceptional good shape for this time of the year.

Mr. Frank Hull celebrated his 75th birthday anniversary on Monday, March 18th.

Mr. Soma was able to return home last week from the Camrose hospital.

Miss Emma Bruha came on Monday for a visit at the home of her sister, Mrs. Henry McGinitie.

Mrs. Harold Smith of Camrose is visiting at the home of her parents, Mr. and Mrs. Geo. Lawson.

Mr. and Mrs. Geo. Cookson returned home on Sunday from Rochester, [illegible] treatment in the [illegible] hospital for several weeks. We are sorry to hear his condition is not very satisfactory.

Mr. and Mrs. Henry McGinitie entertained the young people of the community to a card party on Wednesday night of last week. Eight tables played whist, prizes going to ladies first Miss Mabel Thompson, gents first, Roy Lee, consolation, Mrs. John Brown and J. Thompson. Refreshments was served by the hostess assisted by Miss Annie Bruha. Dancing was indulged in for a short time after which they departed for home, thanking the host and hostess for a pleasant evening.

On Wednesday afternoon Mrs. L. Carlisle entertained the M.A.S. at her home. A goodly number of members and visitors were present, we were glad to have Mrs. Gordon with us again after a long absence through illness. After the regular routine of business was gone through with, refreshments were served by the hostess. The April meeting will be held at the home of Mrs. J. Appleby.

A short congregational meeting was held after the services on Sunday to discuss building a church. It was thought advisable to postpone building operations until another year. Morning services are asked for, as we have had afternoon services for about twenty years: therefore Tofield Sunday school should supply their own Sunday school superintendent, as Rev. Gordon can come out in the forenoon at least for the summer months. As the congregation is half asleep in the afternoon through these months. We are asking for Sunday school at 10.15 p.m., preaching services at eleven, after the first of April.

SIOUX BLOOD FOR SATURDAY

This is a picture you can take with a whoopee! And it is not a blood and thunder thriller either. On the contrary it is a picture passed by the board of censors and carries the title of "passed-U" which distinguishes it from the ordinary run. The film is replete with daring deeds, hair line finishes, thrilling moments and moments that will to the onlooker be mirthful, at one time and serious at another. And of course love has been brought into the picture and altogether, Tim McCoy will star in a really good feature on Saturday.

Blending Red Rose Tea is an art. To obtain the fine flavor and full-bodied richness required years of experience. Every package guaranteed.

RED ROSE TEA "is good tea"

RED ROSE ORANGE PEKOE is extra good

In the best package—Clean, bright aluminum

The Evil Of Grain Mixing

Following the unsatisfactory result of grading the 1928 wheat crop of Western Canada a veritable deluge of protest and complaint has poured in to Dominion and Provincial Governments, Wheat Pools, Grain Commission, Grain Exchange, and all farmer organizations. Merchants and business men generally, suffering because the farmers have suffered, add their protests. In all this volume of criticism perhaps no one feature has called forth more vigorous objection than has the practice of mixing.

It is quite true that everybody does not see eye to eye on this subject, and farmers themselves are sharply divided on the issue whether or not mixing should be absolutely prohibited and made an offence under the law. While many favor such a policy, others hold the opinion that if mixing was entirely disallowed there would be a terrible glut of low grade and no grade grain on the market, with resulting enormous loss to producers.

The Saskatchewan Grain Inquiry Commission has gathered within its own province a mass of evidence on this and allied subjects affecting the grading and marketing of Western grain, and proposes to carry its investigations further afield in Manitoba, Alberta, British Columbia, and Europe in what is recognized as the most determined attempt yet made to find solutions to some of the acute problems confronting the Western grain grower. In due time the report and recommendations of that Commission will be laid before the legislative authorities.

There is, however, another form of mixing in regard to which there are no two opinions. It is unanimously denounced as an evil, and one that is costing the farmers of Western Canada many millions of dollars annually. Furthermore, control in the case of this particular form of mixing rests not with Governments or Wheat Pools, or Grain Commissions, but with the individual grain grower.

The form of mixing to which reference is made is that indulged in by so many farmers of sowing seed of mixed varieties. Instead of sowing only pure seed of one good variety, the seed too frequently used is a mixture of different varieties, white wheats mixed with red wheats, with consequent loss in value of the crop harvested. Thus the original mixing takes place, not in country or terminal elevators, not on board ship, not in the world markets, but right on the farms of Western Canada.

Investigation over a number of years has established the fact that [illegible]

ALBERTA PLANS GRAVELLING OF THREE HIGHWAYS

Edmonton, Alta.—The province of Alberta plans to expend a total of at least $16,000,000 on improving roads within the next three years, so Hon. O. L. McPherson, minister of public works, told a deputation from the Alberta Motor Association which interviewed the government recently.

Of this huge sum, during the year 1929, said the minister, the government will spend the sum of $4,347,000 out of capital and income accounts. This figure, however, includes interest and sinking fund charges on previous capital expenditures.

The expenditure for 1929 will cover the complete gravelling of three main highways from Central Alberta west to the Saskatchewan border. Of these three main highways, one of them, the gravelled road leading east from Calgary through Bassano, Medicine Hat, and on to Walsh, on the Saskatchewan border, will complete a trans-provincial highway clear across the province.

Thus, this main gravelled highway will extend from the Saskatchewan border through Medicine Hat, Bassano and Calgary, linking up with the gravelled highway to Banff.

Britain Plans Second Imperial Air Line

Will Link Capetown With London Says Air Minister

London, England.—Arrangements have been concluded for a second great imperial air trunk line, the two being approximately the same distance and being thus far the longest regular services in the world.

Sir Samuel Hoare, air minister, announced in the House that arrangements have been concluded for a service between London and [illegible]

Heavy Snow In Colorado

Wins McKee Trophy

Wants Canada To Develop Helium Gas

Operation Of British Dirigible Would Necessitate Obtaining Gas Here

London, England.—Development of helium gas for use in airships in Canada is a possible development of the building of the giant dirigibles for trans-oceanic transport by the British air ministry, Sir Samuel Hoare, air secretary, intimated in the House of Commons. He said it was hoped to approach the Canadian government later to see whether it would be possible to produce helium in Canada as the gas is produced and used extensively in the United States.

The two airships, he hoped, would be ready to take the air by spring or early summer.

If the home tests are successful it is proposed to make a flight to Egypt and India, and then to Montreal.

Toronto.—Large quantities of helium gas can be produced from the gas wells of the Bow River Valley, of Alberta, to the south of Medicine Hat. The production of helium in commercial quantities was first accomplished in Canada during the war as a result of researches made by Prof. J. C. McLennan, of the University of Toronto.

Helium is non-inflammable and though less buoyant than hydrogen, is much safer.

WONDERFUL KNOWLEDGE OF BIRD LIFE

The following taken from a Winnipeg paper will be read with interest by the many Tofield friends of the late Mr. Harrold.

The tragic death of Cecil Guy Harrold in New York City due to [illegible] following an attack of influenza [illegible] closed the career of a man still in his early thirties, just as recognition of his sterling qualities had brought him the most important appointment of his life. At the time of his death he was busy preparing the details of an expedition to Madagascar, going forward under the joint auspices of the American Museum of Natural History, the British Museum and the Paris Museum. The expedition was [illegible] February 9th.

C. G. Harrold was the most extraordinary field naturalist that it has been my lot ever to be associated with. He combined an uncanny [illegible] memory [illegible] in the wilds which often led to the most spectacular results.

One May day in 1925 when he was collecting for the National Museum at the [illegible] Lake, Man., we were just sitting down to lunch when Harrold suddenly jumped to his feet and said:

"There [illegible] Peregrine Falcon [illegible]." The camp was surrounded by trees and the [illegible] was not [illegible] noticed was the call of a Red Winged Blackbird from 100 yards away. This was quickly followed by the [illegible] of a crow, and then I saw through the trees the flashing form of a Peregrine Falcon.

Catching sight of our tent, the hawk swung toward it and was promptly collected by Harrold, the specimen incidentally proving to be the only one so far collected showing evidence of intergrading between the Peregrine and Prairie Falcons.

"How did you know the hawk was coming?" I inquired.

"Why, the Red Winged Black bird told me and the crow confirmed it," he replied.

I found that he could interpret the meaning of 15 different calls of the crow. This will illustrate the field wizarding to which he had attained and many similar incidents could be told of his remarkable powers in reading the meaning of sound and action of the wild. Harrold was far more than a student of wild nature he was part of it.

Amazing Capacity for Work

Tall and powerful in build, he was tireless in the field and the amount of work he would accomplish was amazing. I have seen him wade the marshes and tramp the prairie all day and then prepare specimens all night, snatching an hour or two's sleep just before dawn and then be up and on the go again with the rising of the sun. This would not be an occasional spell but a regular program two or three times a week during migration when specimens had to be secured and prepared without delay.

Maintain The Quality Of Alberta's Crops

BETTER SEED

Means

Better Yields — Better Grades — Better Prices

A special committee appointed by the Minister of Agriculture, with the co-operation of numerous organizations in the province, is urging the use this spring by farmers throughout the province of

High Quality, Clean, Treated Seed Grain

in order to reduce the heavy annual losses sustained by sowing inferior seed.

Farmers can co-operate by:

1. Using registered seed wherever available.
2. Using at least high quality commercial seed.
3. Having seed tested for germination and purity.
4. Treating seed for smut.
5. Seeding only varieties of recognized quality and varieties suitable to the district.

Good seed will be in demand this spring. Secure your requirements early—before the supply is exhausted.

U.F.A. Locals, Boards of Trade, the Wheat Pool, Banks, Commercial Grain Firms, the press, and many other organizations are working in co-operation with a—

BETTER SEED COMMITTEE

consisting of representatives of the Provincial Department of Agriculture, the Dominion Seed Branch, the Canadian Seed Growers' Association, the Alberta Seed Growers' Association, the C.P.R. Agricultural Department, and the University of Alberta.

D. A. McCANNEL,
Provincial Publicity Commissioner, Secretary.

TWO GIRLS LIVE ON HOT WATER AND RICE

Largest Single Item In The Dominion's National Wealth Is That Of Agriculture

The aggregate national wealth of Canada for the year 1926, was $26,691,482,000, says a report issued by the Dominion Bureau of Statistics. This figure is exclusive of undeveloped natural resources. Similar estimates placed the total wealth for 1925, at $25,673,174,000, and for 1921 at $22,195,000,000, "though these figures are not exactly comparable in view of certain improvements and additions made in the method of estimation," the report points out. The figures, however, can be taken to indicate an increase of about $500,000,000 for the twelve months under review over the previous like period, and approaching an advance of $3,500,000,000 in the five years 1921-26, the report continues.

The largest single item in the Dominion's national wealth for 1926 was that for agriculture, which reached a total of $7,817,713,000, or 29.29 per cent. of the entire amount. This figure includes the value of agricultural production for the year.

The second largest element was urban real property, which reached a figure of $7,061,275,000; the tangible value of the forests was $1,860,613,000.

As regards the provincial distribution of wealth, Ontario ranked first, with estimated aggregate wealth of $9,130,190,000, or 34.2 per cent. of the total, and Quebec second, with estimated wealth of $6,656,106,000. The western provinces came first in per capita wealth, however; British Columbia held first rank with a per capita wealth of $3,844; Alberta second, with $3,808; Saskatchewan, third, with $3,559; and Manitoba fourth, with $2,957. These figures may be compared with $2,902 and $2,500, the per capita wealth of Ontario and Quebec, respectively, and $2,842, the per capita wealth for the whole Dominion.

By provinces, the estimated wealth was:

Prince Edward Island, $145,745,000; Nova Scotia, $825,748,000; New Brunswick, $722,592,000; Quebec, $6,656,106,000; Ontario, $9,130,190,000; Manitoba, $1,869,806,000; Saskatchewan, $2,920,720,000; Alberta, $2,182,067,000; British Columbia, $2,185,910,000; Yukon, $12,473,000.

Rush For Homesteads

Hundreds Of Homesteads Taken Up In Three Prairie Provinces

From the point of view of new homesteads taken up, the year 1929 has got off to a good start January saw 761 homesteads filed upon, as compared with 457 for the same month last year—an increase, roughly, of two-thirds in favor of the present year. Alberta led the list with 396, as compared with 201 for January, 1928; Saskatchewan followed with 300 as against 194; Manitoba came next with 42 against 51, and British Columbia last with 24 against 11.

Object Had Vanished

The class had been told to bring things to school for drawing lesson, and just as the lesson was about to begin, a small boy was found standing tearfully at his teacher's desk.

"I've swallowed my object," he explained.

"What was it?" asked the teacher anxiously.

"A banana," replied the would-be artist.

Products produced from the forests of Canada have an annual value of about $475,000,000, of which approximately $450,000,000 is distributed for labour, equipment and supplies.

Teacher: "Can any of you tell me an old saying that is now out of date?"

Moses: "Yes, sir: 'Honesty is the best policy.'"—Humoristicke Listy, Prague

W. N. U. 1777

Range Investigations

To Determine Cause For Depletion Of Pasture Crops

Range lands pastured on from year to year apparently suffer by a depletion of certain of the valuable plants. A survey of many ranges in Southern Saskatchewan and Alberta, by officials of the Department of Agriculture, at Ottawa, revealed an acute shortage of pasture crop. Many of the ranchers were forced to reduce their stock. The shortage of feed was felt most during winter months and more than 90 per cent of the stock men found it necessary to cultivate some of their land for the growing of forage crops to supplement the native forage. Realizing that something should be done to place the ranching industry on a more permanent and secure basis, the forage crops and field husbandry divisions of the experimental farms have undertaken a programme of work that gives promise of very useful results. An experimental ranch, fairly representative of the large range area, has been established near the town of Manyberries, in Southeastern Alberta. In his report for 1927, published by the Department of Agriculture, Ottawa, Dr. G. P. MacRostie, the Dominion Agrostologist, announces that it is intended to put into practice different grazing methods including that known as deferred and rotation grazing. The grazing practices regarded as most desirable are those that combine maximum utilization with the maintenance of a vigorous vegetative cover of the climax types. The work is only commencing, but very hopeful results are expected from the range projects that are being undertaken.

Fertilizing the Strawberry Bed

Fertilizers Should Be Applied In the Fall For Best Results

While fertilizing the strawberry bed in the spring may increase the size of the fruit it does not increase the number of fruit buds in the plants. Investigations carried on by M. B. Davis and H. Hill, of the horticultural division of the experimental farms, leads to the conclusion that to increase the fruit buds, fertilizing of the patch requires to be done in the fall of the year. An account of the work published in Bulletin No. 110, of the Department of Agriculture, at Ottawa, shows that the highest yields of fruit were secured when the fertilizer was applied on September 15th, of the first year, and of August 15th, of the first fruiting year. These dates, it was learned, are quite close to the beginning of fruit bud differentiation as determined by microscopical studies carried on with the young plants.

In Need Of Publicity

New York Paper Has Queer Idea About Vancouver

Vancouver, which is voting some $80,000 this year for publicity purposes, might spend a few dollars of it New York to let New York know there is such a place. A New York paper, in alluding to Percy Williams' feat, says: "The young Canadian is a sensation, and well he might be, as he stepped from the backwoods of Northwest Canada into fame with a dual victory at the 1928 Olympic games." Evidently Vancouver has still a lot to learn about putting herself on the map.—Victoria Colonist.

Opinion Has Changed

The change that has taken place in the mental attitude of the people of Canada toward its vast northwestern areas is simply amazing. At the present time it is admitted on every hand that this territory is no longer a barren wilderness, but a region packed with immeasurable potential wealth, which only awaits enterprise and capital for its development.

U.S. Destroyers To Visit B.C.

The United States Government proposes to send six destroyers to visit British Columbia ports during the summer of 1929. Three of these vessels will be at Victoria, and three at Vancouver from July 11 to July 15. Announcement to this effect was made by Hon. J. L. Ralston, minister of national defence.

Now that a motorcycle has ridden along a tight rope it would seem that tight ropes are no longer safe for pedestrians.

Birds have the most remarkable memories of all wild life.

Indian Wedding

The ancient marriage rites of the Stoney People were exemplified when Chief Bear Paw and his minor chiefs united Miss Sylvia Hanlohton-Cate, of Hilversum, Holland, to Mr. Louis Lantzius, of Vancouver. Immediately after the picturesque Indian ceremony which took place on the Bow River at Banff, the couple were again married according to the rites of their own church. Bear Paw is seen placing the eagle feathers, emblem of faithfulness, on the groom's head and bracelet on the wrist of the bride.

Prefers Rural Life

Ontario Man Says Farmer Is His Own Boss

In a letter written to the Farmer's Advocate, "Digit," of Perth County, Ontario disagrees with an assertion that those who live on the farm do so because they cannot tear themselves away and are willing to lose money on the farm rather than draw a hundred a week in the city. He says: "I know of several offices in the city where I am welcome to go on the pay roll at any time. I have tasted some of the joys of city life and at a good salary. I came back to the farm for two reasons: First, I could earn more money and have more left when the year was up; and, second, there is not the worry and incessant demand of attention to business on the farm. As to the $100 a week, I met a couple of men who received that amount. I met a hundred who were competent and successful farmers, but had gone to the city, and only three or four were getting over $30 per week: they could have done as well had they stayed on the farm. Foolishly, we forget what it costs to live in the city."

Breeding Poultry Going Abroad

Market Opening Up In Many Parts Of the World For Record Of Performance Stock

Canadian poultry raisers and particularly those who are participating in the benefits of the Record of Performances, are finding a market for their stock in many parts of the world. One shipment, made from Vancouver, in the month of February included one thousand hatching eggs and twenty White Leghorn birds. This order was filled through the British Columbia Record of Performance Breeders' Association, that has already sent about three thousand eggs to Japan. The majority of the hatching eggs in this shipment were for the Japanese Experimental Farms system, while the breeding stock, consisting of five cockerels and fifteen hens from high record stock, were purchased by a Japanese breeder. The Live Stock Branch of the Department of Agriculture, within which the Record of Performance work is carried on, reports that of the eggs shipped to Japan last year the hatches were well over fifty per cent.

FASHION

No. 341 — Simulates Two-Piece Mode. This style is designed in sizes 16, 18, 20 years, 36, 38, 40 and 42 inches bust measure. Size 36 requires 3½ yards of 40-inch material with ½ yard of 36-inch contrasting.

No. 334—The Smart Bolero. This style is designed in sizes 8, 10, 12 and 14 years. Size 8 requires 1⅞ yards of 40-inch material with ⅜ yard of 36-inch black material for bolero and skirt, and ⅜ yard of 40-inch material for waist and collar.

No. 941—Chic and Slender. This style is designed in sizes 36, 38, 40, 42, 44, 46 and 48 inches bust, measure. Size 36 requires 3 yards of 40-inch material with ⅜ yard of 27-inch contrasting.

No. 387—Perfect Foundation. This style is designed in sizes 16 years, 36, 38, 40, 42, 44 and 46 inches bust measure. Size 36 requires 2⅝ yards of 36-inch material.

No. 912—For Classroom. This style is designed in sizes 8, 10, 12 and 14 years. Size 8 requires 1⅞ yards of 40-inch material with ⅛ yard of 36-inch contrasting.

Emb. No. 11053 —Six Conventional Motifs. Pattern contains two each of 3 designs, 6 inches wide by 8 inches high (blue).

We suggest that when you send for this pattern, you enclose 10 cents additional for a copy of our Fashion Magazine, showing all the most attractive Paris styles, embroidery, etc.

All patterns 25 cents in stamps or coin (coin preferred). Wrap coin carefully.

Make Soil Surveys For Establishment Of Agriculture On a More Scientific Basis

Fruits Of British Columbia

Almost Every Variety Of Fruits Now Grown On Pacific Slope

Most fruits except those indigenous to the tropics or sub-tropics, are now being produced in British Columbia. Apples apricots cherries, peaches, plums, prunes, nectarines, figs loganberries, raspberries, strawberries, grapes, almonds and other less hardy fruits and nuts are now grown commercially. The principal crop is apples, the production of which has increased in the last 17 years from 220,000 bushels to over 3,000,000 bushels.

Recent experiments have shown that some districts of British Columbia are likely to become notable as producers of fruits, nuts and crops that have hitherto not been grown in the province. Flowering bulbs are now being grown profitably.

Co-operative marketing is largely practised by fruit growers and farmers generally. A large percentage of the fruit produced in British Columbia is exported to distant markets, including Great Britain, the Orient and Australia. A horticultural branch is maintained by the Provincial Government to assist the industry.

Mistreating the Heart

Few People Pay Attention To Warning Of Trouble

Take care of your heart. You have only one. You give it a huge amount of work to do and it does it without telling you how you are mistreating it. But when it does rebel and tells you, pay attention to the warnings.

These are some of the evidences of a worn-out heart: You are short of breath on exertion that had not previously produced distress. You may notice that your shoes are tight in the evenings, but that you have no difficulty in putting them on the next morning. Then one day you take cold; the next day you are short of breath, you have a distressed cough and your feet are swollen.

As soon as the symptoms are relieved the average person wants to get up rather than to go about slowly and gradually getting back to his usual activity. It would not be unmitigated bad fortune for a person with a bad heart to have a broken leg too.

Just Ordinary Business

Certified Cheque For Large Amount Nothing To Office Boy

Engineering a very special matter of business involving the handing over of a hundred thousand dollars, a lawyer decided that a certified cheque would be as satisfactory as actual cash, and safer. He therefore drew his cheque to this amount made payable to "Bearer." He took it to the bank and spent most of an hour with an official arranging for the safe delivery of the paper to his office, for, as soon as the bank certifies a cheque to "Bearer" it is cashable by anybody, anywhere. It was arranged that the cheque was to be sent by a clerk, accompanied by an armed guard. The gentleman, relieved by the precautions mapped out, went to lunch. When he returned to his desk the office boy looked up. "A couple of fellows brought a cheque for a hundred grand for you a while ago," he announced. "I put it in the basket with the rest of the incoming stuff."

Maintenance Of Roads

Much Time and Attention Devoted To Protection Of Roadways

Well-constructed highways are necessary in Canada to meet the insistent demands of traffic but well-maintained roads are even of more importance in the interest of economy. Consequently, provincial road administrative organs and engineers are devoting a great deal of thought and attention to the care and protection of roads. In 1927 the mileage of roads under maintenance in Canada under the patrol or gang system was 44,416 miles, at a cost of $16,024,617.

[illegible]

Americans who insist on wearing the kilts while visiting Scotland are becoming such a common sight that the people pay little attention to it. In the past some of the costumes of the visitors have been so loud that true Caledonians shuddered, but apparently they are becoming accustomed to the way foreigners use the plaid.

As much as $30,000 may be spent on the organs installed in the best movie houses.

In view of the widespread interest that is being taken in the procuring of settlers for the farm lands of Canada and in the establishing of agriculture on a more scientific basis, W. A. Johnston, of the Geological Survey presents some interesting facts about soil surveys. He states that soil surveys have been carried on to some extent during the past few years by the provincial governments in the prairie provinces that land classification work has been done by the Department of the Interior, and that the mapping of soils which is primarily a geological problem has been conducted by the Geological Survey.

A soil survey of any area shows the character and location of the several types of soil in the area and thus provides information regarding soil conditions that is of value not only to the farmer but to the scientific agriculturist outside the area who is called upon to give advice regarding questions of the soil improvement or who is attempting to solve problems regarding the most effective uses of certain kinds of soil. The fundamental principles of a soil survey is that each type of soil is best adapted to certain kinds of crops and requires the same kinds of farming practices and methods of soil improvement. It is held by scientific agriculturists that the art of agriculture, the oldest and most fundamental of all the sciences, is the least developed, and it is well recognized that there are at least a few distinct types of soil in each of the physiographic provinces that require different methods of cropping and farm practice. A soil survey in many cases reveals important problems of soil improvement and farm practice that need attention. The perennial question of how long exclusive grain growing can be carried on in prairie provinces is partly a question of the character of the soil, for some soils can be cropped continuously much longer than can other soils. Again, the question of soil drifting which has become a serious problem in many parts of the prairie provinces, is partly a question of the character of the soil, for some soils drift badly whereas others do not. A soil survey also affords a guide in the buying and selling of farm property, and in the selection of land for particular purposes.

Soils may be classified in several different ways, depending upon the point of view of the investigator. A purely geological classification, that is, according to the physical character and mode of origin of the soil, may be inadequate from the point of view of the scientific agriculturist but must be taken into consideration in any scheme of classification. The geological classification ordinarily distinguishes ten to twelve different types of soil in a single physiographic area. The number may be increased if necessary, but there appears to be no need at present for any elaborate classification. The soils in Canada as geologically mapped usually include swamp deposits, dune sands, alluvium of streams, lake or marine sand, silt and clay, and glacial drift in its various forms such as moraines of the ice-sheets, kames or gravel hills and outwash sand plains.

The Geological Survey has mapped and described the soils from the point of view of origin and physical character in several areas in Canada, in the vicinity of Ottawa, in the Rainy River District, Ontario, in southeastern Manitoba, and in the Winnipegosis District of Manitoba. The three latter areas were mapped especially for the purpose of supplying information to intending settlers. Recently the mapping has been extended to cover the greater part of southern Manitoba up to latitude 52 degrees, and it is proposed to issue a map covering this area.

"My oysters are splendid. Yesterday a customer had three pearls in a dozen."—Moustique, Charleroi.

WORLD HAPPENINGS BRIEFLY TOLD

A survey of Fort Churchill will be undertaken immediately by the provincial government for the purpose of laying out a model townsite at Manitoba's seaport.

Charles Angers, former member of parliament, is dead at Quebec, at the age of 71 years. He represented Charlevoix County at Ottawa, in 1896. He was a Liberal.

Regina's assessment for 1929 will be two and a half million dollars greater than the amount upon which 1928 taxes were struck, it was estimated by R. J. Westgate, city assessor.

Soviet Russia on March 12, celebrated the 12th anniversary of the breaking out of the revolution which resulted in the abdication of the Czar. All shops, business houses and government institutions were closed.

League of Nations officials announced that an agreement had been practically reached on the main points of the protocol for adherence of the United States to the world court of justice.

More than half a billion pounds of dangerous explosives were handled by railroads of the United States and Canada in 1928 without injury to any person, and with a property loss of only $77 the American Railway Association announced.

The Polish newspaper Rzeczpospolita says it has learned Pope Pius will begin a tour early in 1930, visiting Trieste, Zagreb, Budapest, Cracow, Warsaw, Vienna, Munich, Brussels, Dublin, Paris, Madrid and Lisbon.

Bankruptcy proceedings have been instituted against Princess Victoria, sister of the former Kaiser. The Princess, who is living in seclusion at the palace in Bonn, Germany, declined to make a statement. The first meeting of her creditors was called for April 4.

Cause of Asthma. No one can say with certainty exactly what causes the establishing of asthmatic conditions. Dust from the street, from flowers, from grain and various other irritants may set up a trouble impossible to irradicate except through a sure preparation such as Dr. J. D. Kellogg's Asthma Remedy. Uncertainty may exist as to cause, but there can be no uncertainty regarding a remedy which has freed a generation of asthmatic victims from this scourge of the bronchial tubes. It is sold everywhere.

There's a Reason

Tea, it is rumored, can be improved somewhat by following the Siberian custom and adding just a dash of rum. Once when entertaining in Shanghai a friend of mine gave tea thus embellished to a missionary but served the ordinary variety to his wife.

"I just can't understand it," the good lady remarked about half an hour later. "At home John won't touch tea, and here he's having his fifth cup."

Use Minard's Liniment for the Flu.

Flashes of manufactured lightning 2 feet long have been produced at the Pittsfield (Mass.), laboratory of the General Electric Company.

It sometimes happens that a man's usefulness ends when his salary is raised.

BILIOUSNESS RELIEVED ... QUICKLY

The Purely Vegetable Pill quickly starts the bile flowing, gently moves the bowels, the poisons pass away, the sour and acid stomach sweetens, and biliousness vanishes. Sick Headache, Indigestion, Bad Breath and Complexion improve by the gentle action of these tiny vegetable laxative pills. All Druggists 25c and 75c red pkgs.

CARTER'S LITTLE LIVER PILLS

Early Heat In Antarctic

Wilkins Party Halted By Melting Ice At Expedition Base

The Antarctic was almost too warm for airplane exploration during the time the Wilkins expedition was at its base at Deception Island early this winter, Sir Hubert Wilkins, leader of the party, said after his arrival from South America.

The earliest summer season in 14 years melted ice at the expedition base and deprived Wilkins of the use of snow-equipped planes, the explorer said.

Wilkins said he made no attempt to reach the south pole, approaching only within 650 miles of it, devoting his time to preliminary survey for weather observation stations in the Antarctic.

Electric Power In Alberta

Transmission Lines Spreading Over Province At a Rapid Rate

The rapid rate at which electric transmission lines have been spread over the province of Alberta, especially during 1928, is indicated in a recently issued government report. A network of high tension lines now radiates east and west, north and south over the central and southern part of the province. There is a continuous line from Edmonton in the north to Magrath south of Lethbridge, in the south, with the exception of the gap of less than thirty miles between Millet and Ponoka still to be closed.

One power company, with headquarters in Calgary, is operating 323 miles of 66,000-volt lines and 630 miles of 13,200-volt lines. Of this mileage approximately 80 miles of 66,000-volt lines, and 474 miles of 13,200 volt lines were built during 1928, and the company's territory in the north now extends as far east as Wainwright and Hardisty.

Cutting Corns With Razor Leads To Lock-Jaw

Don't cut corns with an old razor blade. Infection, followed often by death may result from paring corns with an infected razor. Quick, safe relief comes from using PUTNAM'S CORN EXTRACTOR. If afflicted with corns, callouses or sore foot-lumps, use "PUTNAM'S"—it's reliable, and sure to shrivel up the corns so they drop right off. No pain, no soreness, but quick relief from sore corns comes to all who use PUTNAM'S PAINLESS CORN EXTRACTOR. 25c. at all dealers.

Tax On Bachelors

Cuba Has Some Advanced Ideas On Legislation

Cuba is not the only country that imposes a tax upon its bachelors, but it is doubtful whether any other nation has shown the enterprise of establishing a government matrimonial bureau where spinsters must file their photographs. That, indeed, means progress. Cuba is not satisfied with collecting every year its ten dollars from all bachelors who persist in eluding the wile of women. It is moved by nobler and far-reaching ideals. It would bring together those lonely souls, male and female, who perhaps through an inferiority complex feel unable to take the necessary steps which might lead to courtship and the altar.—Springfield Union.

A DANGEROUS MONTH FOR THE BABY

Mothers Always Dread the Blustering March Days

No month of the year is so dangerous to the welfare of little ones as is March—the month of quickly changing weather. One day is fine, the next cold and blustery. One day dry, the next wet and disagreeable. In spite of all precautions the little ones will take colds and these colds often lead to more serious troubles. Mothers, when the first symptoms appear—sneezing, redness of the eyes, running nose—Baby's Own Tablets should be given at once. They will rapidly break up the cold and prevent the more serious complications.

Mothers who keep a box of Baby's Own Tablets in the home always feel safe—just like having a doctor in the house. The Tablets are a gentle but thorough laxative that sweeten the stomach and regulate the bowels, thus driving out constipation and indigestion and relieving the baby of the many childhood ailments which are the direct result of a clogged condition of the bowels or a sour stomach.

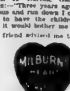
Baby's Own Tablets are sold by all medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

By living on board private yachts moored on the River Thames, near Westminster, a number of Londoners escape paying rent, rates and house duty in return for a mooring fee of three guineas a year.

Nervous and Run Down
The Least Noise
Would Bother Her

Mrs. R. Burton, Oshawa, Ont., writes:—"Three years ago I was so nervous and run down I could hardly bear to have the children make a noise it would bother me so.

"A friend advised me to take



and after taking two boxes I began to feel stronger, looked better and the color came back into my cheeks, and now I am feeling fine again."

Price 50c a box at all druggists and dealers, or mailed direct on receipt of price by The T. Milburn Co., Ltd., Toronto, Ont.

SKI CHAMPION

A Great Canadian

Prof. Shotwell Was Close Advisor Of Woodrow Wilson and One Of the Authors Of Kellogg Peace Pact

Mr. E. J. Garland and the Prime Minister deserve thanks for disclosing to Parliament recently that one of the real authors of the Kellogg Peace Pact is none other than a Canadian, Prof. Shotwell, of Columbia University. Canada has given many notable figures to the industrial, commercial and academic life of the United States. It is doubtful whether she has given anyone who has made a more distinguished contribution to the republic than Prof. Shotwell. Born in Canada and educated in Canada, Prof. Shotwell stands today as one of the most eminent figures in the whole scholastic field of the United States. His name, indeed, is known wherever international or world politics is discussed; the pity is that it is not better known among his own countrymen here in Canada.

Prof. Shotwell first arrested world attention when he became one of the close advisers of Woodrow Wilson in the sphere of foreign affairs. When the Peace Treaty of Versailles was in the making, he was in Paris; and later on, in pamphlets and numerous volumes and newspaper articles and lectures he has dealt with international questions with a scholarship and sure grasp of realities rivalled by few of his contemporaries.

Prof. Shotwell, in fact, must be ranked among the greatest of living Canadians. The pity is that, like many another, he is an exile from the land his talents could serve so well.

Propose Second Arctic Trip

Aviators Anxious To Reach Europe By Greenland Route

A letter has been received in Cochrane, Ontario, from Bert Hassell and his partner, Crammer, stating that it is their intention to make another attempt this year to establish an aerial mail route from Chicago to Stockholm, Sweden, via Greenland. These are from Rockford, Ill., fliers who made an unsuccessful attempt to reach Europe by a northern route last year, the attempt ending when they were forced to make a landing at Greenland. This year, according to the fliers they will attempt the trip in 300-mile relays, with refuelling stations at Sault Ste. Marie, Cochrane and two located at intervals between Cochrane and Greenland. They have asked that the runway which they made use of last year in taking off from Cochrane be kept open in preparation for a start this spring.

Sugar Beets a Paying Crop

Sugar beets proved the best-paying crop in the Taber-Barnwell irrigation district last year, returning an average of $68.50 per acre. Alfalfa came second, with $23.85 per acre, and wheat third, with $23.27. The average production per acre in the project was worth $28.97.

Pupils in Scotland have to get through about three times as many books in the school year as London school children.

The total acreage under pasture in Canada in 1928 was 9,838,043 acres.

Minard's Liniment for Coughs and Colds.

SUNDAY SCHOOL LESSON

MARCH 24

STEWARDSHIP AND MISSIONS

Golden Text: "It is required in stewards, that a man be found faithful."—Corinthians 4.2.

Lesson: Genesis 12.1-3; Deuteronomy 8.17, 18; Jonah 3.1-10; Malachi 3.7-12; Matthew 28.18-20; Acts 1.6-8; 13.1-3, 26.12-20; Romans 1.14-16; 1 Corinthians 16.2; 2 Corinthians 8.1-15, 9.1-15.

Devotional Reading: Psalm 9.1-6.

Explanations and Comments

Stewardship In Regard To Missions, Acts 1.6-8.—The apostles met Jesus on the Mount of Olives, and there they asked Him if at that time He would restore the Kingdom to Israel. Their question shows how well-nigh impossible it still was for the apostles to rid themselves of the common Messianic expectation of the Jews, that the Christ would rule over a Jewish nation independent of Rome and herself dominant, politically and religiously, over the other nations of the earth. "It needed the Pentecostal outpouring of the Holy Spirit to teach the apostles that Christ's Kingdom is not of this world."

"It is not for you to know the times or seasons, which the Father hath set within His own authority," was the answer of Jesus. "It implies that He will restore the Kingdom to Israel, not, however, to 'Israel after the flesh,' as the apostles imagined, but to 'the Israel of God,' i.e. to Christian believers of every nation, by making Christianity the dominant religion."

"O God, I pray Thee for the childlike heart,
That can enjoy—all vexing things apart—
The beauties Thou in heaven and earth doth show,
Nor fret myself with things I do not know."—Babcock.

And then Jesus promised power through the coming of the Holy Spirit, and gave His great commission, they were to be His witnesses both in Jerusalem and in all Judaea and Samaria, and unto the uttermost part of the earth. Some one has called these four missionary ones parish missions, state missions, home missions, and foreign missions. The Acts records the story of how the apostles carried out the commission. "The uttermost part of the earth" is represented by Rome, the capital of the Empire, the place where, as Irenaeus said, "All met from every quarter."

"This message always hurts me when I think of the vast tracts of earth that have never heard the name of Christ."—G. Campbell Morgan.

Change Bread To Cake

Here's the Magic Recipe

Cut slices of day-old white bread ¾ inch thick. Trim off crusts. Cut each slice into strips ¾ inch wide by 3 inches long.

Spread these strips on all sides with Eagle Brand Sweetened Condensed Milk, covering bread well.

Roll strips in dry shredded cocoanut, broken very fine. Place in pan and brown very delicately on all sides under low gas flame, or toast on a fork over coals.

Delicious little cocoanut cakes result—made from bread. Taste just like Angel Food cake.

Try them! This and dozens of other magic recipes are found in the Eagle Brand Cook Book "New Magic in the Kitchen." Write for your free copy to The Borden Co., Dept. BW, 140 St. Paul St. W., Montreal, mentioning this paper.

Hard and soft corns both yield to Holloway's Corn Remover, which is entirely safe to use, and certain and satisfactory in its action.

Western Progress

The thriving city of Regina established a notable record in 1928, in attracting new industries. During the last past year 12 important industrial concerns located in Regina. They are said to have expended about $3,000,000 in sites, buildings and equipment, and they will employ well on to 2,000 men. Housing accommodation was built last year for 1,000 families, and building has not yet caught up to the demand.

A cast off railroad locomotive with its wheels removed, heats a Norwich, Connecticut passenger station. It performs efficiently, supplying heat to the train shed, station and cars in the yard as required.

Take Daylight From Air

Reproduction Of Light Said To Be Next Wonder

A radio aerial draws radio waves out of the air. Radio treats essentially with sound. Absorption and reproduction of light, by a method strikingly similar to radio is likely to be next. R. T. Gee, London, Ont., inventor, president of the R. T. Gee Company, Limited, manufacturer of electric light bulbs, is the discoverer. The process, he states, is to be soon available for general use. When it is introduced, it is stated in scientific circles, it will revolutionize illumination, which is today chiefly created by electricity. For, in addition to drawing energy out of the air and reproducing it, Mr. Gee's method provides for the storage of such energy until it is needed. This means, it is explained, that the aerials at work in the daytime will not only absorb but also store sunlight for reproduction at night.

Rub It In For Lame Back. Brisk rubbing with Dr. Thomas' Eclectric Oil will relieve lame back. The skin will immediately absorb the oil and it will penetrate the tissues and bring speedy relief. Try it and be convinced. As the liniment sinks in, the pain comes out and there are ample grounds for saying that it is an excellent article.

Tested Rocket Sled

A "rocket sled" was tried out at the Schleissheim aviation grounds by Max Valier, inventor of several rocket vehicles. The sled weighs 340 pounds and can be equipped with eight rockets. Valier, using only two rockets, made fine speed on level ground. Spectators tried to visualize the speed that could be made down a snowy slope under the impetus of the rockets, but gave up the attempt before reaching definite conclusions.

Keep Your Health
TO-NIGHT TRY

Minard's Liniment Co., Ltd., Yarmouth, N.S.

Better To Keep Busy

Brooding over trouble is like surrounding oneself with a fog; it magnifies all objects seen through it. Occupation of the mind prevents this. Any hard work, manual work even, gives the mind other matters of concern, and also tires the body so as to ensure sleep.

Too Much ACID

Many people two hours after eating, suffer indigestion as they call it. It is usually excess acid. Correct it with an alkali. The best way, the quick, harmless and efficient way, is Phillips' Milk of Magnesia. It has remained for 50 years the standard with physicians. One spoonful in water neutralizes many times its volume in stomach acids, and at once. The symptoms disappear in five minutes.

You will never use crude methods when you know this better method. And you will never suffer from excess acid when you prove out this easy relief. Please do that—for your own sake now.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

THE CRIMSON WEST

ALEX PHILIP

Published by Special Arrangement With Thomas Allen, Publisher, Toronto, Ont.

CHAPTER XVI.—Continued

From up the mountainside came a drumming roar and the rending crash of trees as the fire undermined their roots. Sparks from burning tree-tops crossed the fire-break and started other fires. To combat these, water had to be carried up the steep hillside in pails. Andy was among those delegated to this arduous task. For hours he staggered from stream to hill and back again with a brimming pail in either hand. Scorched by sun and fire, the perspiration streaming down his face and stinging his eyes, the little hero stuck gamely to his task.

"I 'ired on this 'ere job as a cook," he grumbled, "not as a blinkin' water-spaniel, to make me pink. If the water I've carried today was sprinkled in 'ell the devil'd be out of a job. Oh, well," he added resignedly as he filled his pails and turned to again ascend the hill, "as Methuselem said, 'Every little bit 'elps.' These two buckets myke exactly four million, two 'undred and six gallons that I've carried this d'y." At this instant his foot caught in a root to send him sprawling on his face rolling down the mossy hillside, the pails clattering after. He lay where he had fallen, flat on his back, with arms outstretched. "There," he soliloquized, "that was the wisp of straw that broke the elephant's back. To 'ell with the fire. Let the blighter burn."

Wilkinson came wearily down the hill. His face was blackened and blistered, his hat gone, and his shirt a network from holes burned through the cloth by flying sparks. He sprawled on all fours by the stream, drank sparingly, then plunged his face in the cooling waters.

"'Ello, Wilkie!" shouted Andy, "'ow would you like to 'ave a cold bottle of beer?"

Wilkinson seized a stone threateningly and glared at his tormentor. "Men have been killed for less," he growled huskily.

"I s'y, Wilkie," grinned Andy, "these Forestry jobs are a snap. Do you 'ave the nerve to collect a salary?"

The district ranger was too tired for speech. His swollen face puckered in a smile and he passed on up the hill, and Andy came stiffly to his feet and resumed his never-ending task.

Connie brought reports that the fire was being held on the north and east. The fire-break on the south held, but spot fires were kept in check only by the almost superhuman efforts of the fire-fighters.

Forest fires reach the peak of their intensity while the sun is hottest. With darkness the wind subsides, and, especially in the mountains the heavy dews are a never-failing help.

The sun, showing blood-red through the smoke, now sank behind the hills and a blessed coolness filled the air. The fire smouldered along the fire-breaks, but the dreaded sparks were not flying. The trembling roar diminished to a steady crackling where fallen trees were being steadily consumed.

The fire-fighters, their shoulders drooping, and wavering from sheer weakness, plodded down the hill for well-earned food and rest.

"You'll have to be at it again at daylight," said Wilkinson grimly. They nodded a tired assent. Wilkinson and Donald with twelve men patrolled the fire area throughout the night.

The next morning broke sullenly in a dull haze. As the first streaks of light heralded the coming of the new day, the fire-fighters again took up their posts. Men from the other mill arrived, and another day of battle with the fire demon was begun. An attempt was made to check it on the west front, high up the mountainside, where the fire had crept through in the night to a small level plateau. At ten o'clock the wind came suddenly, and with it the fire broke through on the south-west corner with a deafening roar and rushed through a stand of dead trees with ever-increasing speed.

Donald shouted a quick cry of warning to the men who were in danger of being cut off by this break. They came on the double quick just in time, as a lurid wall of flame shot up the hill over the path they had traversed.

"Are the men all out?" questioned Donald.

"Andy isn't here!" said one of the men excitedly.

Donald seized the speaker's arm. "Was Andy with you?"

The man nodded.

Donald's face set in grim lines. Whirling quickly, he ran straight toward the line of fire. With a bound Connie was on her horse and after him at swift trot. As he neared the screen of smoke, Pegasus changed his gait to that of a mad runaway and with the small rider lying prone on his bare back disappeared from view.

At this spot the fire had spent its fury in the first mad rush, but a heavy smoke welled up from the charred ground. Terror possessed the horse, but the calm voice of his mistress urged him on. Crimson embers showered about her. Scorching heat fanned her face as if the doors of a blast furnace had been opened. A blazing branch fell with a rushing sound, barely missing the horse's head. Sharp reports from the tree-tops made the plucky cayuse shy in a panic of fear.

Filled with apprehension, the crowd of fire-fighters stared with tense anxiety into the drifting smoke. Then a glad cheer burst from them as horse and rider emerged, Andy clinging to Connie's stirrup and Donald swaying drunkenly in the rear. Ready hands held water to Andy's parched lips and bathed his hot face as he lay panting on the ground. He sat up with an effort and looked about him. "Where's Connie?" he asked. But Connie had stolen quietly from the scene.

By mid-afternoon the main body of the fire was apparently under control, but the persistent spot-fires kept the entire crew engaged. A huge cottonwood, standing just within the fire-breaks, was the chief offender. Sparks from its lofty blazing top were floated by the breeze to land on the dry ground, starting innumerable fires.

"That tree will have to come down or we will be fighting spot fires indefinitely," said Wilkinson.

Silence fell. Everyone of those lumber-jacks knew the danger attached to the falling of a rotten, blazing tree. In sound timber the skilled "faller" can cut the scarf and drive the falling-wedge to lay the tree within six inches of the desired spot. With a hollow tree the task is much more difficult, as in the soft, decayed pulp the wedge may not provide sufficient leverage to swing the enormous weight, and the tree may crash from any angle.

Men working at the butt of a burning tree, too, are exposed to the fall of branches. Even a small bough, hurtling from the dizzy height of lordly cottonwood or fir, will break a man's limbs.

Wilkinson picked up a falling saw. "Who will go with me?" he called.

Gillie stepped forward with wedge and hammer.

"Nothin' doin'," said little Blackie. "Wilkinson here has a wife and kid, an' Jack has brains enough to be our boss. Me and Hoop-la ain't got neither, we're just a couple roughnecks. Whadda you say, Hoop-la?"

"Yo betcha," came vigorously from Blackie's pal.

Two men were sent with them to assist in clearing a space at the foot of the big snag. A few minutes later the twang of the cross-cut, mingled with Blackie's happy song, sounded above the crackling of the fire.

Wilkinson pointed to the southern sky, where heavy nimbus clouds were massing. "At last! The blessed rain is coming!" he cried in a voice of thankfulness.

A stronger gust swept through the valley to send a surge of flame from the giant cottonwood's topmost branches. There was a sharp cry of warning as a limb broke off with a splinter-crash and came roaring to the ground, sending up a swirl of dust. A strangled cry of pain, animal-like in its intensity, cut the air.

"Blackie's hit," screamed Hoop-la.

Blackie lay on his face, his clothing afire, pinned down by the shattered limb. With a heave of powerful shoulders Hoop-la flung the crushing weight aside, and his big hands quickly smothered the fire in the clothing of his fallen comrade. Gently he raised the stricken man in his arms and bore him beyond the range of fire.

"Blackie! Oh, Blackie! are you all right?" he questioned fearfully as he looked down at the quiet face that held the grey pallor of death.

"Call the doctor and bring a stretcher," sharply ordered Wilkinson.

(To Be Continued.)

Simple Precautions Against FLU
Sore Throat —
— The Danger Signal

Health Authorities Point Out The Necessity Of Treating The Simple Cold At Its Beginning

Nearly every case of "Flu" starts with a simple cold. At first the throat is sore—often just a little hoarse—soon the infection goes lower—then the chest is affected. A safe plan is to gargle the throat three times daily with "Nerviline"—this will keep the throat free from germs. If there is any sign of tightness in the chest, rub on Nerviline—every drop will penetrate deeply—congestion will be relieved—the cold will break up quickly. Many a dangerous case of "Flu" can be avoided by this simple home treatment.

Of course it is always wise to take some relaxing medicine, and for this purpose immediate results will be secured from Dr. Hamilton's Pills—they purge the system of impurities and carry off a lot of disease—breeding wastes.

This combination treatment of Nerviline and Dr. Hamilton's Pills is very effective for Grippe, Influenza, Bad Colds, etc., and can be relied upon to give very satisfactory results.

Canada's Chinese Population

Last Registration Gave Total Number As 55,706

According to reports tabled in the House of Commons, three Chinese immigrants were admitted to Canada during the fiscal year 1927-28, two of whom were women. Two students coming to attend Canadian universities were admitted as non-immigrants. Eleven Chinese were deported during the year.

The registration carried on during 1923-24 shows a Chinese population in Canada of approximately 55,706. Of this number, 46,205 were males, 1,202 females, and 8,099 children under 16 years of age. Of the total British Columbia had 31,116 Chinese residents.

The number of Japanese entering Canada in 1927 was 511, and in 1928 535. Of the total for two years, 273 were adult males, 557 adult females and 216 children under 16 years of age.

Dump Valves For Passengers

They have long had dump valves in airplanes for gasoline, but now they have got one for passengers. Floyd Smith demonstrated the device at Mercer airport, tilting the passenger seat with a lever and letting a 180-pound dummy passenger hurtle down from a height of 1,500 feet. The dummy's parachute opened in one and four-fifths second and the dummy floated safely to earth.

It is estimated that only 5½ per cent. of Florida's white population is foreign born.

Up-To-Date Airport

Municipal Field At Oakland, California, Has Every Modern Convenience

How many people realize that parking space for airplanes is sold in the same way as parking space for automobiles, in the down town areas of big cities. To take Oakland Municipal Airport at Oakland, California, as an example. Over night ground rental costs one dollar per plane. Hangar space less than 1,000 square feet costs two dollars a day or forty dollars a month, while quotations for larger space up to an area over 3,000 square feet are charged at four dollars a day or seventy-five dollars a month.

One can get a plane washed just as a car is washed for $1.25 an hour. Mechanics are available at this airport for two dollars an hour during regular working hours and three dollars an hour during other periods.

If you arrived at this airport by plane and wanted to stay there during the night, you can get a bunk for a dollar a night or fifteen dollars a month. There are at this airport conveniences found at few other airports and that of sleeping quarters is one of them.

Oakland airport which is operated in connection with the seaport of the city, has had a speed boat channel from San Leandro Bay, an arm of San Francisco Bay, dredged direct to hangars. This channel is 150 feet wide, and 16 feet deep, and allows for the landing of seaplanes at the same field that serves land planes. It is a matter of 11 miles from the seaplane landing to the San Francisco ferry post office.

A restaurant to accommodate 150 people was recently completed at the field. There is a coffee shop, a dining room with full view of the field and a banquet room housed in this building. In addition to the usual news stand, tobacco shop, soda fountain and souvenir booth, which one is accustomed to find at any railway station.

Western Horse Shipments

Twenty-five Thousand Sent To Eastern Canada Last Year

Western horses to the number of 25,000 were shipped from the prairies to Eastern Canada last year. Most of these horses came from Alberta and Saskatchewan, and were disposed of principally in Ontario and Quebec although some were shipped as far as Prince Edward Island. The shipments varied from heavy draught animals to light range stock and about 5 per cent. were unbroken. A carload of these unbroken range horses of Percheron and Belgian breeds, was shipped into Paisley, Ont., recently and sold at public auction, realizing an average price of $71 for the 21 head.

Traveller (at country railway station). "Do the fast trains ever stop here?"

Porter. "Yes, we had a smash-up here once."

~take it! It's Safe

The nurse tells you to take Aspirin because she knows that it is *safe*. Doctors have told her so. It has no effect on the heart, so take it to stop a headache or check a cold. For almost instant relief of neuralgia, neuritis, rheumatism; even lumbago. But be sure it's Bayer—the *genuine* Aspirin. At druggists, with proven directions for its many uses.

Aspirin is a Trademark Registered in Canada

BAYER ASPIRIN

Little Helps For This Week

"In God have I put my trust, I will not be afraid."—Psalm lvi. 4.

Oh, heart of mine, we shouldn't
Worry so!
What we've missed of calm we couldn't
Have, you know!
What we've met of stormy pain,
And of sorrow's driving rain,
We can better meet again,
If it blow.

We have erred in that dark hour
We have known;
When our tears fell with the shower
All alone.
Were not shine and shadow blent,
As the gracious Master meant?
Let us temper our content
With His own.

For we know not every morrow
Can be sad;
So, forgetting all the sorrow
We have had,
Let us fold away our fears,
And put by our foolish tears,
And through all the coming years
Just be glad.

—James Whitcomb Reilly.

God writes straight on crooked lines.—Spanish Proverb.

Taken Without Question

There are times when we question the pronouncements of the learned, but one of the things we have decided not to prove for ourself is the recent statement of a prominent naturalist that lions are near-sighted.

Shirts are being worn by constantly increasing numbers of Chinese.

"Robot" For Nine Years

Expert Chess Player Fooled Patrons Of New York Museum

The secret of perhaps the strangest "robot" ever exhibited in America has been revealed with the death of Peter J. Hill. Thirty years ago in New York city, the proprietors of a dime museum astonished their customers with an "automaton chess player." Thousands, including many internationally known players, tried in vain to defeat the "mechanical man." The robot in reality was Hill, masked and disguised. An expert chess player, he sat in the museum for nine years, shifting the pawns on board with jerky, mechanical movements, maintaining silence and keeping his secret from those with whom he played.

Whales have the largest brains of all mammals, the largest on record weighing 7,000 grams.

CRUMBLY TEETH

Help your children to have sturdy bodies, sound bones and strong teeth. Give them Scott's Emulsion rich in vitamins. It serves the needs of childhood equally as well as it does grown people.

The most comical war picture ever produced.

Admission 75c. and 35c.

EDMONTON ARTISTS HEARD AT TOFIELD

Tofield citizens were given a musical treat on Friday evening, when the "Original Polmatier Sisters" assisted by Mrs. Rachel Cockburn of Edmonton, soloist and Gordon Johnson, of Edmonton'ville, gave a most entertaining concert of high class music and elocution at the Variety Theatre.

The artists, in addition to Mrs. Cockburn and Mr. Johnson, were Pauline Polmatier Johnson, pianist, of Edmonton; Eva Polmatier Wright, trombone, of Edmonton; Helen Polmatier Hewitt, cornetist, Troy, New York and Lu Sebe Polmatier Pincott, violin and elocutionist, of Tofield.

The proceeds of the concert were donated to the local branch of the Women's Institute, to be expended in assisting a needy girl through normal school.

JAMES H INGRAM CUT BY SAW

James H Ingram, a pioneer farmer of this district and prominent in local U. F. A. circles, met with a nasty accident on Thursday afternoon when he had the front third of his right foot severed with a circular saw while sawing wood.

Ingram felt himself falling face toward the whirling saw and in throwing himself backward in an effort to save himself he threw his right foot forward with the result that the foot was pressed against the teeth of the saw. He was attended by Dr. F. F. Law and rushed to an Edmonton hospital.

EDITORS PARENTS PASS AWAY

It is with much sorrow that we have to announce the death of the editor's father and mother, Mr. and Mrs. W. Warton of Great Yarmouth, England. They passed away within a few days of each other and were buried together, after 55 years of married life.

In consequence this issue of the Mercury is a very poor one, work going very slow. This issue is published to give service to both local and foreign advertisers who were depending on us to publish forthcoming happenings and seasonable merchandise.

Saturday theatre patrons who will see Tom Mix in "The Arizona Wildcat" Fox Films latest release, will view the western star in new and more daring arts than he has had put on the screen before.

Mix has the role of Tom Phelan, owner of Arizona ranch famous for its polo ponies, and in the opening sequences Tom rescues Dorothy Sebastian from the wreckage of a stage coach at the edge of a high waterfall. She was in the coach when the horses ran away and wrecked the vehicle at a ford above the falls. The coach floats to the falls and is caught by rocks where Mix, riding Tony, dashes to the rescue.

A silver tea and sale of home cooking is to be held under the auspices of Holy Trinity W.A. in the Institute Rooms on Saturday, March 30th. Kindly leave your orders for daffodils with Mrs. Carey and Mrs. Ross.

The C.W.L. will give a tea and sale of home cooking at the Institute rooms on Saturday, April 6th.

THE DIFFERENCE

Buy a pound of TOFIELD CREAMERY BUTTER and— Note the smooth creamy, clean flavor.

Note the waxy, even, texture not found in all butters.

Note the even color throughout and then decide on having the best.

All equipment connected with its manufacture is thoroughly sterilized daily.

TOFIELD CREAMERY BUTTER is made in your own town but put up in a new wrap.

The name on the new wrap stands for quality ....

Try it. Eat more of it. It's good. By all means have the best, it cost no more.

WEEKLY NEWS BULLETIN

Issued by the Publicity Commissioner, Department of Agriculture.

C.N.R. Appoints Industrial Agent

Robert Henderson who for the past eight years has been connected with the District Engineer's Branch in Edmonton, has been appointed Industrial Agent for the Alberta lines of the Canadian National Railway. The action of the C.N.R. in making similar appointments in the three prairie provinces reflects the increasing interest being taken by eastern firms in the commercial and industrial development of the West.

Stock of Game Birds to be Increased

Some 2,000 Chinese ring-necked pheasants, 600 Mongolian pheasants and 1,000 pheasant eggs for hatching will be brought into Alberta this year states C. A. Hayden, President of the Provincial Fish and Game Association. It is reported that the pheasants placed in several districts in the province last season have wintered very well and it is hoped that through the activities of the association and a number of local bodies, the supply of these desirable game birds will be greatly increased within the next few years.

Cold Lake May Have Fish Hatchery

Further experiments may be carried on during the coming summer at Cold Lake to determine whether a fish hatchery can be satisfactorily established at that point. With the new hatchery at Waterton Lakes in operation this year the capacity of hatcheries in the national parks in Alberta will be 3,280,000 fry in a season. Large numbers of these are set out annually in the rivers and lakes of the province in order to maintain and increase the supply of game fish.

PUBLIC SALE OF LANDS

Notice is hereby given that, under the provisions of the Tax Recovery Act 1922, and amendments thereto, the Municipality of the Town of Tofield will offer for sale by public auction, at the Town Hall, Tofield, Alberta, on Saturday the 6th day of April 1929 at 2 o'clock p.m., the following lands:

Lot	Block	Plan
[illegible]	6	5280
[illegible]	8	do.
[illegible]	10	do.
[illegible]	14	do.

The above described lands will be offered for sale subject to a reserve bid and the reservations contained in existing certificates of title. Redemption may be effected by payment of all arrears of taxes and costs at any time prior to the sale.

Dated at Tofield this 20th day of March 1929.

J. W. CHAPMAN,
Secretary-Treasurer.

Spring Poets

Spring is the time of the year when poets—good and bad are abroad in the land.

Spring sunshine gives inspiration to many people to give vent to their feelings in language more beautiful than commonplace.

There are however, a number of spring poets around this year that have more than ordinary reason to give vent to their feelings in language different from the commonplace.

We refer to those who have left their cars stand around all winter and when they try to start it, find that it doesn't want to go. What they say we don't want to put into print, but if it is poetry we are sure it is not faultless rhyme.

Don't work yourself into a poetical frenzy when your car refuses to run right, but bring it to the

CLEAN SEED GRAIN AND THE NOXIOUS WEED PROBLEM

By W. J. Stephen, Provincial Fields Crops Commissioner

Statistics from Western Canada show that the revenue derived from grain production and agriculture in general is rapidly increasing and much wealth is derived therefrom. Still there are leaks in the system which can be averted. For instance, the farmers of Western Canada are sustaining tremendous losses as a result of weeds. It is estimated that in 1928 weeds cost the west a loss of from fifty to seventy-five millions of dollars. Is there a solution for this? That is the question that naturally confronts us.

According to a survey made by the Dominion Seed Branch in 1925-26-27 some fourteen per cent of our Alberta farmers in the districts covered by the survey made no attempt to clean their grain before sowing it. The survey showed that in some cases as many as 472,360 weed seeds per acre were sown in wheat, 804,000 in oats and 493,056 in barley.

We know that weed seeds under ideal conditions germinate 100 per cent. We also know that many of them will stay in the ground for many years and germinate when we least expect it,—when they are brought near the surface into a seed bed with the proper amount of moisture and heat. One seed will produce a plant. One plant will produce many thousands, and sometimes many millions of seeds. Is it, therefore, any wonder that so many of our farms are so weedy, and that so many of our farmers do not derive greater financial returns from their operations? Were it not for this heavy drain on our agricultural resources our towns and cities would be larger and our business houses more prosperous. Our country would have a much better standing in the eyes of the outside financial world. More people of a desirable type would settle in our midst. Instead of Alberta having only 82,000 farmers on the land and a total population of some 632,000, would it not be reasonable to expect that these numbers would be considerably increased?

We are told that Western Canadian Wheat is not looked upon with the same degree of favor by the Millers and bakers of Great Britain and Europe as it was in the days when Manitoba wheat established its high reputation. We are reminded that less than a quarter of a century ago practically all the wheat from the great Western plains graded number one hard. To-day less than a score of cars annually are put in this superior grade. What is the reasons for this?

True, during the last two or three years weather conditions have been unfavorable to the production of high wheat in many districts of the west. True, there are too many different varieties being sown. Too many of our farmers are sowing mixed varieties with the result that we get a commercial product that lacks uniformity in maturity and possesses other undesirable milling and baking qualities. Thanks is due for the excellent work of the Canadian Seed Growers Association and its members in spreading the gospel of the value of registered seed. They are doing much to convince that it is essential to sow hard red spring wheat that is true to type, pure and of a variety acceptable to the millers and bakers. Great credit is also to be accorded to our scientists of the past and present ages for giving to us varieties that mature earlier and eliminate the losses from early frosts.

Investigation and research have shown that one of the chief reasons for the depreciation in the standard of our wheat from that of former days is the lack of protein, which follows as a consequence of the depletion of plant food, particularly nitrates, from our soils. It has been shown that the growth of weeds has removed sufficient of these soil constituents to reduce the grade of our wheat and that had it not been for the growth of weeds, our Western Canadian wheat would show much greater baking strength. The outside demand would be greater and competition from other wheat growing countries would be less keen. Larger premiums would be forthcoming and a more stabilized market created.

It is, therefore, clear that the matter of weed control is closely associated with the question of better seed, and that both of them must be linked up with the general principals which go to make agriculture an industry that is both practical and scientific.

Let us hope that every farmer in Western Canada will not only advocate the use of better seed and good farming principles, but that he will put his knowledge into practice. Serious attention to various factors in good farming practice will go far towards providing a solution to the Noxious Weed Problem.

A DREAD DISEASE

That dread disease cerebro spinal Meningitis has reared its ugly head once more in the province. Six cases have been reported in one town, all the patients being children. Up to date four have died.

Children are most susceptible to this disease.

The disease is spread from one person to another by the discharge from the nose and throat of a person already effected. Overcrowding in the home and close contact in crowded theatres and concert rooms greatly favor the spread of it.

If a child has a fever and vomiting with pain in the neck or stiffness of the neck it should be isolated as a suspected case. There should be no delay in calling a doctor for prompt treatment is essential. Treatment is effective only if administered early and becomes less effective with each day's delay.

If the physician diagnoses Cerebro Spinal Meningitis, the patient must be nursed in isolation, that is in a room by himself, with one member of the household responsible for his care. No other member should be allowed in the sick room. All nasal and throat discharges should be caught on old rags, placed in a paper bag and burned.

Dishes and cutlery are kept separate and linen is disinfected before being taken from the room. Scraps of food should be burned. The home nurse, when caring for the patient should wear a washable overall which should be removed before leaving the room. Also before leaving the room she must wash her hands with soap and water and soak in disinfectant (Lysol one teaspoonful to one pint of water). Prevention is better than cure. Persons suffering from colds should stay at home. Mouth and nose should be covered with a handkerchief when coughing and sneezing. Hands should be washed frequently.

Pamphlets on all communicable diseases can be had from the Red Cross Society, 407, Civic Block, Edmonton, Alta.

New School Inspector Appointed

R. J. Scott, Principal of McKay Avenue School, Edmonton, has been appointed Inspector of Schools for the Oyen Inspectorate succeeding the late F. L. Aylesworth whose death occurred recently. Mr. Scott, who has occupied his recent position for the past ten years, has had twenty-one years teaching experience and is well qualified for the new duties he will take up.

Settlers Interested in Irrigated Lands

A marked activity in land sales in the Brooks District is reported by Don H. Bark, Superintendent of the C.P.R. Demonstration Farm at Brooks. Mr. Bark states that more new settlers are coming into the irrigation district this year than the total of the movement during the past five years. The majority of the new arrivals are coming from the eastern provinces and from the western and central states.

Alberta Muskrats Shipped to England

Ten pair of live muskrats were shipped from Edmonton during the past week to England. The shipment, the first of its kind to be made from western Canada, will form the nucleus of breeding stock for a large fur raising concern. It was made by A. C. McFadyen who states that if this trial proves successful, several thousand more rats will be shipped through the next few months. Further evidence of the rapid growth of this industry is given by orders for breeding stock which Mr. McFadyen has recently received from Czecho-Slovakia.

One Nation, Two Cultures

The Dominion of Canada is a great heritage. It has many great problems to solve in order to achieve its destiny. Before Government people can successfully cope with these problems the citizenship Dominion must become imbued with, fully accept, and earnestly ; the "Spirit of Confederation" which animated the leaders in the public life of this country sixty odd years ago. The names and memories of the Fathers of Confederation are held in honor, not only for what they achieved but because of the true patriotism expressed through real sacrifice by which union became an accomplished fact.

It is no light matter to speak of the Spirit of Confederation. It was a very real thing. It breathes through every utterance of the men who found it necessary to sink political differences, submerge personal views and convictions, abandon policies dear to their hearts, and accept compromises falling short of what they desired. But they did it, knowing that only so could disaster for British and Canadian interests be averted and the future of the northern half of the continent under the British flag be assured. It was this spirit which alone made Confederation possible and carried it successfully through the stormy early years.

This same spirit is just as vitally necessary in the life of Canada today as it ever was in the past. Without it the Dominion could not have had its being, without it the Dominion cannot continue to exist.

The great challenge which Canada presents to the world at large, and, of course, most vitally of all to her own people, is not in the material realm of trade and commerce, but in the spirit of the people of the Dominion composed as they are of two great races, two distinct forms of religion, speaking two languages, and the product of two cultures. Canada's challenge to the world is to be found in our success or failure to consistently live up to the Spirit of Confederation and make it a living vitality in the life of the Dominion. This is Canada's challenge to the world because the issues of world peace or war are wrapped up in the solution of exactly similar problems in the nations of Europe and across the Pacific.

The problem before the Fathers of Confederation was whether the existence of two races, two languages, two cultures in Canada was an insurmountable obstacle to the creation of a single united nation, and whether such a nation could exist on the basis of that fact. Their decision was that such a nation could exist, and they laid down the formula in the British North America Act. Confederation became an accomplished fact, and it has not only survived but progressed and grown to an amazing extent.

There is one Canadian of French race and language for every two Canadians of English race and language. How shall both feel that common love for home and soil which is the soul of nationality? Both races have traditions, a past of their own. On what principle and to what ends may both races have a common national future?

These vital questions cut clean through the whole of our national life today, just as they did prior to and at the time of Confederation. Shall the people of Canada, with so vast an estate to develop in common, with so great a part to play in elevating the quality of living, and so noble an opportunity awaiting them alike in the British Empire and in the sphere of international relations, always be faced with the menace of racial discord, of attacks by one race on the integrity of the other, of recourse to embittered discussion of rights that should be secure, or wrongs that should have been corrected, when scores of social and economic problems are crying out for solution? Race is like a car left with its engine running. The slightest touch will put it in gear and set it speeding towards some bitter accident.

In the nineteenth century Lord Durham's policy was the "obliteration" of the French-Canadian. The policy of the Fathers of Confederation was the recognition of the identity of both races, both languages, both religions, both cultures. Their ideal was one nation, two cultures; one nationality, two languages; one loyalty, two races.

Which policy was practical? To obliterate a whole people, or to form a nationality in which the identity of two peoples might be secure, free, developing? The Fathers of Confederation had the only practical policy, the only policy that would ensure peace, make the progress of Canada possible, and establish a new nationality in British North America.

Small Suns Compose Stars

Partially Eclipse Each Other Every Twenty-Four Hours

In Castor's solar system there is a star of the ninth magnitude known as C. It is composed of two small suns, each about half as massive as our sun and but little more than half the diameter, though of much greater density. They appear to be dying down into the planetary stage, or burned-out condition, for they shine with a reddish light and possess a much lower surface temperature than our sun. This pair of twin worlds in the making are at an average distance apart of 1,760,000 miles, and they appear to revolve round one another at great speed in about twenty hours, partially eclipsing each other every time, as seen from the earth. We do not see the effect of these eclipses until forty-three years after they occur, owing to the great distance (2,730,000 times that of our sun) of this marvellous solar system of Castor.

VITAMINS

Everyone needs them to support growth or to protect the body against germ-infection.

Scott's Emulsion

abundantly rich in vitamins is of great importance in all run-down conditions of the body. Scott's Emulsion builds strength.

Fellowship Honor For Manitoba Professor

Dr. Buller Will Be First F.R.S. In Prairie Provinces

Dr. A. H. Reginald Buller, head of the department of botany, University of Manitoba, has been selected for the fellowship honor by the Royal Society of London, England. He is one of 15 candidates on whom the honor will be conferred in May, and will be the first F.R.S. in the prairie provinces.

Dr. Buller has been carrying on research work in connection with wheat for 22 years and his valuable contributions to science in this respect caused him to be singled out for the honor. He is the author of various books dealing with wheat rust fungi.

It Has Many Qualities.—The man who possesses a bottle of Dr. Thomas' Eclectric Oil is armed against many ills. It will relieve a cough, break a cold, prevent sore throat; it will reduce the swelling from a sprain, relieve the most persistent sores and will speedily heal cuts and contusions. It is a medicine chest in itself.

There are 220 foreign consuls and consular agents in Canada with the doyen of all J. M. Owen, the United States consular agent at Annapolis Royal, N.S.

In one month, last year, 100,000 New York families, involving at the lowest estimate 300,000 people, moved from one apartment to another.

Minard's Liniment prevents Flu.

Wool By Aeroplane

Australian Company Considering This Means Of Transport

Transport of wool by aeroplane is being considered by Australian Air Services, Ltd., in districts where camel caravans are now employed. The company in Melbourne has already received a request from a station owner in Northern Victoria for specifications and an estimate of cost of freight plane to carry his wool over a difficult 500 miles of the journey to the nearest seaport. The transport of freight in the district in which the station is situated costs about £20 per ton, and a plane will be able to transport freight over the distance in a day whereas several weeks are often required.

Toes Made Comfortable — Corns Removed

[illegible] almost instantly [illegible] PUTNAM'S [illegible] Shoes won't [illegible] single drop of Putnam's stops the pain. A few applications make the corn dry up and drop off. Putnam's Corn Extractor gives satisfaction. Thousands use it every day. Get a bottle from your druggist. Refuse a substitute for "Putnam's" the one sure relief for sore corns.

Can See Two Oceans

The inhabitants of Costa Rica say that the only place commanding a view of the Atlantic and Pacific ocean is the summit of Mount Irazu, situated in Cartago Province. The mountain is 12,000 feet high, and the Costa Ricans assert that on a clear day it is not difficult to see the waters of both oceans with the naked eye.

DO YOU SUFFER FROM RHEUMATISM

For Relief You Must Reach the Root Of the Trouble In the Blood

Sufferers from rheumatism who have found their condition unrelieved or actually growing worse while using other remedies, would do well to try Dr. Williams' Pink Pills. The tonic treatment with this medicine has proved in thousands of cases that it builds up the blood to a point that enables it to cast out the rheumatic poisons through the regular channels, the bowels, kidneys and the skin. When this is done rheumatism is banished and as long as the blood is kept pure and rich there will be no return of the trouble.

That Dr. Williams' Pink Pills do what is claimed for them is proved by the case of Mrs. Ettie A. Muma, Sarnia, Ont., who says:—"I was a helpless invalid for a year with inflammatory rheumatism. I had medical treatment and took mineral baths, but with no result. Naturally I felt utterly discouraged, and was suffering greatly. Then one day I read in a local paper of a case similar to mine, in which great praise was given to Dr. Williams' Pink Pills and I decided to give this medicine a trial. It is now with the greatest pleasure I write to tell you that in less than two months after starting the use of Dr. Williams' Pink Pills I was able to get up and walk about as well as ever I did. I can never praise these pills too highly and I hope that in making my experience public it may benefit some other sufferer."

A very useful book "Building Up the Blood," will be sent free on request by The Dr. Williams' Medicine Co., Brockville, Ont.

Dr. Williams' Pink Pills are sold by all druggists or will be sent by mail, post paid, on receipt of price, 50c. a box. Try them today.

Many western Canadians will make a tour of the Maritime Provinces in June, under the auspices of the "New Outlook," official publication of the United Church in Canada, and the Canadian National Railways.

Neighbor: "What is your son taking at college?"

Dad: "All we can send him."

COULD NOT WORK FOR MONTHS

Restored to Health by Lydia E. Pinkham's Vegetable Compound

Port Elgin, N. B.—"For three months, I was nervous and weak with tired feelings and could not do my work. A friend advised me to take Lydia E. Pinkham's Vegetable Compound and I have got good results from it and recommend it to others."—LILA TAYLOR, Port Elgin, N. B.

This dependable medicine is sold by druggists everywhere.

Sure Of Hoover's Support

League Of Nations Has Good Friend In U.S. President

What stand will President Hoover take in regard to United States co-operation with the League of Nations? Supporters of the League, while they have practically abandoned any hope that the States will become an active member of the League, feel that in Mr. Hoover they have the strongest support of its policies since the regime of President Wilson.

They base this belief on the fact that in 1919, President Hoover was an urgent advocate of United States entry into the League and that while bound by loyalty to his party to take an opposite point of view he will always remain at heart a strong protagonist of League ideals.

It cannot be said that League supporters felt they had a genuine friend in Mr. Coolidge. Practical ignorance or tepid acquiescence was all that could be expected from the former chief executive. Always he appeared to be dominated by the small town point of view of the narrowest type of American in his dealing with the League and constitutionally he seemed incapable of thinking on an international plane.

While the new president is also bound by party considerations it is believed that by every means in his power he will strive to represent that sizable minority in his country who fervently advocate closer co-operation with the League in maintaining world security.

Many have been relieved of corns by Holloway's Corn Remover. It has a power of its own that will be found effective.

Recipes For This Week

(By Betty Barclay)

BREAD PUDDING DESSERT

1 package lemon junket.
1 pint milk.
4 slices bread.
Butter.
Raisins.

Remove crust from bread, butter lightly and cut in small cubes. Divide the cubed bread among dessert dishes and add a few seeded raisins. Warm the milk to lukewarm—not hot; add the lemon junket. Stir until dissolved; pour over bread. Let stand in a warm place until firm—then chill. Sprinkle with a mixture of sugar and cinnamon before serving.

SCALLOPED DISHES

Pour over layers of well-seasoned meat, fish or vegetable enough medium cream sauce to cover. Sprinkle well with buttered crumbs and bake until brown. When combined with starchy dishes such as potato or macaroni, use thin cream sauce. Medium cream sauce calls for 1 cup milk, 2 tablespoons flour and 2 tablespoons butter. This cream sauce calls for 1 cup milk, 1 tablespoon flour and 1 tablespoon butter.

There is nothing repulsive in Miller's Worm Powders, and they are as pleasant to take as sugar, so that few children will refuse them. In some cases they cause vomiting through their action in an unsound stomach, but this is only a manifestation of their cleansing power, no indication that they are hurtful. They can be thoroughly depended upon to clear worms from the system.

Big Job For Typemakers

Complete Set Of Chinese Type Will Take Seven Years To Produce

Few will envy a certain Shanghai printing establishment which has been working for three years to make a complete set of type, so that 10,000 Chinese characters (most of China's alphabet) can be printed.

It will exceed by several thousands the number of characters now being used in the printing of the largest of Shanghai's Chinese newspapers.

Since the single symbol, in Chinese, may express a whole idea, an imposing array of type is required by the smallest printing establishment, and the newest alphabet, which will provide each of the 10,000 characters in five sizes, will be a boon.

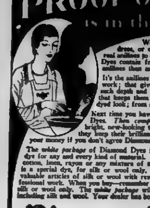
Each "letter" must be photographed and the impression from the resulting plate tediously tested by hand. Four more years will be required to complete the work.

Time For Everything

Have a time and place for everything, and do everything in its time and place, and you will not only accomplish more, but have more leisure than those who are always hurrying, as if vainly attempting to overtake time that has been lost.

Minard's Liniment for Coughs and Colds.

PROOF OF DYES is in the dyeing



Words won't dye dress, or coat, or sweater. It takes real *colors* to do that. That's why Diamond Dyes contain from three to five times more aniline than any other dye—by actual test. It's the aniline in Diamond Dyes that does the work; that gives the colors such brilliance; such depth and permanence. It's real aniline that keeps them from giving things that re-dyed look; from spotting or streaking.

Next time you have dyeing to do, try Diamond Dyes. *Then compare results.* See how soft, bright, new-looking the colors are. Observe how they keep their brilliance. Your dealer will refund your money if you don't agree Diamond Dyes are better dyes.

The *white package* of Diamond Dyes is the original "all-purpose" dye for any and every kind of material. It will dye or tint silk, wool, cotton, linen, rayon or any mixture of materials. The *blue package* is a special dye, for silk or wool only. With it you can dye your valuable articles of silk or wool with results equal to the finest professional work. When you buy—remember this. The *blue package* dyes silk or wool only. The *white package* will dye every kind of goods, including silk and wool. Your dealer has both packages.

Diamond Dyes

Easy to use — Perfect results

New Type Of Flying Craft

Being Built For British Air Ministry and Is Nearly Ready For Tests

The London Mail says that a flying machine called a "helicogyre" is being built at the order of the British air ministry and is nearly ready for tests.

It is a development of the helicopter, and was invented by Vittorio Isacco, who in 1917 collaborated with Pescara in making five helicopters.

The new machine is designed to ascend and descend vertically and to hover motionless in mid-air.

Traffic Is Increasing

Two New Steamers Ordered For Vancouver-Victoria Night Service

To meet increased freight and passenger traffic on the waters of the Pacific coast, two new vessels of the "Princess" type for night service between Vancouver and Victoria have been ordered by the Canadian Pacific, it is announced by Captain C. D. Neroutsos, manager of the British Columbia Coast Steamship service. The two sister ships are to be delivered next year, each having accommodation for 420 passengers.

Yours for the Asking

PRIVY COUNCIL MAY INVESTIGATE GRAIN QUALITY

Winnipeg.—Possibility of Canada's "certificate final" on grain shipments to foreign buyers being challenged in the Privy Council of England, looms up.

It is learned here that because of shipments of American barley to Germany during the season just closing, which were finally found to be "scab diseased" and which caused the death of stock to which it was fed, there is quite a possibility of a legal review of the validity of the contract which exists between Canadian and American shippers and the London Corn Exchange, acting as the intermediary on such shipments.

As the facts are now known it is stated that following the death of livestock after feeding on this "diseased" American barley, a board of arbitration was set up in England under the rules of the Corn Exchange before whom the German grain exchanges presented their complaint.

This arbitration board, it is learned, has now completed the taking of evidence and will submit the facts, in all probability, to an English court in order that the contract between the London Corn Exchange and the foreign buyers might be tested. It is also learned that no matter how the decision may go an appeal will be taken to the Privy Council.

Under the contract referred to between the trade and the London Corn Exchange, it is provided that the Canadian government grade certificate shall be taken as final; but there is another provision to the effect that this certificate is not a warranty of quality of the shipment unless any defect in the grain is observable upon examination. It is on this provision that the legal representatives of the German grain exchange have taken their case to the British Board of Arbitration, arguing that the defect in the barley shipments from the U.S.A. was observable upon examination and that therefore the certificate, which is the same as the Canadian certificate, is not a warranty of quality.

Should the board of arbitration find this as the fact, it is highly probable that before the Privy Council the Canadian government certificate final might become the subject of close scrutiny, if not, indeed, a legal decision.

The organized grain trade of Canada and the wheat pools of Canada through their central selling agency have it is understood, subscribed to the enquiry by the board of arbitration and the outcome of it's findings of fact are being awaited with considerable concern and interest here.

Many Perish In Fire

Over Hundred Persons Burned In Russian Theatre

Moscow.—Fire in a wooden moving picture theatre that had but one exit caused the deaths of 114 men, women and children, in the village of Igolkino, Vladimir province, 400 kilometres northeast of Moscow. The film caught fire and the flames spread rapidly through the frail structure.

In addition to the dead, 11 were severely injured and six slightly hurt. Because so many of the victims were parents, the education department has taken steps to care for the orphans. The state executive appropriated 15,000,000 rubles for the bereaved families and will adopt further relief.

Earl Arrives At Castle

Southampton, England.—Amid lusty cheers from employees of the estate and fusillades of fog signals exploded by a truck pushed along the railway line, the "rancher earl," from Alberta, tenth Earl of Egmont, and his son, Viscount Perceval, arrived at the family seat, Avon Castle, in Hampshire.

Important Land Deal

Springwater, Sask.—An important land deal has been completed here with the sale by R. H. Bourk, of 15 sections of farm land to a party of Mennonites. The purchase price is said to be around $90,000. Mr. Bourk is a prominent farmer of this district, having come here in pioneer days.

Plan Zeppelin Flight

Berlin.—Dr. Hugo Eckener, commander of the German dirigible Graf Zeppelin, states that a flight from Friedrichshafen to Rio De Janeiro, Brazil, was being considered for this year.

Discussing Amount and Duration Of Annuities

Committee Makes Good Start At Reparations Key Problem

Paris.—The experts committee on reparations is making a good start at its key problem—the amount and duration of annuities with which Germany's debt will be paid.

Discussion is strictly semi-official, however, and there are still wide gaps between the hopes and claims of the different parties. But there is a spirit of conciliation in the air which seemed to justify an optimistic outlook on deliberations which soon may reach a plenary session of the committee.

France was credited with the intention of claiming ten billion marks (about $2,500,000) of an immediate payment which Germany is expected to make.

Belgium, it is stated, will ask reimbursement of six billion marks for alleged worthless forged German currency which the German invaders left behind.

Great Britain's claims in the first payment are expected to total about four billion marks (about $1,000,000,000). It is understood that Great Britain will claim that previous agreements do not apply to the claims of the dominion and that she expects further to be reimbursed now for what has already been paid the United States on the war debt account.

Plans Another Trip Over Niagara Falls

French-Canadian Willing To Dare Death a Second Time

Niagara Falls, N.Y.—Jean Lussier, French-Canadian, who successfully made the perilous trip over the falls last summer, encased in a rubber ball, probably will dare death a second time on July 4.

Lussier went over the falls in a specially constructed ball in daylight with more than 75,000 persons witnessing the feat. He was fished from the river two hours after starting his trip by William "Red" Hill, veteran riverman.

Lussier is planning to make the second trip in a vehicle which he calls a "parlor ball." The ball will be six feet in diameter, electrically lighted and so constructed that the occupant will be able to remain upright during the entire journey. It will be heavily padded inside to insure escape from any serious injury.

No Disarmament Conference This Year

Earliest Possible Date Will Be Spring Of 1930

Geneva.—League of Nations circles have informed the press that there will be no possibility of holding a general disarmament conference this year.

The earliest date it was declared at which such a conference can be convoked will be the spring of 1930, but it is more than probable that it will be well along in the fall before it can be held.

This delay is due purely to the present lack of progress in the preparation for the conference.

It will be necessary it was pointed out that the League's Preparatory Disarmament Commission must have at least two more sessions before agreement can be reached on a draft project for a general disarmament convention.

A Million Dollar Prize

Shanghai, China.—A three cornered contest among wind and waves, Japanese salvagers and hundreds of Chinese pirates for a prize valued at more than $1,000,000, is taking place off the China Coast, eighty miles from Shanghai, within the Yangtse estuary. The prize consists of the North German Lloyd steamer "Gelsen" which was wrecked on the treacherous Button Rock.

Alberta House Prorogues

Edmonton, Alta.—The third session of the sixth Legislature came to a close here, March 20, at 5.45 o'clock after His Honor the Lieutenant-Governor William Egbert had consented in the name of His Majesty the King, to the passage of a large number of bills and had formally accepted on behalf of His Majesty the supply granted the House.

Bequests For English Charities

London, England.—Several bequests to English charities are contained in the will of R. M. Horne-Payne, formerly of the British Columbia Electric Railways, who died here recently. The estate amounted to $700,000.

Long Search Rewarded

Father Finds Son Stolen About Forty Years Ago

Kansas City, Kansas.—Forty years of search, his life and fortune spent in quest of the babe, his boy who was kidnapped from a cradle, was rewarded when A. A. Wilhite, 60, was reunited with his son, F. H. Bixler.

The son, now 41 years of age, is a prosperous farmer of Kent, Ohio. His mother died at his birth.

The child's maternal grandmother, Mrs. Sarah Lewis, ran away with the boy from their home in Emporia, Kansas. A man named Alfred Bixler disappeared from Emporia at the same time. The boy grew up with the name of Bixler.

Danube River Overflows Banks

Families Lose Everything In Worst Flood Since 1872

Bratislava, Czecho-Slovakia.—Thousands of families along the right bank of the Danube have been bereft of their homes, cattle and other belongings by the worst flood since 1872.

The great river, which is choked with millions of tons of thawing ice, was rising steadily and threatened further disaster.

Church bells tolled along its 1,800 miles length, warning dwellers near its banks to flee for their lives.

MARSHAL FOCH SUCCUMBS AFTER LONG ILLNESS

Paris.—Marshal Ferdinand Foch, famous generalissimo who led the allied armies to victory in the great war, died at his home after a lengthy illness. He was 77 years old.

Although it had long been apparent that the great general was fighting his "last campaign," his warrior heart would not give in and day after day he fought off the inevitable end with grim courage, but a combination of heart trouble, kidney disease and a lung infection were too great at his age.

On February 20, the Associated Press was authoritatively informed that the marshal's death seemed only a matter of days—a week, perhaps, or ten days. But the marshal, with indomitable will, held off death even longer than his doctors thought possible. It was sudden collapse of his heart after several days of improvement that brought death to the intrepid warrior.

"The foremost fighter in the great war," displayed in illness the same grit that he had displayed as the commander-in-chief who led the allied armies to victory in the great war.

The national funeral accorded him is the sixth in the history of France. The five men who were previously so honored were: Presidents Carnot and Faure; Pasteur, the scientist; Gambetta, the statesman; and Victor Hugo, the poet.

Canadian Bank For California

San Francisco, Calif.—Organization of a new bank, the Canadian Bank of Commerce (California), was approved by the state banking commissioner. The action makes the delegation formed of representatives San Francisco branch of the Canadian Bank of Commerce, a separate entity from the main organization operating under a state charter.

URGES TARIFF REPRISALS

Hon. Hugh Guthrie, acting Conservative leader, in the budget debate at Ottawa on March 7, urged retaliation by Canada in the foreshadowed economic brush with the United States.

Prince Decorated By Master Mariners

Receives Temporary Insignia Of Office While Regular One Is Being Made

London, England.—The Prince of Wales at the annual banquet of the Master Mariners, was adorned with a temporary insignia of office, an ornate badge and chain, while the actual insignia in gold and jewels is being made. It was the first meeting in his official capacity with the body to which the King last year appointed him "master."

Cabinet ministers, ambassadors, and many prominent men were present.

The prince, after an allusion to the presence of the high commissioners of the Dominions, announced amid cheers of proposal to make the company an imperial body by increasing its membership by one-hundred. All of the new members had been master mariners resident in the Dominions. The prince said he regarded the proposal as a very important move and one which would serve as a great imperial link.

Says Doukhobors Are Not Communists

Look On World As One Community States Peter Veregin

Winnipeg.—Stating that communism, so-called, was nothing but a "changing of seats," Peter Veregin, spiritual head of the Christian community of all Doukhobors, asserted in an interview here that Doukhobors were not communists in the accepted sense of the term.

They looked upon all the world as one community, headed by Christ, and looked upon the country in which they were a community unit.

Mr. Veregin declared that it had not been Doukhobors, but Russians living on the borders of the Christian community and wrongly considered members of it, that had been involved in trouble with educational authorities in British Columbia.

New Submarine Device

Washington D.C.—The submarine "Lung" device which recently proved successful in tests off the Florida coast is to be furnished to the entire submarine personnel of the navy, it was learned recently. Seven hundred "lungs" have been ordered by the navy for use on its four V-type submarines. Bids for 6,300 more will be called for soon, it was learned.

MY ANGELINE

Mable Wayne — Evangeline Well, Grand Pre

It is not often that Canada has been the inspiration for popular songs. We sing about "Michigan," "My Ohio Home," "The Swanee River," but at last the most romantic portion of Canadian territory has served to inspire popular song writers just as it did the great Longfellow in other days. Wolfe Gilbert and Mable Wayne have given us "My Angeline," based on the "Evangeline" story and, no doubt, many other Evangeline songs will make their appearance and add to the fame of this quaint Nova Scotia valley of apple blossoms. The authors of "My Angeline" were also co-authors of "Ramona," "Chiquita" and many other popular numbers.

Trains Meet In Head-On Collision

Nineteen Meet Death In Train Wreck In Ontario

Parry Sound, Ont.—Through an unexplained mistake in the interpretation of orders, two crack Canadian National Railway transcontinental express trains loaded with sleeping passengers crashed head-on at Drocourt, a siding 46 miles north of here.

Members of train crews met death when the heavy engines and the baggage cars of the trains were telescoped and passengers in a colonist car on the west-bound train were burned to death, some before the eyes of helpless trainmen and passengers.

Some of the dead may never be identified owing to the fierceness with which the flames devoured all within the car.

Railway officials estimate that 19 persons were killed, though late tonight but six of these, all members of the train crews, were listed among the identified dead.

The passengers burned to death in the colonist car are believed to have been mostly immigrants bound for new homes in the West. Many of them were without relatives or friends in the Dominion.

The colonist car which caught fire was of wooden construction. This type of car is fitted with a stove which passengers are allowed to use for preparation of their meals during the long journey from the seaboard to the prairie provinces. The interior of these cars is wooden. It is believed that the crash overturned the stove and the car took fire from the coals which were spilled out.

The passengers, many of them asleep in their berths when the trains crashed, were caught without means of escape. Emergency trains were sent out from divisional points when news of the disaster was flashed out. The injured were placed aboard and rushed to hospital here. Some died en route.

Representative From India

Will Attend National Conference On Education At Vancouver

New Delhi, India.—The National Conference on Education at Vancouver, in April, will be probably the first occasion on which the Indian states have been represented as a separate unit of the British Empire. Lawrence Rushbrook-Williams, foreign secretary of the State of Patiala and noted historian, is the official representative of the native ruling princes and he left for Vancouver on March 22.

ALBERTA FIGHTS PLAN FOR RETURN OF RESOURCES

Edmonton, Alta.—Protesting that return of the natural resources to Alberta on the same basis as their return by the Dominion government to Manitoba and Saskatchewan would be unfair to Alberta, Premier J. E. Brownlee delivered a lengthy exposition of Alberta's position on the subject in the legislature.

Grounds on which Mr. Brownlee objected to the same settlement of the resources question with Alberta as with Saskatchewan, were outlined by the premier as follows:

The Dominion had made Alberta an offer, including the return of school lands and school lands funds; a settlement of the parks question on the same basis as other provinces and an arrangement that, when the financial considerations ultimately were decided upon there would be a transfer of natural resources with the present subsidy but with no increases. This is the same offer made to Saskatchewan, but that province is objecting to continuation of the present subsidy, now amounting to $750,000 annually, arguing that it should not be fixed until the subsidy rises to $1,200,000 annually, the maximum.

It had been suggested that settlement would be made by the Dominion on the same terms with both Saskatchewan and Manitoba, said Mr. Brownlee.

If this arrangement were carried into effect, the net result would be that Alberta's subsidy would remain for all time at $562,000 a year, while Saskatchewan would receive annually $750,000 this being entirely due to the accident of Saskatchewan, having passed the population basis of the earlier agreement by which a larger subsidy would be paid, even though when the two provinces were created in 1905 there had been no discrimination.

WHEAT GRADING IS SUBJECT OF OTTAWA DEBATE

Ottawa.—The marketing of Canada's 1928 wheat crop came before parliament in no uncertain way recently. Following reports from the west of dissatisfaction with the work of the board of grain commissioners, and the way the crop was handled this year, three resolutions were placed on the order paper of the House of Commons. One asked that in grading wheat, its protein content be taken into consideration. A second referred to the mixing of grain, and a third condemned the board of grain commissioners for issuing the so-termed "hybrid" ticket. It was on a recommendation of the committee on agriculture that it be empowered to investigate all these points at one time that the discussion burst forth into the Commons and forced the budget debate to give way.

To the various and severe criticisms which have been levelled at the board of grain commissioners, Hon. James Malcolm, minister of trade and commerce, said: "To discuss charges against the board of grain commissioners when the board has not had an opportunity to give evidence as to why they ruled or failed to rule in a certain way, I think is unfair. So far as I am concerned I have found the board of grain commissioners at all times anxious to assist in the administration of the grain act in the interests of the producer. Whether they have made mistakes of judgment or not will be brought out in the evidence before the committee."

He declined to comment as a minister of the crown on a public servant until the latter had been given the opportunity to defend himself. He accordingly urged the application of the committee that its scope be enlarged, be granted by the House. The members of the board would then come before the committee to give their side of the case.

Speed Boat Title Captured By Segrave

English Driver Adds This To Automobile Racing Laurels

Miami Beach, Fla.—The International Speed Boat racing title went across the seas to England as the result of a race devoid of competition.

Major H. O. D. Segrave added the water title to his automobile racing laurels when he sent his patched and leaking "Miss England" creeping across the finish line on Biscayne Bay recently five minutes behind Gar Wood's "Miss America VII." He was officially credited with winning the two-heat race with three points, as against two for the United States speed-boat king.

Wood's boat finished around the two-mile course in the elapsed time of 11 minutes, 45.05 seconds, for an average speed of 61.275 miles an hour. The Englishman finished in the time of 16 minutes, 30.40 seconds, for an average of little more than 42 miles an hour.

The victory went to the English driver on the basis of points scored, Wood having been forced from the first heat yesterday with no points.

Seeding In Peace River

Ten Acres Of Wheat Seeded On March Nineteenth

Edmonton, Alta.—A special to the Journal from Spirit River, in the Peace River country, says: The Blueberry settlement, twenty-five miles west of Spirit River, has the rest of the country shaded for early seeding. Jack Burrows, a rancher of Blueberry, seeded ten acres to Marquis wheat, March 19th. This is believed to be the earliest seeding on record in the North.

Work on the land in Edmonton district got off to a start on March 19, when a large disc swung into action on the provincial government farm at Oliver. This is said to be one of the earliest starts on the land in ten years.

Horses Win Against Turtle

Port Arthur, Tex.—Fisherman A. Wiltz hitched four horses to a seine and dragged a 1,250 pound turtle from the Gulf of Mexico. The turtle whose protective shell had been cut, perhaps by a ship's propellor, put up a hard fight before the horses finally won. It was estimated to be more than 300 years old.

Jasper Park Lodge will open on May 21; Minaki Lodge a month later.

Farm Training for British Boys

The first group of [illegible] British boys coming to Alberta during the coming [illegible] under [illegible] arrangement between the Provincial Government and the [illegible] Board will arrive [illegible] March 26th. The boys will be given a month's course of training at [illegible] Provincial School of Agriculture at Olds and Vermilion [illegible] placed in employment on farms in the province. A second group will arrive about May 1st and will be [illegible] and [illegible] in farm work.

Parties of young British [illegible] are expected to arrive [illegible] June 1st and July 1st. They will be given a month's instruction which will fit them to fill positions as domestic farm help throughout the province.

Both the boys and the girls coming forward under this arrangement have been selected through the office of Herbert Greenfield, Agent General for Alberta in London. They are all said to be of the type most likely to be readily adaptable to conditions in Western Canada, many of them already having had experience in farm work.

Alberta Flier Wins Dominion Trophy

The McKee trophy awarded for the most meritorious flying done in Canada in 1928 has been won by Lieutenant [illegible] H. Dickens of Edmonton. Special mention is made in awarding this honour to Lieut. Dickens, of his flight of 3,964 miles across the Barren Lands last September. During the past months while on a flight to Fort Good Hope, he crossed the Artic Circle and has since returned to Edmonton from where he has engaged in making regular flights into the far north.

FOR SALE.—Garnet wheat, government tested; $1.25 per bushel. Apply to W. Swinton, Box 75, 'phone 91, Tofield, Alta. 6c

Strong Evidence That Indicates The Real Worth Of Dominion As a Field For Mineral Industry

Among the evidences of Canadian progress in 1928, none is more gratifying than that which again reveals, in stronger light than ever, the real worth of the Dominion as a field for mineral industry. The preliminary figures for the value of the country's mineral output, recently issued by the Dominion Bureau of Statistics, reach a peak well above any previous level.

There are two physical facts that carry a broad and special interest in connection with the steady ascent of Canada's mineral production in late years.

One is to be found in the sheer variety of minerals that enter into our annual output. In financial circles the wisdom of "diversity of investment" is a byword, and it may well be said that Canada's strength as a mining field [illegible] largely in "diversity"—in the fundamental fact that Nature has invested the Dominion with mineral assets which, in variety, are matched by few, if any, countries. It is to this wide range of resources that the Canadian mining industry mainly owes both its enjoyment of present prosperity and its assurance of stable, well-sustained growth.

A second physical fact of no less importance exhibits itself in the breadth of territory afforded by the Dominion as fair ground for more intensive prospecting. A major portion of Canada has so far been subjected only to cursory study, but even so, [illegible] information has been gained as to the potential mineral wealth of the less known regions of the country to confirm the Canadian mining industry in its title to an ample field for further development.

British Stock Farmer Uses Artificial Light

Ultra-Violet Rays Keep Animals In Good Condition

Ultra-violet light is reported to be a boon to the British stock farmer, besides maintaining cows, race horses, etc., in good health during the sunless months of winter. It is improving their condition so that they bring a higher price in the market, according to V. M. Wood, a south of England farmer, in Surrey, who experimented with pigs. Twelve pigs were treated with ultra-violet light for three minutes daily when they were 10 to 12 weeks old, and the time of treatment was gradually increased to 20 minutes. This was maintained until the animals were sold at the age of 20 weeks. Twelve similar pigs were kept as controls without light treatment. All 24 were sold on the same day, and in every case the irradiated pigs sold for a higher price than the untreated animals. The extra money obtained for each pig was said to be 11 times the cost of the operation of the quartz lamps which were used for the irradiation.

Healthy Stock In Dominion

Packing House Inspection Shows Cattle In Splendid Condition

In fifty-six packing plants during the past fiscal year, inspectors of the Dominion health of animals branch examined 1,120,000 cattle, 620,000 sheep, 2,600,000 swine and 300,000 poultry and passed upon their suitability for human consumption. All carcasses found seriously diseased were condemned as unfit for food, while others in which the disease was localized had the diseased portions condemned. It is a fine commentary on the excellent health of Canadian live stock and the efficacy of the Dominion regulations to maintain that health, that only a very small proportion of the carcasses examined were condemned 1.28 per cent. in the case of cattle, and 0.27 and 0.26 per cent. in the case of sheep and swine. That the cattle percentage was even so high may largely be attributed to the fact that reactors from the tuberculosis eradication campaign were included in the inspection figures. There is to be no let up in the campaign against live stock disease, however, as the Hon. W. R. Motherwell has announced the opening of a new laboratory at Ottawa to be used for research work, particularly into new methods of eradicating bovine tuberculosis. Calmette vaccine, which it was announced would immunize calves against tuberculosis infection, has already been under test for five years at Ottawa, so far with somewhat negative results, but the experiments will be continued with the larger facilities now available until the claims of the discoverer of the vaccine are either proved or disproved. It is encouraging that the output of meat animals from the commercial herds of the country continue to show such a splendid percentage of healthy animals.

Can Make Nitrogen From Air

Before War, Secret Was Known Only To Germans

The world's supply of fertilizer, has been greatly augmented by the discovery of extensive nitrate fields in South Africa. However, modern chemistry has rendered us largely independent of such natural deposits. For years it has been possible, says a Daily Chronicle writer, to make nitrogen from the atmosphere, and before the war, German chemists knew the secret process by which this could be done. Despite the blockade, Germany was able to produce millions of tons of nitrogen from the air for agricultural purposes and the making of explosives. This process was a secret for some time, but ultimately we discovered it and our chemical factories can now produce vast quantities of synthetic nitrogen from the very air we breathe.

Chewing Gum Craze In London

Chewing gum has become such a craze in London, that cleaners in trams, buses, theatres and motion picture houses are complaining of the extra work of removing the "parked" wads from under the seats. Dealers say the demand for gum grew greatly during the summer and they believe touring Americans were responsible for much of it. The Londoners then took up the habit from the visitors.

Galleries Extend Many Miles

The underground tombs of early Christian martyrs may be visited by tourists in Rome. The galleries of the catacombs, if placed one after the other, would extend for six hundred miles.

Policeman: "If you had sounded your horn this poor chap would have been able to avoid being hit by your car."

Girl Driver: "I thought of that, but I didn't want to startle him so suddenly."

Origin Of Butter

Swaying Motion of Camels Caused Sour Milk To Turn To Butter

The camel is the real inventor of butter, according to the results of research made by the National Dairy Council. The origin of this food was traced to the custom of the Arabs who carried across the desert on the backs of camels sour milk in skin bags. The swaying motion of the camels caused the contents of the bags to turn into butter, which the Arabs first used as a lotion for the skin. Later they made butter by tying the bags of milk to fast horses and racing the steeds up and down for several hours. Bags of milk were also laid on the ground and beaten until their contents were churned into butter.

China Bans Toy Pistols

Forbids Importation Because Bandits Use Them To Terrorize People

Because bandits in interior China use them to rob and terrorize the country folk who do not know that they are only toys, the Nationalist Government has issued a regulation forbidding the importation into China of toy-pistols and air guns.

"Such toys, while not regarded as harmful and are imported only as playthings for children," explains the order, "are known to have been frequently used in the interior of China by bandits and gangs of riff-raff to terrorize the ignorant country folk. For this reason, hereafter, importation of toy pistols and air-guns, either by Chinese or foreign firms, will not be permitted."

Student: "And poor Harry was killed by a revolving crane."

Englishwoman: "My word! What fierce birds you have in America."

"Since I have been exercising my chest has expanded two centimetres a week."

"Then a year hence you will need a larger house."—Lustige Blätter, Berlin.

All patterns 25 cents in stamps or coin (coin preferred). Wrap coin carefully.

Wanted To See It

The recruit had been at the naval training station two weeks and had spent most of his time digging ditches, chopping trees, and filling depressions. Finally, he sought his immediate superior.

"You see, sir," he complained, "when I joined the navy they said I'd see the world, and for two weeks I've been doing nothing but re-arrange it."

Another Proof Of Intelligence

Charles Minich, a road patrolman lay helpless in his bachelor home, near Cornwall, Wisconsin, suffering from a violent attack of rheumatism. Minich called his Airedale dog to the bedside, tied a message to the dog's collar, and repeated the name of a neighbor several times. The message was delivered by the animal, and Minich was taken to town and given medical care.

Great Britain Forging Ahead With No Sign Of Decadence As Some Critics Have Predicted

Keeping Pace With Settlement

Many New School Districts Organized In Province Of Alberta

Fifty-six new school districts were organized in the province of Alberta during 1928, bringing the total number of districts in the province up to 3,107. The total school enrolment is now approximately 160,000. Eighty-one new one-room schools and thirteen new two-room schools were built in country and village districts last year.

A feature of the report of the Department of Education is the reference to the increase in the number of students enrolled for technical education. In the Institute of Technology at Calgary, enrolment last year reached a total of 1,765. Approximately 600 new students were enrolled during the year for correspondence courses. Over 1,000 more pupils wrote the departmental examinations than in any previous year. Of all the units written in the high school grades 78.19 per cent. were passed successfully.

Seeds Will Be Sun-Tested

Will Test Seeds For Purity At World's Grain Exhibition To Be Held In Regina

Grain exhibits entered in competition at the World's Grain Exhibition, to be held in Regina, in 1932, will be tested for purity in nature's laboratory. Although the exhibition itself will not open until August, the seeds entered in competition must reach the grounds before April, so that they may be sown in plots to determine the purity of the various varieties.

Prizes aggregating nearly a quarter million dollars will be awarded for grain and seeds, and exhibits from all the world's grain growing countries are expected to be entered in competition.

B.C. Purebred Poultry Sent To Switzerland

Birds For First Shipment Supplied By Victoria Man

The first shipment of British Columbia purebred poultry ever sent to Switzerland was made by the R.O.P. Poultry Breeders' Association of British Columbia recently. The shipment consisted of ten White Leghorn yearling hens, all blood-tested and with R.O.P. records of from 200 to 223 eggs. The birds were bred and supplied by N. R. Plaxton, Victoria. They were shipped on the steamer "Notre Dame" which took them to Havre, France. From there they went to Switzerland by train.

One Way Out

The way to avoid having uninvited guests for week-end visits is to have no spare bedrooms, according to a man who has given a great deal of thought to the uninvited-all-night-guest problem. "Extra bedrooms in a house invite company as surely as a peach tree in a yard invites boys," he said. "When you build a new house don't add too many bedrooms if you wish to lead a quiet life."

Electricity From Mud

Besides pies and baths, mud is to be used as a source of electricity. A power station has been erected at Karnap, Germany, which will utilize the mud from the Ems River. This mud has a heat value, when extracted and dried, which corresponds to that of lignite. The dried product will be used to heat steam for the engines driving the dynamos.

Philip Whitwell Wilson, formerly a member of parliament for South St. Pancras, famous as an author and war correspondent recently gave an address in the Town Hall New York. He said:

All past empires have declined and fallen. Will that be the fate of the British Empire? No! With a population of forty-five millions she governs 450 millions. At the outset of the Great War her area was about thirteen million square miles. Today it is about a million more. We must remember that empires in the past lacked means of communication. Rome built admirable roads but their value is trivial in comparison with our telegraphs, transoceanic telephones, quick transships and airplanes. Our Empire is the first that recognized that when colonies grow up it is best for them to begin house-keeping for themselves. We have a civil service which is superb; our judiciary never stood higher in ability and dignity, testifying to the rising character of the people, the efficiency of our courts. In education there is a keener and more intelligent interest than in any other era of our history.

To the advancing prosperity of the British Empire the Great War came as a staggering blow. In 1914 our national debt was three-and-a-half billions sterling, it is now 36 billions. In 1914 our taxes were not quite one billion, they are now three-and-a-half billions. In England taxation is about $80 per head annually, as against about $30 in the United States. The latest annual report of her commerce shows England exporting four-and-a-half billions and importing six billions. The difference was in large part made up by income from foreign investments, receipts from shipping and insurance, with goodly amounts from tourists, most of them trans-Atlantic.

As to unemployment, about one-ninth the toilers in Great Britain are out of work. Usually the figure has stood at about one-twentieth. And yet, partly because of an increased population, there are at this hour more people at work in Great Britain than there were in 1914, and they are better clothed and fed. Since the Armistice about a million new dwellings have been built, about 600,000 more are needed. Acute depression is felt in Wales and in Northern England, especially in the cotton and woollen trades, in iron, coal and shipbuilding industries. The textile mills before the war enjoyed wide markets in Russia, India and China. These have been lost. In coal mining the situation seems hopeless. In 1927 the estimated loss in this trade was $45,000,000, in operating 3,000 mines by about 1,500 companies, liable for royalties to about 4,000 land-owners.

As to remedies: Every year about a thousand miners leave their old homes. Every year about five thousand miners are trained for other trades, and are slowly absorbed by other districts of England. Notwithstanding the depression in shipbuilding there are today on the stocks ships which will have a total tonnage of one-and-a-half millions. In the steel trade there is anxiety regarding the growth of competition with France, where the production may soon overtake that of Great Britain, now about eight million tons a year.

Often the question is asked, "Is England to share the fate of Holland and drop to secondary rank?" That would be no ignoble destiny. No nation on earth is more worthy of respect than Holland. A nation may be great without being the most populous or the richest.

Football Coach: "What experience have you had?"

Freshman: "Well last summer I was hit by two autos and a truck."

Great Britain provides a market for approximately 2,000,000,000 buttons a year.

First Ten-Pounders

Trained farm workers who are headed for the West, where they will contribute to the success of the 1929 harvest. They came over on the "Metita," the first large group under the ten-pound rate, and were directed to farm work by representatives of the Canadian Pacific Railway.

Hearwich: "I use 10 brands of hair wash. I am manicured, pedicured. I get my meat straight from Paris. If this goes on, I shall be having a bath."—Dorfbarbier, Berlin.

Only choice leaves grown at high altitudes go into the blending of Blue Ribbon Tea. That is why its flavour is so uniformly excellent. Insist upon getting it from your grocer—refuse substitutes of inferior quality.

WORLD HAPPENINGS BRIEFLY TOLD

The Prince of Wales won nearly all the principal prizes at the fourth annual show and sale of Shorthorn bulls at Birmingham.

Admiral Alfred Von Tirpitz, who led the Imperial German navy during the Great War was 80 years old March 19.

Lord Lovat has resigned from the chairmanship of the Overseas Settlement Committee owing to ill health. He has now almost completely given up public life.

The Turkish government has paid foreign bondholders the first instalment on the Ottoman debt, the total of which is $162,000,000 and is to be paid within 27 years.

French volunteer firemen who make up the bulk of the fire fighting forces are attempting to organize the first firemen's world's fair, to be held in Paris in 1929.

The British treasury has received $25,000,000 as the sixth instalment on the French war debt, and $725,000 as the seventh instalment on the Italian debt.

In order to enable him to become acquainted with public affairs from the diplomatic angle, Prince George, the King's third son, has taken up temporary duties in the foreign office.

Graham Jardine, 55, former branch manager of the Royal Bank in western Canada, and for the last five years connected with a Toronto brokerage firm, died suddenly in that city.

The government of Cuba has formally notified the Canadian government that it accepts the agreement concluded at Ottawa, in January, in regard to the division of the short radio waves in the North American area.

Conquest of the air by feminine pilots was advanced by Mrs. Louise McPhetridge Thaden, 23, of Oakland, California, when she remained aloft in the lonely cockpit of her biplane for 22 hours, 3 minutes and 12 seconds to establish a new endurance flight for women.

Worms in children, if they be not attended to, cause convulsions, and often death. Mother Graves' Worm Exterminator will protect the children from these distressing afflictions.

Creatures Of Habit

We are unreasonable creatures most of us. The person who puts ... a hot tea kettle because he is required to button his garment every morning and unbutton it every night, day after day, month after month, year after year ... and ... [illegible]

The Right Idea

Uncle Ezra: "My nephew, the aviation student, writes me as how he did his first 'solo' on Wednesday. He was 2,000 feet in the air."

Uncle Rean: "Well, if a fellow is going to practice singing, that's the place for him to do it."

High In World List

Canadian Banks Among Leaders In Amount Of Deposits

In a table made by the California Bank, Los Angeles, is found the interesting fact the Bank of Montreal ranks tenth in amount of deposits in a list of 150 of the largest banks of the United States, Great Britain and British Dominions. The rank of the banks in this list is based on the deposit in dollars to the end of the past year.

The five leading banks on the list are located in London, and the next five in New York. The next two are located in Canada. They are the Bank of Montreal, and the Royal Bank of Canada. Down the list to the sixteenth name is found the Canadian Bank of Commerce.

The paid up deposits, according to this tabulation, for the largest bank is $1,920,272,305. The Bank of Montreal has a deposit of $733,440,278 and the Royal Bank $703,202,083.

Minard's Liniment for the Grippe and Flu.

By means of a secret chemical compound, German vessels made a town completely invisible in six seconds with a smoke cloud 300 feet high and 500 yards square.

NEW APPOINTMENT

R. HENDERSON,

who has just been appointed Canadian National Railway's Industrial Agent for the Alberta district, with headquarters in the station at Edmonton. Expanding industries in the west, and eastern concerns which are looking to the opening of western branches, will be assisted by Mr. Henderson, who will do for Alberta what Mr. Roblin and Mr. Chambers, both recently appointed, are doing for the Saskatchewan and Manitoba districts. Mr. Henderson entered the services of the National system in 1912.

To Improve Maple Industry

Producers In Canada Will Ask Legislation From Government

An organization has been formed of Canadian producers and manufacturers of maple products which will submit to the Dominion Government a request for legislation to improve the condition of the industry. The chief demands will be for more stringent laws against adulteration, inspection to prevent adulteration and a campaign of publicity to secure greater consumption of maple products in Canada.

The Royal Canadian Golf Association has decided to hold the Canadian Amateur Championships on the Jasper Park Lodge course this year from August 19 to 24.

FASHION

No. 286—Youthful Flare. This style is designed in sizes 16, 18, 20 years, 36, 38, 40 and 42 inches bust measure. Size 36 requires 3 yards of 40-inch material with 1½ yards of binding. Emb. No. 11130 (blue) 15 cents extra.

No. 259—Parisian Simplicity. This style is designed in sizes 16, 18, 20 years, 36, 38, 40 and 42 inches bust measure. Size 36 requires 2¼ yards of 40-inch material with ⅝ yard of 36-inch contrasting.

No. 740—Step To Smartness. This style is designed in sizes 16, 18, 20 years, 36, 38, 40, 42 and 44 inches bust measure. Size 36 requires 3 yards of 36-inch material.

No. 151—For the Smart Junior. This style is designed in sizes 10, 12, 14 and 16 years. Size 12 requires 2½ yards of 40-inch material with ¼ yard of 36-inch contrasting.

No. 637—Playtime. This style is designed in sizes 2, 3, 4, 5 and 6 years. Size 4 requires 2⅛ yards of 40-inch material with ½ yard of 32-inch contrasting.

No. 241—An Attractive Flare. This is designed in sizes 16, 18, 20 years, 36, 38, 40 and 42 inches bust measure. Size 36 requires 3¼ yards of 40-inch material with ⅝ yard of 36-inch contrasting and 6⅞ yards of binding.

All patterns 20 cents in stamps or coin (coin preferred). Wrap coin carefully.

SUNDAY SCHOOL LESSON

MARCH 31

THE FUTURE LIFE
(Easter Lesson)

Golden Text: "Be thou faithful unto death, and I will give thee the crown of life."—Revelation 2.10.

Lesson: Matthew 28.21-46; Mark 12.26, 27; Luke 24.1-12; John 14.1-6; 1 Corinthians 15.3-20, 50-58; 1 Thessalonians 4.13-18; Revelation 22.1-5.

Devotional Reading: Psalm 23.1-6.

Explanations and Comments

The Resurrection Of Christ, Luke 24.1, 2.—Early on Sunday morning after the crucifixion of Jesus, Mary Magdalene and other women came to the tomb where His body had been laid, to embalm it with the spices they had prepared. All the way they had been worrying about the great stone that blocked the entrance to the tomb. They could not move it, and who would be there to move it for them? But when they came within sight of the tomb, lo, they saw that the stone had been rolled away. Christ had risen. "Why seek ye the living among the dead?" were the words they heard. Was it true? Jesus was not there, but where was he? They were full of fear and full of joy, half fearing and half believing. And then they met him. There he was, the same Jesus, and their fear and doubt vanished. He was risen, even as He said.

We no longer fear what lies beyond the grave. We know that we do not really die, that we pass through death to another life. We know that we shall live again, and in that knowledge we lose our fear and find hope and joy.

"May Easter Day
To thine heart say,
'Christ died and rose for thee.'
May Easter night
On thine heart write
'O Christ, I live to Thee.'"

The Promise Of Christ, John 14.1-3.—"Let not your heart be troubled; believe in God, believe also in Me." In spite of everything the disciples must trust in the goodness of God and in their Lord's own loving thought of them. Faith is still the cure for heart-trouble, the sure reliance in anxious moments. Not a nominal faith in the existence of God, but an active, overmastering belief in His goodness and wisdom, and in His overruling all things for good, is the faith that will keep the heart from despair in times of danger and dread.

"'Twas the Master Himself who said it
To the sorrowful little band,
Facing an hour of darkness
That they could not understand."

To Asthma Sufferers. Dr. J. D. Kellogg's Asthma Remedy comes like a helping hand to a sinking swimmer. It gives new life and hope—something he has come to believe impossible. Its benefit is too evident to be questioned—it is its own argument—its own best advertisement. If you suffer from asthma get this time-tried remedy and find help like thousands of others.

Confusion Is Right

Issuance of laundry receipts in Chinese will be illegal in New York State, if a bill recently introduced by Assemblyman Mark C. Kelly, of Utica, is passed. It provides that every laundry establishment, upon receiving clothing, shall issue a receipt in English, itemizing each article received. Said Assemblyman Kelly: "A Chinese laundry ticket does not mean a thing to the recipient if he is a one-language American."

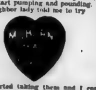
A Corrector Of Pulmonary Troubles.—Many testimonials could be presented showing the great efficacy of Dr. Thomas' Eclectric Oil in correcting disorders of the respiratory processes, but the best testimonial is experience, and the Oil is recommended to all who suffer from these disorders with the certainty that they will find relief. It will allay inflammation in the bronchial tubes.

Cloves came from the Indies and take their name from the Latin clavis—meaning a nail, to which they have a resemblance.

The onion first came from India. The onion was almost an object of worship with the ancient Egyptians.

Could Not Sleep Heart Would Start Pumping and Pounding

Mrs. Fred. P. Averill, 136-12th Ave., Calgary, Alta., writes:—"I was bothered so much with my heart I could not sleep. I would waken up in the night screaming, and my heart would start pumping and pounding. A neighbor lady told me to try



so I started taking them and I can truthfully say I am a different woman. Altogether I only took two boxes."

When Cunarders Carried Cows

Vast Difference Between Past and Present Of Steamship Travel

Amazing facts are given by E. D. Breton, of London, England, who writes of the past and present of steamship travel, and refers to the famous old "Britannia," which was the first steamer to cross the Atlantic on schedule, and which was the product of the imagination of Sir Samuel Cunard, of Halifax, Nova Scotia, founder of the Cunard Line.

For instance the Britannia was the wonder ship of her day, yet described by the inimitable Charles Dickens as having a saloon "not unlike a gigantic hearse," with sleeping berths comparable only to coffins. Her staff comprised two stewards, a cook, a kind of cabin boy and the navigation crew. She carried a cow abroad to supply fresh milk. Her bathroom would have disgusted any traveller of today, and may have disheartened many prospects of those middle eighties.

Gone is the Britannia. Sir Samuel is gone too. Today the monuments to the man and his crude little steamers are the famous Cunarders which ply across the Atlantic to and from Great Britain, and Europe, and Canada, and the United States, and cruise into the seven seas of the world with their red funnels topped by a black band.

For instance: the world's fastest liner, the Cunarder "Mauretania," voyages along at about 30 miles per hour. The Cunarder "Berengaria" houses 4,000 souls, and carries hundreds of bathrooms for passengers who can either pay the same old Britannia ticket price for accommodation undreamed of in those days, or pay as high as $6,000 for luxury that kings could not get in days gone by. Passengers can now hold swimming parties in the ship's pool, stage balls, or send facetious messages by wireless to friends ashore. They tread on the Cunarder "Aquitania's" three miles of carpet, benefit by her 10,000 electric lights, and 1500 push bells, and are cheered by her 2,000 yards of silk damask wall coverings. Hectic travellers cross the Atlantic in about four days from New York on the Mauretania and marvel at her fame, which has lasted 22 years, and at her record of total mileage which runs into the million.

Sultan's Son a Fiddler

After looking in vain for a rich American girl to marry and restore his shattered fortune, Prince Abdul Kadir, the son of Sultan Abdul Hamid, who today might be sultan of Turkey had not Mustapha Kemal made that country a republic, has sought permission from the minister of labor to join a gypsy orchestra as a violinist.

It is estimated that British workers spend $150,000,000 yearly in travelling between home and place of employment.

The peach originally came from Persia.

Use Minard's Liniment for the Flu.

Will Maintain High Quality Of Beef

Grade Must Be Satisfactory To Receive Government Brand

As soon as the necessary inspectors can be appointed at local points, the Federal Livestock Department will inaugurate a policy of branded beef, with the Federal Government responsible for the maintenance of high quality of the brands which it approves. In order to qualify under this scheme of Government certification, the beef must have been slaughtered in a Government-inspected abattoir and bear the Government inspector stamp. It shall then be submitted to the Government inspector and, if satisfactory grade, the brand of quality will be affixed to it. The beef must then be retailed through an establishment approved by the Government.

Reindeer For Canada

A cable from Stockholm states that a consignment of 300 live Swedish reindeer has been shipped to Canada through a Norwegian port. This is the largest shipment of the sort ever to go forward.

What Will you do

When your Children Cry for It

There is hardly a household that hasn't heard of Castoria! At least five million homes are never without it. If there are children in your family, there's almost daily need of its comfort. And any night may find you very thankful there's a bottle in the house. Just a few drops, and that colic or constipation is relieved; or diarrhoea checked. A vegetable product; a baby remedy meant for young folks. Castoria is about the only thing you have ever heard doctors advise giving to infants. Stronger medicines are dangerous to a tiny baby, however harmless they may be to grown-ups. Good old Castoria! Remember the name, and remember to buy it. It may spare you a sleepless, anxious night. It is always ready, always safe to use, in emergencies, or for everyday ailments. Any hour of the day or night that Baby becomes fretful, or restless. Castoria was never more popular with mothers than it is today. Every druggist has it.

Indigestion

What most people call indigestion is usually excess acid in the stomach. The food has soured. The instant remedy is an alkali which neutralizes acids. But don't use crude helps. Use what your doctor would advise.

The best help is Phillips' Milk of Magnesia. For the 50 years since its invention it has remained standard with physicians. You will find nothing else so quick in its effect, so harmless, so efficient.

One tasteless spoonful in water neutralizes many times its volume in acid. The results are immediate, with no bad after-effects. Once you learn this fact, you will never deal with excess acid in the crude ways. Go learn—now—why this method is supreme.

Be sure to get the genuine Phillips Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

THE CRIMSON WEST

— BY —
ALEX PHILIP

Published by Special Arrangement With Thomas Allen, Publisher, Toronto, Ont.

CHAPTER XVI.—Continued

Men hurried to do his bidding. When the stretcher bearers leaned to lift the inanimate body, Hoop-la fiercely interfered. "Let him alone," he said savagely. Stooping, he picked up the light form and bore it down the hill to their bed in the rough log shack. Donald forced a few drops of brandy through the dying man's colourless lips. Blackie stirred feebly. His eyes flickered open and he smiled as he recognized Hoop-la.

"Give me your hand," he whispered faintly; "I'm runnin' my last high-load, old pal. I guess God'll be good to us rough necks." He gasped painfully. The irregular breathing ceased, his eyes became fixed and glassy, his jaw dropped.

Hoop-la sat motionless, the hand of his dead friend held in his warm clasp. Slowly his head dropped forward and his big frame shook with dry racking sobs. Doctor Paul came in hurriedly. In answer to the look of interrogation in Donald's eyes, he shook his head sadly.

Donald and Wilkinson tiptoed softly to the door. They were unashamed of the tears that made furrows down their blackened cheeks. Sick at heart, utterly overcome by this tragedy, Wilkinson sank dejectedly to a seat outside the cabin door and covered his face with his hands.

There came a sudden patter of raindrops that drummed on the roof of the cabin. Wilkinson stood erect with arms stretched wide. "Rain!" he cried. "The merciful rain! Thank heaven!" He stood with face upturned for an interval, enjoying the pelting downpour, then turned to [illegible] in the cabin door, a deep and brooding sadness in his bloodshot eyes.

"Donald," he said gently, "the newspaper account of this fire will mention the fact that 'a logger was killed.' A logger!—yes—men like Blackie are the backbone of this country, the salt of the earth. Will people ever learn?" he continued, in a voice vibrant with deep emotion. He pointed to the barkless skeletons of trees blackened and charred and branchless save for the gibbet-like limbs stuck out from the naked trunks. "Think of it! All this—the snuffing out of a valuable life—a verdant hillside changed to a charnel-house of dead trees and blackened stumps on bare rocks—the loss of thousands of dollars worth of valuable timber, all this caused by the careless dropping of a lighted cigarette!"

CHAPTER XVII

Donald's announcement that Labor Day would be celebrated at the Lake was received with good-natured approval by the men of the camp, who spoke of the coming event as the "dry" holiday. The rain, which had brought such blessed relief to the hearts of the guardians of the forest, had cleansed the air of the last vestige of haze that had overhung the valley for the past month.

The morning of the holiday dawned auspiciously. The hot days of August had given place to the mellow sunshine of Indian summer. Through the crystal clear atmosphere the mountains seemed much nearer, standing out sharply against the blue sky. Near the top there had been a fresh fall of snow that had covered the bare ice of the glaciers like a white mantle. The brilliant rays of the September sun were reflected from this virgin covering with a brilliancy that was dazzling to the eye.

Janet arrived for the occasion, bringing with her a score of her friends. All through the previous day the trail from the north had brought strings of cayuses from the Indian Reserve, their dusky riders gaily bedecked in holiday attire. "Klahowya, tillicum!" they shouted, their coffee-coloured faces lighting up with a grin that betokened a gala day spirit. Their tents dotted the lake-shore, their camp fires glowing cheerfully throughout the night.

The sports committee had arranged a varied list of events. A rowing race between the two camps; a sack race, free for all; a basketball game between the whites and the Indians; a sawing race in which two "buckers" from each camp would participate; a hundred-yard dash; a log-rolling contest between a man of the State of Maine and a citizen of New Brunswick. But these were mere preliminaries to the real event of the day, the much advertised horse-race. The men from the other camps, arrayed in their "Sunday clothes" made their appearance early in the day.

Each camp brought its quota of sandwiches and cakes, but the brunt of the work fell on Andy and his assistants, who piled tier upon tier of sandwiches on the long tables under the willows by the lake-shore. The lemonade was in half-barrels at each end of the tables, with a "help yourself" sign attached.

Old klootchmen, with stolid, sombre faces, etched deep with cross-hatching of wrinkles, walked through the throng laden with baskets they were trying to sell. "Mika take basket," quavered their aged voices as they held forth their wares.

About eleven o'clock Mr. Wainwright appeared alone.

"Where's Connie?" asked Donald.

"As you are aware, Mr. McLean, Connie is very shy. I could not induce her to accompany me."

"That will never do," said Donald quickly. "I am going after her."

"I am afraid that your trip will avail you nothing," smiled Wainwright in his absent-minded way.

Donald borrowed a cayuse and set off up the trail. He hitched the horse at the edge of the clearing and proceeded on foot down the path, his shoes making no sound on the soft dark earth. As he turned a clump of alders and came in view of the cabin he stopped short, arrested by a sight that evidently elicited his amused interest.

Connie stood outside the door before a small mirror hung on the rough log walls of the house. She was attempting to place her heavy hair in a knob at the top of her head. A page cut from a magazine was tacked to a log near the mirror. She studied the photograph carefully, then returned to the attack with renewed vigour. But she could not get it to suit her. She tried and tried, but the heavy shining coils would elude her slender fingers and fall in a golden cascade over her slight shoulders. Her efforts to reach a satisfactory result brought her to the verge of tears. She stamped her little foot impetuously. At last she got it arranged in a fair semblance to that of the envied actress. The effect was so startling that Donald fairly gasped. The child of the moment was transformed, as if by a fairy's wand, to a woman of wondrous grace and beauty.

Connie poised her head daintily, then half smiled to show her small milk-white teeth; apparently she was pleased with the reflection she saw in the glass. From the clothes-line she took a flour sack that had been split open and washed to be used for drying dishes. Draping this from her waist line, she pinned it securely. Assuming a haughty pose, she walked past the mirror with a sinuous, undulating movement. The little artist was so perfect in her mimicry that Donald's lips involuntarily formed the word "Janet." Twice she passed before the tiny mirror with a regal step, her head turning with its characteristic bird-like motion to catch the reflection.

Gradually the queenly pose slipped from her. She stopped abruptly, throwing out her arms with a forlorn gesture. Her golden head fell forward. Two big tears welled from her blue eyes and ran down the small freckled nose. Her small hands pinched convulsively at her faded blue overalls. A sob like a stab pain shook her slender body. One arm came up slowly to cover her tear-wet face as she threw herself face forward on the grass. Her slender shoulders were shaking with such an agony of weeping that Donald's throat felt constricted and his eyes grew suddenly dim.

Her spotted cayuse, grazing nearby, raised his head at the sound of Connie's hysterical sobbing and moved to the small figure of his mistress. With ears bent forward and a look of bewilderment in his soft eyes, he nuzzled her neck with his velvety nose. The sobbing continued, but her brown hand came up to pat his head lovingly.

Donald tiptoed softly back to the trail. He stood for some time with his hand on the saddle, his head bowed in deep thought. "Poor little kid," he said gently, then whistling a lively tune, he slowly retraced his steps to the cabin. He entered the clearing just in time to see Connie as she disappeared in the timber across the field. He did not want her to know that he was aware of her flight, so he knocked loudly on the door and shouted her name. A raven croaked derisively from the top of a dead tree. The pony raised his head to eye him silently. Connie's pet deer came around the corner of the barn, a look of gentle questioning in her beautiful big eyes.

Donald rode slowly back to camp. Connie's distress had touched his heart; her heart-breaking sobs were still ringing in his ears. "It is not that Wainwright does not love his daughter," mused Donald. "It must be that he is very poor.

"Don't see how I can help," his thoughts ran on. "One can't very well suggest to a father that he buy clothes for his child."

Andy rang the lunch-bell, and there was a wild but good-natured scramble for the tables.

A long table had been arranged in the big dining-room for the officials and Janet's party to which Donald had invited Mr. Wainwright.

"Did you find Connie?" queried Wainwright.

"No," lied Donald, "I couldn't find her."

Janet's friends were having a merry time. There was laughter, jesting and gay repartee from all sides. Douglas was in his element, his quips and brilliant sallies keeping the diners in a continual uproar.

As Donald glanced around the big table at the laughing faces of the gay party, he tried to visualize Connie dressed as one of these fashionably-clad girls who represented Vancouver's "younger set." The vision he conjured caused him to smile dreamily.

Janet had manoeuvred to secure a seat beside Donald. In spite of all her artful contriving she had been unable to have more than a few words with her father's busy general superintendent since her arrival. She noticed the dreamy smile on his face and wondered what could be the cause.

"You seem rather distraught," she said with an arch smile, her dark eyes fixed on his face. "Aren't you enjoying yourself?"

(To Be Continued.)

Guard Against FLU — Sore Throat The First Warning.

Few families will escape. This epidemic constitutes a real danger. Health authorities everywhere warn the public of the danger of the common cold. "Flu" usually starts with Sore Throat. Unless the germs are killed by some antiseptic treatment a serious malady may develop.

A simple treatment is to gargle the throat three times daily with Nerviline. The antiseptic properties of Nerviline quickly destroy the germs in the throat. Of course if the chest is sore Nerviline should be rubbed over the affected area. lots of rubbing. It can't burn a blister, but will bring out the congestion and break up the cold.

To prevent "Flu" or colds from gaining headway Nerviline will prove most effective. It is hardly necessary to point out that the bowels should be stimulated, and the system purged of all waste materials. For this purpose Dr. Hamilton's Pills are recommended. They act without griping or discomfort of any kind. This combination treatment of Nerviline and Dr. Hamilton's Pills will prove a very satisfactory prevention for Grippe, Flu, etc.

PIMPLES CAUSED SEVERE ITCHING

On Face, Neck, Hands and Head. Cuticura Healed.

"My skin trouble started with pimples and red blotches that affected my face, neck, hands and head. The pimples were hard, large and red, and festered and scaled over, causing disfigurement. They also caused severe itching and burning, and I could not sleep at night with the pain. The trouble lasted about two months.

"I tried several other remedies which did not give me any relief. I began using Cuticura Soap and Ointment and they helped me after a few applications, and in two weeks I was completely healed." (Signed) Miss Muriel Gibson, Naggan, Alberta.

Use Cuticura to clear your skin.

Infallible Finger Prints

System Used By Scotland Yard Has Been Greatly Improved

The use and importance of finger prints in the detection of crime is emphasized in a book published by Sir Edward Henry, former commissioner of the Metropolitan Police.

The number of identifications made during 1927 was more than 34 times greater than the largest number effected in a year by the old method. This depended on the unchanging measurements of parts of the human frame.

At Scotland Yard the ring finger of each hand is recorded and the slips are divided into 64 sub-groups. A search among 100,000 slips can be completed within five or six minutes by a practised officer.

He carries in his eye the salient features of the slip he is looking for and can search for it as rapidly as his hand is able to turn over the record slips.

Appointed To Railway Board

John A. Stoneman Will Succeed Hon. Frank Oliver

John A. Stoneman, Saskatoon, Sask., has been appointed as a member of the board of railway commissioners, to succeed Hon. Frank Oliver, who recently retired.

Mr. Stoneman is a past president of the United Farmers of Canada, and is at present a member of the Royal Grain Commission, appointed by the Saskatchewan Government to inquire into conditions affecting the grain trade.

It is understood that Mr. Stoneman will take over his new duties on the conclusion of the work of the grain commission.

Bristling With Thirteens

Superstitious People Should Avoid American Silver Quarter

Londoners have a deeply rooted idea that five shilling pieces are unlucky.

It is very hard, says a writer in Pearson's Weekly, to find the origin of this queer idea, yet it is an absolute fact that many waiters and waitresses hate even to handle a five-shilling piece owing to their fixed belief that it will bring ill luck.

If it were the American silver quarter dollar, one could understand the superstition, continues the article, for surely, of all coins ever minted, this is the most risky. The quarter is twenty-five cents, which roughly corresponds to our shilling, and it simply teems with thirteens.

It has thirteen stars, thirteen letters in the scroll in the eagle's beak, thirteen feathers in the eagle's tail, thirteen parallel bars on the shield, thirteen horizontal stripes, thirteen leaves on the olive branch, thirteen arrow heads and thirteen letters in its name "quarter dollar"—an amazing collection of thirteens!

A PERFECT MEDICINE FOR LITTLE ONES

Baby's Own Tablets Should Be In Every Home Where There Are Children

The perfect medicine for little ones is found in Baby's Own Tablets. They are a gentle but thorough laxative which regulate the bowels, sweeten the stomach, drive out constipation and indigestion; break up colds and simple fever and promote healthful and refreshing sleep. It is impossible for Baby's Own Tablets to harm even the new-born babe as they are absolutely guaranteed free from opiates or any other injurious drugs. Concerning them Mrs. Earl Taylor, Owen Sound, Ont., writes:—"I have four children and have always used Baby's Own Tablets. I am never without the Tablets in the house as they are the best medicine that I know of for little ones."

Baby's Own Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Discover Old Observatory

Instruments, All Of Stone, Are In Excellent Condition

Workmen, digging a cellar in Buetzow, Mecklenburg, discovered an old observatory which archaeologists declare dates from 1181 B.C. A stone circle with markings showing observations on the sun's positions throughout the year served as a chronicle.

The instruments, which are all of stone, were found in excellent condition, and a fair measure of solar altitude can be made even now. Several museums are bidding against one another for the possession of this old Nordic relic.

A telephonic service between Stockholm, Sweden, and Buenos Aires, Argentina—a distance of 8,062 miles—has been inaugurated.

Little Helps For This Week

"Not my will but Thine be done."—Luke xxii. 42.

Whate'er my Father wills is best,
Delight or suffering, toil or rest,
Thine eye, and Thine alone, can see
What I should have, and do, and be.
I only ask that I may know
The way which Thou wouldst have me go,
That I my will in Thine may lose,
That what Thou, Lord, for me shalt choose,
I, too, may choose.
—C. W. Harris.

There are no disappointments, it has been said, to those whose wills are bound up in the will of God.
The Light of the Conscience.

The General Sherman Big Tree in the Sequoia National Park, California, estimated to be at least four thousand years old, is still producing an annual crop of cones from which fall millions of fertile seeds.

The first book to be written by a native Canadian was written by a woman and published in 1801. Since that time some 800 authors have published books, many of them of world-wide renown.

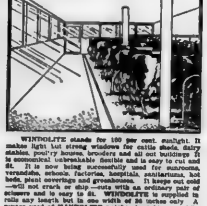
WINDOLITE *The Improved Glass Substitute*

MADE IN ENGLAND



WINDOLITE stands for 100 per cent. sunlight. It makes light but strong windows for cattle sheds, dairy stables, poultry houses, brooders and all out buildings. It is economical, unbreakable, flexible and is easy to cut and fit. It is now being successfully used for sunrooms, verandahs, schools, factories, hospitals, sanitariums, hot beds, plant coverings and greenhouses. It keeps out cold—will not crack or chip—cuts with an ordinary pair of scissors and is easy to fit. WINDOLITE is supplied in rolls any length but in one width of 36 inches only. A square yard of WINDOLITE weighs about 14 ozs. while a square yard of glass of ordinary thickness weighs about 135 to 130 ozs. The improved WINDOLITE requires no varnish. WINDOLITE is made in England.

Price $1.30 Per Square Yard, f.o.b. Toronto.

Use WINDOLITE and let

COMES WITH A MESSAGE OF HEALTH

THE sun is the all-powerful life producer, Nature's universal disinfectant and germ destroyer, as well as stimulant and tonic. WINDOLITE is the sun's most important ally.

Medical research has definitely proved that from the point of view of Health and Hygiene, the most effective among the sun's rays are the Ultra-Violet rays, which possess the greatest power for the prevention and cure of disease and debility.

Science has further established that ordinary window glass does not allow the passage of Ultra-Violet rays, so that by using glass we are artificially excluding these vital health-giving rays. Therefore, the invention of WINDOLITE has completely satisfied the long-felt want. Exhaustive experiments have conclusively proved that it is a most effective substitute for glass, that it freely admits the Ultra-Violet rays and that its use has a most beneficial effect on the growth and development of plants and chickens and on the well-being of cattle, enabled for the first time to have healthy light instead of darkness in their sheds.

Indeed, the discovery of WINDOLITE has during the last six years completely revolutionized gardening, given a new stimulus to poultry breeding, increasing the egg-laying capacity and fertility of chickens, has greatly improved the health of cattle and is now being used in domestic and household requirements.

Distributors: JOHN A. CHANTLER & CO., LTD.

SATURDAY, APRIL 13th

"SHADOWS OF THE NIGHT." A dog picture in which "Flash" the peoples greatest favorite is starring. Laurence Gray and Louise Lorraine take the leading roles.

LOCAL AND PERSONAL

The gospel meetings held in Ingram school [illegible] week [illegible] well attended. Service was held each evening commencing at eight o'clock.

A number of jolly card players were entertained at the home of Mr. and Mrs. Wm. Thompson on Wednesday evening of last week. There were seven tables playing and those who were successful enough to win first prize were, Mrs. J. McGlattie and Mr. C. Ingram; Mrs. J. Ferguson and Mr. C. Baptiste were winners of the consolation.

After lunch being served in the usual order visiting was indulged in. The party broke up in the small hours of the morning, each and everyone reporting an enjoyable time.

The Suitcase bridge club met last week at Mrs. Pincott's, and a pleasant afternoon spent as usual. The first prize was won by Mrs. Plum, the consolation by Mrs. Hill. Some business was transacted, after which the hostess served lunch.

On Saturday, March 16th, Mr. Sullock took his most brilliant orators Boyd Stauffer and Joe Kallal down to Viking to debate a high school team from that place. The Tofield team emerged from the verbal battle as winners. The details of the debate are lacking, the winners being too modest to make a noise about it.

The C.W.L. will give a tea and sale of home cooking at the Institute rooms on Saturday, April 6th.

The Silver Tea, Sale of Home Cooking and Daffodil Sale held under the auspices of Holy Trinity W.A. on Saturday, March 30th, was a great success. We wish to thank the public for their patronage and were very pleased to welcome so many of our Logan and Lindbrook friends.

UNITED LADIES' AID TO PRESENT FINE PROGRAM

The Ladies' Aid of the United Church will present at the Variety Theatre, on April 18th, a varied program, the main feature being a humorous playlet, "The Obstinate Family." Watch this paper next week for further details, and keep the date open.

W.I. NOTES

The regular monthly meeting of the Women's Institute will be held in the Institute rooms on Tuesday, April 9th at 3 o'clock. Mr. Pincott will speak on "Wills and how they affect the women of Alberta." This subject should prove very interesting and we hope a large crowd will be out to hear Mr. Pincott's address. A cordial invitation is extended to everybody.

Recipes for sandwiches will be collected.

Hostesses: Mrs. Taylor and Mrs. Plum.

The Institute wishes to take this opportunity of thanking the Palmatier Sisters whose entertainment was greatly appreciated by the audience. It is plainly seen that this talented family are first class entertainers and Tofield was indeed fortunate in having this opportunity of hearing them.

CHEVROLET DEMONSTRATION

From the famous "Bluenose" fishing fleets of Lunenburg and the iron mines of Sydney to the logging camps of British Columbia is a far cry. Yet the number of people who were fortunate enough to gain admittance to the special Chevrolet Chassis Lecture and Demonstration held in the Variety Theatre Saturday afternoon, viewed these scenes and many more from the length and breadth of the Dominion, illustrative of the nation's vast natural resources and scenic wonders.

"Chevrolet Across Canada" is the title of the highly educational moving picture which was specially taken for the Chevrolet Motor Company of Canada and was shown here under the auspices of Geo. McLaughlin, (local dealer). Chevrolet cars and trucks were seen playing their part in the Nova Scotia fishing and mining industries, or doing their bit in the building of good roads in the Prairie Province. Gathering the nation's wheat in the Canadian west, the same sturdy vehicles were shown beside the combines loading grain for speedy transportation to the [illegible].

Thrills of another kind were seen in Ontario where numbers of Chevrolet trucks do service as fire engines. A fire truck was pictured making a record run and fighting and putting out a real live fire. A horrible railway accident was narrowly averted through the efficiency of the cars four wheel brakes.

Most of the principal Canadian cities visited by the camera man were shown on the screen. In Montreal the audience saw the large fleet of Chevrolet cars and trucks in the service of the Bell Telephone Company. At Toronto were seen fleets of two dozen Canadian National and Canadian Pacific Express trucks starting out on their runs.

Previous the moving picture film, an interesting and instructive description of the inner workings of the New Chevrolet Six was afforded by the audience by means of an illustrated lecture delivered by Mr. G. M. Gossage, of Oshawa, Chevrolet expert.

Following the moving picture there was a drawing for which prizes were awarded. The prize winners were Joe Sutton jr., five gallons of Mobile Oil; Mrs. M. Roth, box of chocolates; Master Stauffer, a flashlight.

LADIES' CURLING CLUB HOLD ANNUAL MEETING

The Ladies' Curling Club held their annual meeting on March 28th at which time the following officers were elected.

Honary pres., Mrs. J. Lee, jr.; pres., Mrs. Clutterham; 1st vice-Mrs. Firth; 2nd vice, Mrs. Hannan; secretary, Mrs. Swift; treas., Mrs. Beirnes.

Executive—Mrs. Brace, Mrs. Chapman; Mrs. Lee sr., Mrs. Agnew, Mrs. Jobb.

LINDBROOK

The deepest sympathy of the Lindbrook people is felt for the Editor in his late sad bereavement.

Mr. H. E. Low of Clifton, near Bristol, Gloucestershire, England, arrived here last Friday, and is staying with Messrs. Clarke and Hicks at the Lindbrook store.

Messrs. Clarke and W. Hooper motored to Edmonton last week on business.

We are very sorry to hear that Miss Hazel Westlake is ill and hope soon to be abel to report her O.K. again.

Mr. August Kortsman and nephew Ralph Kortsman, paid a visit to Phillips, Alberta recently.

Mr. C. Morden has been busy cutting wood and crushing grain in the vicinity.

Mr. W. McHeffey has moved his saw mill down to Mr. D. Turner's where he intends to saw lumber.

Mr. and Mrs. G. Branston entertained their neighbors to a whist drive on March 16th. Six tables were played, prizes being awarded to Mr A. Gill (acting lady) for the first, the second going to Mrs. W. Morden. Mr. H. Creveling reversed his last performance by capturing the gent's first, whilst Mr. Bailey won the second. After ward lunch was served by the hostess and shortly after a very enjoyable evening came to a close.

School is closed this week for Easter recess, reopening April 8th.

Friends of Mr. and Mrs. J. Leahy and family will be pleased to hear that they arrived in B.C. alright and are now located, having bought a place at Strawberry Hill, six miles from New Westminster. They like the place fine and w e all wish them all success and luck in their new home.

ANKIE CREEK WEDDING

Last Sunday at twelve o'clock a pretty wedding took place in Ryley Lutheran Church where Mr. and Mrs. Iver Annebo's eldest daughter Clara Elvida was united in marriage John Alfred Wilson. Magda Annebo, a sister of the Bride acted as Bridesmaid, the bridegroom was attended by Petter Matheson from Round Hill. The church was beautifully decorated for the occasion, Rev Bjelde officiating. Over eighty guests were invited to the bride's parents home where a bountiful dinner was served. The happy couple received many costly and useful presents. Our best wishes for a bright and happy future goes with them.

Card parties are getting quite popular in our district, Mr. and Mrs. Appleby also entertaining their friends to one. Court whist was played this time and was a pleasant variety. Twelve tables being played. Lunch was served by the hostess at midnight after which the prizes were awarded as follows: ladies' first being won by Mrs. A. Gill, second by Miss Irma Shupe. Gent's first was won by C. Creveling and the second by B. Hammersley. Then the dining room was cleared and dancing and singing were the next items on the program. Then to bring to a close a pleasant evening, all joined hands and voices in singing "Auld Lang Syne." Mrs. T. Cookson being the accompanist.

Unfortunately Mrs. Smith, Stanley Smith and Mr. Appleby being down with severe colds were unable to join in these festivities so we hope by now that they are well again and that a few more parties take place for them to enjoy in place of those missed.

Crows and gophers have been seen also snow and ice, so what season is it really? When the mosquitoes come then we will be sure, until then?

THE DIFFERENCE

Buy a pound of TOFIELD CREAMERY BUTTER and—Note the smooth creamy, clean flavor.

Note the waxy, even, texture not found in all butters.

Note the even color throughout and then decide on having the best.

Try it. Eat more of it. Its good. By all means have the best, it cost no more.

Spring Poets

Spring is the time of the year when poets—good and bad are abroad in the land.

Spring sunshine gives inspiration to many people to give vent to their feelings in language more beautiful than commonplace.

There are however, a number of spring poets around this year that have more than ordinary reason to give vent to their feelings in language different from the commonplace.

We refer to those who have left their cars stand around all winter and when they try to start it, find that it doesn't want to go. What they say we don't want to put into print, but if it is poetry we are sure it is not faultless rhyme.

Don't work yourself into a poetical frenzy when your car refuses to run right, but bring it to the

TOFIELD

GARAGE

P. M. HAUGEN PROP.

Do you know why McLAUGHLIN-BUICK rides so much more comfortably than other cars?

Here are three important reasons

McLAUGHLIN BUICK'S famous cantilever springs—the most expensive type of springs employed on any car in the world, coupled with the famous McLaughlin-Buick torque tube drive—are designed solely for comfort, not for transmission of power, and provide the maximum degree of riding restfulness.

McLaughlin-Buick's Lovejoy hydraulic shock absorbers . . *front and rear* . . absorb the jars and jolts of the roughest roads, thus adding still further to the buoyancy of McLaughlin-Buick travel.

And McLaughlin-Buick's deep, soft seat-cushions, together with the lounging spaciousness of McLaughlin-Buick interiors, provide unequalled riding luxury for every passenger.

McLaughlin-Buick offers the highest standard of motoring comfort ever attained; and this is one vital reason why more motorists drive McLaughlin-Buicks than any other fine car.

Canada's Future

In a very [illegible] by Mr. Graham Spry, secretary of the Association of Canadian Clubs, and printed in The Canadian Nation, the subject of Canadian unity [illegible] with under the title "One Nation Two [illegible]" which was [illegible] over the article appearing in this column last week. In [illegible] article was inspired by Mr. Spry's address.

In his speech Mr. Spry urged that, above all, the two Canadian races should be frank with each other, speak out their feelings freely and courteously, and [illegible] the fear, the suspicion, which ignorance breeds [illegible] working for common national ends, working the same national [illegible] and developing the same national estate, they will learn to know [illegible] to recognize each as a Canadian, to feel a sense [illegible] partnership. Then he said:

"One nation, two cultures, one nationality, two races, one loyalty, two tongues, on this the Dominion of Canada is founded, on this the partnership rests by solemn [illegible] by mutual trust. And thus it must abide or perish. Let it abide and the nation will grow greater and the world richer that two races, full of spirit [illegible] the heritage that time endows, a tongue, a culture each their own and shared at times in common, may live in amity as the secure partners in the development of the noble estate to which we are fortunate successors. Let it fail, let race seek to dominate race, let prejudice take its rein and ride rough shod through the fine bonds that unite us and Confederation shall perish, and the peoples of Canada be thrust towards a future dark and impenetrable."

Looking back over the sixty-odd years of Confederation can any one imagine what the position of the present Dominion of Canada would be had the Canadian people of both races in 1867 not agreed to sink their differences [illegible]

[illegible]

Prisoner For Eight Years

Russian Boy Punished By Father For Joining Red Army

A story of an eight-year imprisonment of a boy by his father in a pit near their hut in the village of [illegible] Kursk province has been brought to Moscow. In 1918 young Tarasoff joined the Red Army and three years later returned to his native village filled with enthusiasm for the new order. His reactionary father told him "the red army marches against the Czars and you must not serve its ranks."

According to the report that night old Tarasoff dug a deep cave in his garden and binding his son hand and foot threw him into the pit apparently to keep him there until the return of the old order. Recently the father died and the villagers, chancing upon the living grave, extricated the worn and wrinkled man who although only 29 years of age had [illegible]. He was said to have been placed in a hospital.

PAINS IN THE BACK

These Are Usually Due To a Weakened Condition Of the Blood

The muscles of the back are constantly under heavy strain and have but little rest throughout the day. They are therefore in need of all the nourishment and strength that plenty of pure red blood can give them. Unless they have this help you will have backache and continue to have it.

Backache seldom or never means kidney trouble. It is nothing more than the tired, wornout muscles of the back showing their exhaustion because of the lack of good, pure blood. The one generally recognized efficient blood builder is Dr. Williams' Pink Pills. When the blood has been improved through the use of this medicine backache disappears. Mrs. F. Fairbairn, Essex, Ont., tells what Dr. Williams' Pink Pills did for her in a case of this kind. She says: "I suffered for nearly three years with a weak back. At times the pains were so bad that I had to walk half doubled over. I had tried several doctors with very little benefit. A friend urged me to try Dr. Williams' Pink Pills. I did so, and oh, the joy of once more being able to stand up straight without suffering intense pain. [illegible]"

Opportunity For Canadians

Several Positions Are Open On Staff Of League Of Nations At Geneva

Opportunity for young Canadians who wish to live in the beautiful city of Geneva, and to become associated with the work of the League of Nations, is offered by a notice from the Civil Service Commission of Canada, circulated for the authorities of the League, which invites applications for one important and two lesser positions. Competitions are open to men and women.

The chief position advertised is that of secretary of the narcotic division of the permanent central board of the League. Applicants must speak both French and English, be under forty-five years of age, have had knowledge and experience of administrative and secretarial work, and be trained statisticians. Preference will be given to those having experience or knowledge of the narcotic problem, and any familiarity with the languages of Eastern and far Eastern countries. The salary attached to this post is about $4,500 per annum.

[illegible]

Monarchy Divides Germany

Many Incidents Show People Still Cling To Old System Of Rule

Many incidents are constantly happening in Germany to show that the people are still sharply and incurably divided over the question of the monarchy. At Breslau a motion before the city council to remove the statues of three former emperors, including the ex-kaiser, and to rename streets in honor of revolutionary heroes occasioned a bitter fight but was passed by a vote of 40 to 36. At Neustadt, Silesia, when guests entered a hall on the occasion of a state dinner the portraits on the walls of three former kaisers were seen to be covered. This precipitated a sharp quarrel and conflict which broke up the party.

Shipping Is Handicapped

On account of an outer and inner bar across the channel connecting Lake Maracaibo with the Gulf of Venezuela, only vessels drawing less than 12 feet of water can enter the port, with the result that but two shipping companies, one American and one Dutch, maintain a weekly passenger and freight service between New York and Maracaibo.

A Household Medicine.—They that are acquainted with the sterling properties of Dr. Thomas' Eclectric Oil in the treatment of many ailments would not be without it in the house. It is truly a household medicine, and as it is effective in dealing with many ordinary complaints it is an inexpensive medicine. So, keep it at hand, as the call for it may come most unexpectedly.

Competes With Canada

Forty or fifty years ago, Denmark was a grain producing country. Then the Western Canadian prairies began to export grain cheaper than Denmark could grow it, and so she turned to dairy farming and its natural complement hog raising. Now she competes with Western Canada in selling bacon to England.

Capture Will Be Painless

New Invention To Be Used On Animals For Durban Zoo

For the first time in history wild animals are to be captured painlessly for the Durban Zoo.

Authorities of Pretoria Zoo have commissioned Captain Burnett Harris, the inventor of the so-called "mercy bullet," to carry out this task.

This bullet is practically equivalent to a hypodermic [illegible]. The animal who receives it will feel no more than if it had been brushed by a thorn. The bullet itself contains drugs.

SAYS WORLD IS APPROACHING A FINANCIAL CRISIS

London, Eng.—Sir George Paish, British financier and economist, who recently predicted the world was approaching a financial crisis, considers the 20 per cent call money rate reached on the New York Stock Exchange a possible forerunner of the crisis, he told the United Press.

The white-haired authority on world economic conditions pointed to recent bank rates in various countries as indications that the world was suffering from what he termed "financial sickness."

"I am no prophet, however," he said. "I am simply an interested observer attempting to diagnose the world's financial troubles. In my recent speech at Manchester, I simply called attention to a situation which I have been watching develop for some time past."

The world in general was over-borrowing, with the possible exception of South America, Sir George said. He emphasized "the utter folly" of various nations erecting tariff barriers which would prevent reimbursement of their mutual debts.

"It is of very great moment," he said, "that the situation should be surveyed not only by bankers and business men but by statesmen as well, in order that a collection effort may be made to avert a still more dangerous situation than now exists."

"High money rates in America since the middle of last year have been a notification to the world in general that America's power to lend has become much smaller and it is obvious that still higher rates of interest [illegible] in America and the effort of American bankers to restrict credit already granted in the [illegible] an almost [illegible] American credit [illegible]," Sir George said.

[illegible] high rate of interest [illegible] to affect American business adversely. If it is borne in mind that the great quantity of credit granted by the United States until the present time has been mainly responsible for the maintenance of world prices for commodities at the present level it is obvious that restriction of this credit must bring about a general fall of prices with consequences to producers throughout the world that cannot easily be measured.

"The situation would be exceedingly difficult if the volume of credit already granted were of normal dimensions but having regard to the vast amount of credit that has been granted throughout the world it is obvious that restriction of American credit at the present time in the manner that seems probable cannot fail to cause a great world wide monetary stringency which in turn, cannot fail to have serious consequences to both credit and business."

Counsel For Alberta

Edmonton.—R. B. Woods, K.C., has been retained as counsel for the Alberta government in the British Columbia appeal to the Canada Privy Council against the grain rates decision of the railway commission. Both Alberta and Saskatchewan are supporting the coast province in this action, and Mr. Woods will represent this province when the [illegible]

Radio Commission Making Western Trip

Will Investigate Domestic Conditions In the Broadcasting Field

Ottawa.—The royal commission on radio broadcasting headed by Sir John Aird of Toronto, will leave for Western Canada on April 8, to inaugurate its program of [illegible] into domestic conditions in the [illegible] broadcasting field.

The commission will proceed direct to Vancouver, where the members will attend some of the [illegible] of the National Council of [illegible] which has placed on the convention agenda several papers relating to the radio question. A debate will also be held on the subject, "A national policy or [illegible]tation of the radio." Hearings will be held in Vancouver [illegible] Victoria.

[illegible] sittings will be held later in Edmonton, Calgary, Saskatoon, Regina, Moose Jaw, Brandon, Winnipeg, Port Arthur and Fort William, followed by a tour of Ontario, Quebec, Maritime provinces and a visit to a number of centres in the United States.

The final report of the commission is expected to be submitted to the government before Parliament prorogues.

Disastrous Prairie Fire

Large Strip Of Country Swept Bare By Flames

Regina.—A prairie fire started northwest of Nodeauville, Sask., destroyed thousands of acres of pasture, the buildings on three farms, and was responsible for a man being sent to the hospital at Medicine Hat, where his wounds, though serious, are not thought to be fatal.

A strip of country about ten miles wide and twenty-five miles long was swept bare. At its closest to the main line of the C.P.R., it was ten miles away, north of Tompkins.

George Campbell lost his barn and outbuildings but managed to save his stock, some of this being singed when running through the fire. His loss is estimated at $1,000.

John Fisher and family were driven from their home, which was destroyed by the flames, and are staying with neighbors. Mr. Fisher also lost all his buildings and feed for spring work on the farm. His loss is placed at $1,500.

Fred Robinson, by plowing a fireguard around his buildings saved these, but lost all his feed, valued at $300.

Advertise Zeppelin Cruise

Plan Trip From Germany To America In May

Frankfort-On-the-Main, Germany.—For what is believed to be the first time in history, the advertising columns in a daily newspaper were invoked to secure passengers on a long airship pleasure cruise.

The Frankfurter Zeitung carried the following advertisement, inserted by the Hamburg-American line Berlin Travel Bureau:

"The second Zeppelin cruise, to the Mediterranean and the Orient, will start about April 15 from Friedrichshafen. Passage per person 3,000 marks (about $750).

"Zeppelin cruise to America about May 10. Passage from Friedrichshafen per person, $2,000."

Train Crew Arrested

Responsible For Wreck At Drocourt According To Coroner's Finding

Parry Sound, Ont.—Responsibility for the wreck of two Canadian National trains at Drocourt with a death toll of at least fourteen was placed on the crew of the northbound train No. 2 in the written verdict of Special Coroner J. B. Broughton.

Criminal proceedings were at once instituted against the three surviving members of the crew and charges of manslaughter were laid against Engineer J. V. Alexander, Fireman E. Illey and Rear End Brakeman Charles Gorris.

The arrest of the three trainmen followed the verdict of the coroner's inquest on the death of Horace Smith, one of the victims of the wreck. According to the verdict the collision of the two fast trains was "due to the neglect of the crew of Train No. 2 in running past the meeting place at which they had orders to stop."

It is expected the three accused trainmen will appear for trial at the spring assizes, which open here May 14.

MARSHAL FOCH IS BURIED WITH IMPRESSIVE RITES

Paris.—Marshal Foch was laid to rest near the tomb of Napoleon. More than a million heads bowed as the great soldier was borne on a gun carriage from the stately gothic nave of Notre Dame Cathedral to the simple and severe chapel of the Invalides.

Church and State, separated in France for more than twenty years, united for the day to provide the devout Christian soldier with a national funeral unparalleled in pomp and magnificence. The world has seldom seen its like before and it is not probable that such a show of solemn splendor will be repeated in this age.

The Republic of France and the Church of Rome were joined by ten nations whose armies Foch commanded in the greatest of wars in heaping honors upon the bier of the modest master of ten million warriors.

Most of the civilized world was represented at the church funeral ceremony, and in the cortege that moved with military pomp and precision through the streets and squares of Paris from Notre Dame to the golden dome of the Invalides.

The great outpouring of people who watched the funeral procession provided the crowning stone of the great edifice of honor and love which a grateful nation and friendly peoples of other lands have steadily built to the greater glory of Foch's name since the day he was chosen from all military commanders of the Allies to lead 10,000,000 fighting men under 10 flags.

Premier Poincare, who was president of France during the war, said in his brief funeral address that Foch had had no other ambition than to serve and had wished no other recompense than the assurance of having accomplished his duty.

PRAISES HYDRO DEVELOPMENT

Senator Norris of Nebraska, who praised Ontario Hydro development as one of the greatest in the world and the St. Lawrence development as most tremendous undertaking of this civilization. He also declared the United States high tariff policy is not wise.

Lightning Strikes Peace Tower

Electric Storm At Ottawa Turned Day Into Night

Ottawa.—Batteries of a recent severe electric storm centred their bombardment upon Parliament Hill and lightning playing directly over the buildings, struck the Peace Tower and caused the mighty pile of granite to shudder with the shock.

Lightning conductors prevented any serious damage. Only the tower elevator was put out of order. A second blinding flash struck at the southeast corner of the centre block just above the rooms of the press correspondents causing some consternation. There was no damage here, however.

The storm made the day as dark as night.

To Study Tourist Traffic

New Subject Taken Up At German Academy Of Commerce

Berlin.—Scientific research of tourist traffic, including particularly a study of its causes and its social, political and economic effects, has been added to the curriculum of the Academy of Commerce of Berlin. Transportation methods, hotel management and the work of expositions and fairs will also be studied, while special courses will be arranged for directors and managers of hotels, spas, fairs and so forth. A library dealing with the subject is to be assembled by the academy.

Appointed Poultry Promoter

Regina, Sask.—Appointment of W. H. McLellan, Saskatoon, as provincial poultry promoter, effective May 1 was announced by Hon. C. M. Hamilton, minister of agriculture. Mr. Hamilton said the appointment was made on the recommendation of the Saskatchewan Poultry Breeders' Association, in recognition of the growing importance of the industry in the province.

FLYING GOLD SEEKERS

Capt. Charles Sutton, chief of Canada's flying gold seekers, accompanied by Mrs. Sutton, is here seen just prior to taking off from the Fairchild airport, Farmingdale, L.I., for an expedition to the Canadian North-west.

Chinese Law Courts Busy With Divorces

Number Of Cases Greatly Increased Under Nationalist Rule

Shanghai.—Divorce has come to China to stay. With the National Government more firmly entrenched and the women of the country quickly seizing their newly found freedom, the Chinese law courts daily are handling an increasing number of divorce actions.

Last year a record was set in Shanghai courts with a total of more than 1,400 divorces, a gain of more than 800 over 1927. In 1926, before the establishment of Nationalists rule in Shanghai, divorces failed to reach the hundred mark.

Survey of the 1928 divorces based on statistics compiled by the United Press, reveals that spring and summer are the "big" seasons, with fall and winter trailing quite a distance behind.

More than 60 per cent. of 1928's divorces were filed between May 1 and September 30, the remaining 40 per cent. in the other seven months of last year. December wound up the year with 75 cases, just a little more than 5 per cent. of the year's total.

Planning Survey Of Pacific Great Eastern

B.C. Seeking Services Of Alberta's Deputy Minister Of Railways

Victoria.—J. Callaghan, deputy minister of railways and telephones for the province of Alberta, has been in conference with Premier S. F. Tolmie and cabinet ministers in connection with the proposed survey of the Pacific Great Eastern Railway, it was learned. The services of Mr. Callaghan, while the survey is [illegible] made, is sought by the government as he was connected with the P.G.E. work when the line was first laid.

Premier Tolmie stated that as yet it has not been decided whether the services of Mr. Callaghan could be obtained.

Many Receive Assistance

Thousands Helped Last Year Under Empire Settlement Act

London.—Answering questions in the House of Commons, Right Hon. L. C. Amery, secretary for the Dominions, stated that during 1928 27,523 persons proceeded to British North America with financial assistance under the Empire Settlement Act. This compared with 20,619 to Australia and 2,175 to New Zealand. Information was not available regarding the number of assisted migrants who returned to the United Kingdom in the same period, he said.

GIANT GERMAN OCEAN LINER IS PREY OF FLAMES

Hamburg, Germany.—The mysterious fire which virtually destroyed the new North German Lloyd liner Europa, was expected to have an important effect on the North Atlantic traffic war.

The Europa, a 46,000-ton vessel, was being built for five-day service with the Bremen between New York and the English Channel, and was considered a challenge to the Cunard, White Star and Hamburg American lines.

The ship caught fire while only a few workmen were aboard her. She was scheduled to make her maiden voyage in July and construction was nearing completion when the fire broke out suddenly.

Cause of the fire probably never will be known, it was said, since it started in four places simultaneously deep in the hold. Experts did not believe it was arson, however.

The vessel was insured for 40,000,000 marks (about $9,500,000) but the loss was estimated at about 50,000,000 marks (about $11,990,000). Shipyard engineers claimed later, however, that the damage was not that large.

Although the ship was not a total loss several experts said it would be useless to rebuild it. The North German Lloyd Company was expected to refuse to accept it from the builders, Blohm and Voss.

The fire was spectacular. Starting before dawn, it was not brought under control until 3 p.m. The boilers, machinery, hull and lower decks escaped the fire.

None of the few workmen aboard when the fire started were injured but a fireman was overcome. Eight hundred men were thrown out of work by the fire.

TEST SHIPMENT OF GARNET WHEAT TO GREAT BRITAIN

Ottawa, Ont.—Between 4,000 and 5,000 bushels of Garnet wheat is being put into sacks at Fort William to be shipped overseas. Excellent progress has been made in preparing this shipment which is done with a great deal of care in view of the importance to the grain growers. The future of this type of wheat will largely depend upon whether this consignment meets with favor among the millers of Great Britain and Germany.

It was first planned to ship 10,000 bushels in an open cargo but after consideration by the Wheat Pool which is looking after the arrangements and the Dominion department of agriculture, it was decided to bag about half the amount and ship that instead. The wheat will go to London and from there be distributed to British [illegible] a representative miller in Germany. The department of agriculture officials expect that complete reports will be available before the 1929 crop is ripe.

It was explained at the department that all the reports so far from both Britain and the United States have been satisfactory to Garnet wheat. The Canadian millers, however, have not been so favorable to this early ripening variety with the result that it has never been graded as No. 1. In many parts of the prairies the Garnet, because of its big yield and early ripening qualities is the favored variety, and if it can take its place alongside of Marquis No. 1 it will mean much to the producers.

The department officials are confident that the report will be favorable because Garnet is a very hard wheat and [illegible] is believed will prove just the blend the British millers require to give the "punch" to the softer grades they import from other parts of the world. The present shipment will enable a thorough test by Canada's wheat customers.

Between Canada and U.S.

Matter Of Ship Sinking Turned Over To Hon. Vincent Massey By British Envoy

Washington, D.C.—The sinking of the rum runner "I'm Alone" in the Gulf of Mexico by a United States coastguard patrol has resolved itself into a question for settlement between the Canadian and United States governments.

Sir Esme Howard, the British ambassador at Washington, who had made the original enquiries at the state department concerning the sinking of the vessel, informed the United States government that the ship was of Canadian registry and replies to his enquiries should be addressed to Hon. Vincent Massey, Canadian minister at Washington. All discussion will henceforth be conducted between the Canadian and United States governments.

For Winter Fair Building

Saskatoon, Sask.—The provincial government is prepared to contribute one third of the cost of a $[illegible] winter fair building at the exhibition grounds here [illegible] that the city of Saskatoon and the federal government [illegible] amounts, Charles Agar, M.L.A. for Saskatoon County made this announcement recently. Mr. Agar [illegible] is practically assured that the federal government will contribute and almost certain the city would.

Released From Custody

Toronto.—Mary De Merta, a gypsy, who was held suspected as being a woman by the same name wanted on a charge of theft at North Battleford, Sask., was released from custody, when Provincial Constable W. McRae, of Saskatchewan, failed to identify her as the wanted woman.

Size Of Chinese Armies

Peping.—There are just over 1,500,000 men in the officially recognized armies of China today, according to the official reports of the various military commanders as reported by Kuo Min, the Chinese official news agency. These do not include the numerous bandit organizations.

Regina Residents Killed

Regina, Sask.—Two well known residents of Regina, Mr. and Mrs. Armour, were instantly killed when their motor car was struck by a Los Angeles bound passing express at a level crossing on the Southern Pacific route. Both bodies were mangled in the wreckage.

ROSS CREEK

Miss Mable Sampson visited Miss Grace Wood for a few days last week.

A slide show and dance was held in the Ross Creek school on Friday night. Quite a nice crowd was present. Mr. Nick Humenako showed some very good hand tricks. Music for dancing was supplied by Miss Bessie McLachlan, Miss Mildred Malcolm and Mr Ed Bailey.

Miss Esther Woods visited Miss Mable Sampson for the past few days.

A whist drive was held at the home of Miss Grace Wood on Monday night of last week. Twenty eight were present, five tables being played. Prizes were won by Miss Violet McLachlan, Mr Joe McLachlan. Consolations were won by Miss Mable Sampson and Mr. Bill McLachlan.

Those that visited at the home of Mr. and Mrs. Chas. Sampson on Sunday last were Miss Gladys Hissy, Miss Katherine Odorno, Miss Grace Wood, Mr Albert Halborg, Mr. Everet Hissy, Mr Ralph Malcolman and Mr. Elmer Sagmoen.

Church was held at the Ross Creek school on Sunday afternoon at three o'clock. The Rev. Sid Bainbridge of Chipman preached the sermon. Quite a number were present it being Easter Sunday.

LAKESHORE

We extend to the editor our sincere sympathy in the loss of his father and mother.

The Misses Myrtle Bethel and Mildred Booth are among the teachers home for their Easter holidays.

Hubert Bethel was unfortunate in cutting his arm with the axe while splitting wood on Monday. Medical aid was summoned and several stitches were necessary to close the wound.

Mr. Watson Johnston visited friends in Tofield over the week-end.

A very enjoyable dance was held in the Community Hall on Monday evening. The Lounie boys supplied the music.

Mr. and Mrs. Samoss were visitors at the J. H. Johnston home on Tuesday.

Mr. and Mrs. Everett Noland spent the week end at Deville visiting relatives.

Mr. and Mrs. R. C. Phillips visited Mr. and Mrs. H. D. Stine of Lindbrook [illegible].

Mrs. Owen Eaton received word last week that her father was very ill in Lamont hospital.

The Misses Pearl and Edna Gray were visitors at the parental home on Sunday.

Miss Ellen Walker who is attending normal school in Camrose is home for the holidays.

KETCHAMOOT

On behalf of Ketchamoot we extend our sincere sympathy to Mr. and Mrs. Worton in their sad bereavement.

Sunday school will reopen next Sunday April 7th, at 10.15 a.m. Church services at 11 o'clock.

The monthly meeting of the M.A.S. will be held next Wednesday, April 10th at the home of Mrs. J. Appleby. All are cordially invited to attend.

A large crowd was present at the McMullen sale on Tuesday of last week, and which was very satisfactory to all. The prices were good considering it was a cash sale. The farm was not sold. Mr Frank Ball was the auctioneer.

After an illness of ten days, the little six months baby, Mr. and Mrs. John Brown was caring for passed away on Tuesday evening following an operation for bowel trouble, in an Edmonton hospital.

Mr. and Mrs. Wm. Lee, Mr. and Mrs. John McGinitie, Mr. and Mrs. Soars, Miss Fawcett, Messrs. A. F. [illegible] and C. A. Ingram from our district attended the card party at Wm. Thompson's last Wednesday evening and all reported a very pleasant evening.

Mrs. Keitha Oliver and Miss Marjorie Lee spent the Easter holidays at the home of their parents, Mr. and Mrs. Peter Lee.

Mr. and Mrs. Hugh Mitchell and Mr. Wesley Ingram returned home from Victoria, B.C. last week. Mr. and Mrs. Mitchell stopped off in Edmonton to visit their children there.

Mr. and Mrs. W. Ingram have bought property at Victoria and Mr. Ingram expects to return in a few weeks.

Mr. and Mrs. C. Coombes and family, and Mrs. McMullen motored to Bawlf on Easter Sunday and spent the day at the Archie Brown home.

Mrs. A. Harrison and little son returned home the latter part of the week after a two weeks visit with friends and relatives at Lamont.

Miss Mabel Younse of Edmonton is spending her Easter holidays at the home of her uncle and aunt, Mr. and Mrs. W. A. Mitchell.

Mr. and Mrs. Marshall Mitchell's baby is ill with pneumonia at the Camrose hospital.

Mrs. J. H. Ingram returned home on Tuesday after spending over a week with her husband in Edmonton. Mr. Ingram is getting along as well as can be expected, but it will be at least ten more days before he will be able to leave the hospital.

Mr. and Mrs. Harold Smith of Camrose spent over the Easter holidays with their parents the Smith and Lawson families.

Mr. and Mrs. Some and family, brother to the Mr. Some living on the D.H. Mitchell farm have rented and moved on the A. Campbell farm near the Dunham home.

The "turn around" social on Monday evening April 1st, at the J. Appleby home was a decided success both socially and financially. A large crowd was present and enjoyed the fun and entertainment which consisted of music, singing, reading, games and contests. Around $25 was added toward the church fund.

A TYPE of performance entirely new in a low-priced automobile—that's what you experience when you drive the new Chevrolet Six!

Marvelous six-cylinder smoothness throughout the entire speed range! A freedom from vibration and rumble that makes driving and riding a constant delight! Increased speed and acceleration. More power for hills and heavy going!

You are cordially invited to come in for a demonstration—for until you actually sit at the wheel, you can never know what Chevrolet and General Motors' engineers have achieved in the new Chevrolet six-cylinder valve-in-head engine. C-13-5-30C

McLaughlin Hardware Company Ltd.

[illegible] OF GENERAL MOTORS OF CANADA, LIMITED

Spring started March 21st.

get ready now

SPRING is already here! Soon you'll be feeling the lure of the road again. Your hands will be tingling to get on the wheel.

And here's your chance to save money on a Good Car . . . a car with thousands of miles of enjoyment left in, that somebody gave up to get an Outstanding Chevrolet.

We can't keep these Used Cars in stock with the spring deliveries coming in. They MUST go. They ARE going. BUT there are still many bargains left. Still a good variety to choose from. So come in and grasp this opportunity. Be ready for Spring this year!

Expansion Of Manufacturing In Prairie Provinces Expected To Proceed At a Rapid Rate

No sooner does an originally agricultural community tend to become stabilized and develop community centres than an effort begins to build up local industries. This tendency grows as the years pass on even without the additional impetus received when, besides a productive soil, the country is also found to contain valuable minerals. This has been the history of the Prairie provinces, especially in the post-war period, when it has been found that the rich mineral belt of Quebec and Ontario extends westward along the same parallels. Industrialization, therefore, is likely to proceed even more rapidly than heretofore, more especially should the natural resources of these provinces be restored unrestricted.

These provinces, long dependent upon external sources for manufactured products are more than ever set on achieving complete economic independence and are gradually accomplishing it. The period, indeed, is rapidly approaching when the cities of Manitoba, Saskatchewan and Alberta will pride themselves on their industrialization just as do the much older Eastern centres and conduct as ardent a propaganda for the stimulation of their local enterprises. Already in Manitoba the output of manufactured goods is approaching the value of its farm products. Last year its industries turned out goods valued at $450,-232,000.

Dominion Government statistics indeed, indicate that farming is already in second place to industries in that Province now. Revenue from farming in Manitoba in 1927 amounted to $113,874,000, whereas the value of manufacturing production in the Province in 1926 was $132,719,[illegible]. Manitoba, being the longest established of the three provinces and the tendency of industries being to move westward, the trend is much more pronounced here than in the sister provinces. According to the Manitoba industrial development board, a 21 per cent. increase was recorded last year in the Province's manufacturing output, the greatest growth being in steel, iron and paper products produced. In the period some sixty-two new industries were established with several other important locations foreshadowed.

The future will see an expansion of manufacturing in the Prairie Provinces at an increasing rate in the consistent effort to reduce the volume of imported necessities. It is not, however, to be anticipated that over the territory as a whole agriculture will ever take second place to manufacturing, but that rather the two will extend along parallel lines, each providing ever larger markets for the other. Industrialization should only increase western Canadian agricultural opportunity by building up a larger domestic consuming population and increasing the need for new farmers.

G. F. Goldthwaite, appointed Advertising Manager of the Canadian National Railways, to succeed the late H. R. Charlton.

Revised Rules For Hog Grading Adopted

Definite Classification Is Provided For In New Regulations

New hog grading regulations, which have been under consideration by the department of agriculture for a considerable time, have been passed by order-in-council and will become law upon official promulgation it was announced by Hon. W. R. Motherwell, minister of agriculture.

The new regulations provide for definite classification of bacon and non-bacon hogs, involving revision of grades so that hogs henceforth will be graded as nearly as possible in accordance with their actual commercial value.

Packers have undertaken to try to maintain the spread of 50 cents per 100 pounds between "selects" and "bacons" and all other grades have been left to find their own market level in accordance with the principle agreed to at the 1920 swine conference in 1927.

The new regulations also provide for the compulsory grading of all hogs at local shipping points in accordance with the official grades.

"During the past year the federal department has had an opportunity to test out the practicability of country grading and are satisfied that it is feasible. Under this new regulation it will now be possible to get the information regarding the grade back to the farmer, as was requested by the producers' representatives at the 1927 swine conference held in Ottawa," Mr. Motherwell's statement says.

Other changes involve strengthening of the wording of the regulations from a legal standpoint, with a view to eliminating as far as possible the need for litigation in their enforcement.

To Hasten Grain Planting

Day and night grain planting may be tried in Germany to avert a possible serious shortage of bread supplies during the coming year. German agricultural leaders, faced with small crops resulting from the February cold wave, are of the opinion that 24-hour planting is the only solution to the difficulty.

Customer: "I want to buy a house."

Real Estate Agent: "Did you have anything special in mind?"

Customer: "Yes, I want one with a parking place for my car, a sparking place for my daughter, and a barking place for my dog!"

A cubic foot of water is convertible into 1,661 cubic feet of steam.

"Well, do you want three pennyworth of meat for the cat like yesterday?"

"No thanks; uncle has gone home again."—Moustique, Charleroi.

W. N. U. 1770

Expansion Of Motor Traffic In Britain

Ownership Of Cars Is Growing By About 100,000 Annually

The notion that the United States has a monopoly on motor traffic expansion is discredited by a report to the American section of the International Chamber of Commerce from Paris on the growth of motor car ownership in Great Britain.

This, it is said, is mounting by about 100,000 cars annually, rising from 344,000 in 1923, to 787,000 in 1927. "This year's figures," the report continues, "will probably be near to the 'potential' 787,000 suggested by the Society of Motor Manufacturers on the basis of national income statistics. The latter body believes, however, that the inclusion of private cars owned by business firms, and the growing popularity of the 'baby' car of seven or eight horsepower, may raise the potential figure of 950,000 or 1,000,000,-000.

"Within the home market the British manufacturer has secured 83 per cent. of last year's new car sales in Great Britain and so long as he enjoys the double protection of 33⅓ per cent. import duty and a taxation system based on horsepower his supremacy does not appear likely to be seriously threatened."

John McCombe, chief medical officer of the Canadian National Railways, announces the appointment of A. O. Beck, as chief organizer of First Aid for the system with headquarters at Montreal.

A finger-ring made of mistletoe was worn in Sweden as a defense against illness until comparatively recent times.

Winnipeg Newspaper Union Fashion

No. 901—Particularly Smart. This style is designed in sizes 36, 38, 40, 42, 44, 46, 48 and 50 inches bust measure. Size 36 requires 3 yards of 40-inch material with [illegible] yard of 36-inch contrasting.

No. 980 — Enchantingly Lovely. This style is designed in sizes 16, 18, years 36, 38, 40 and 42 inches bust measure. Size 36 requires 3¼ yards of 40-inch material with ½ yard of 32-inch contrasting.

Finders Are Keepers

The indignant householder held up before the policeman the dead cat that had been lying by the curb three days. "What am I to do with this?" he demanded.

"Take it to headquarters," was the serene reply, "and if nobody claims it within a reasonable time its your property."

New Government Elevator

More than 100 men are employed [illegible] miles east of Port Arthur taking [illegible] piles for the new Government elevator and harbor improvements [illegible] Prescott. The contract for this work is the largest of its kind ever given in Canada. More than 2,000,-000 feet of lumber is called for in the contract.

DAYTONA BEACH TRAGEDY

In one of the most spectacular and tragic denouements of Daytona Beach racing track history, Lee Bible, driver of J. M. White's speed-demon car, "Triplex," seeking to surpass the 231 mile world's record, set two days before by Major H. O. D. Segrave crashed to the sand dunes and death at 202 miles an hour, snuffing out, at the same time, the life of Charles Traub, a news reel cameraman. The accident occurred before 30,000 spectators who lined the mile course and saw Bible flash by the starting point. The layout here shows: (1) Lee Bible, 42-year-old Daytona Beach garage mechanic, driver of "Triplex," J. M. White's racing car, who was killed; (2) and (3) Mrs. Segrave congratulating her famous husband, Major H. O. D. Segrave and (4) the huge crowd at Daytona Beach, Florida, who witnessed Segrave's victory and similar to the one that witnessed Bible's tragic end.

Three Prairie Provinces Are Anxious To Extend Boundaries Northward To Arctic Circle

If the Dominion government grants the requests of Alberta and Saskatchewan that the northern boundaries of these two provinces be extended to the Arctic Alberta will add approximately seven-tenths to its present area, while Saskatchewan will increase its present area by one and two-fifths of the existing territory.

Alberta covers at present [illegible] square miles of land and water. Premier Brownlee's proposal to extend Alberta's boundaries north through to the Arctic would add some [illegible] square miles of territory to the province.

Saskatchewan's present area, land and water is 251,700 square miles. The northern territory which Premier Gardiner would add to that province is approximately [illegible] square miles in extent.

The requests if acceded to would make Saskatchewan's area in square miles [illegible] and Alberta's [illegible] square miles.

The area of the provinces at present is as follows: Quebec, 703,653 square miles; Ontario, 407,262 square miles; Manitoba, 251,832 square miles; Saskatchewan 251,700 square miles; Alberta 255,285 square miles; British Columbia, 355,855 square miles.

Extension of the boundaries of Saskatchewan to include the vast sub-Arctic region lying west of the Hudson Bay and south of the Arctic Ocean would add to the province a territory covering between [illegible] and [illegible] square miles populated by a few [illegible], Indians and half breeds, and a handful of R.C.M.P. officers.

With the extension of boundaries as indicated by Premier Gardiner's request on behalf of the Saskatchewan government the province would have an area of about 600,000 square miles, or about 53,000 square miles less than the area of Quebec.

Saskatchewan's bid for an outlet to the sea and extended territory in the north has drawn a counter demand from Hon. John Bracken, premier of Manitoba, for more land for Manitoba.

Manitoba has had its boundaries extended three times since the province was formed in 1870 when Manitoba was known as "the postage stamp province," bounded by a line running north and south east of the site of Brandon, and east and west on a line running a little north of Winnipeg.

In 1898 a bill was introduced into the Dominion parliament, and passed without debate, adding 100,000 square miles to the Province of Quebec. In 1912, Acts were passed adding 351,780 square miles to Quebec, 146,400 square miles to Ontario and 180,000 square miles to Manitoba. A short time before this an Order-in-Council was passed by the Borden government granting Ontario a strip of land 290 miles long and five miles wide through the Province of Manitoba to the Nelson River to give Ontario access to Port Nelson.

Soviets Suppress Religion

New Law Forbids Any Gathering Of a Religious Nature

Reports come from Russia about new attempts to suppress religion. A new law has been published, by which it is intended to limit by force even private worship. It forbids every gathering or meeting of a religious nature of women, children or young men. Religious libraries or reading rooms are no longer to be maintained. All objects to be used in religious worship are declared national property and may only remain in the hands of religious communities in the form of a loan. All public worship in public squares, likewise all festivals in hospitals and prisons are forbidden. In the latter they may only be practiced for those who are seriously ill and who expressly ask for them. These renewed efforts are due to the great increase in religious interest of late amongst the Russian peasants.

Provincial Trade Marks

Indian Symbols Are Suggested To Distinguish Certain Products

The North American Indian was a master of pictorial condensation. Every totem told a story and told it well, and in Western Canada the proposal has been mooted that by a reversion to these totemic types much could be done in the way of devising trade marks for provincial products.

The marking of goods with some distinctive label has become an important factor in economics and there is merit in the suggestion than meets the casual eye. The symbols employed by the red man are unique, [illegible] capable of infinite adaptation and in time we may yet see on commodities a Kwagewatch [illegible] of a Haida chieftain, informing us at a glance of the country of origin.

Of British Origin

Investigation has disclosed that there is British blood in 87 out of the 96 members of the United States Senate, a fact which may have some influence on the voting when the quota question for immigration is raised again. Among the United States people as a whole the British strain is only 43 per cent., so it would appear to have a particular affinity for politics.

Health Brings Happiness

It has been said that "a hale cobbler is better than a sick king." Health is better than wealth because wealth cannot be enjoyed without health. One's desires and needs cannot be satisfied if the health is poor. Health brings happiness.

20,000 people are killed yearly by snakes in India.

In Sparsely Populated

Although Brazil is nearly as large as Europe and larger than the United States, if Alaska is excepted, its estimated population is only about 30,630,000, or a little more than the states of New York, Pennsylvania, Illinois and Colorado. Its four largest states have an average population of only one person to two square miles.

January Building Permits Higher

January's building permits for all Canada have doubled since 1920, having risen from $4,017,024 in that year to $8,364,67[illegible] in 1929. This is due, in part, to a natural expansion and also to the fact that building operations are not now halted in mid-winter as they once were.

Hertz, a German, discovered radio waves in 1887, 21 years after Maxwell, an Englishman, calculated that they must exist.

Client: "Do you think my late father looked like that?"

Modern Painter: "That is how you have described him."

Client: "Then I am glad I never knew him."—Dorfbarbier, Berlin.

To Check "FLU," Grippe

Fights the Germs in the Throat Before They Invade Other Parts of the Body.

EFFECTIVE PREVENTIVE MEASURES EXPLAINED

Simple precautions taken now will enable you to fight dreaded "Flu" which is sweeping rapidly through the whole country. The germs of Influenza gain access to the body through the mouth and throat. Keep the throat healthy and you go a long way towards stopping the trouble. An effective means of prevention is to gargle the throat three or four times daily with Nerviline. Half a teaspoonful of Nerviline in water makes a most efficient gargle. The germ-killing properties of Nerviline quickly destroy any bacteria in the mouth or throat. If the chest is sore, if the throat is hoarse, if you have a cough—be sure to rub the neck and chest with Nerviline. Every drop of it will rub in, and out will come the congestion.

Of course it is absolutely necessary to house-clean the system with Dr. Hamilton's Pills which stimulate the eliminating organs, and rid the system of disease-breeding wastes. This combination treatment of Nerviline and Dr. Hamilton's Pills will give prompt and entirely satisfactory results.

WORLD HAPPENINGS BRIEFLY TOLD

The Canadian Pacific Railway contemplates constructing a modern hotel in London, England, it is revealed in the annual report of the company.

Over two-thirds of the immigrants who entered Canada during the ten months of the current fiscal year came either from Britain, the United States or preferred country sources.

The Edmonton Exhibition this year celebrates its fiftieth anniversary, the first show having been held within the walls of Fort Edmonton in 1879.

For the eleven months of the current fiscal year, April 1, 1928, to February 28, 1929, immigration to Canada totalled 152,911, an increase of 1,939 or 12 per cent over the corresponding period of 1927-28.

[illegible]

[illegible] H.M.S. Royal Oak, who figured in a notable court martial at Gibraltar last April.

Carl B. Eielson, of Hatton, N.D., pilot for Captain Sir George Hubert Wilkins on his North Pole flight, was awarded the Harmon trophy for 1928, which is given to the U.S. flier making the greatest contribution to aviation during the year.

CARTER'S LITTLE LIVER PILLS

Nahanni Country Gold Rush

Prospectors Going Into Dangerous Part Of Unknown North

Though the richness of the Saskatchewan river sands is exhausted, a new gold rush is now starting into the Nahanni country west of the Mackenzie river, and more than 1,000 miles north of Edmonton. Airplanes are taking in prospectors who are following the air trail blazed last summer by Jack Hammell's N.A.M.E. machines. Traces of the old McLeod diggings have been found, and one of the McLeods is on deck to help re-discover the placer deposits which have cost more than one human life since their first discovery in 1904. Hostile Indians and fugitive whites have combined to make Nahanni a dangerous part of Canada's unknown North.

Gives Lots Of Light

What is said to be the world's largest electric lamp is a 50,000-watt experimental bulb recently constructed. It resembles a radio vacuum tube. At the top of the bulb a metal [illegible] carries off a heat of [illegible] degrees Fahrenheit.

Florida possesses more than 30,000 lakes.

Money In Fish Scales

Product Makes Essence Used In Manufacture Of Jewelry

The boast of the modern meat-packing industry that all the pig is utilized except its squeal, is now followed by the announcement of the Maine fishing industry, that all the fish is being utilized, even its scales.

Pearl essence plants at Portland and at other points along the Maine coast are offering seven cents a pound for fish scales, and tons of scales formerly discarded by fishermen have been sold this season at a total price estimated at $200,000.

One hundred pounds of the scales, for which the essence factories pay $7, are required to produce one pound of pearl essence, valued at $125 in the New York market. The essence, after elaborate processing, is used in the manufacture of beads, necklaces and miscellaneous jewelry.

The spinning and weaving of cotton is one of the most important and largest of the manufacturing industries in Portugal.

NO MEDICINE LIKE BABY'S OWN TABLETS

For Either the Newborn Babe Or the Growing Child

There is no other medicine to equal Baby's Own Tablets for little ones—whether it be for the newborn babe or the growing child the Tablets always do good. They are absolutely free from opiates or other harmful drugs and the mother can always feel safe in using them.

Concerning the Tablets, Mrs. John Armour, R.R. 1, South Monaghan, Ont., says:—"We have three fine, healthy children, to whom, when a medicine is needed, we have given only Baby's Own Tablets. The Tablets are the best medicine you can keep in any home where there are young children."

Baby's Own Tablets are a mild but thorough laxative which regulate the stomach and bowels, banish constipation and indigestion, break up colds and simple fever and make teething easy. They are sold by medicine dealers or direct by mail at 25c a box from The Dr. Williams' Medicine Co., Brockville, Ont.

A Meatless Luncheon

The following tested recipes solve the problem of a tasty luncheon without meat:

Tomato Chowder

- 2 cupfuls Borden's St. Charles Milk.
- 1 pint hot water.
- 2½ cupfuls canned tomatoes.
- 1 medium sized onion sliced thin.
- 1 tablespoonful butter or butter substitute.
- 4 tablespoonfuls flour.
- 2 teaspoonfuls sugar.
- 2 teaspoonfuls salt.
- ⅛ teaspoonful pepper.
- ¼ teaspoonful soda.
- 6 water crackers split.

Melt the butter in the top part of the double boiler, add the onion, and cook it gently till yellowed, about five to eight minutes. Pour in the milk and water, set over the lower part of the double boiler and scald. Mix the flour, salt and pepper with enough cold water to make a smooth cream; stir it into the milk, and cook about fifteen minutes, stirring occasionally. Heat the tomato with the sugar; when boiling, add the soda and combine it with the thickened milk. For serving, put a split cracker which has been dipped in warm water, in each plate.

Many hotels in Europe permit passengers on their way across the Atlantic to reserve their rooms by radio, at the charge of the hotel.

SUNDAY SCHOOL LESSON

APRIL 7

THE MINISTRY OF ISAIAH

Golden Text: "Then I said, Here am I; send me."—Isaiah 6.8.

Lesson. Isaiah 6.1-13; 7.1-17; 28.1-6; 36.1-22.

Devotional Reading. Psalm 116. 12-19.

Explanations and Comments

Isaiah's Heavenly Vision, 6.1-4.—In the year that King Uzziah died, I saw the Lord sitting upon a throne, high and lifted up: thus the prophet Isaiah begins his account of his vision and call to service. "This is more than a date; this is an experience!" exclaims Dr. C. R. Brown. Isaiah had a vision, a dream, in which God was vividly real to him.

"Isaiah saw God. Do men see Him today? Was He any nearer to Jerusalem than He is to London or New York? Did that old Hebrew possess [illegible] different [illegible] ours? Can we see and know [illegible]? [illegible] do we mean by seeing [illegible] God? A spirit cannot be seen [illegible] physical [illegible]. We mean [illegible] we are so convinced of the reality of God that our thinking and living are determined by that conviction, so sure of Him that we live as if we saw Him by physical sight."—Amory H. Bradford.

"The conception of Isaiah's vision is singularly pure and lofty. It is a worshipper's thoughts when he draws near to God. The vision is but the service in the temple transfigured. The prophet fell into a trance while holding the service and musing on its meaning. Suddenly the House and service and the ministers became transfigured, the walls went apart, and the roof lifted itself up till it seemed the high dome of God's palace on high under which he stood, and the Lord the King sat upon His throne receiving the adoration of all holy beings."—A. B. Davidson. And His train filled the temple. There was

"No face, only the sight
Of a sweeping garment vast and white
With a heaven that I could recognize."—Browning.

"The king was dead, but God was alive. Who shall say that it was not something of the same strength of [illegible] James A. Garfield, when, speaking to a discouraged multitude in New York after the assassination of Lincoln, he exclaimed, 'God reigns, and the government of Washington still stands'"—J. T. McFarland.

There are approximately 236 cinemas in Finland, totalling 40,000 seats.

Women, in some provinces of India, have been eligible to vote since 1924.

Charles Dickens wrote a "Life of Christ" specially for his children.

Gulf Stream Misbehaving

And Berlin Professor Is Predicting Another Glacial Age

The Gulf stream is behaving badly, according to a Berlin professor, who says it is flowing backwards in certain places. If it goes on like this we are told, we shall be back in a glacial epoch, some time or other. Many years ago the same charge was made against the Gulf Stream, and a journalist asked his editor what should be done about it. The editor, somewhat cynically, replied that it was a good one-day story, which turned out to be a correct estimate. Another prophecy that in 20,000 years time we shall be [illegible] another ice age in Northern Europe, [illegible] us—no not even cold. These long distance forecasts are safe enough to make, because when the time comes their authors will in all human probability be forgotten. We had much rather hear on reliable authority what the weather will be like this day week.

CORNS

Relief in 2 Minutes

Just a drop or two of Putnam's Corn Extractor, and the pain goes away. Relief is almost instantaneous. Removing corns with "PUTNAM'S" is so easy, so sure, so painless—thousands use this wonderful remedy, and say it is the best. Don't suffer any longer, use Putnam's Corn Extractor, the one sure relief for sore corns. Sold at every drug store.

Nearly ten million fish eggs and fry were transported over the Canadian National lines in 1928, for the stocking of lakes.

CHAPTER XVI.—Continued

"Oh yes," he replied absently.

"You were gone for some time this morning she stated.

"Yes," he concurred, "I went up to bring Connie."

"Oh!"

Janet's fine eyebrows lifted slightly, and she looked at Donald with a curious intentness. "Why didn't she come?"

"She [illegible]"

Her woman's intuition long ago had told here that the "woodsprite"—as Donald called Connie—was madly in love with him. As she looked at him now and noticed his pre-occupied air, a pang of jealousy shot through her heart like an arrow. Was it possible that he had begun to realize that the wild girl of the woods was not a child, and that a love for her had been kindled in his heart? The thought made her feel faint and she tried to put it from her mind.

Lunch was finished now and they were walking back to the lake. Douglas invited the party to take a trip around the lake in a motor-boat, to which they assented gleefully.

Janet hesitated as Donald turned away with Wainwright. "Aren't you coming Mr. McLean?" she called.

Donald turned and shook his head. "I may be needed here," he said briefly.

Janet flushed to the roots of her dark hair and bit her lip in anger. She was not used to being thwarted in her desires.

Donald and Wainwright seated themselves on a bench under the willows and lighted cigarettes. Donald was ill at ease. The sound of Connie's tragic sobbing was ringing in his ears. He could see her little figure writhing on the ground in a tempest of grief that had torn at his heart-strings. He sprang involuntarily to his feet and began pacing the ground with quick, nervous strides. Wainwright glanced up at him interrogatively.

"You seem worried," he volunteered.

"I am," Donald admitted briefly.

Donald was in a welter of indecision. How should he broach this delicate subject? Although poor as the proverbial church-mouse, Connie's father had the pride of Lucifer. There was natural dignity in his bearing, a certain aloofness in his manner, that in no way interfered with his unfailing courtesy, but has always precluded exchange of intimacies. He had resided in this wilderness for many years, but none could say that they had any more knowledge of his affairs at th's moment than on the day of his arrival.

Donald decided to take the plunge. He sat down on the bench beside Connie's father and related the scene he had witnessed that morning — of Connie's preening before the mirror with the magazine page pinned to the legs, of the struggle with her hair; of the flour sack, and of the piteous sobbing of the heart-broken child.

Wainwright's face flushed painfully. There was a look of poignant suffering in his grave eyes. Of all the races in the world, the English—especially of the better class—fight most stoically to hide their distress.

Wainwright leaned forward, his throat working convulsively as he struggled to regain composure.

"I hope you do not consider me presumptuous," said Donald, a note of anxiety in his tone.

Wainwright's hand reached forth to clasp Donald's firmly. "No, I do not doubt your sincerity. An inordinate sense of pride has kept me in my present circumstances. This circumstance you have related has brought me to a realization that it is a selfish pride, as it has denied Connie the privileges to which she is entitled. There is nothing I can say," he went on in bitter self-condemnation, "that can even partially condone or palliate my stupidity. I should have known that she would require proper clothing now that she is grown up. As a matter of fact"—he paused, his distress acute—"my finances are at a low ebb."

"How old is Connie?" asked Donald, hoping to relieve Wainwright's embarrassment.

"Nineteen."

Donald's head came up with a jerk. "What!" he almost shouted.

"She is nineteen," Wainwright reiterated, a peculiar expression in his eyes as he noticed Donald's bewilderment.

"Nineteen!" Donald re-echoed, a bemused look on his face. "Great Scot! This is a surprise. I thought of Connie as being not more than fourteen or fifteen."

"Connie's healthful outdoor life has tended to keep her young, and her mode of dressing enchances the youthful effect," said her father as he sat down wearily, a far-away look in his eyes. "Her mother," he went on softly, a tremor in his voice, "was just like her; at the age of twenty-five she looked almost a child." He turned to Donald. "No doubt you have wondered why I buried myself in this wilderness?"

Donald nodded. At this moment they were interrupted by members of the Sports Committee, who wanted Donald's advice on a matter pertaining to the afternoon's programme.

It was evident to Donald as he withdrew that Wainwright had been about to disclose his past history, a history which had been locked in his heart these many years.

At three o'clock the crowd began drifting toward the race-course. The centre of the valley had been cleared of under-brush, and the long grass burned under the watchful eye of the fire-ranger. A small creek and a few swampy places had been "corduroyed" with cedar poles and then covered with soil. A judges' stand, with a few hastily erected seats for Janet's party, stood near the [illegible] point. The horse-race as has been said, was to be the [illegible] event of the day. The crowd surged happily from the [illegible] in orderly ranks about the oval.

The brilliant and diversified colours of the Klootchmen's [illegible] and head-gear showed in bright contrast to the drab wearing apparel of the white men. The Siwash Indians were dressed in nondescript clothing as to trousers and coat, but one and all wore wide-brimmed cowboy hats and displayed silk handkerchiefs of gorgeous hues, knotted at the throat to drape their shoulders carelessly.

Three husky farmers' sons from Pemberton rode to the starting-line amid hearty hand-clapping and shouting from their friends. A swarthy-skinned rider, mounted on a spirited black cayuse, came prancing through the crowd. He lifted his hat and smiled in acknowledgment of the plaudits of the spectators. This was Joe Lafonte, the half-breed who has won first prize at the Lillooet races for the past two seasons.

The wise ones averred that Paul John, of the Indian contingent, would give him a hard race. Paul John's cayuse was young, but the previous year he had run the half-breed's horse a close second. Money was being placed on all sides, particularly by the [illegible] who are inveterate gamblers. Amid an excited babble in Chinook, nine Indian riders came laughing and shouting, with much waving of hats, to prance about and display their horsemanship before the admiring crowd.

Donald, with Andy, Gillis and Wainwright, stood leaning over the edge of the judges' stand watching the animated scene below.

At this moment there was an agitation at the far end of the oval, where the crowd opened to admit a horse and rider that came tearing down the course like the wind.

"Look!" Donald shouted excitedly as he seized Wainwright's arm. "It's Connie!"

Down the course, riding like a spirit of the woods, came the girl, her golden hair blowing about her face, sitting astride her mettlesome horse and riding as if the wilderness belonged to her alone.

Pegasus was not used to crowds. With arched neck and quivering flanks he reared on his hind-legs to poise an instant, then leaped forward like a [illegible]. Connie sat on the bare back of her adored cayuse as though a part of the animal, her slender body moving in gentle undulations in perfect co-ordination with the movements of the horse. She was hard set to keep from running over the other riders who sat mouths agape.

[illegible] was unknown to the greater part of the crowd. To them this child-like equestrienne, with her mane of shining hair, appeared as an apparition. Her firm little hands soon checked her turbulent mount, who stood trembling with nervousness. The crowd gave her a rousing welcome as soon as they had recovered from their astonishment.

"Who is she? Where does she come from?" they shouted.

Connie kept her eyes fixed on the ground. She was outwardly calm and serene; inwardly she was as nervous as her fretting cayuse, and did not dare raise her flushed face to meet the battery of eyes around her.

(To Be Continued.)

THINNESS

Over-thinness is detrimental to a child's progress in growth and health.

Scott's Emulsion

of vitamin-rich cod-liver oil is a body-building food and tonic that overcomes thinness and helps build up a sturdy body.

Scott & Bowne, Toronto, Ont.

Automobile Is Real Benefit To Humanity

Curse Is Man Who Does Not Use It Wisely

The automobile, in itself, cannot be a curse to anyone. The curse of the automobile is that of the human element, of the man who does not know how to use wisely an [illegible] ment of real benefit to humanity.

Unfortunately the human element cannot always be controlled. There always will be those who use automobiles for law-breaking purposes, and who drive them so recklessly as to endanger the lives of other people.

If all automobile owners and drivers were imbued with a real sense of their responsibility to their fellow men, there would be very few accidents and there would be no need of judges or anyone else having to make remarks derogatory to a machine that has become an essential part of this country's life.

Holloway's Corn Remover takes the corn out by the roots. Try it and prove it.

Small Son: "What are diplomatic relations, father?"

Wise Parent: "There are no such people, my boy."

Use Minard's Liniment for the Flu.

Succeeds To Title

Resident Of Vancouver, Through Death Of Cousin, Becomes a Baronet

A second Canadian romance of the British peerage within recent weeks has come to light in Vancouver, in the succession of Eric Windham Francis Carmichael-Anstruther, to the baronetcies of Carmichael and Anstruther.

The Vancouver man, now Sir Eric Windham Francis Carmichael Anstruther, bart., has left for the family seat, Carmichael House, Thankerton, Lanarkshire, Scotland, to settle matters in connection with the estate following the death of his cousin, Sir Windham Frederick Carmichael-Anstruther, bart.

Sir Eric expects to be in the old country about three months, after which it is his intention to return to Vancouver, where he has been employed as a draftsman for the past three years.

Sir Eric comes of a very old Scottish family which traces its ancestry for 700 years. He will be the 11th baronet of Anstruther created in Scotland in 1700, and eighth of Carmichael, created in England, in 1798. According to a directory of titled persons he will also assume the honor of hereditary carver of the royal household in Scotland and one of the masters of the household.

Recipes For This Week

(By Betty Barclay)

FRUIT FRITTERS

- 2 oranges.
- 1 egg.
- ¼ teaspoon salt
- ⅛ cup milk.
- ½ cup flour
- ½ tablespoon cooking oil.
- ½ teaspoon baking powder
- ½ teaspoon sugar.

Beat egg until light; add milk, flour, sifted with baking powder, sugar and salt, and oil or melted butter. Beat until smooth. Pare oranges, removing membrane with peel; cut in slices, and sprinkle with sugar and a few drops lemon juice. Have deep fat, hot enough to brown a piece of bread while counting to sixty. Dip orange sections in batter mixture, and fry in deep fat until puffed and brown. Do not fry too many at one time. Drain on brown paper, sprinkle with powdered sugar, and serve with orange sauce.

APPLE AND ORANGE SALAD

Peel and slice oranges, rejecting white membrane. Cut wedge-shaped slices from red apples, without paring. Arrange on lettuce-covered salad plates, using alternate slices of orange and apple.

GRAPEFRUIT SALAD

Peel orange and grapefruit and divide into segments, rejecting all white skin. Arrange a circle of orange segments on a lettuce-covered salad plate and fill centre with [illegible]

Reduce the Acid

Sick stomachs, sour stomachs and indigestion usually mean excess acid. The stomach nerves are over-stimulated. Too much acid makes the stomach and intestines sour.

Alkali kills acid instantly. The best form is Phillips' Milk of Magnesia, because one harmless, tasteless dose neutralizes many times its volume in acid. Since its invention, 50 years ago, it has remained the standard with physicians everywhere.

Take a spoonful in water and your unhappy condition will probably end in five minutes. Then you will always know what to do. Crude and harmful methods will never appeal to you. Go prove this for your own sake. It may save a great many disagreeable hours.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

Inventor's Claim Unusual

Wisconsin Chemist Says His Mechanical Device Can Be Taught

Claim that he has invented a mechanical device which is capable of being "taught" is made by Dr. H. D. Baernstein of the University of Wisconsin physiological chemistry department, following a challenge issued six months ago by C. L. Hull, professor of psychology at the state school.

Dr. Baernstein's "thinking" apparatus consists of numerous switches, wires and an incandescent light. The mechanism, he said, is so arranged that the bulb may be lighted by one of the switches and that any of the other switches may be "taught" to light the bulb. The operation, he claims, is analogous to the presentation of stimuli.

"The machine," Dr. Baernstein declared, "is merely a symbol of mechanism of the human body."

Externally Or Internally, It Is Good. When applied externally by brisk rubbing Dr. Thomas' Eclectric Oil opens the pores and penetrates the tissue, touching the seat of the trouble and immediately affording relief. Administered internally, it will still the irritation in the throat which induces coughing and will relieve affections of the bronchial tubes and respiratory organs. Try it and be convinced.

Just a Memento

First Housewife—"I suppose you carry a memento of some sort in this locket of yours?"

Second Ditto—"Yes, it is a lock of my husband's hair."

"But your husband is still alive?"

"Yes, but his hair is gone."

Has a Reason

The mayor of Minneapolis has been asked to confiscate and destroy all the Gideon Bibles in that city. The reason is logical enough — the Scriptures say a lot about St. Paul but nothing about Minneapolis.

None of us ever gets anything for nothing, but that doesn't keep us from trying.

Little Helps For This Week

"Do thy diligence." 2 Timothy iv. 9.

There lies no desert in the land of life:
For e'en that tract that barrenest [illegible],
Labored of thee, in faith and hope, [illegible] teem
With heavenly harvest and rich gathering rife.
—Frances Kemble.

When you awake in the morning, and when that heavy pain wakes too, —oh, so sharply!—and the burden of a monotonous life falls down upon you, or rises like a dead, blank wall before you, making you turn round on your pillow, longing for another night instead of an insupportable day, rouse yourself. Remember what you are, a child of God. Say, "What have I got to do today?" Not "What have I to enjoy or suffer?" but "What have I to do?" Don't try to be happy, but try to work, work for God, and happiness will come.

New Books Published

Last year holds the record for the number of books published. There were 10,612 new books, and 2,787 new editions issued in 1928, compared with 10,334 new books, and 3,476 new editions in 1927.

When the skin is moist, the resistance to electricity is greatly decreased and serious shock may result from relatively low voltage.

FLU

Claims Many Victims in Canada and should be guarded against.

Minard's Liniment

Is a Great Preventative, being one of the oldest remedies used. Minard's Liniment has relieved thousands of cases of Grippe, Bronchitis, Sore Throat, Asthma and similar diseases. It is an Enemy to Germs. Thousands of bottles being used every day. For sale by all druggists and general dealers.

Minard's Liniment Co., Ltd., Yarmouth, N.S.

NOTICE

As it is likely that I will be temporarily leaving Tofield as soon as the road spring work commences, I am suggesting that those desiring scavenger work done or rubbish hauled away, communicate with me as soon as possible. Any time in the month of April or early May.

T. WALLINGTON.

FIVE ROOMED HOUSE FOR SALE

Re reasonable offer refused.—Apply to W. Norton, Tofield.

General Automotive Work

There are very few cars in the district, which after winter storage or use would not be the better for a spring overhauling. If you place any value upon your car, the cost of a spring overhauling is money well spent, the improved service being worth more than the work costs. We are thoroughly experienced and suggest you bring your car in early.

VARIETY THEATRE

Saturday, April 13th

"Shadows Of The Night"

"FLASH," the wonder dog of the screen, does some exceptionally fine acting in this picture, with almost human intelligence. Without a doubt one of the best dog pictures we have ever shown.

SATURDAY, APRIL 20th
REX BELL
—in—
"WILD WEST ROMANCE"

A western like we have all been waiting for, showing the old west in all its glory, with romance, good riding and full of thrills to the end.

WEDNESDAY, APRIL 24th
TIM McCOY in
"BEYOND THE SIERRAS"
A Pioneers Romance in the Early Days.

BEN HUR, April 26—27. Matinee 27 at 2:30

"GIMME, GIMME, GIMME!"

How can any man possibly look as pleasant as C. Constantine answers to that time-worn question? Taken on the Canadian Pacific liner "Duchess of Richmond" on the way from Liverpool to Montreal. Mr. Constantine is the well known Fleet and the Mediterranean. Throw the latch string out for "Peppo" Edwards, father of the modern illustrated newspaper.

KINGMAN

Hallgren and Hines are building a new garage in Kingman

Mrs. R. D. Bruce of Leyelminster spent with Mr. and Mrs. J. Bruce over the week-end.

Mr. Gladys Hoste of Daysland spent the Easter holidays with Mrs Florence Holmes.

Mr. and Mrs. Jas Minsen and family and Helen Bjykort of Camrose were dinner guests of Mr and Mrs. E. Bjykort on Sunday

Mr. John Erickson of Camrose spent the week-end with his parents Mr. and Mrs. E. Erickson.

Mrs. A. Asp returned home on Sunday after spending a week visiting with relatives near Daysland

Joe Sutton, Florence and Palmer Brown motored to Daysland on Sunday.

Mr. and Mrs. R. Simovitch of Round Hill visited with Mr. and Mrs P. Rosenzweig on Sunday

Mr. H. Sparky spent the week-end at his home in Bawlf

RADIO

Mr. and Mrs. Fowler of Bellingham, Washington, are paying an extended visit here, with the latters children, Mrs. J. Stauffer, Mrs. J. Yoder, Peter and Julius Letheken.

On the evening of March 25th a surprise party was held on Robert Burcombe, the occasion being his birthday. A delicious lunch was served by Mrs Stauffer, Mrs. Yoder and Mrs. Letheken. Every one present reports having had a very good time

Mrs. Rudd and Miss Nora, returned home from Edmonton last week

The service held at Bluedy, Friday morning was very well attended The I. P. E. on Sunday evening, and service on Easter Monday were also well attended.

Dinner guests at the home of I. Moon on Good Friday were, Mr. and Mrs. Hambrick, Mr. and Mrs. Jensen, Hannah Jensen and Mr. and Mrs. Lund Rud.

Mr. and Mrs. Robert Eade entertained over forty guests at dinner, at the home of Mr. and Mrs. P. B. Anderson on Good Friday. The occasion was in honor of their little daughters, baptism; she was christened Rebecca Marie.

Another shooting match was held last Saturday at Olaf Anderson Twenty-two men took part. Oliver Strand won with a total of eighty-two points

We are pleased to welcome Mr. and Mrs. Bothwell to our neighborhood. They are living on the H Jensen farm.

Mr. and Mrs. Jacobson moved to the farm they have rented, north of Tofield, last week.

The U. F. A meeting held at the home of George Hendrickson was well attended. A very interesting meeting was held. The roll call was answered with a favorite recipe after which followed a discussion on Girl Guiding. Mrs. Spring 33rd Meeting and Hilda Rud served a tempting lunch at the close of the meeting

Joseph kauffman youngest son of Mr. and Mrs. kauffman, is very ill with pneumonia. We all hope for a speedy recovery.

The annual meeting of the Tofield Women's Institute held in the Farmers Exchange, Monday April 7th. The following officers were elected for the ensuing year

President, Mrs E. Sallal
First Vice-President, Mrs. E. Bissel

Second Vice President, Mrs. J. O'Hara
Third Vice President, Mrs. J. Hannes
Secretary Treasurer, Mrs. J. McInnes

During to the increase of attendance at Easter, it was necessary to get several more desks for the Ingram school. There are three new pupils on the roll, they being the children of Mr. White who has just recently moved to the district.

SWAMP CREEK

The cup and saucer social held on the basement of the church, on Monday evening of last week was a success from start to finish. Mr W. Anderson was the auctioneer. Fifteen cups were sold at an average of $2.00 (two dollars) each. The children had a good time fishing from the fish and at ten cents a fish which brought $6.50. The money goes to pay some debts and for the painting of the church

Lloyd Sargard who has been working for E. A. Moon for the last two years took sick and had to be taken to the Edmonton hospital to be operated upon for appendicitis. We have not heard yet how he got along

Mr. C. A. Moon is now able to be around again but has to be very careful for some time

Mr. R. O. Berg is improving very slowly, the rheumatism have not left him yet

The A. Patterson family are driving a new Ford car

Frank Watt from Edmonton spent the Easter holidays with relatives here

The name of the bridegroom in the wedding announcement last week should have read, Johnrs Alfred Nilsen, instead of Wilson

EVERYBODY HAPPY—MAYBE

The sombre surroundings of the Tofield TeTwo Hall were enlivened by the hearing of a fight case on Monday.

Frank Kortzman was summoned for fighting but the evidence showed that to a large extent he was the aggrieved party. It appears that on Saturday the brothers Wahr (a pair fighting name) and Ed Bruhn picked a quarrel with Frank Kortzman and some time later Frank carried the battle to the enemy's camp. Anyway, Frank after being hit from in front and behind, got real peeved. He thereupon knocked one Wahr down and out, subdued the aggressive spirit of Bruhn, and chased the other Wahr onto Frank Bell's office Kortzman was fined a dollar and the Wahr Bros $5.00 each.

MAIL DRIVERS TEAM BOLT

On Wednesday morning while Mr. Drake was loading on his mail bags at the Tofield Post Office, his team became frightened and bolted. The latter board a load and also coming down the street and then a load of trash. Jumping out of bed and looking out of the window in time to see the wagon bounding in the centre of the street, the lone post had been broken off near the ground horses evidently having tried to pass on each side of it. The horses did not appear to be hurt though they must have had a severe shock when the whiffletree hit the post. The rig did not appear much damaged. Mr. Chatterham and Mr Drake were soon on the spot and took care of the mail which was not damaged in any way

W.I. NOTES

The regular meeting of the Women's Institute was held in the W.I. rooms on Tuesday, April 9th, at three o'clock, with an attendance of nineteen

The Institute decided to hold a bridge drive in the W.I rooms on April 24th.

A committee was appointed to make enquiries regarding a plant sale

Mrs. Prescott and Mr. James McKenzie favored us with two violin duets which were very much enjoyed by all.

Mr. Prescott gave a very interesting address on "Wills and how they affect the Women of Alberta." Mr. Prescott also answered and explained questions relating to wills, life insurance, etc., and needless to say the members spent a very interesting and profitable afternoon. We feel that the Institute is very much indebted to Mr. Prescott for his kindness in speaking at our meeting and for giving us such an instructive address.

Recipes for sandwiches were collected.

Delicious refreshments were served by Mrs. Taylor and Mrs. Thompson.

Mr. Lowell Gray left on Thursday for Vancouver where he will visit before returning to Lake Louise for the summer.

Very slow plumber "Oh, I remember your little boy mine. He was in the infants' class when I went to do a job at the school a few times ago."

Disappointed Lady Indeed, " And what class was he in when you'd finished?"

More than 84,000 of Canada's old age pensioners received their relief in September of 1929.

Bible Three Centuries Old

Was Used To Swear In New Vice-President Of United States

A most unusual Bible was used to swear in the new Vice-President of the United States, Chas. Curtis, of Kansas. It is the property of H. M. Gale, of Salina, Kansas, and is 300 years old. The Bible has been in the Gale family at least five generations. It was printed in Glasgow, Germany in 1564 and was copyrighted by Emperor Ferdinand. It is bound in solid oak slats with wooden covers. The book is printed in two colors red and black in clear faced type and contains many wonderful pictures. One scene shows an angel driving the devil out of Paradise. Satan is shown as a large horned dragon. On the front page which bears the German imperial seal are depicted a series of seven the first being the medieval artist's conception of the fall of man. Eve is shown handing Adam an apple. The end is of an angel driving the two out of the Garden of Eden.

FOR MOTHERS OF YOUNG CHILDREN

Mothers are quick to give anything which helps their children. Just so with their little colds and coughs that will not leave the baby well and keep him with a high temperature nearly recommendation from the mother That is why Baby's Own Tablets are so popular. Thousands of mothers throughout the country will not rely upon them for their own little ones but will also recommend them to be able to recommend them to other mothers. Dissatisfied with the ordinary Baby's Own Tablets to be without an equal in relieving baby's ills—free of any of the irritating elements which are found in many preparations of the sort. Baby's own Tablets are the best medicine for baby's ills. They have been a household remedy for many years and are guaranteed to contain no opiate or harmful drug. Mrs. Jos. Gingras, Lac Bouchette, Que., writes: "I have used Baby's Own Tablets for my baby and I am satisfied that they are the best medicine for children. I always keep a box in the house." Sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

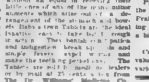
Compulsory Insurance

Privately owned automobiles will be exempt from compulsory insurance if free view of bond in the province of Alberta according to a report of the Vehicles and Highway Traffic Act recently distributed to members of the Legislature. Taxicabs and livery cars of all descriptions will be compelled to carry a specific amount of insurance.

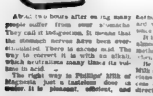
Heart Palpitated Nerves Bothered Her Sleep Was Broken

Mrs Fred A. Purdie, East South Qu'Appelle, Sask., writes: "I was both nervous and weak with my nerves and palpitation of the heart and my sleep was by turns all night.

I decided to try



When Frosty Sours



After two hours after eating many sufferers from sour stomachs. They call it indigestion. It means that the stomach nerves have been overstimulated. There is excess acid. The way to correct it is with an alkali, which neutralizes many times its volume in acid.

The right way is Phillips' Milk of Magnesia. Just a teaspoon does an ounce. It is pleasant, efficient, and harmless. It has remained the standard with physicians in the 50 years of its invention.

It is the quick method. Results come almost instantly. It is the approved method. You will never use another after you know.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting acid-sour stomachs. Each bottle contains full directions. Sold druggists.

COULD NOT DO MUCH WORK

Eczema on Face, Neck and Hands. Cuticura Heals.

"Eczema as an on my face and neck some and hands. I had to keep my sleeves rolled up so they would not irritate the breaks and sores on my hands. I was so ashamed to go around on account of the eruptions and the treatment was terrible. I could not do much work, and the ointment was not popular at night.

"I sent for a free sample of Cuticura Soap and Ointment and it gave relief. I purchased more and in about two months I was entirely healed." (Signed) Frederick Fuller, R. R. 6, Lindsay, Ont., Aug. 27, 1928.

Cuticura Talcum, the scented powder of the Cuticura family, for the prevention of odor is perfect.

Sample Each Free by Mail. Address: Cuticura Laboratories, Dept. 20, Malden, Mass. Cuticura Shaving Stick 25c.

Vancouver Grain Port

Gaining Ahead With Port Development On a Big Scale

Vancouver is experiencing a movement of grain such as characterized the rush season of Spring on March 15th was 5,210,193 bushels in Vancouver elevators with 534 Chandlers reported to be on hand. Since then most of Fleet There were 18 boats loaded with assorted variety of 2,-500,000 bushels in elevators with an additional 6,000,000 in bodies for whether storage.

Preparing for continued growth of the westward flow of grain from the prairies Vancouver is going ahead with port development on a big scale

Mild Weather Thaws Igloos

Eskimos Are Much Homeless By Action Of the Sun

It might be expected that winter would be welcome at Tuvane Bay. The Tuvane Bay is 200 miles north of Fort Churchill, where the Hudson Bay Railway, through Manitoba's rich southern mineral fields, will end. But the North has been much maligned. Even the Eskimoes will tell you that. As usual, this past winter, the Eskimoes of Tuvane Bay built their igloos, their little round houses of snow and ice. As usual they were buried now and again by blizzards. But gets out of the usual was the thaw which struck them just after Christmas. The temperature soared to 27 degrees above zero. The walls of the igloos collapsed, and dozens of families were made homeless. Yet the Eskimoes were cheerful. Their attitude was "Who said cruelty to animals?" And as building materials were cheap. As soon as the weather was normal again, they set to work and rebuilt.

Empire Marketing Board

Spending Money To Create An Interest In Canadian Farm Products

A bulletin from the Saskatchewan Department of Agriculture draws attention to the fact that the Empire Marketing Board is spending money liberally to create an interest in Canadian farm products in the British Isles, and that the Empire Marketing Board, in its turn is educating the people of the British Isles to purchase Canadian farm products. It points out that the British Empire sells unrivalled opportunities to develop markets within her own boundaries, but that it is because a sufficient number of the people of the British Empire have not had undergone certain weaknesses and forms of fear that the people associated at Jerusalem were filled with the Holy Ghost and endowed with the extraordinary gift of tongues. Peter, who was the time for beginning the Pentecost. Accordingly the King with the princes, and all the assembly in Jerusalem, had taken counsel together and had agreed to keep the Passover in the second month. The law (Numbers 9:10, 11) allowed those who for good reason were prevented from observing the Passover at the regular time to celebrate it in the second month, and this decision, arrived at by the king and the whole assembly.

Dr. Charles Reynolds Brown contends that Christ's loved-minded acquaintance with the narrow religion of three chief priests and Pharisees who were intent upon putting Christ to death upon the ritual of another Passover, and who would not enter into Pilate's judgment hall lest they by fact should suffer defilement and make them unfit to share in the sacred feast. "No one is entitled to speak with greater authority on the Semitisations of ritual than a strong believer of the sanctity of ritual like the Chronicler and we may well note, as one of the most conspicuous marks of his inspiration the unstudied manner in which he puts forth frank and sympathetic record of irregularities of Hezekiah's Passover. It says much for the healthy tone of the temple community in his day that he does not attempt to reconcile the practice of Hezekiah with the law of Moses by any hazardous quibbles."—W. H. Bennett. "Everything regarding form is negligible in the interests of the soul."—W. L. Watkinson.

Escalloped Macaroni With Cheese

1½ cupfuls Heinz's St. Charles Milk.
2 cupfuls cooked drained macaroni cut in two-inch lengths.
1 cupful grated American cheese.
2 tablespoonfuls flour.
2 tablespoonfuls butter or butter substitute.
1 teaspoonful salt, scant.
¼ teaspoonful pepper.
Few grains paprika.

Make a white sauce of the flour, butter, seasonings and the milk undiluted. Stir in the macaroni. Thoroughly mix the cheese and paprika, put in a layer of the macaroni, then one of the cheese, continuing in this way until all is used and finishing the last layer one of cheese. Bake in a moderate oven until browned, about thirty-five minutes.

Princess Mary has been elected president of the Yorkshire Beekeepers' Association, added to be the largest society of the kind in the world.

Young women in Japan are rapidly taking the place of men as elevator operators, as well as in many other positions connected with business and industrial advancement.

There may be splinters in the lot of success, but you don't notice them unless you're sliding down.

The exact measure of time covered by a day is 23 hours, 56 minutes and 4 seconds.

APRIL 14

SIBERIAN LEADS HIS PEOPLE BACK TO GOD

Golden Text: "Jehovah your God is gracious and merciful."—2 Chronicles 30:9.

Devotional Reading Psalm 145: 9-17.

Explanations and Comments

Ritual Was Made For Man and Not Man For Ritual, verses 1-5. Nadab, first minister of the royal household, corresponding to our modern office of prime minister, was in charge of the king's treasury. The reign of Hezekiah however, was one which could not be kept at that time because a sufficient number of the people had undergone certain weaknesses and forms of fear that the people associated at Jerusalem were filled with the Holy Ghost and endowed with the extraordinary gift of tongues. Peter, who was the time for beginning the Pentecost. Accordingly the King with the princes, and all the assembly in Jerusalem, had taken counsel together and had agreed to keep the Passover in the second month. The law (Numbers 9:10, 11) allowed those who for good reason were prevented from observing the Passover at the regular time to celebrate it in the second month, and this decision, arrived at by the king and the whole assembly.

Dr. Charles Reynolds Brown contends that Christ's loved-minded acquaintance with the narrow religion of three chief priests and Pharisees who were intent upon putting Christ to death upon the ritual of another Passover, and who would not enter into Pilate's judgment hall lest they by fact should suffer defilement and make them unfit to share in the sacred feast. "No one is entitled to speak with greater authority on the Semitisations of ritual than a strong believer of the sanctity of ritual like the Chronicler and we may well note, as one of the most conspicuous marks of his inspiration the unstudied manner in which he puts forth frank and sympathetic record of irregularities of Hezekiah's Passover. It says much for the healthy tone of the temple community in his day that he does not attempt to reconcile the practice of Hezekiah with the law of Moses by any hazardous quibbles."—W. H. Bennett. "Everything regarding form is negligible in the interests of the soul."—W. L. Watkinson.

Predicts Next War Will Be Sudden

English Professor Says Britain Could Not Wait To Commit Dumdidum

Great Britain was not the first to use gas in warfare, declared the Brigadier-General J. H. Morgan, K.C., professor of constitutional law at the University of London, said in a lecture at the university.

The next war, he said, might come like a thief in the night and might be fought and won in the course of three weeks. There probably would be no ultimatum in wars of the conflict. Nor, the professor continued, would he likely to dare to define what was a flagrant violation of right necessitating immediate action without consulting the Dominions.

While the parties were trying to decide whether there had been a violation of rights and the parliaments of the Dominions were being summoned, the war would be fought and won, the lecturer declared. The result, he said, would be that if Great Britain stepped to consult the Dominions, she would lose the war, and if she did not consult them, she would lose the Dominions.

Brigadier-General Morgan has had a distinguished military as well as a brilliant academic career.

Alberta Wheat Pool Elevators

Fifty-six elevators will be built at as many different points by the Alberta Wheat Pool this year. This will bring its total up to 376 elevators.

Calgary's Aero Club

Calgary's Aero Club now has 856 members, of which 140 are taking instruction.

About all you can say for you-men is that they shorten the jury's deliberations.

Castoria is a comfort when Baby is fretful. No sooner taken than the little one is at ease. Contains no opium, no drops soon bring sweetest rest. No harm done, for Castoria is a baby remedy meant for babies. Perfectly safe to give the tiniest of babies. Mothers have the doctors' word for that! It is a vegetable product and you could use it every day. But it's so an emergency that Castoria means most. Some doubt when constipation must be relieved—or colic pains—or other suffering. Never be without it even mothers who use extra baths, unopened to make sure there will always be Castoria in the house. It is effective. Tell those children how! read the book that comes with it.

CHAPTER XVII.—Continued

Donald turned to Wainwright. "Am you going to let her run? Is it safe for her to enter a race with all those men?"

"I couldn't stop her now, and besides," he added with a laugh to Greta, "she can hold her own with any of them."

The old trapper made his way to Donald's side His leathery old face, with its countless wrinkles, was a study in conflicting expression. "That fellow Lafonte is one of the best dog drivers in the country," he said, "but he's full of dirty tricks, 'tanst safe for Connie to ride."

Donald turned anxiously to Wainwright.

Connie's father shook his head "I am afraid it is too late now." There is a lower course he added. "You must go over in the second month. The law—"

Donald leaned puzzled for a moment. Suddenly it dawned on him. "The purse!"

Wainwright nodded. "It would break her heart if I forbade her to ride, now that she has gone this far. She must have decided suddenly, as she never mentioned it to me."

The Rennie Company had put up a purse of two hundred and fifty dollars. There was to be a collection taken after the race to add to this purse.

The horses trotted down the course Connie's was roaring and pawing, and it was with difficulty that she managed to get him to join the others She leaned forward to whisper words of quieting in the animal's twitching ears. Down the course they came. They were also aligned at the judges' stand.

"Go!"

Connie on her spotted cayuse showed a bright streak of colour in the midst of her darker competitors.

Lafonte's dark face lighted with a savage gleam as he swung his horse to the inside or "pole."

Running neck and neck with him was his hated rival, Paul John, leaning low on his horse's neck and shouting unintelligible to Chinook, a few yards behind. Connie was with the stragglers few lengths in the rear This was new to the Chronicler and we may well note, as one of the most conspicuous marks of his inspiration the unstudied manner in which he puts forth frank and sympathetic record of irregularities of Hezekiah's Passover. It says much for the healthy tone of the temple community in his day that he does not attempt to reconcile the practice of Hezekiah with the law of Moses by any hazardous quibbles."—W. H. Bennett. The Greatest March in all McLaughlin-Buick History

THE motor-car buyer . . the final judge of automobile values . . has registered enthusiastic endorsement of the revolutionary advances made by the 1929 McLaughlin-Buick!

During the past month, McLaughlin-Buick sales have been 25% greater than March of last year . . greater than any previous March in all McLaughlin-Buick history.

More people buy McLaughlin-Buick than any other car at or above its price . . because the 1929 McLaughlin-Buick with its Masterpiece Bodies by Fisher, has unquestionably established a new standard of performance and a new order of beauty.

Get behind the wheel and get the facts!

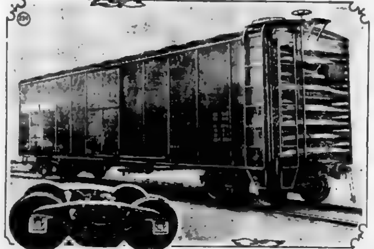
Steel Cars Now for Freight Service



Steel is replacing wood in freight service and seventy-five hundred of the new freight cars now on order for the Canadian Pacific will set a new standard in grain and general freight service. These cars are not in replacement but in addition to the wood cars already in use, and will furnish a greater margin of safety, more speed and longer service while eliminating leakage.

They will have a capacity of 2,000 bushels of wheat and will considerably speed up the movement of grain. Rivetting of all joints and connections will reduce to a minimum possibility of loss of grain and the car itself will be more solid and will possess greater rigidity. The roof of the car will be steel as will also the whole structure, but the sides will be wood lined inside.

Additional safety will be provided by a new type of truck having a cast steel frame. These truck side frames which represent a new standard of Canadian Pacific equipment, are one integral casting. Elimination of parts in the car proper is another noteworthy feature.

Dimensions of the car are 40 feet 9 inches in length, 8 feet 7 inches high, and 8 feet, 7½ inches wide. They will have 5 foot side doors and a capacity of 120,000 pounds.

The new cars represent an important advance in railway freight transportation on this continent and they have been developed more directly to keep pace with the development of the west. In recent years crop acreage has increased. Car loadings have increased in like measure. Improved harvesting machinery has speeded up delivery to the rails and necessitated still more efficient handling on the part of the railway companies.

Delivery of the new cars will be made in ample time for the harvest of 1929 and the Canadian Pacific may be expected to again break the record of crop handling.

COLOR AND STYLE IMPORTANT FACTOR IN MODERN MOTOR CARS

Color styles in automobiles show a definite trend towards the conservative according to the executives of General Motors of Canada who have [illegible]. The trend, it is stated, started about six months ago. One of the reasons for it is that the public are becoming more "color conscious."

Elusive Factor

Color, it is pointed out, is one of the most elusive factors in automobile manufacturing, there being no really definite rules to follow as in engineering. At the same time color is one of the most important factors in the industry, because color and style now receive the major consideration of the buyer. To find a wide market a car must of course be mechanically sound; but that is not enough. Its color and design must be such that it will possess that indefinite something called "style."

The Color Room

At the Oshawa, Ontario, plant of General Motors there is what is called a "Color Room". In this room are samples of every known color combination. Laymen who visit the room are bewildered at the existence of so many colors of which they have never known. Their number is infinite.

"Lido Green"

The beach at the Lido near far-away Venice is famous for a particular type of fashion parade. On one of the walls of the General Motors color room at Oshawa is a door panel colored in what is known as "Lido Green" and it is now the color of one of their most popular cars.

Many such stories lie behind the numerous colored door panels on the walls of the color room. The current color combinations of every model of each line of the Company's cars are presented in this way. Other combinations and shades are represented on various types of panels. Executives of General Motors and of the various divisions find this room very valuable in selecting new colors.

EYE GLASS PEDDLERS FINED IN COURT

Recently there has been developed a mail order method of selling glasses. The entire examination consists in answering two questions. "How old are you." & "Have you ever worn glasses before." To anyone who has undergone the painstaking examination made by an eyesight specialist, the ridiculousness of the situation is apparent. The American Medical Association tested out one of these concerns by having a half dozen persons answer the test questions, and purchase glasses by mail. The glasses received were compared with the glasses worn by the subjects and in every instance it was found that the mail order glasses were so far from correct that they were useless. Even more in several cases, the use of the glasses would have been positively harmful to the purchaser

These ready made houses send a slide to various people offering to sell glasses, which is numbered, and the number is supposed to give the strength of glasses required. Several convictions have resulted during the last few months, the offenders being charged with infringement of the Optometric Act. Persons hearing of anyone selling glasses in this manner, kindly notify Inspector M. W. Fyffe, 11424, 95thA St., Edmonton, or the nearest provincial police depot.

Convenient Comfort—
In the Heart of the City
Selkirk Hotel — Jasper Ave. and 101st Street.
Yale Hotel — 10018 Jasper Ave.
These two Hotels situated in the very centre of the city offer every convenience for a business or shopping trip. Family custom is specially catered to and the rates are very reasonable
ROBT. McDONALD, Proprietor.

Queen City's Crown

A year ago there was a great hole, nearly a city block in area, facing the Union Station at Toronto. Down in the bottom, half a dozen cranes were busy sorting huge pieces of steel which were being neatly swung as they were set, meccano like into position.

On that site today stands the tallest building in the British Empire, the magnificent Royal York Hotel which, in two months more, will open the doors to its thousand rooms and welcome its first guests.

Remarkable as has been the speed with which this great Canadian Pacific Hotel has been erected, still more extraordinary to the man on the street must be the tremendous thought which went into the planning of what will be the most up-to-date institution of its kind in the world and in the working out of those arrangements that will ensure its guests the utmost in facilities and service. There will be, for instance, radio outlets in every room, and in the concert hall, Banquet hall and Ballroom, which have seating capacity for [illegible] thousand people, the most [illegible] means of amplification have been installed to provide not only that speakers and artists and musicians be thoroughly heard wherever they are speaking but, by connection through the radio room, in any other portion of the building. There is provision also for television, should this be developed, for moving picture and movietone projection.

With its own power plant and water-works, its emergency hospital and internal and outside transportation and communication systems, the Royal York Hotel is a complete city. [illegible] bank and brokers offices, [illegible] stores and shops, its community hall and recreation centres. Nothing which a progressive town might have has not been thought of and incorporated to advantage. Down in the basement is a complete printing establishment, a linotype and three presses.

With a tunnel entrance from Union Station, at the junction of all roads into the city, in the heart of "down-town" the site of the Royal York is strategic. With Lake Ontario before it, it is beautiful. The travelling contingent will join with the citizens of Toronto in their eager anticipation of the opening day in June.

Big Values in unused transportation

Look at these

EVEN at ordinary prices, a Used Car gives you more miles of automobile transportation for your dollar than you can get in any other way—because the original owner has stood the heavy first-year depreciation.

Now, we offer you a double bargain . . Good Used Cars, at phenomenally low prices! We want to clear out our entire stock of used cars to make way for new Chevrolets coming in. It would cost us money to carry them and store them until summer. So we're turning that money over to you; making it worth your while to BUY now.

Look at the cars . . and the prices . . and you'll agree you've never seen such values in UNUSED TRANSPORTATION. It's an opportunity that you may never get again.

The West's Ocean Port

Announcement that the rails of the Hudson Bay Railway had reached Churchill on Good Friday, is the most welcome news the people of Western Canada have received for some time, heralding, as it did, the realization of a long entertained hope. For many years Western Canada agitated for the building of a railway to the Bay. It was vigorous, even violently, opposed by Eastern Canadian interests, and, politically speaking, the voice of the West was weak in comparison to that of the East. The West, however, kept up its campaign of education as to the merits and feasibility of the route, and ultimately all political parties in Canada became committed to the project.

Finally, plans for a Hudson Bay Railway assumed definite shape in 1910, when a branch line of the Canadian Northern was completed from Hudson Bay Junction, Sask., to The Pas, Manitoba, and the building of a Government line from The Pas to Hudson Bay was authorized by Parliament. Work commenced the following year with Churchill as the objective.

Following a change of Administration at Ottawa, Churchill was abandoned as the proposed terminal, and Port Nelson chosen. The location of the railroad was accordingly altered. The right-of-way was cleared and graded to Port Nelson and steel laid, before the end of 1916, as far as Kettle Rapids, 332 miles from The Pas.

Owing to the war and consequent lack of men and steel, operations were suspended and for some years only part of the completed railway was kept in repair.

The work that commenced by the Liberals in 1910 was continued by the Conservatives until war, and the after-war period of financial depression stopped the work. The work, however, had only been carried on in a more or less half-hearted manner with the result that progress was slow, and the country, as a whole, lacked confidence in the undertaking, the East regarding it as a waste of public money and in the nature of a political sop to the West.

With the acceptance by Hon. C. A. Dunning of the portfolio of railways in the Mackenzie King Government, a marked change took place. It is an open secret that Mr. Dunning made the immediate and vigorous construction of the road a condition of his entry into the Government. He frankly told the people of the West that he regarded it as "his Job" to complete the railway in the shortest possible space of time.

The task of reconditioning the roadbed which had fallen into disrepair was begun, and, in view of divergent views which prevailed as to the relative merits of Churchill and Nelson as terminal harbors, Mr. Dunning secured the services of the most eminent British harbor engineer to decide the question. He reported strongly in favor of Churchill, and his report was immediately accepted, and the road again diverted in that direction.

Since then there has been no let-up in construction. It has been pushed forward day and night, in season and out of season, with the gratifying result announced on Good Friday.

In the meantime Mr. Dunning grappled with the problem of building an effective harbor at Churchill and establishing the feasibility of the ocean route through Hudson Straits. Airplane and other surveys, radio, and every modern invention was called into use, and in two years public opinion in the West was not only justified, but the East was largely converted, especially as huge and very valuable mineral discoveries in the northland made accessible by the railway quickly followed.

Although both steel and telegraph have reached Churchill it will require some months yet to fully ballast the road to make it capable of efficiently handling trains. There is an enormous amount of work to be done to build necessary harbor facilities at Churchill. That work is in progress and being prosecuted with the same vigor as characterized the building of the railway in the last three years. Hundreds of carloads of supplies, material and equipment for the harbor are even now distributed along the the railway to be rushed in at once now that the rails have been laid.

It is confidently anticipated that before the end of 1929 freight will be moving steadily from the prairies to the West's own ocean port at Churchill and Mr. Dunning has already announced that the Crow's Nest Pass schedule of rates on grain will apply to the Hudson Bay route.

The new route will, it is believed, effect a veritable revolution in Western transportation. In preparation for it both of our great railway systems have been building north and south lines within recent years, whereas formerly their policy was to so construct lines as to move everything from east to west and west to east.

With the completion of the Hudson Bay Railway one of Canda's ambitions is being realized. It is in these Western Provinces that depth is to be given to the Dominion, something it has lacked since Confederation brought a Dominion into existence consisting of a long narrow strip extending from the Atlantic to the Pacific just north of the International boundary line.

WHEAT POOL HISTORY GIVEN TO U. S. SENATORS

Washington.—Not only has the Canada Wheat Pool been of distinct advantage to the wheat farmers of Canada and tended to increase the prices they have obtained for their product, but it has had an influence on the white wheat market, according to A. J. McPhail, president of of the Central Selling Agency for the great three Western Canadian pools, who discussed the subject before the Senate committee on agriculture here.

Mr. McPhail came before the Senate committee by special request of the chairman, Senator McNary. Not only was he warmly thanked by Senator McNary and others of the committee for consenting to be present but senators expressed the view that the information which he set forth as to the workings of the Canada Wheat Pool would be of great use in evolving plans in this country for farm relief.

Not the least interesting phase of the hearing was the suggestion that this country and Canada by co-operating with respect to the marketing of exportable wheat could control the world market to a still greater degree than it has already been influenced by the Canadian Pool.

Senator Brookhart of Iowa, asked a series of questions of Mr. McPhail on this point. While Mr. McPhail made no commitment on the policy of such co-operation, he indicated that the Canadian Pool, working with some similar organization in this country, could have an increased influence on the world market.

Mr. McPhail gave a sketch of the history of the formation of the pools ...

British Liberals Start Drive

Two Killed In Plane Accident

Pilot and Passenger Lose Lives In Crash At Khedive, Sask.

Khedive, Sask.—To the sudden panic of a passenger, unnerved by the swooping ascent and gyrations of the aeroplane in which he had sought the thrill of a first flight, is attributed the tragic crash here that cost the lives of Flying Instructor Roland Ford, of Regina, and John Sydorchuk, a C.P.R. section foreman.

Trapped in the enclosed cockpit of a dual-control Velie Monocoupe when the right wing of the 'plane, in which the two were flying, fouled a telephone wire, they were plunged downward with terrific force, and death either came instantly from concussion, or else they perished in the flames that immediately enveloped the crumpled machine.

The coroner's jury which investigated the tragedy came to the merciful conclusion that the victims were either dead or stunned and were thus oblivious to suffering. On the other hand, a Regina pilot who visited the scene and examined the wreckage of the plane in the light of all the circumstances, expresses the opinion that the crash was not sufficient of itself to cause the deaths of Ford and his passenger. He believes the two fought vainly to escape from the blazing cabin before succumbing to the flames.

Making Tour Of Canada

CANADIANS IN U.S. ARE SUBJECT TO DEPORTATION

Washington.—Thousands of Canadians are certain to be affected by the "absolute deportation" law, which passed near the close of congress. Walter W. Husband, assistant secretary of Labor, one time commissioner-general of immigration, said the illegal residents are divided into three groups.

In the first group are those who entered this country without payment of the head tax of $8 between 1917 when the tax was first imposed, and June, 1921, when the first immigration exclusion act went into effect. This group is the least seriously affected. They [illegible] be deported as the statute of limitations has outlawed their offences. Steps are being taken in congress to validate their residence.

In the second group are those who entered without paying a head tax between June 3, 1921, and July 1, 1924, when the policy of strict exclusion went into effect. Members of this group also are in no danger of deportation, as the statute of limitations has operated to protect them from prosecution. But unless they take steps at once to validate their residence, they can never safely leave the country, even for a short visit to relatives in Canada. If they cross the international border they can never get back except by complying in all particulars with the present immigration laws.

Men and women who have slipped into the country since July 1, 1924, comprise the third group and are affected by "absolute deportation" law. ...

RESIGNS IMPORTANT POST

Lord Lovat, who has now almost given up public life, has resigned from the chairmanship of the overseas settlement committee owing to ill-health. He resigned as parliamentary under-secretary for Dominion affairs last December.

CANADA TAKES ACTION ON THE I'M ALONE CASE

Ottawa.—The sinking of the Canadian schooner "I'm Alone," by United States coast guard vessels has been the subject of formal representations by the government of Canada to the United States.

This was stated in the House of Commons by Right Hon. W. L. Mackenzie King, prime minister, answering a question by Hon. R. B. Bennett, Opposition leader.

Mr. King stated that the I'm Alone case had been the subject of correspondence between Ottawa and Washington for the past week. He also said that the correspondence in this case would be brought down in due course.

Washington.—Word from Ottawa that the Canadian Government had decided to make the sinking of the Canadian rum runner "I'm Alone" subject of formal representation to the American Government was interpreted by official and diplomatic circles here as a move on the part of the Canadians to bring the anti rum-smuggling treaty up for formal discussion.

There has been an inclination during the past few days in some quarters in Washington to believe that the Canadians might drop the case, hence no move in the way of an apology or steps to straighten out the tangle were made by the American authorities.

It is generally believed the Canadians are more interested in the principles of the case with regard to the treaty than they are with the actual sinking.

"THE OBSTINATE FAMILY" A HUMOROUS PLAY AND OTHER NUMBERS TO BE PRESENTED TUESDAY

On Tuesday next the United Church Ladies' Aid will present an excellent and varied programme at the Variety Theatre. Included are a number of vocal and instrumental numbers of merit. The headliner will be a sketch entitled "The Obstinate Family." This is extremely funny and the cast is composed of the following persons: Mr. George Bassett, Mr. A. E. Calvert, Mr. A. H. Lundie, Mrs. E. M. Firth, Miss Stella Clement, Miss Marion Cooper

Be sure and attend this event, you will enjoy it

THE WEATHER

The promises of an "early spring" vanished when after a spell of nice weather, it turned cold and wintry again. The real winter's snow had gone and the ground bare, when along came more snow. The change into real spring weather, however, is very close and in a few days winter will have been a thing of the past.

RADIO MAY AID MAN IN STUDY OF WILD LIFE

Harry Allen

Do animals converse? Harry Allen, famous New Brunswick guide says they do, and he speaks from the experience of a lifetime spent in the woods which flank his seventy-eight mile lease of the Cains River. Within certain narrow limits, he insists, the language of the wild can be counterfeited by man with such skill that it deceives the animals themselves. Thus, the call of the cow moose in the mating season is more often than not a successful lure in bringing the bull to the hunter. The cry of the hunting wolf and the honk of the migrating geese are easily imitated by the initiate and are easy of interpretation. There is, however, nothing particularly new in this. What is new, is Mr. Allen's claim that animals communicate with one another by sounds inaudible to the human ear. That they do converse and communicate one with the other is demonstrated in a thousand ways each day. What our well-known guide suggests is that radio will eventually solve the question and be the means of interpretation of the animal communication

That the human ear is sensitive to but a very narrow and limited range of vibrations is in fact certain. What Mr. Allen hopes to prove shortly is that all animals are sensitive to, and make use of, "wave lengths" outside the range of mankind.

"It is a common occurrence in the woods to see a cow moose leave her calf, or a deer her fawn," says Mr. Allen by way of example. "I have seen it hundreds of times. Every time the mother animal has instructed her young, in a language inaudible to human ears, not to stray. That language was quite intelligible to the young, but although I have sometimes been within touching distance, I have never heard the faintest sound, beyond at most, the blowing out of air from the nostrils which had no apparent significance. The young of the moose or deer will remain exactly as its mother left it, even though she be gone for half an hour at a stretch. More than that—in case of extreme need it will "radio" its mother without apparent sound.

"I have experimented on the problem many times. In each case it has been the same. I have waited until the mother has gone some distance; then have approached and stroked the young animal. Beyond a slight twitching of the skin, it has not moved, but it must have sent out a call, for almost immediately I w[illegible] hear the crashing return of the mother through the undergrowth. At such moments I would not pursue my investigations further."

Mr. Allan has cited many other "demonstrations" to members of the Tourist Department of the Canadian Pacific Railway who are encouraging him to develop his theory still further as he engages in the role of guide, philosopher and friend to the fisherman and the hunter. 255

Massey-Harris 3 Bottom Horse Gang, complete with 3 extra shares and seven horse hitch. Good as new.

General Automotive Work

There are very few cars in the district, which after winter storage or use would not be the better for a spring overhauling. If you place any value upon your car, the cost of a spring overhauling is money well spent, the improved service being worth more than the work costs. We are thoroughly experienced and suggest you bring your car in early.

That Tired Feeling

May be nothing more than the natural re-action of the human organic system due to the change of seasons. At this time, the change-over period from winter to spring, a good tonic will be found to be of much benefit—both as regards keeping well and improving ones' condition when unwell.

A good tonic taken at this time of the year is worth more than it costs, and will in the big majority of cases result in improved health, greater vigor and increased energy.

They would appreciate the co-operation of school boards, parents and teachers. The programme will commence at 2.30 p.m.

C.N.R. DISALLOWS P. F. INGRAM'S CLAIM

We have been requested by Mr P. F. Ingram, of Victoria, to insert the following two letters which are to our readers self explanatory.

Mr. P. F. Ingram,
1206 Douglas Street,
Victoria, B.C.

Dear Sir:—

With reference to your letter of January 7th, presenting claim, $861 98, for loss of poultry alleged delayed in transit.

I have now completed my investigation to find that the loss is one for which we cannot accept any liability, it being caused through circumstances over which we had no control; that is to say fog, which our barges encountered and could not proceed on account of the density of it. Consequently I regret that claim is one which we must decline.

Yours truly,
T. GINNELLY,
Asst. Freight Claim Agent.

To the Farmers that shipped me poultry from Tofield and other points on C.N. Railway, Alberta.

This shipment left Vancouver on the morning of December 17th, arrived at Victoria December 22nd, partly spoilt and too late for Christmas trade. The C.N.R. tied up for fine weather at the same time the C.P.R. boats came through on time. I am willing to leave it to the public if they don't think our claim was a just one and should be paid

Yours truly,
P. F. INGRAM.

UNITED LADIES' AID CONCERT PRESENTED TO LARGE CROWD

On Tuesday evening the Variety Theatre was filled to its capacity when the United Ladies' Aid presented a variety programme consisting of all local talent.

The event was a complete success in every way—financially socially and technically.

All the artistes were at their best and encores were frequent.

This is the first all local talent programme Tofield has staged for a long time, and those who thought that the art of public entertaining had died as regards Tofield, were greatly surprised to find it very much alive.

The Ladies' Aid and Mr. Rowe as business director are to be congratulated on the success of the event, while the artistes deserve every praise.

Part A—solo, Mr. A. E. F. Carey; duet, Miss Mary Rowe and Master Dennis Edwards; violin solo, Mrs. R. W. Pincott; Quartette, Mesdames Firth and Rowe, Messrs. Murray and Gordon; piano duet, Mrs Cary and Miss Ruth McLaughlin, "The Great Illusion" Mr Al Innes; piano solo, Miss Stella Clement; vocal solo, Mrs. G. H. Rowe, reading, Mrs. R. W. Pincott, trio, by three coons from Alabama

Part B of the programme was a humorous sketch, "The Obstinate Family." This created much fun, and kept the audience in one continuous scale of laughter. Cast Mr Geo Bassett; Mr. A. E. Calvert, Mr. H. M. Lundie, Mrs. E. M. Firth, Miss Stella Clement, Miss Marion Cooper

"BEN-HUR" FOR NEXT WEEK

The famous film production, "Ben-Hur" will be shown at the variety next Friday and Saturday. This is without doubt one of the most interesting features ever filmed. It has the unqualified endorsation of newspapers the world over, and is is replete with thrilling episodes. It is educational and entertaining both and residents of Tofield and district should be sure and see this feature when it is shown here.

FOUR HUNGARY MAIDENS

Four New Canadians from Hungary whose native dances delighted thousands in attendance at the Regina Festival

From whatever viewpoint it is to be judged, the Great West Canadian Festival recently brought to a conclusion at Regina, was a success. In attendance it eclipsed its forerunner at Winnipeg last year. Its handicraft exhibit covered a wider range, a more comprehensive representation of the peoples of the West had been arranged for and in the words of J. M. Gibbon, sponsor of the festival, "Saskatchewan has proved that within its borders is the foundation of an art upon which will be built a structure of national culture finer than that of any other nation on earth." Over a hundred folk-dancers interpreted the dances of many racial groups. Folk-singers numbered over one hundred and sixty. Handicrafts struck response from thousands and it is safe to say that next years festival, which is already being planned, will receive still greater support and present a folk-pageant to be unequalled on the continent. The festivals have been arranged under the auspices of the Canadian Pacific Railway.

KETCHMOOT

A little daughter was born to Mr. and Mrs. Jim Johnson one day last week at Edmonton hospital

We were sorry to hear the infant daughter of Mr. and Mrs. Robert Sturret only lived a few days.

Miss Sybil Morrison teacher in training at the normal school in Camrose taught at our school last week for her trial week.

Mr. J. H. Ingram was able to return home onn Saturday from the Edmonton hospital. Dr. Law is still dressing his foot.

Ralph Whilliams has been very ill the past two weeks with pleurasy pnemonia, but we are glad to hear that he is now on the road to recovery.

Mr Wesley Ingram returned to Victoria B. C. one day last week where they will make their home

Mr. Ralph Miller came up from Calgary one day last week and sold his farm to a Hollander family at $41 per acre.

Mr. C. A. Ingram attended the Spring stock show in Edmonton last week.

Mrs. J. Appleby entertained the M.A.S. at her home on Wednesday afternoon of last week. A large attendance of members and visitors were present. The secretary-treasurer was instructed to buy another $100 savings certificate which makes the society's funds $700 towards the church fund. An autograph quilt is being made, colors sand and blue, which will be very pretty when finished, refreshments were served by the hostess. The May meting will be held with Mrs A Williams.

THE STORY OF WILD WEST ROMANCE
AT THE VARIETY SATURDAY

Phil O'Malley is a good natured hard riding young cow puncher, who is aroused to a blazing rage when he sees a brakeman chase a little mite of humanity from a passing freight train and whom he saves from injury by racing beside the train on his horse and catching him in his arms.

He adopts the child, a boy, whom he nicknames Kid, and the two become fast friends.

The Kid rides the range with Phil and one day they witness a holdup staged by Indians. But Phil, after an investigation, decides the Indians were really white men in disguise and that their leader is the towns youthful bad man, Brake Martin. Thinking he had found enough evidence to make good his charge, Phil publicly accuses Brake of the crime. The latter is able to squirm out of his predicament and to make Phil look ridiculous before the others

The arrival of the Reverend Thorndyke, a travelling evangelist, before whose gospel tent Phil fights with Brake further embarrasses Phil, and makes him look like a rowdy in the eyes of the evangelist's pretty daughter Ruth

The plot proceeds and involves Phil in plenty of trouble and there are many exciting scenes. Eventually Phil is completely vindicated in the eyes of all, including Ruth, who allows him to lead her to the altar with the kid grinning his approval.

5,000 FACTS ABOUT CANADA

The 1929 edition of that popular annual "5000 Facts about Canada", edited by Frank Yeigh, the well-known Canadian author and publicist, is now off the press and contains a wealth of material that presents the stirring story of our national progress in crisp concrete form. Many new features mark this issue, such as the striking expansion during the ten years since the armistice, as well as the remarkable advance made in the last 12 months' period of "Canada's Best Year" The booklet "sells Canada" most effectively, and is widely distributed for that purpose, while it is invaluable to any Canadian who wishes to know his own country. The 50 chapters of contents tells the all-Dominion story in a nutshell. Copies may be had at 25c. from leading newsdealers or from the Canadian Facts Pub. Co., 588 Huron Street, Toronto.

BARDO

Miss Ellen Walker of Tofield has been practice teaching at Bardo the last week.

A very jolly party was held at Pohlman's last Sunday afternoon, in honor of Merlin's 13th birthday. The afternoon was spent in playing games. A delicious lunch was served at the close of the party

Miss Nora Rude entrained for Edmonton on Monday

The bible class held at the Hendrickson home Sunday evening, was very well attended. The next meeting will be held at the home of Mr and Mrs Rorem

The Bardo gunmen met at G. Hendrickson on Friday afternoon to again try their skill with a rifle. A continuous bombardment was kept up throughout the afternoon. P. Lerbekmo getting the highest score

The Easter Cantatta given by the Tofield Choir at Bardo on Sunday afternoon was enjoyed by a crowded house. The singing was very good. Refreshments were served in the basement after the service

A few of the young men of Bardo wended their way to Clarence Rude's, Wednesday last, to celebrate his birthday. A long and eventful evening was reported.

Miss Martin spent the week end at her home in Edmonton.

Little Ida Zook, eldest daughter of Mr and Mrs John Zook, is seriously ill with pnemonia and appendicitis. We all hope for a speedy recovery.

KINGMAN

O. Thompson was a business visitor in Edmonton last week.

Edwin Olson returned on Thursday from Minneapolis, where he has taken medical treatment for five weeks.

Mrs. E. Erickson was a Camrose visitor on Thursday

A. Aap motored to Matiskow on Saturday.

Mrs. E. Erickson entertained a number of friends on Friday afternoon.

Mr. and Mrs. W. Jardie motored to Edmonton on Friday

Mr. and Mrs. I. Pederson and family of Round Hill visited with Mr and Mrs. R. Molvik on Sunday

D. M. Thompson motored to Kelsey over the week end.

Visitors at the Nels Jardie home on Sunday were W. Hartchens, W. Jardie, C. O Pedersons, E. Erickson's and Ed Tollefson's.

Mr. and Mrs. O. and Mr. and Mrs. G. Welch motored to Camrose on Friday.

LINDBROOK

The recent "moisture" although not apreciated just now will be very much so after the seed is sown.

Mrs. Clark and daughter Elizabeth and Mrs. Hicks all of Bristol, Eng., arrived here last Friday, Messrs. Clark and Hicks having been here for several months and are now the proprietors of the Lindbrook store. Welcome to our "city"! ladies, we'll hope you will enjoy life here.

Mrs. W. Hooper nd Messrs. Lyndon and James Hooper motored to Edmonton for the week end.

Miss Evelyn Glenn spent the week-end in Edmonton the guest of Mrs. Swain.

Miss Thelma Jobb of Tofield was here last week from the normal school Camrose, gaining first hand knowledge of her profession in our "institute of learning" on the hill.

LUMBER YARD BURNS

Fire from an unknown cause Monday night swept the W. H. Clark and Company Lumber yard, Edmonton, causing damage estimated at $30,000. Charles G. Robson, president of the Company, stated Tuesday he was unable to throw any light on how the fire might have started, though apparently it originated somewhere in the moulding building. Both the building and the lumber destroyed were covered by insurance.

BEAUTIFY CANADA

Clean Up, Paint Up, Keep It Up — Increases the Value of Your Property

THE DRIVE TO FINISH OLD MAN DIRT IS ON

Greatest Effort in History of Canadian Cleanliness Includes Hundreds of Communities

The greatest effort in the history of Canadian cleanliness is on! Cleanliness has a history. Its influence can be traced down the ages. Those races that were clean were the races that were Masters.

The Athenians with their baths and beautiful homes conquered the Persians with their unkempt beards and dirty ways. The Romans with their aqueducts and baths, their gardens, beat the barbarians with their greasy hair.

Cleanliness has always been po... that Modern sanitation saved millions of lives in the great war.

Real people, they were the leaders in progress, always have fought for cleanliness. At times it has been a sporadic fight, a skirmish. A clean man was handicapped by a neighbor who let his premises run wild. But co-operation has been brought to play at last.

This year in Canada some hundreds of villages, towns and cities are campaigning for cleanliness, health and beauty. The drive is not done in a day or a week but in a continuous campaign. There is a steady pressure.

Tin cans, flies, refuse, dirt, waste paper, unsightly buildings, unpainted surfaces are taboo. The drive is on. It won't be stopped.

Join the forward movement. Clean Up, Paint Up and Keep It Up. Make the old enemies, Dirt, Disease and Unsightliness, disappear forever.

The Use of Paint

Lessens Farmer's Cost Of Doing Business

Rules For Fire Prevention

Do not permit rubbish, greasy rags, paper and useless waste to accumulate in or around buildings.

Do not allow matches kept in your homes, offices and stores in other than metal boxes. Use safety matches.

Do not allow children under ten years of age to use matches.

Do not use lamps and lamp burners that are not clean.

Do not tamper with or extend electric wire, employ an electrician.

Do not keep gasoline in other than air-tight cans painted red.

Do not fill tank of gasoline stove when lighted and fill by daylight only.

Do not permit a rubber tube connection to a gas stove.

Do not empty ashes in other than metal cans.

Do not carelessly throw cigar and cigarette stubs where they could cause a fire.

Do not fail to warn your children of the dangerous bonfires.

Loss through preventable fires in the United States is $250,000,000 which, however, is exceeded by the annual loss through the lack of painting according to Prof. H. H. ... who has conducted paint tests for several years for the people of Kansas at the Kansas Agricultural College.

Clean Up and Paint-Up campaigns reduce fire losses and insurance rates, increase property values, remove unsafe buildings, swat the fly, make school and home gardens, ... and develop a community spirit that permanently ensures a cleaner, safer, healthier and more beautiful town.

These All Count

Here are some pointers for citizens who would regenerate their community with a real Clean Up and Paint Up campaign:

1. Take away all the ashes and trash from your back yard immediately. Send your rubbish to the dumping ground.
2. Suggest to several men with teams, that they drive through the alleys with a sign, "Clean-Up Wagon" on their wagons, also a bell calling attention. People are only too glad to pay such a man for hauling their trash away.
3. Burn all rubbish that will burn. Clean your vacant lots and alley ways.
4. Make your street and parking look as trim and well kept as possible.
5. Refrain from throwing old paper, banana and orange skins into the streets.
6. Plant some grass and flower seeds to make your home beautiful.
7. If your store front is dingy, paint it. Nothing will do more to improve the appearance of a town than the liberal use of paint.
8. If there are unnecessary, unsightly sheds in your back yards, tear them down. They detract from the beauty of your home and the town. Open spaces and fresh air are better.
9. If your walk is an eyesore to those travelling over it, repair it or build a new one.
10. Trim hedges and trees and spray trees.
11. Paint and whitewash barns, paint houses, outbuildings, etc.
12. Paint tools and machinery.

The "Clean Up and Paint Up" campaign offers the most direct and practical and permanent avenue through which women, organized or individual, can work for homes and home towns beautiful and sanitary.

For Health's Sake

Clean-Up and Paint-Up—Guard Against Epidemics By Removing Their Cause

Tuberculosis and other germ diseases are generally brought about by dirt and filth. The germs of tuberculosis cannot live where there is sunlight, cleanliness, and fresh air. The scrubbing brush, soap and water, paint and whitewash are deadly enemies of tuberculosis. The easiest way to get rid of the germs that have nested in your house and around your premises is: Clean-Up and Paint-Up.

The cleaning out of filth will keep down influenza, infantile paralysis, typhoid, and diphtheria, as well as tuberculosis. And the painting brush should follow the scrubbing brush so that the cleansed places may be kept clean.

Do you want a clean town? Then do your part. Go through your house from cellar to roof and gather up all the old, useless, worn-out things stored away and get rid of them now. Clean out all rubbish, ashes, etc., in the cellars, yards, alleys, and areaways.

Screen your homes thoroughly. Remove any animal or vegetable matter. Manure breeds flies, which carry disease to human beings, especially the babies. Clean out and fix up the manure bins. Repair your yard fences, poultry houses, outhouses, etc. Then paint or whitewash them. Don't spare the paint.

An ostrich's egg weighs three pounds.

Paulin's Cream Sodas — Long Red Package

BABIES GAIN BY THIS SIMPLE METHOD

Don't Neglect Painting Up

Make the Paint Brush the Partner Of the Scrub Brush In Your Campaign Against Dirt

Paint Up goes hand in hand with Clean-Up. When you have dusted and swept and mopped the corners and the open spaces put the paint brush to work. It will be easy to keep things clean then. A painted surface does not accumulate dirt like an unpainted one does. Besides, dirt is more obvious on a painted surface, and less apt to be ignored. Paintliness is the best incentive to cleanliness, which you know is "next to godliness."

Make the paint brush the partner of the scrubbing brush. They make a whole team. Enlist both of them for Clean-Up and Paint-Up.

It doesn't need much argument to convince a man that his house and his barn and his whole farm will be worth more money if the buildings are kept in the best order.

Don't Forget the Garden

You Can Make Enough Out Of the Back Yard To Paint Your House

Don't forget that garden this year. Gardens save thousands of dollars for householders, they conserve and add to the food supply and give many persons a healthy and inexpensive form of outdoor exercise.

Cultivating the back yard regularly will save enough money to save the house for years, by painting it regularly. The work is congenial and creates contentment—and "garden sass."

Clean-Up and Paint-Up On the Farm

The man who owns a farm or lives on one should be just as much interested in Clean-Up and Paint-Up as the city householder. And the incentive to start such campaigns has been just as marked in the rural districts as in the more thickly populated ones.

Farmers everywhere are being urged to remove ramshackle buildings, repair and paint those that remain, trim hedges and trees, and clean and paint tools and machinery.

Hoisting of the Nationalist flag in Manchuria on December 31, placed the greater part of China under the Nationalist government.

Toothbrushes and handkerchiefs have figured among the tokens of valor presented by Chinese generals to the troops under their command.

Keeps Floors Beautiful

Beautiful floors are largely a matter of prevention, the great secret is to put them in perfect condition and then keep them that way. Doorways, passages and tracks become worn and unsightly first. You can keep these parts looking well by waxing them frequently. This requires but little time and effort if a good prepared wax and floor polishing brush are used.

The Clean Town Is the Healthy Town

Germs Lurk In Filth and Clean-Up and Paint-Up Will Chase Them Away

It long has been a well known fact that dirt and disease walked hand in hand. Influenza, typhoid, pneumonia, tuberculosis, and other germ diseases exist because dirt exists. Get rid of dirt, and many diseases will be wiped out.

Cleanliness and the liberal use of the paint brush and mop and broom will make it hard for dirt to exist. If your town is spotless it will be a healthy town. And there is no better advertisement for a community than a low death rate.

Make your community clean and healthy. Wide-awake Canadian towns are conducting Clean-Up and Paint-Up campaigns, and Home and Community Beautiful campaigns as much for the sake of health as for the sake of beauty.

In Alameda, Cal., campaign workers went to the length of placarding houses with the inscriptions, "Clean," "Dirty" or "Filthy," as the case might be. It was heroic treatment but it proved effective.

Make your town a clean town and you will also make it a healthy one.

CHAPTER XVII.—Continued

Connie made no attempt to check her cayuse's onward flight. She was in no mood to listen to the kudos of the admiring crowd, she wanted only to get away from the scene as quickly as possible. The movement toward the centre gave her the opportunity she desired, and she urged the weary cayuse through an opening on her left. Many hands were reaching to congratulate her, but she pushed her way through to the trail.

At the sound of hoof-beats behind her she turned to see Lafonte urging his tired mount toward the Pemberton trail and looking back apprehensively over his shoulder.

Several men were running after him, shaking their fists and uttering loud imprecations. A man leaped from behind a jack-pine to land in the path of the half breed, lunged for the reins, missed, then caught the stirrup. Lafonte struck the man a blow with his heavy whip that loosened his hold and felled him to the ground.

Connie saw Gillis break from the crowd, jump to the saddle of a cayuse and start after the fleeing man just as the latter disappeared in the woods. Gillis waved his hand to her and vanished in pursuit. She urged Pegasus to the shelter of the timber as she saw her father and Donald running toward her.

The strenuous race and the spectacular fall had left both horse and rider in a badly shaken condition. Connie's body was bruised and sore, and her head ached horribly. The cayuse's strained muscles were stiffening, he was limping badly, and his head drooped wearily as he dragged his tired limbs up the steep trail.

At the barn door Connie dismounted stiffly, removed the horse's bridle, then threw her arms passionately around his neck and stroked his symmetrical head with soft caresses. "I'm so sorry, Peggy darling," she said in a choking voice.

The horse nipped her shoulder in a weak attempt at playfulness, as if to signify that he quite understood.

Connie's eyes brightened at a sudden thought. "Peggy, dear," she whispered softly as she nestled her cheek against his soft mane, "do you know that I can have some nice clothes now? Lots and lots of nice things. I am going to buy you a blanket, a nice thick one for winter—and some ribbons for your mane. And you, Peggy"—with a flood of tenderness in her voice—"you won all this for me."

She was crooning sweet nothings in his ear that only Pegasus could understand when her father appeared, breathless from running, his face grey and anxious.

"Are you all right, Constance darling?"

Connie stepped forward. She was pale and weak, but her colourless lips tried to form a smile. "Yes, Daddy dear—I'm—all—ri—." Her voice trailed to a whisper and the blue eyes closed as darkness fell upon her like a cloud. Swaying uncertainly for an instant, she fell like a broken flower into her father's outstretched arms. For the first time in her life Connie had fainted. She lay like a child in his trembling arms, her upturned face wearing the pallor of death.

With a prayer on his lips and an agony of fear at his heart, her father carried her to the cabin and tenderly stretched the bruised little body on the coarse blankets of her bunk.

CHAPTER XVIII

At the race-course the crowd eddied excitedly about the judges' stand, or stood in groups talking of the wonderful performance of the spotted cayuse that had made the erstwhile champion appear a mere tyro.

Gillis came riding slowly from the woods and was hailed by questioning shouts from a score of throats.

"Did you get him?"

A bloody handkerchief was wrapped around the big man's head, and a livid welt showed on his forehead. He smiled grimly as he dismounted. "I got the d——d skunk," he answered savagely.

He turned to a group of Indians. "You fellers'd better look out for him when you go along, his eyesight's kinda bad."

Donald came to the front of the judges' stand and held up his hand for silence. Gradually the hum of voices died away and the crowd turned to face him.

"As you know we are to take up a collection to add to the Company's purse. The gentleman below," pointing down at Andy, "will hold the hat. We have witnessed an exhibition of matchless skill and pluck. Give as you feel."

The crowd cheered lustily. Then, jostling each other good naturedly like a lot of schoolboys, they formed in a long queue.

Andy started the contribution by giving his whole roll of bills. Money showered upon him until he was forced to call for another hat.

"Fightin'" Jack came to Donald in great perturbation. "Say! Our gang's all stony broke. Can we sign a due-bill?"

Donald called the time-keeper.

"Make her out for twenty bucks for each of us," said "Fightin'" Jack.

Andy's spirits soared as the pile rose higher.

"God bless 'er little 'eart," he murmured, "she can 'ave an ole ship-load of them blinkin' camisole things."

An hour later, as Donald climbed the hill to deliver the prize he met Doctor Paul.

"How is she, Doctor?"

"She's had a nasty shaking up but there are no bones broken. She will have to remain in bed for a week or so."

Wainwright saw Donald coming and stepped outside the door to meet him. "She's sleeping," he said in a low tone. He looked questioningly at Donald as the latter passed him the package of money.

"The prize money," Donald explained.

"I've brought your big trunk with the bulgy top," Miss Wainwright," he cried.

Connie sat up in her bunk so quickly that her head bumped the board above. "Miss Wainwright!" he had called her! Her eyes glowed in the dusky half light. "Thank you so much," she replied.

The next day Wainwright informed Donald that Connie was up and would see him.

"Just a minute, Dad," she cried as she heard them approaching.

Feverishly she rushed to the small mirror to glance at her reflection. With nervous hands she fluffed the hair about her ears and smoothed imaginary wrinkles from the collar of her dress. Then she sat down gravely and arranged her skirts about her.

(To Be Continued.)

Cutting Corns With Razor Leads To Lock-Jaw

Don't cut corns with an old razor blade. Infection followed often by death may result from paring corns with an infected razor. Quick, safe relief comes from using PUTNAM'S CORN EXTRACTOR. If afflicted with corns, callouses or sore foot-lumps, use "PUTNAM'S"—it's reliable and sure to shrivel up the corns so they drop right off. No pain, no soreness, but quick relief from sore corns comes to all who use PUTNAM'S PAINLESS CORN EXTRACTOR. 25c at all dealers.

Australian Wine Firm

An old-established wine firm of Australia has incorporated under the British Columbia provincial statutes and proposes importing Australian wines in large quantities.

KEEP YOUR BABY HAPPY AND WELL

Every mother wishes her child or children to be well and happy, to be bright-eyed, rosy-cheeked boys and girls. No mother, though, can expect her children to escape all the ills of babyhood and childhood, but she can do much to help them fight the battle for health.

All prudent mothers constantly keep at hand the means of aiding their little ones when sickness comes suddenly, as it generally does in the case of children. In every home where there are infants and young children Baby's Own Tablets should be found. Read what Mrs. Mary Hill, Centre Dummer, Ont., says concerning these Tablets: "I am the mother of six children and would not be without Baby's Own Tablets. They are a wonderful medicine for little ones."

Baby's Own Tablets are a mild but thorough laxative which regulate the bowels and sweeten the stomach and thus break up colds and simple fevers, banish constipation and indigestion and allay the irritation accompanying the cutting of teeth. They are absolutely safe and are pleasant to take. The Tablets are sold by all medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

A Scotch mother complains that her daughters "have danced away from her." Having their Highland fling probably.

Sour Stomach

Just a tasteless dose of Phillips' Milk of Magnesia in water. That is an alkali effective, yet harmless. It has been the standard antacid for 50 years among physicians everywhere. One spoonful will neutralize at once many times its volume in acid. It is the right way, the quick, pleasant and efficient way to kill the excess acid. The stomach becomes sweet, the pain departs. You are happy again in five minutes.

Don't depend on crude methods. Employ the best way yet evolved in all the years of searching. That is Phillips' Milk of Magnesia.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acid. Each bottle contains full directions—any drugstore.

Little Helps For This Week

Which hope we have as an anchor of the soul both sure and steadfast.—Hebrews vi. 19.

God liveth ever!
Wherefore, Soul, despair thou never!
What though thou tread with bleeding feet
A thorny path of grief and gloom,
Thy God will choose the way most meet
To lead thee heavenwards, lead thee home.
For this life's long night of sadness
He will give thee peace and gladness;
Soul, remember in thy pains
God o'er all for ever reigns.

Who can really think and not think hopefully? You were in my mind last night, and you brought a little boat to sail me past despondency ... and fear of extinction. When ... despair and discolor things, it is ... in result, and they have made the sovereign brain their drudge. I heard you whisper: "There is nothing the body suffers that the soul may not profit by." With that I sail into the dark; it is my promise of the immortal, teaches me to see immortality for us.

—George Meredith.

Commissioner For Panama

A Canadian trade commissioner's office has been opened in Panama, and a trade commissioner will shortly be appointed it is officially announced. At present most of the Central American Republics come under the commissioner's office in Mexico, while Venezuela and Colombia come under Cuba.

A magazine writer says a dog finds an empty place in man's life. This is especially true of the hot dog.

Minard's Liniment for the Grippe and Flu.

The Government of Alberta will spend $1,500,000 on improving and constructing roads in the province this year.

You can tell a civilized country. It's one where people kill the birds and then spend millions to fight insects.

An Oil Without Alcohol.—Some oils and many medicines have alcohol as a prominent ingredient. A judicious mingling of six essential oils compose Dr. Thomas' Eclectric Oil and there is no alcohol in it, so that its effects are lasting.

Magistrate: Are you sure you understand the nature of an oath?

Youth (scared stiff): Sure. Ain't I your caddy down at the links?

Minard's Liniment for Coughs and Colds.

He (earnestly): "I mean to kiss you, and kiss you, and kiss you." She: That would be only three times.

Minard's Liniment prevents Flu.

Long Air Trip Planned

One of the longest air lines in the world is being contemplated between London and Cape Town. The route, more than 6,000 miles long, will branch off at Cairo, crossing over to India.

Vinegar used in place of water when mixing plaster of paris will keep the plaster softer for a longer time than water.

CONSTIPATION RELIEVED ... QUICKLY — This Purely Vegetable Pill will move the bowels without any pain and depressing after effects. Interest Shown in Alberta Salt Deposits

Sir Thomas Tait, president of the Canadian Salt Co. Windsor, Ontario, will shortly pay a visit of inspection to the salt deposits in northern Alberta according to information received by Hon. V. W. Smith Minister of Railways and Telephones. In his position as head of the largest company of its kind in the Dominion, Sir Thomas is reported to be interested in possible developments in this promising Alberta industry.

Lacombe Boy Wins Fine Trophy

Edward Chesser, 12 years old, of Lacombe was awarded the Prince of Wales Silver Challenge shield and the first cash prize of one hundred dollars at the Edmonton Spring Show during the past week in the beef section of the Boys and Girls Calf Feeding Competition. The calf which headed the 56 entries in the competition was from the Shorthorn herd on the Lacombe farm of Dr. P. R. Talt, Provincial Veterinarian. A record for an Edmonton show ring was established when this fine animal sold at auction on Friday afternoon for $2.00 per pound being purchased by the T. Eaton Co. Ltd., Edmonton and weighing 780 pounds.

Prizes Offered For Best Wheat Crop

Substantial prizes will be awarded in a competition sponsored by the ... Board of Trade and the Vulcan and Nanton Agricultural Society for the best ten acres of wheat in Southern Alberta during the coming season. The decision to organize the competition followed a speaking tour by Major H. G. L. Strange and D. H. Galbraith, M. L. A., under the auspices of the Canadian Seed Growers' Association and the committee in charge of the recent "Better Seed" Campaign promoted under the direction of the Provincial Department of Agriculture.

Repatriated Canadians for Peace River District

Marking the beginning of a considerable movement of people of French Canadian origin who are returning to Canada from the New England states, a party consisting of 18 new settlers passed through Edmonton this week on their way to a number of districts in the Peace River country. Settlement will be principally in the vicinity of Kathleen, southwest of McLennan, where a new parish is being established. Included in the party were young married men well equipped with capital who will return for their wives and families after homes have been prepared on the farms selected in Northern Alberta.

THE DIFFERENCE

Buy a pound of TOFIELD CREAMERY BUTTER and—Note the smooth creamy, clean flavor.

Note the waxy, even, texture not found in all butters.

Note the even color throughout and then decide on having the best.

Tofield Creamery butter is made from Clean, Sweet Cream pasteurized daily under the most sanitary conditions.

All equipment connected with its manufacture is thoroughly sterilized daily.

TOFIELD CREAMERY BUTTER is made in your own town but put up in a new wrap.

The name on the new wrap stands for quality ——.

Try it. Eat more of it. Its good. By all means have the best, it cost no more.

Spring Poets

Spring is the time of the year when poets—good and bad are abroad in the land.

Spring sunshine gives inspiration to many people to give vent to their feelings in language more beautiful than commonplace.

There are however, a number of spring poets around this year that have more than ordinary reason to give vent to their feelings in language different from the commonplace.

We refer to those who have left their cars stand around all winter and when they try to start it, find that it doesn't want to go. What they say we don't want to put into print, but if it is poetry we are sure it is not faultless rhyme.

Don't work yourself into a poetical frenzy when your car refuses to run right, but bring it to the

A Tremendous Increase in Public Acceptance

FOR years McLaughlin-Buick has led the world in fine-car sales.

For years the proven McLaughlin-Buick engineering principles have been acclaimed by an overwhelming majority.

But now a tremendous increase in public acceptance has resulted in establishing during the past month, a new sales record for all time.

Because here, in addition to the powerful, triple-sealed, valve-in-head engine; the famous torque-tube drive; the cantilever rear springs and the wonderful sealed chassis, are new, revolutionary standards of performance and riding ease, and new beauty and luxury of Masterpiece Bodies by Fisher!

You have but to drive this great car to understand why it is literally breaking all sales records for cars at or above its price.

CARE OF BABY CHICKS ON ARRIVAL

(by Alex Taylor's Hatchery, Winnipeg, Man.

When your baby chicks arrive, be sure to have a comfortable home prepared for them. The lid of the chick box acts as a brooder and should be kept on until you have your brooder ready for them or give them to broody hens. Most farm folks have a brooder 10x10 feet. This will accommodate 200 to 500 chicks with a coal burning colony brooder stove to mother them. The brooder should be tested and operated several days before chicks arrive and have the Brooder House thoroughly dried before chicks arrive. The temperature of the brooder for the first week should be 95 degrees; second week 90 degrees; third week 85 degrees. The temperature of the brooder house five feet from the floor should be 65 to 70 degrees. Once you have raised chicks with a brooder you will lose all your desire to use broody hens. Give baby chicks water with the chill removed. Feed all the buttermilk they will drink, have plenty of small chick grit, oyster shell and charcoal in hoppers before them. Feed a Baby Chick Food of 50 per cent Fine Oatmeal or a well mixed Commercial Chick Food. Hopper feeding is a Sanitary Poultry Practice and is especially valuable in preventing disease. Feed chicks what they can consume in 15 or 20 minutes, then remove what is left and feed four or five times a day. Chicks grow when they are consuming the maximum of feed and they will only do this when they are hungry between feedings. Green feed should be given at noon. Lettuce or chopped dandelions are very good. A good thing is to give the chicks a warm mash at noon of equal parts of shorts, crushed oats, Victory Meal and Cornmeal, a pinch of salt and pepper to flavor. Also mix with same your clean table scraps.

Cod Liver Oil in the chick mash is essential during cold weather or dull days; it develops bone, muscle, plumage and keeps chicks supplied with the necessary vitamines. For chicks up to one month, use one ounce in ten pounds of dry mash; for older chicks and hens, two ounces in ten pounds of dry mash.

Water dishes and founts should be washed every day. Keep chicks warm and dry, change the litter often, especially if you have a large number together. Protect chicks against colds and draughts.

LUMBER YARD BURNS

Fire from an unknown cause Monday night swept the W. H. Clark and Company Lumber yard, Edmonton, causing damage estimated at $30,000. Charles G. Robson, president of the Company, stated Tuesday he was unable to throw any light on how the fire might have started, though apparently it originated somewhere in the moulding building. Both the building and the lumber destroyed were covered by insurance.

AN INVESTMENT IN YOUTH

How well repaid we feel when we invest in the happiness of some boy or girl!

Especially if we know that along with happiness we are bargaining for other things more precious still. Alert young minds active young bodies—eager young hearts—how a love peace they are!

These are the things to which The Youth's Companion is dedicated. This splendid young spirited magazine covers every interest, every activity, every aspiration, every fashion taste of our keen-minded, critical boys and girls. Its influence is more vital, certainly more vitally needed, today than ever before.

The following special offer will enable you to make an investment in the future of some boy or girl that you'll never regret.

The Royal York, largest hotel and tallest building in the British Empire, will be open shortly in Toronto. It is a self-contained community having its own bank, brokers offices, stores, power station, printing plant, recreation centres, and so on.

Gas from wells of the Bow River and South Saskatchewan Valley to the south and west of Medicine Hat may provide helium gas for the British Air Ministry.

The Boy Scouts' knowledge in woodcraft may be turned to a new use in Nova Scotia where the provincial government forestry department propose to enlist their services in the planting of 1,500,000 trees to reforest 1,000 acres of land.

The Canadian Pacific has in excess of 91,000 employees and its yearly pay-roll is approximately $125,000,000.

"The announcement by the Atlantic steamship lines of reduced rates on cabin ships coincides with the opening of an Atlantic travel season in which the cabin type of ship reaches a standard of equipment and accommodation never hitherto reached and during which more cabin ships than ever will sail to and from Europe. The advent of reduced rates also harmonizes with the policy of many world governments to abolish passport visa fees. Ocean tourist travel is quickly getting back to pre-war conditions but greatly enhanced by bigger and better ships," says William Baird, Steamship Passenger Traffic Manager, Canadian Pacific Steamships Limited.

Orders for Canadian cheese cabled from Great Britain, demonstrate its popularity overseas and the confidence placed in our grading methods, according to Doctor J. A. Ruddick, Dominion Dairy Commissioner, who states that the British demand for Canadian cheese is at the peak.

Between four and five thousand bags of Garnet wheat are being shipped from Fort William to be tested by millers in Great Britain. Reports of the reception given these samples will be available before this year's crop is ripe, government officials expect. If these prove favourable the future of this early ripening variety should be assured.

Beef grading in Canada will be established shortly under regulations framed by the Dominion Government. H. S. Hamer, chief of the cattle division of the Department of Agriculture, announced at the annual meeting of the Ontario Cattle Breeder's Association in Toronto the other day. The proposed system will be voluntary one and will be confined to municipalities with facilities for inspection and [illegible] ... The aim in view is the stabilization of the ... and the breeding of ...

FURTHER INVESTIGATIONS OF THE MILLING AND BAKING QUALITIES OF GARNET WHEAT

A new variety of hard spring wheat produced by the Experimental Farms Branch, Department of Agriculture, name "Garnet", has been under test at various Experimental Stations throughout Canada for a number of years. It has also been grown by a large number of farmers since and including 1926. During this period it has become immensely popular among growers who live in districts in which early maturing sorts have a distinct advantage.

Garnet is distinguished chiefly by its ability to mature from seven days to two weeks ahead of the standard variety Marquis, and to produce excellent yields of hard red (non-piebald) grain, under widely varying conditions. It produces a somewhat more vitreous grain than does Marquis, and on account of this peculiarity Canadian millers are afraid that Garnet may not mill well when mixed with Marquis or other less vitreous varieties.

The flour of Garnet in its natural condition is usually somewhat more creamy in color than is that of Marquis. This applies also to the crumb. Apart from the above two points, Garnet admittedly entitled to rank Marquis as a producer of high quality flour for use either alone or for blending with flours of lesser strength.

Whether or not Garnet when mixed with Marquis, actually may offer any serious difficulties from a milling standpoint is a matter of some importance. It would seem necessary also to describe whether the color of the flour of Garnet is likely to be a factor in determining the value of the variety, especially for the Old Country trade.

BANKING REQUIREMENTS of FARMERS

THE banking requirements of farmers differ according to location and the particular branch of farming in which they are engaged.

Whatever your banking requirements may be you will find the Bank of Montreal prepared to give the particular form of service you need.

BANK OF MONTREAL
Established 1817
TOTAL ASSETS IN EXCESS OF $[illegible]
TOFIELD BRANCH:
C. H. ROWE, Manager.

1. ... Northern Electric Engineer in charge of installation and G. W. Giles, C.N.R. Radio Engineer with two of the large horns used.
2. Dining salon of the "Lady Nelson".
3. General apparatus in Wireless Cabin.
4. The "Lady Nelson" in West Indian Waters.

Passengers on board the Lady Nelson and the other units of that fine fleet of new steamers just put into the West Indies service by the Canadian National Railways, as they steam down the highways of the Atlantic Ocean and linger on the shimmering moonlit waters among the Treasure Islands to the South, will now be regaled by entertainment brought to them by Radio from distant or nearby stations. Failing ... they need not ... about ... their meals or for dancing, since these new floating palaces have been equipped with the latest developments of Radio Science, the Public Address and Music Reproducer System.

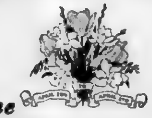
This is a system of Amplifiers with controls in the Wireless Cabin and extra high quality loud speakers, capable of accurately reproducing the most delicate shades of musical tone or voice inflection.

This equipment installed by the Northern Electric Company for the five vessels of this new fleet, consists of powerful amplifiers to which are connected for instant use, a sensitive microphone for "picking up" a concert from the Lounge, a Radio Broadcast Receiving Set and a Music Reproducer rendering available recorded music, any one of these systems may be "cut in" at a moment's notice.

A specially designed loud speaker is placed in the Lounge Salon, and high quality cone speakers are located in the dining and smoking salon. Two large horns such as shown in the accompanying picture are "built in" on the After Boat Deck where dancing may be indulged in.

The Wireless officer who is not on watch, has charge of the apparatus and operates it for the benefit of the passengers at scheduled times throughout the day and late into the night. The volume is controllable from a mere whisper to the fanfare of a whole orchestra.

SPRING SHOWING



of the NEW CHEVROLET SIX

—a Six in the price range of the four!

WE cordially invite you to visit our special Spring display of the new Chevrolet Six.

Here, in a price class that has hitherto been occupied exclusively by four-cylinder automobiles, you will see displayed a line of beautiful models that bring you every advantage of six-cylinder performance in the price range of the four . . . six-cylinder smoothness, six-cylinder reserve power, six-cylinder speed and six-cylinder acceleration.

And this amazing six-cylinder performance is matched in impressiveness by the beautiful new Fisher bodies. Longer lower and roomier . . finished in striking new colors . . and offering numerous outstanding comfort and convenience features—they introduce into the low-price field a new conception of luxury, comfort and style.

Come in any time the week of April 20th to 27th. We want you to see for yourself that no other car in the world can give you so much at prices within the reach of all.

Think Of the Future

A condition of prosperity prevails throughout Canada from coast to coast. It is not confined to any one section nor to any one industry or group of industries. There is, in fact, a generality in the extent of business activities probably without a parallel in the past history of the Dominion. This is not to say that everybody or every industry is equally prosperous, or indeed, that there are not those who do not enjoy prosperity. The exception is true that basing Canada as a whole, and in the major activities of its people, prosperity reigns today.

Such a condition is of course, gratifying. Nobody would have it otherwise, and all desire that it shall be long continued. But there are dangers to be avoided in times of more or less unusual prosperity which do not present themselves when times are hard and business depression rather than business activity is an endurance. It is in such times proved abundantly that many people who can and have stood strong and true through the storm and stress of adversity, and even through to ultimate victory, have crashed and broken when forced with prosperity's sudden gifts.

Canada is in prosperous today, and it should take full advantage of its present favorable conditions. The people are optimistic and should continue so. They should continue to show vision, courage, and engage in constructive development. It would be unworthy of their heritage and the future possibilities of their country were they to do otherwise. But they should nevertheless take care in the enthusiasm of the growing present not to forget the years to come.

Just as night follows day winter follows summer, youth grows into old age and death is the ultimate ending of birth so it is inevitable that, in every line of business and industry, periods of prosperity and depression succeed one another. A problem which confronts the business man of today is to so time his efforts that the strain and stress of adversity, and even through to ultimate victory, have crashed and broken when forced with prosperity's sudden gifts.

VISITING DAY AT CRIPPLED CHILDREN'S HOSPITAL

Visitors are always welcome at the Junior Red Cross Hospital in Edmonton during the official visiting hours in the afternoon they may see for themselves what manner of miracles are being wrought the soft baby bodies of little ones who are unfortunately handicapped from birth.

The writer had the pleasure of escorting a party of country friends round the wards lately, and it was worthy of note that at every step of the way, the sympathies and admiration of the visitors increased as they saw and heard and spoke to the children for whom they had been making special financial appeals in their home towns.

A smiling nurse welcomed the party and in a trice everyone was robed in white, the special gown being used as a precaution for safety and health. Turning to the little nursery wards at the entrance, the visitors saw little ones in each of the four cots. One looked quite a new baby and was soundly sleeping with the happy air of innocent infancy. Not so the ex babies who were all on wires apparently, full of fun and ready for the little gifts of their friends. Small feet in casts of plaster, little faces in tar masks, limbs suspended from special supports, crutches under tiny shoulders, hands and fingers being gently massaged, children at study, others at play, nurses here and there and everywhere, such were the pictures of hospital life seen on a visiting afternoon.

Special interest was shown by the country friends as they saw in one cot a little darkie lad with a wide smiling mouth big rolling eyes, while in the cot opposite lay a small Japanese lady of three years old gazing dreamily through almond eyes.

Children whose accent told of central Europe, true born Canadians of the fourth generation, little fair haired Old Country youngsters, even a daughter of the Red men of the plains all together under the banner of Red Cross, whose benediction of health and happiness falls on all, regardless of race or color. Endowed cots here and there told their own story, one small "Tiny Tim" cot expressing the sentiment of the visitors "God Bless Everyone."

LOCAL AND PERSONAL

The local Junior C.G.I.T. group held a very successful tea and sale of fancy work on Saturday last. The funds of the group were swelled by some thirty odd dollars. The leader and girls take this opportunity of extending thanks to those who donated and helped and to the general public for the generous support.

Mrs. Sinclair and family arrived at Tofield and will reside in their home here.

Quite a number of railroad workers were in town over the weekend. They were laying new steel on the main line. There was about one hundred men employed.

General Automotive Work

There are very few cars in the district, which after winter storage or use would not be the better for a spring overhauling. If you place any value upon your car, the cost of a spring overhauling is money well spent, the improved service being worth more than the work costs. We are thoroughly experienced and suggest you bring your car in early.

LOCAL AND PERSONAL

Born.—To Mr. and Mrs. Thomas Rourky, on April 21st, a son.

Born.—To Mr. and Mrs. J. Francis on April 22nd, a son.

Born.—To Mr. and Mrs. B. Wilson, at Edmonton, on April 10th, a daughter.

The Holy Trinity W. A. will meet at the home of Mrs. Letourneau on Wednesday, May 1st, at 2.30 p.m.

Mrs. Burton, of Lindbrook North, returned home from the Edmonton hospital this week. Mrs. Burton was an inmate of the hospital for seven weeks.

Mrs. J. Lee entertained at five tables of bridge on Friday evening, where honors at cards went to Mrs. H. E. Rogers and Mrs. K. Galloway.

Mrs. McLaughlin and Mrs. Calvert visited the city this week.

Miss Minnie Wood is spending a few days in the city.

Mrs. A. Smith spent a few days in the city last week.

Mr. and Mrs. Bissett of Edmonton visited at the Geo. Bissett home here last week.

Mrs. Sinclair and family motored down from the city last week. They have taken up residence in Tofield in their house formerly occupied by Dr. McClurg.

Mr. Schmaltz, one of the operators at the local telegraph station, was taken to an Edmonton hospital on Thursday afternoon. Mr. Schmaltz has a severe leg injury.

MR. C. W. ROBINSON BADLY BURNED

Early in the week, the building in which Mr. Robinson did his dry cleaning caught fire and was burned to the ground. The cause of the fire is unknown.

Interviewed by a Mercury representative, Mr. Robinson stated that he was just in the act of finishing some work that was urgently wanted, and was in the act of kneeling on one knee when he found himself enveloped in flames.

He rushed outside, but did not get out before he was badly burned about the arms and face. His burns are very painful, but we are glad to say that he is recovering quickly.

The building was a total loss also the equipment and some articles of apparel, on which there was no insurance carried.

Mr. Robinson states that he will continue the dry cleaning and pressing business and has already commenced to rebuild.

"BEN HUR"

(With apologies to Kipling)
By Phillip Hand

When the world's last film is fashioned,
And the camera has ground out its last,
When the actors have long since departed,
And the screen is a thing of the past.
We shall pause, look back through the ages
And from memories still holding true,
Shall continue to talk of the great plays
That flash up in interims few.

We shall remember the "Birth of a Nation"
With emotions still flaming our breast,
And compare it with the mighty "Intolerance",
"Abraham Lincoln", "Old Nest",
We shall mention the great "Ten Commandments,"
"Covered Wagon" "Volga Boatman," "Big Parade,"
But in our thoughts, will ever there linger,
"Ben Hur"—the noblest e'er made

For, oh, what a wonderful story,
In the powerful days of old Rome,
When might was the only criterion
And justice was cold as a stone,
When the love of one, the Great Master,
Brought a new force by which all could cope,
And a new world blazed forth to all creatures,
A new Heaven, a glorious Hope!

WEATHER NOTES

The past week has not been an ideal one for spring opening. There was a great deal of dull raw weather with comparitively few periods of sunshine. However, the frost has been lifting out of the ground, and the rainfall we have had was more or less needed to start the crop. According to various reports we have received, there was very little moisture in the ground on account of the open dry fall last year.

Farm work has already started in spite of the inclement weather and will be general throughout the district by the end of the week. As a great deal of the land was prepared for seed last fall, a considerable amount of seeding is going on. If the fair weather which obtains as we go to press, should hold, everything points to a fairly season.

TOFIELD SCHOOL FAIRS

The reorganization meeting of the Tofield School Fair Association was held on Saturday April 20th. The officers elected were:

President, Mr. B. A. Anderson, Beaverhill.

Vice-President, Mr. J. Robinson, Tofield.

Secretary-Treasurer, Mr. J. T. Bulloch, Tofield.

Committee: Mr. W. Jacobs, of Tofield, and the six secretaries of the rural schools. The association now consists of twelve schools, more than in any previous year.

Mr. Malaher, of the Vermilion School of Agriculture was present and gave many helpful suggestions, besides promising to have each school visited in the near future.

The new committee will have its first meeting on May 4th, when it will arrange the special prize list.

ORDINARY OATS OR HULLESS OATS

(Experimental Farms Note)

At this time of the year in the prairie provinces the question is frequently asked regarding the advisability of sowing hulless oats in preference to the hulled oats for ordinary farm purposes. The fact that the glumes do not adhere to the kernel of the hulless oats seems to appeal to the fancy of many farmers.

Hulless oats are not as useful a crop for most purposes for which oats are used as the ordinary hulled varieties. For the feeding of young calves or pigs or as a feed for poultry they are to be preferred to the hulled sorts on account of the absence of the hull. As a concentrated feed for horses, however, ordinary oats are far superior to hulless oats and on acount of their bulky character are one of the safest of all foods.

At the Dominion Experimental Farm, Indian Head, Saskatchewan, the best varieties of hulless oats such as Liberty and Laurel, have been tested for the past five years against standard hulled varieties like Banner and Victory. In these tests the hulless varieties have matured, on the average, seven days earlier than Banner or Victory but have yielded from twenty-two to twenty-four bushels to the acre less. This difference in yield is very significant indeed and should not be overlooked when considering the advisability of choosing between hulless oats or ordinary oats. Unless there is some very special reason for growing hulless oats, good varieties of the ordinary varieties of the ordinary hulled sorts are likely to give better returns.

On Wednesday night, April 24th, Miss Florence Kendall was pleasantly surprised when a number of her school friends arranged a surprise party for her, which was held at the Beariste home. Dancing was the order of the evening. At midnight a delicious lunch was served by Mrs. Beariste. After lunch dancing was once more resumed. Soon it was time to go home and all left feeling that they had had an enjoyable evening and wishing Florence many many happy returns of the day.

KINGMAN

April 22nd

Miss Josie Thompson who has been very ill with the measles is slowly recovering.

Mrs. Emil Erickson is a patient at the St. Mary's hospital.

Mrs. Elmer Grahn had some dental work done in Camrose on Friday.

Mrs. J. Anderson visited with Mrs. E. Erickson on Wednesday.

Mr. and Mrs. W. Jardie motored to Edmonton on Saturday.

Mrs. P. Simonson and son Simon, spent the week-end in Edmonton.

Mrs. O. Bray of Camrose visited with Mrs. E. Erickson on Friday.

Mr. and Mrs. W. McIntosh were the dinner guests of Mr. and Mrs. J. Erickson on Sunday.

Mr. and Mrs. A. Aap and family were Camrose visitors on Saturday.

Some of the farmers have already started seeding.

LAKESHORE

We are sorry to report that Mr. Everett Noland was quite ill the latter part of the week. Latest reports are that he is improving.

Mrs. M. Seals entertained the Lake Shore Ladies' Aid Society on Wednesday of last week. There was a good attendance considering roads and weather. One new member was added to the roll.

Mrs. Tom Sheltz of Deville visited at Everett Noland's on Monday.

"Doc" Morrison and Miss Lucille Gray visited with her parents on Sunday.

Miss Ardis Wood visited home folk a few days last week returning to Edmonton the latter part of the week.

A few friends and neighbors of Lloyd Wood surprised him on Friday evening by arriving at his home en masse. He made them very welcome and the evening was very pleasantly passed at cards. The ladies served supper at midnight.

A very pleasant dance was held in Community Hall on Friday evening. The teacher and pupils of McKenzie school sponsoring it for the purpose of raising money to buy play equipment for the school. We understand the undertaking was quite satisfactory financially.

Edward Ferguson, the nine year old son of Mr. and Mrs. Elmo Ferguson was unfortunate in fracturing his arm last week while playing with his brothers.

U.F.W.A. NOTES

The regular meeting was held on April 11th. There were 15 members present.

A letter was read from Mrs. McNaughton our district director regarding the conference which she said possibly might be held at Tofield this year at the end of June or July. The secretary was instructed to write to her that this be done if possible.

Mrs. Gray read a paper on shrubbery for the farm home. This was much apreciated and Mrs. Gray was deluged with questions concerning the subject which she was very capable of answering.

Mrs. Phillips read a paper on the care of linoleum.

The next meeting will be on Thursday, April 25th, in the Municipal hall. The roll call will be answered with hints on baking doughnuts. Mrs. Dodds will present a paper on women of other lands and Mrs. Baptist will give a report on co-operative marketing and Mrs. Gray on one on the Canadian Council of Agriculture.

WEDDING

On Tuesday, April 23rd, Miss Violet McLarkin of Ross Creek was united in marriage to Mr. Edward Bailey, also of Ross Creek. The young couple will reside on the farm of Mr. Bailey's, which he recently purchased from Mr. Ranch.

CHESTER WHITE HOGS POOR INVESTMENT

Of the interest in connection with the selling campaign carried on in a number of districts in the province last summer by the Central United States Swine Co., an American organization promoting the sale of Chester White hogs, in an article recently reprinted in the Chicago Drovers' Journal. It will be recalled that the Alberta Department of Agriculture issued a warning to farmers in the province at that time as to the position of the company and the possibility of difficulty in enforcing the terms of the contract which they were asked to sign.

The present position of the company is indicated in the following dispatch, referred to above:

"Spokane, Wash., March 19.—The Status of the brood sow market in United States will be scanned by a committee of attorneys selected by 150 creditors of the Central U. S. Swine Company who met at the Spokane hotel to determine how the affairs of the concern can be worked out to the advantage of the creditors.

Discussion among creditors from Washington, Oregon, Montana, Idaho and British Columbia showed that the concern which recently, it is said, had trouble in operating in the Dakotas, had an unusual it proposed as a means of populating the country with fine sows.

The discussions were that the company would sell a man a blooded sow at $95 and take her sow pigs at 100lbs. at $35 each. It was disclosed that many persons made money who cancelled early. Attorneys declared that as the business expanded and the company accepted notes, their assets became "frozen" and that they did not have enough money to carry out their contracts. Whether the sow market has been saturated has not been brought out.

Attorneys were told that there is nearly $100,000 in notes, which may give the creditors something. When the creditors were unable to get any authentic information, they appointed the committee of attorneys to determine if a receiver should be asked".

PRAIRIE FIRES CAUSE SERIOUS LOSS

Several serious prairie fires in the southern part of the province have resulted in considerable destruction of farm property as well as grass on the ranges. It is pointed out by Benj. Lawton, Provincial Game and Fire Commissioner, that those who find it necessary to set fires should take every precaution to prevent it from escaping, and anyone driving through the country should refrain from throwing lighted matches and live cigar or cigarette stubs away before they are extinguished.

The burning of stubble on grain fields in the past has resulted in considerable damage from fires which have been allowed to escape. It is considered that the long stubble and straw left on grain fields where combine harvesters have been used may prove to be even more serious menace where this is burned preparatory to plowing. It would be well for all who find it necessary to burn the stubble of this kind to take special precautions even in addition to those provided for by The Prairie Fires Act.

Where burning is to be done at any season of the year for the purpose of destroying stubble, straw or brush, or where it is considered necessary to utilize fire for the clearing of land, a fire guard is required, and the fire in every instance must be watched by three adult persons, equipped with suitable appliances for the extinguishing of fire, and the fire must be watched and guarded until it has been extinguished. A fire guard must be provided before kindling any such fire and must be ten feet wide if burning is to be done before May 7th, and twenty feet wide if it is to be done after that date.

Only choice leaves grown at high altitudes go into the blending of Blue Ribbon Tea. That is why its flavour is so uniformly excellent. Insist upon getting it from your grocer—refuse substitutes of inferior quality.

Canada's Opportunity and Responsibility

It has been said times without number that Canada occupies a paramount and responsible position as interpreter of Great Britain to the United States and of the United States to Great Britain. Such views have been expressed, not so frequently by Canadians themselves as by leading men in Great Britain and the United States.

Within the past few years the opinion has been expressed by leading citizens of the Empire and of China, Japan, and other oriental lands, that Canada, by reason of its geographical position and its rapidly expanding trade across the Pacific likewise occupies a strong position as interpreter of the Orient to the rest of the Empire. Canada is popular in China and Japan as compared with the United States and European countries.

In the councils of the League of Nations this Dominion also stands high and deservedly so. It is recognized by other countries, and more particularly the smaller nations, that Canada has no selfish purpose to serve through its membership in the League, that, on the contrary, the Canadian attitude is one of disinterestedness, based wholly in a desire to render service to mankind. The Canadian position in the League has always been for peace, conciliation, recognition of the rights of others, and, especially, not merely fair treatment but open generosity and sympathy for minorities.

Because of this unselfish attitude Canadians are welcome in all lands, and the high opinion entertained for this country is proving a real asset [illegible] and commercial interests of the Dominion in the opening and development of foreign markets for Canadian products.

Now one of the most influential men in India, Sir Rabindranath Tagore, the world renowned poet, outlines to Canada a duty which rests upon this young Dominion, not only to itself or to a group of nations, but to wide world. Sir Rabindranath was a distinguished guest and speaker at the recent Conference of the National Council of Education held at Vancouver, and in his farewell message to Canada he gave expression to views which Canadians everywhere may well read, ponder over, and to which they should give heed.

"Canada," he said, "is too young to fall a victim to the malady of disillusionment and scepticism, and she must believe in the great ideals in the face of contradiction—for she has the great gift of youth; she has the direct consciousness of the stir of growth within her which should make her trust herself which is the only sure way of trusting the world."

How true this last sentence! A man or a nation which does not trust himself or itself but lives in an atmosphere of fear and suspicion, can never trust others.

Continuing, that great Indian savant said: "Let Canada feel the sacred dear of her life that the expectation of human destiny is upon her as upon [illegible] countries which have just entered into the cycle of their [illegible]. Canada will have to solve for the salvation of man the most difficult of all problems, the race problem, which has become insistent with the close contact of communities that had their tuition for centuries in their geographical and cultural exclusiveness. Canada will have to reconcile the efficiency of the machine with the creative genius of man which must build its paradise of self-expression, reconcile science with religion, individual right with the social obligation that it must acknowledge. She must dream of the introduction of honesty even in politics, which is the self-interest of the nation, knowing that such interest can only have its sure foundation in international friendships. She must ever hope to be able to win the heart of the world by offering the best that she produces."

Although his actual knowledge of this country was limited, Sir Rabindranath said Canada possessed powers of character and material resources that would enable her to carve out a destiny free from "the fatigue that old civilizations suffer from in the shape of cynicism."

This is an inspiring view of Canada's place in the world. It is one that calls for the best that every citizen, regardless of his race or creed, can contribute. And it is because the Canadian people of tomorrow will be a development of the cosmopolitan population of today that the Canada of the future will find within itself the ability, the sympathy, the international viewpoint which will make possible such a great contribution to the future of mankind and the ultimate and lasting peace of the world, for, until the race problem is solved there can be no peace in any country, or in the world as large.

Ontario Man Inherits Title

Will Go To France To Take Possession Of Property

Count Richard du Manoir de Juaye has lived for 25 years in one-half of a frame house in the village of Westmeath, near Pembroke, Ontario. All that time he has known he was next in line to the family estates and titles, together with the fine old Norman chateau. The property which has now fallen to the Count on his succession to the family title is situated near Bayeux and it is his intention to leave Westmeath for France and his ancestral home together with the Countess and their son and heir.

The Count, who acted as house painter and general handy man in the unpretentious village of Westmeath, was known as Richard Du Manoir. This is the second European title to be inherited by a Canadian within the past few weeks, the other case being that of the Earl of Egmont, former rancher of Priddis, Alta.

FEELING TIRED AND DEPRESSED

Then Try the Treatment With Dr. Williams' Pink Pills

It is good to be tired after hard work or play. Rest and food will banish that kind of a tired feeling. But to be weak all the time never to feel strong and vigorous, to be breathless at the least exertion, denotes a condition of ill health that must be corrected or worse results will follow. Such a condition the doctors term anaemic, and is caused by thin blood. For relief in this condition nothing else can equal Dr. Williams' Pink Pills, which enrich and purify the blood, bringing new health and strength. Among those who have found new health through the use of these pills is Mr. G. E. Huston, R.R. 4, Elgin, Ont., who says:—"For a long time I was greatly disturbed with pains in my back and felt tired and depressed most of the time. My blood seemed to be in a bad condition, so much so that I slept poorly and scarcely felt like eating. I tried a doctor, but his treatment did not help. Then one day I read an advertisement of Dr. Williams' Pink Pills, describing a case much like my own and I decided to try this remedy. I took the pills for about two months, and the result was wonderful. I gained fifteen pounds in weight and felt like a new man. I know of nothing that will build up the strength like Dr. Williams' Pink Pills, and I have since recommended them to many of my friends."

Dr. Williams' Pink Pills are sold by all dealers in medicine, or direct from the Dr. Williams' Medicine Co., Brockville, Ont., at 50 cents a box. Write today for a copy of the free booklet, "Building Up the Blood."

CASTORIA

NURSES ADVISE

Zam-Buk, because they have proved that it does what is claimed for it.

Miss E. L. Dezry, graduate nurse, of 3329 Michigan Ave., Chicago, says: "I have a patient who suffered terribly with piles. Zam-Buk is the only remedy that gave her relief."

"I have used Zam-Buk myself for the same ailment, also for sores and burns, and have the greatest confidence in it."

Zam-Buk

Explore Arctic For Minerals

Sergeant Clay, Superannuated Mountie, Joins Private Party

Staff-Sergeant Sidney G. Clay, of the Royal Canadian Mounted Police, left Toronto recently en route to the Arctic Circle. He is superannuated from the force having served 22½ years, and is going back to the Arctic regions not with the Mounties but with private exploration interests. For several years he was in charge of the farthest north outpost of the R.C.M.P. On his first northern trip he started for Edmonton with dog teams and canoes as his only means of transport. This time aeroplanes and motor sledges will be used.

The object of the expedition is to explore for minerals. The country around Chesterfield Inlet, according to Clay, is the wealthiest in the world. They are carrying a motion-picture outfit with them. For the past three years Clay has been a successful fruit-grower at Grimsby.

Strangled With Asthma is the only expression that seems to convey what is endured from an attack of this trouble. The relief from Dr. J. D. Kellogg's Asthma Remedy is beyond measure. Where all was suffering there comes comfort and rest. Breathing becomes normal and the bronchial tubes completely cleared. This unequalled remedy is worth many times its price to all who use it.

CONFERENCE ON REPARATIONS ENDS IN FAILURE

Paris.—The second reparations committee has failed in its purpose to re-define German reparations for the damage of the Great War.

The conference, which for ten weeks has been engaged in an effort to set a figure mutually acceptable to the allied nations and to the German republic seemed definitely wrecked.

A sub-committee was appointed to prepare a report to the several governments stating the "why" of the failure. This sub-committee, conceivably, may furnish a loophole through which revival of the conference could be sought but general opinion did not anticipate such a development.

Dr. Hjalmar Schacht, chief of the German delegation, made continuation of the conference hopeless when he stated definitely that payment of even one-half the total sums demanded, must be conditional on abolition of the Danzig corridor, revision of the frontier of upper Silesia and immediate return of the Saar Valley to Germany.

A sub-committee, headed by Lord Revelstoke, had met to endeavor to bring about an agreement between the Germans and the allies on the first ten or fifteen annuities.

Discussion never got beyond the first annuity. Dr. Schacht declared that Germany would never under any circumstances pay annuities greater than 1,610,000,000 marks (approximately $386,000,000), and for no longer than 37 years. She would make these payments, he concluded only if the allies made it possible for her to increase her ability to pay by giving her access to raw materials and the resources of which she was deprived.

One of the allied experts immediately remarked that "Dr. Schacht wants the experts to revise the treaty of Versailles, which was certainly not comprised in our terms of reference."

The chief of the German delegation was then told plainly that his attitude led finally toward breaking up the conference, with the result that reparations payments would [illegible]

Report Is Satisfactory

Sir Henry Thornton Pleased With Record Of C.N.R.

Ottawa.—The special standing committee of commons on Canadian National Railway affairs held its first meeting recently, when General Fiset, Liberal, Rimouski, was elected chairman. Sir Henry Thornton, president of the Canadian National Railways, stated that the report of the railway showed the calendar year 1928, was the most satisfactory of its history, both financially and from an operating standpoint.

Out of every dollar traffic receipts earned by the C.N.R., 17.61 cents was available for interest. On United States class 1 railways only 18.21 cents was available for interest. Sir Henry thought this was very satisfactory, particularly as many lines were in new districts.

To the question whether the increased receipts of the C.N.R. were at the expense of the Canadian Pacific, or attributable to national growth, Sir Henry said the net earnings of the Canadian Pacific attained a record last year.

"Therefore, I should say," Sir Henry asserted, "if I were a C.P.R. official, that the National is an asset to the Canadian Pacific. As a C.N.R. official, I consider the Canadian Pacific is an asset to the Canadian National."

"Then why not bring the C.P.R. down into Nova Scotia," asked Colonel Cantley, Conservative, Pictou.

"Well, the C.N.R. is not yet a Christmas tree," Sir Henry replied.

As to whether another large wheat crop was expected this year, Sir Henry explained it was impossible to forecast any particular year. However, there had been a steady and progressive increase in the quantity of wheat produced, extending over a decade of years.

He explained that it was generally considered that the Great Lakes had a sixty-year cycle of high waters and similar cycle of low waters which must be ascribed to the precipitation. Canada was entering on the wet cycle now and it might be prophesied that the greater rainfall would result in greater crops.

The heavy carryover of wheat would assure much business in grain carrying this year.

Colonel Geary, Conservative, Toronto, inquired if there had been any [illegible]

DEATH OF SIR CLIFFORD SIFTON, NOTED CANADIAN

New York.—Sir Clifford Sifton, K.C.M.G., K.C., prominent in Canadian public life for forty years, died in New York while sitting in a chair talking with his son, Harry. Accompanied by his sons, Sir Clifford left his winter residence at Daytona Beach, Fla., last Saturday, and was on his way to his home in Toronto when death overtook him.

Although Sir Clifford had been troubled with heart weakness for about two years, his health was fairly good until last fall and he was quite sick when he left Toronto in November to go to Florida for the winter.

Sir Clifford Sifton, K.C.M.G., K.C., of Toronto, Privy Councillor, former Minister of the Interior, whose death took place at New York, had been a figure of magnitude in Canadian public life for forty years. Born in Ontario, in 1861, he came to Manitoba when a youth with his father, the late Hon. W. J. Sifton, locating at Brandon.

A barrister at the age of twenty-one, Clifford Sifton became a member of the Manitoba legislature in 1888, and entered the Greenway government as Attorney-General in 1889, being only twenty-nine years of age. From that time onward he played a conspicuous part in the development of the West.

Sir Clifford was called by Sir Wilfrid Laurier to the Federal cabinet on November 17, 1896, as Minister of the Interior and Superintendent-General of Indian Affairs. As Minister of the Interior he carried out a vigorous immigration policy which added largely to the population of the Dominion. [illegible]

Radio Links Arctic and Antarctic Zones

Recent Broadcast Heard Over Distance of 10,000 Miles

Copenhagen.—The first radio communication between the Antarctic and Arctic zones was reported in a cablegram received here by the newspaper Extrabladet from the Mount Evans Greenland, radio station.

Mount Evans said a recent broadcast by Commander Richard E. Byrd's station in the Antarctic was heard excellently although from a distance of more than 10,000 miles.

Gasoline reserve supplies have been sent from Mount Evans to Camp Lloyd in preparation for Swedish-American trans-Atlantic flights next summer, the cablegram added.

GRAIN INSPECTION SYSTEM SAID TO BE ANTIQUATED

Ottawa.—Standard samples set each year by the chief grain inspector are frequently higher than the minimum set by the Grain Act and on that account cargoes are graded lower than they should be. This was the contention of John Gillespie, dealers' representative on the grain standards board, whose evidence was continued before the agricultural and colonization committee of the house of commons.

[illegible]

NEW SCHEME TO SETTLE PEACE RIVER DISTRICT

Edmonton.—Settling of 1,000 families in the Peace River District under an ambitious scheme which has been submitted to the provincial government is proposed by the Bowen Utilities Corporation Limited. It appears that the furtherance of the scheme depends on what stand is taken by the province, as the federal authorities will not act without the approval of the Alberta government.

The scheme is said to involve an expenditure of $10,000,000, which backing has been assured by influential financial interests in the Old Country, according to A. D. Bowen, head of the company. The settlement would be in the ten townships, beginning in township 74, range 24, east of the D. and B. C. Railway at Aggie and then west and north to Sturgeon Lake. British settlers would be brought out while a saw mill, pulp and board mills would be operated, thus providing employment. The company would build a trackway through the entire area, construct serviceable roads to each section, clear the land for cultivation and build a house and barn on each quarter section for the occupancy of each settler, who would acquire the land on long time terms.

"The federal government at Ottawa is quite ready to make the reservation if there is no objection from the provincial government," said Mr. Bowen. "If satisfactory arrangements are made, we would make a start by bringing out 50 settlers this year."

THE DIFFERENCE

Buy a pound of TOFIELD CREAMERY BUTTER and—
Note the smooth creamy, clean flavor.

Note the waxy, even, texture not found in all butters.

Note the even color throughout and then decide on having the best.

Tofield Creamery butter is made from Clean, Sweet Cream pasteurized daily under the most sanitary conditions.

All equipment connected with its manufacture is thoroughly sterilized daily.

TOFIELD CREAMERY BUTTER is made in your own town but put up in a new wrap.

The name on the new wrap stands for quality — —.

Try it. Eat more of it. Its good. By all means have the best, it cost no more.

Spring Poets

Spring is the time of the year when poets—good and bad are abroad in the land.

Spring sunshine gives inspiration to many people to give vent to their feelings in language more beautiful than commonplace.

There are however, a number of spring poets around this year that have more than ordinary reason to give vent to their feelings in language different from the commonplace.

We refer to those who have left their cars stand around all winter and when they try to start it, find that it doesn't want to go. What they say we don't want to put into print, but if it is poetry we are sure it is not faultless rhyme.

Don't work yourself into a poetical frenzy when your car refuses to run right, but bring it to the

WEEKLY NEWS BULLETIN

Issued by Publicity Commissioner, Department of Agriculture, Edmonton, April 19th, 1929.

Old Age Pension Act in Operation

The Old Age Pensions Act will probably come into operation in Alberta in about a month according to a statement made on Thursday by Premier Brownlee. The Act, it has been decided by the Executive Council, will be placed under the jurisdiction of the Workmen's Compensation Board, and arrangements are being made by this board to administer the provisions of the new act. Under the proposed plan it is necessary for each province sharing in the benefits of the Dominion legislation to submit its supplementary and contributary legislation to the Dominion Government through Hon. Peter Heenan, Minister of Labor, for final ratification and to draw up a formal agreement of operation. As soon as this step has been taken it is expected the Alberta Act will come into effect. The payment of pensions will not become retroactive but will date from the time the Act is proclaimed.

Many New Buildings at Mental Hospitals

Increased facilities for taking care of the mentally sick people in the province are provided for in the Alberta Government's building program for the present season, it is announced by Hon. George Hoadley, Minister of Health. The Ponoka, Oliver and Red Deer institutions will all share in the enlargement program under which six additional buildings are to be erected. A one storey pavilion fire-proof building will be constructed for infirmary cases at the Red Deer training school for mental defectives at a cost of $30,000. New buildings planned at the Ponoka Hospital include a separate building for the care of advanced mental cases, an extension of the nurses' home, a reception ward for men patients and a new dining room for women for women patients. At the Oliver hospital an additional building will provide accommodation for some 120 patients. Work will be started shortly on the construction of these buildings for which provision was made in the estimates passed at the recent session of the legislature.

Alberta Farm Loan Board Named

The personnel of the Alberta Farm Loan Board as nominated by the provincial government and accepted by the Federal Farm Loan Board at Ottawa will include J. C. Murray of Edmonton, A. H. Tovell of Calgary and George Bennett of Manville. Hon. R. G. Reid, Provincial Treasurer, in making this announcement expresses the belief that the government has secured a highly efficient board to which may safely be entrusted the administration of the new act in the province. Mr. Murray, the chief executive officer of the board has been until recently a member of the Edmonton staff of Credit Foncier. He will give his full time to the farm loan work, his associate members being available for such time and service that may be required. Mr. Tovell is chairman of the Municipal Hail Insurance Board and Mr. Bennett is a well-known director of the Alberta Wheat Pool. Steps will be taken at an early towards bringing the new Act into operation in Alberta and a number of applications and inquiries already in hand respecting farm loans will be dealt with as soon as possible.

Follows Her Nose.

A bow rudder is a unique feature in the equipment of the Princess Norah, latest addition to the fleet of the British Columbia Coastal Steamships of the Canadian Pacific Railway. This facilitates the control of the vessel in the narrow channels in Pacific coastal waters and between Vancouver Island and the mainland linking the ports of Vancouver, Victoria, and Seattle. The Princess is shown here in drydock, her bow rudder being plainly visible. On her initial voyage up the coast she carried a distinguished company, including Their Excellencies the Governor General and Lady Willingdon, Hon. Randolph Bruce, Lieutenant Governor of British Columbia, and his niece Miss Helen Mackenzie, and prominent residents of the Pacific coast.

A Good Many Do

QUITE FREQUENTLY as a "filler" line we run the sentence "Please Renew Promptly." We have this sentence good humouredly brought to our attention frequently, when one subscriber or another pays his or her subscription.

In a few days we will be sending out notices to all those whose subscriptions have expired and we hope to have a good response.

The "local" newspaper is a tradition of the North American Continent. At no other place in the world are type and presses assembled to serve so few people. People here call for their "local paper" and desire to know the everyday affairs of the town and district in which they live.

A new baby arrives and his arrival is chronicled in the local newspaper. A valued and respected citizen passes and his praises are printed in the local paper. Brown's, Smith's or Jones house burns down and the local paper reports it. Somebody's hen lays a very large egg; somebody's cow gives an extra quantity of milk; somebody's pigs grade extra special and the news is spread throughout the district by the local paper. All ordinary and extraordinary things of life find their way into the columns of the press. Not so big and bulky as the city newspapers; not so many columns of type, but much more intimate to the people it reaches is the local sheet.

We hope to retain all our present subscribers and add new ones to our list. When you receive the notice regarding your subscription, please give it attention. In most cases the amount is small to the subscriber but these small amounts in the aggregate is quite a sum to the publisher.

As your paper comes out week by week, read the advertisements. By trading with our advertisers one can frequently save more than the price of the paper.

The Tofield Mercury

BEAUTIFY CANADA

Clean Up, Paint Up, Keep It Up — Increases the Value of Your Property

PROOF OF DYES is in the dyeing!

Words won't get it done, or soon, or as easy. It takes real dyes to do that. That's why Diamond Dyes remain from show to how times more millions than any other dye—by actual test. It's the millions in Diamond Dyes that do the work; that give the quick, rich brilliant, sure depth and permanence. It's real colors that keep them from fading, streaking, spotting. It's real dyes that brighten, revive and keep them beautiful. Don't worry about what dye you have been dyeing to do, any Diamond Dye will do it perfectly. Don't worry about the directions. They are right on the package. They keep their brilliance. No other dye could do more than your dye will do. Don't worry about results. Diamond Dyes are sure to do it. The whole package of Diamond Dyes is the original "all purpose" dye for tinting and dyeing every kind of material. It will dye or tint silks, satins, wools, linens, cottons, mixed goods, feathers, ribbons, rugs, draperies, coverings, everything that can be dyed or tinted. The whole package will give every kind of result. The whole package will give every kind of finish, no matter how rich and vivid. Your dealer has both packages.

Why Cement and Plaster Need Painting

It is certain to cost even a cement concrete floor, plaster or brick surface no more to paint than to let it go. Many a farmer will remark that he has cement floors and walls and he is proud of the fact, but he is not in the habit of painting them. Cement and plaster are very porous and absorb moisture readily. Paint will help to protect them from the weather and other destructive conditions.

Paint will not make them waterproof, but it will help to keep out the moisture does not burn it. It is almost as important to prevent rain from penetrating the surface of this rough material outside as it is to protect wood and iron from rain.

But just any kind of paint will do. It must be a special cement paint having a chemical composition not affected adversely by lime or alkali.

It is important that owners of commercial and manufacturing buildings, grain elevators, warehouses, garages, silos etc., such shoulder outside surfaces should receive the advantages of painting when that they will last longer look better and need fewer repairs after being painted.

Many accidents happen from [illegible] and other mixtures [illegible] Inflammable liquid. Almost every day it happens "Regone" does not seem to be the best word to use, however, for it is discovered that such "accidents" [illegible] wrong descriptive word), are usually the result of want of [illegible] House use.

Anybody should [illegible] who's highly inflammable or [illegible] heat, whether burning or hot or even warm store is more than likely to cause an explosion. [illegible] who heating a pot of varnish on the stove and it exploded." Of course it did and she thank it would [illegible] boil over like a pot of soup. Farmers Magazine

Clean Up Every Yard

Let the paint-brush and the milk for five minutes, then scald the utensils. Combine the egg-yolks, sugar and salt with the cooled milk and cook until slightly thickened like a custard. Then stir the gelatine into the egg whites beaten still; add the vanilla. Then turn individual moulds which have been dipped in cold water and when set unmould and serve with light cream, or any preserved fruit.

Demand For Fine Machinery

Implement houses at Moose Jaw and Swift Current are preparing to carry the present time filling orders for spring farm machinery. It is understood that the International Harvester Company will have at least another twenty carloads of machinery shipped into Swift Current this spring while the Massey-Harris Company is also handling a heavy movement.

Moose Jaw Board Of Trade

The recent three days drive for membership in the Moose Jaw Board of Trade with an objective of [illegible] members went over the top with [illegible] 200 paid up members secured.

Lady in Library Has been reading Longfellow?

Bridgeburg News, only [illegible] Ontario.

Ammonia purchased in the past year by [illegible] 15,000 pairs of shoes.

Acid Stomach

Excess acid is the common cause of indigestion. It results in gas and sourness about two hours after eating. The quick corrective is an alkali which neutralizes acid. The best counteractive is Phillips' Milk of Magnesia. It has remained standard with physicians in the 50 years since its introduction.

One spoonful of Phillips' Milk of Magnesia neutralizes instantly many times its volume in acid. It is harmless and tasteless and its action is quick. You will never rely on crude, unpleasant measures to relieve you of acid indigestion when this genuine method sets you right so quickly.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any druggists.

Had Thought For Troops

Prince Of Wales Commemorated On Her Parade During Tu Wednesday

On the day the Prince of Wales presided over the first Royal levee of the year at St. James's Palace, Pall Mall, London, elaborate ceremonial had been arranged. He was to drive in a silver and gilt coach through Buckingham Palace, the King's London residence, to St. James's attended by a squadron of the Horse Guards in full parade equipment, including highly polished steel cuirasses and enormous busbies.

The weather turned intensely cold, and the discomfort this parade would have occasioned not to himself, for he would have been well cloistered in the coach, but to troops that were to take part at once regiments to the Prince Hall an hour before the ceremony was to begin, there, force be quietly countermanded it and word from the modest bachelor quarters he occupies in York House never by Little was said about this at the time, but a few of the 47 cases of inhabitants of some grey inch [illegible] to the Royal Beach took note of it and approved.

Home Decorations

A little message from a busy way to furnishing a home or to [illegible] spend. A piece painted well in a light pleasant tone, the modest of moonshine or neatly patterned paper [illegible] very much, but goes a long way toward giving a room a fresh smart appearance. Cheap [illegible] cretonnes add a touch of gaiety and cheer to windows. Ugly or unsuitable pieces of furniture can be replaced by inexpensive ones of cottage furniture. Nondescript chairs made and [illegible] can be painted pleasant colors, giving service to the furnishings of the room. Worn-out upholstery can be covered with slip covers of denim or cretonne or reupholstered in inexpensive wool [illegible] New silk or patchwork lamp shades and pillows of quilted silk or bright linen adorned with wool embroidery or applique add to the up-to-date appearance of the room. Well designed scatter rugs, rag mats, [illegible] the delightful new [illegible] make charming and inexpensive floor coverings.

Air Service From Seattle To Alaska

Proposed Line Via British Columbia Coast Ports

The International Airways will start a passenger service from Seattle to British Columbia and Alaska early this summer operating eight [illegible] passenger seaplanes, P. T. McCarty, president and general manager of the company announced. The service will include stops at Victoria, Prince Rupert, Ketchikan and Juneau, the capital of Alaska. Scheduled time—Juneau to Seattle.

Mr. McCarty and a party of [illegible] others, completed a survey of the proposed course, making a round trip from Seattle to Juneau by seaplane

Invents New Auto

British Engineer Claims Machine Capable Of Great Speed

Claims that Henry Young, British engineer, is reported to have invented a type of automobile capable of [illegible] miles an hour with [illegible] with a guaranteed speed of [illegible] an hour and a [illegible] maximum speed of [illegible].

For the first time wireless will be used for steering of the dirigible [illegible] that were kept secret. The engines will have [illegible] power and the car will be fitted with eight wireless [illegible] for the control.

Was Very Careful

A man had recommended a friend of his for a job. In he fond of [illegible] and [illegible] of the [illegible] works. Finally [illegible] friend and employer [illegible] said to his wife: I never saw a man who could talk such good care of work as he does. Some piece of work will just him for a week."

My Lord," said the foreman of an Irish jury, when giving the verdict, "We find the man who stole the Hon' Golly."

How's everything at home?" Oh she's all right."

SUNDAY SCHOOL LESSON

APRIL 29

THE SUFFERING SERVANT OF JEHOVAH

Golden Text: "With His stripes we are healed." Isaiah 53.5.

Lesson Isaiah 52.13 to 53.12.

Devotional Reading: Revelation 5. 9-14.

Explanations and Comments.

The Servant Of Jehovah.—Who is meant by the servant is the words of the Ethiopian eunuch (Acts 8.34); "Of whom speaketh the prophet this? of himself or of some other?" Philip, to whom the eunuch spoke, immediately took up the passage which he was study today. Professor Bruce.

Misplaced.—Reference to the Revised Version will show that the last verse of the second part of the 52nd chapter and the first verse of the 53rd (52.13-15; 53.1) belong together. (52.13 to 53.12 is the description in the mind of the prophet of the Servant. "Who is the prophet or a person." If a personification, was it a real person? What was the nature or the location of that nation—or that righteous nation? They are in Babylon or that part who remained in the Jewish homeland or in the [illegible] of the exile and then kept alive the true religion? Is it a person who is ideal, or real? A prophet, or [illegible] nation? Is it a person who is now still to come the promised Messiah? Such and other [illegible] doors are ably defended by a holster. The [illegible] Servant is the ideal standard of life for individuals and [illegible] Israel. What would be [illegible] become the "servants of all." Jesus [illegible] in the only perfect [illegible] of [illegible]. Selfishness is the [illegible] of [illegible]. Christ brought [illegible] to us as the perfect Servant of Jehovah. [illegible] Servant of Jehovah." And [illegible] servant [illegible] and [illegible] that suffering [illegible] the strength of humanity."—John T. McFarland.

The Later Exaltation Of the Servant—Isaiah 52.13-15. Is there [illegible] between the fifty-second chapter of Isaiah and the beginning of the Speaker (Is 52.13, 15, He [illegible] exalted. Behold, he shall deal [illegible] Behold, he shall be exalted. But just as many were astonished at [illegible] so many shall be [illegible] and His sufferings. His visage was so marred by disease, so [illegible] to be a marvel he shall startle many nations. Kings shall be silent [illegible] surprise when he is really known. [illegible] the Servant of Jehovah is [illegible] Christ and others and [illegible] not originally [illegible] and perhaps not originally [illegible] [illegible] read "Many nations will marvel at him."].

The Servant Of Jehovah a Man Of Sorrows, verses 1-3. The prophet [illegible] the speaker. Whatever [illegible] is suddenly introduced into prophecy. [illegible] Isaiah [illegible] speaks when the prophet takes the nation along with himself."—Dellitzsch. Who [illegible] believed our message, and to [illegible] the arm of Jehovah been revealed? He refers seemingly to the [illegible] Christ brought to [illegible] the substance of 42.1-4, 49.1-6; 50.4-9. The tenses in verse 1-3 are past (prophetic perfect), the future [illegible] viewed as already [illegible] of. The implied answer to the question is "No one."—Dummelow. The "arm of Jehovah" is a figure of speech for the work of Jehovah, the doing of the "Servant" to his work [illegible] developed, and [illegible] of [illegible] of sorrows, and acquainted with grief."Wont as [illegible] verses is condensed into three words." And as [illegible] hid their faces [illegible] He was despised; and we esteemed him not. Surely he hath borne our griefs [illegible] from Him with loathing. Many see in these words a suggestion of leprosy, and refer to Job. 18.6.

The Cost Of Corrosion

In a paper read before the Institution of Civil Engineers, Sir Robert Hadfield on "The Corrosion of Ferrous Metals," the startling statement was made that, according to an estimation, 20,000,000 tons of steel were lost by rusting in 1920. At 5c pounds a ton this would represent for the year the huge bill of 100,000,000 pounds, in which might be added another 120,000,000 pounds spent on operations rendered necessary by the corrosion. These figures refer to the whole world, but, as the "Electrical Review" pointed out, the major part, say 400,000,000 pounds would probably have to be debited to the British Empire, a sum equal to more by half our total war indebtedness to the United States.

The girl with a broken heart always manages to save the pieces.

Pictures and Mirrors Give Finishing Touch

Pictures serve an admirable purpose in the decoration and furnishing of the model home.

By the very nature of their location on the wall they occupy parts of the floor space that is so valuable in the small dwelling. If a little room has been rather crowded with furniture, pictures on the wall carry the eye upward and bring the attention from the lower part of the room to the upper, where there is a greater appearance of space.

Then, too, the subjects of the pictures may be chosen with a view to increasing the apparent size of the room. Pictures with a rather deep perspective give the eye a chance of looking into the scene, down a corridor into a valley, along a river, or otherwise creating an appearance of distance.

To do this removes much of the cramped feeling that invades a small room if pictures are not used.

The choice of color in pictures also will bear much to do with the decorative scheme of the room and the same effect of spaciousness can be created with the judicious use of mirrors.

The Past Paint Plays

Where poverty here there sits blesseds." Someone wrote or said that a long time ago and it is quite true today. The smallest property in a town, or its poverty and unfitness are indicated by its physical appearance.

Frost and Frisk Are Partners, is one of the attributes of the "Cheapjack and Painted-Up Campaign," and it is a good one. "The greatest incentive to cleanliness is paintiness." is another true one.

Any community cleaning that hopes to [illegible] the paint brush even more than the scrub brush. Walls and ceilings, surfaces which are properly painted, enamelled or varnished, are washable. They are easier to keep clean. Good paint and varnish reduce the labor of keeping clean, promote health, inspire pride of ownership, multiply the joys of living and increase property values. There is no better time to paint up than when you are cleaning up, and there is no hope of keeping your premises cleaned up unless they're painted up.

The Dandelion Digger

The dandelion is a pretty little flower for a few hours. Then the down of the ripened [illegible] seeds which are lifted by the slightest breeze and blown over the face of the [illegible] the neighborhood. The [illegible] dandelion soon becomes an unsightly weed which disfigures an otherwise beautiful lawn.

Dandelions attract mosquitoes and other undesirable insects. Get rid of the dandelion by enlisting the services of the children. Offer a prize or note an army of dandelion diggers.

Any self-respecting home owner will pay the little less ten to twenty-five cents per hundred for dandelion and other roots that may be found. You can appeal to the pride of the little fellow by making them soldiers in this special army of fighters, and you will find them by a small cash reward for their work.

Grocer—"Then you don't want oil cranberries?"

Customer—"No, I've changed my mind. I see your rat is asleep on them cranberries."

Grocer—"And'll be alright. I don't mind snakin' the oil up."

A biologist has declared that the ape is not man's ancestor, and that ought to be comforting to the ape.

CHAPTER XVIII.—Continued.

"Come in," she called.

Donald followed Wainwright, his bowler-hand [illegible] in his hand. For an instant he could not distinguish objects in the dim interior. Then his eyes rested on Connie, sitting demurely in the corner. She wore a gingham dress of blue, with white collar and cuffs. A dark belt was fastened snugly at her waist. What They high-heeled shoes peeped from below the hem of her skirt. Her beautiful hair was [illegible] in a large braid that fastened on the top of her head, round each with a narrow black bow. She rose and crossed the room to meet him, her high heels making her like to the body appear much taller. There was something fragile about her beauty, some of the colour gone from her cheeks, and just a hint of shadows under her eyes.

Donald held out his hand. "Good evening, I'm glad to see that you are better," he said awkwardly.

A slender, warm hand crept timidly into his, and he became aware of a gentle smile on a flower. He stared down at her, thrilled by her beauty. She relaxed her eyes with their bewilderingly long lashes slowly to [illegible] Then With a sudden impulse he kissed. Donald realized that he was in love.

They talked desultorily while Connie sat demurely on the edge of the [illegible] Wainwright, who could not [illegible] at ease in the high, narrow chairs and the over-upholstered settee. And she managed to [illegible] the rough face with an assumed air of ease, her ankles turned and she would have [illegible] had not Donald caught her in his arms.

As he raised her to her feet she blushed furiously, and he flinched he found her [illegible] Connie, in full sailor dress, [illegible] Wainwright, who [illegible] [illegible] Organist [illegible] [illegible] [illegible]

CONSIDERABLE SWEET CLOVER BEING SOWN THIS SPRING

Apparently there will be a large acreage of Swet Clover sown in Alberta this spring, and looking at the matter from the standpoint of advancement along agricultural lines this is a splendid sign. Sweet Clover means feed and feed means stock. It means another thing that is just as important and that is a beneficial effect that the growing of this crop will have upon the soil. Such leguminous crops as sweet clover add humus and fertility, both of which are very essential to the permanence of our agriculture. As an indication of the new acreage that will be sown the Bacteriological department of the Provincial School of Agriculture, Vermillion, report that they have sent out over 1300 bottles of legume culture this spring already. This is sufficient to seed 1300 bushels of seed or seed sufficient for nearly 6000 acres. Last year over 2500 bottles were sent out to farmers, and shipments to date are ahead of those of a year ago.

General Automotive Work

There are very few cars in the district, which after winter storage or use would not be the better for a spring overhauling. If you place any value upon your car, the cost of a spring overhauling is money well spent, the improved service being worth more than the work costs. We are thoroughly experienced and suggest you bring your car in early.

LOCAL AND PERSONAL

Miss Annie Brohe is assisting at the J. R. Francis home.

Miss Kathleen Hobson is visiting her aunt in the city.

Howard Lee, leaves for New Westminster on Monday, where he will play baseball duringn the coming season.

Mr. and Mrs. Ward, Mrs. Noland and Thelma motored to the city on Sunday.

Miss Polly Napier visited over the week end with Miss Jenny Ormsby of Edmonton.

Mr. and Mrs. Burchard's and L. Gray motored to the city on Thursday.

The Hobson family motored to Edmonton on Sunday.

Miss Rola McPherson of Holden was a visitor in town on Wednesday.

Mrs. Ward of Edmonton, visited at the Emery home this week.

Mrs. H. Lewis is visiting her parents, Mr. and Mrs. W. Bowick.

Mr. A. B. Evenson is visiting at the Jebb home.

H. Hopgood is a candidate in the Edmonton Bulletin circulation prize competition.

Miss Harrold, sister of Mr. A. P. Harrold of Tofield, was a visitor at the J. W. Robinson home for a day or two last week. Miss Harrold has been visiting in Vancouver for the past 18 months. She sailed for England on May 3rd.

An enjoyable birthday party was held at the Hobson home last Thursday evening in honor of Miss Annie Hobson. Bridge was lpayed, five tables being occupied. Miss Marion Cooper won ladies' 1st and Keith Scott, gent's first. Miss Ethel McClymont was awarded the ladies' consolation and Jack Cookson the gent's consolation. A lovely lunch was served and a splendid time was enjoyed by all.

On Saturday night of last week, Miss Annie Swift entertained a number of her friends at her home in honor of her friend, Miss Jeffrey of Edmonton, who was visiting her over the week-end. Dancing was the order of the evening, and shortly before midnight, a delicious lunch was served by Mrs. Swift, after which everyone departed for home, all feeling that they had had a most enjoyable evening.

MRS. HANNAN ENTERTAINS TO BRIDGE DRIVE

On Friday evening of last week Mrs. Hannan entertained to twelve tables of bridge. At midnight a delicious lunch was served to which all did ample justice. The prizes were won by, Mrs. Law first; Mrs. Abbott second and Mrs. Hay won the consolation prize.

TENNIS MEETING

There will be a tennis meeting held in Mr. Pincott's office at 8:00 p.m. on Monday night, May 6th. All members are urged to attend, and all others who are interested and intend playing tennis this summer, don't forget the date and time 8:00 p.m. on Monday, May 6th.

"EXCESS BAGGAGE" GETS ITS TITLE FROM VAUDEVILLE

Applied to Actors Who Travel with Troupe and Do Nothing

" 'Excess Baggage,' "said William Haines, "is a lot of extra luggage that you carry with you and pay for but never get a chance to use."

Thus the star defined his idea of the meaning of his new starring picture of that name which comes Saturday night to the Variety Theatre.

According to John McGowan, the author of the stage play from which movie production, the term originally derived from baggage offices of the railway companies who were accustomed to charge an extra fee for transporting all luggage weighing over 75 pounds per ticket.

As all theatrical people have heavy luggage, they naturally often paid extra fare for the transportation of their belongings. Hence their familiarity with the term.

As used in vaudeville today, "Excess Baggage" means as much "dead weight." In other words a person carried in an act who contributes nothing or practically nothing to its success.

So Haines in the beginning of the picture is thought by his wife, Josephine Dunn, to believe her to be "Excess Baggage." Later on after she has won success on the screen, he has the same idea when he believes that he so much "Excess Baggage" as far as her career is concerned.

James Cruze directed the screen production while the cast includes Ricardo Cortez, Kathleen Clifford, Greta Granstedt, Neely Edwards and others.

NARROWLY AVERTED FIRE AT TOFIELD

What might have turned out to be a very disastrous fire was soon put out, in Swift and Emery's garage on Tuesday morning.

Smoke was seen issuing from the roof of the workshop and upon investigation the roof was found to be on fire. The alarm was sent in and soon a crowd of willing workers were on hand. The fire had not gained much headway when first noticed. The shingles were torn off the roof and water poured on the flames, the chemical was then brought into use and the fire was soon put out.

Some of the cars were taken out of the show rooms in case the fire got beyond control.

It was very fortunate that the fire was noticed in its early stages for if it had once got a good start it would have very likely have burnt up the whole corner. No more damage than the hole in the roof when the shingles were torn off was done. The cause of the fire is unknown.

MAJOR MILLER INSPECTS TOFIELD CADET CORPS

On Thursday, May 2nd, Major Miller of Calgary, paid his annual inspection trip to Tofield. He was very well pleased with the corps and said that they showed great improvement over last year. He was prepared to present a shooting badge to the cadet holding the highest score, but as some of the cadets had not done any shooting yet this was left in the hands of the instructor to be awarded as soon as the target shooting had been completed.

Mr. H. Lundie is the instructor of the Tofield cadets.

KETCHAMOOT

April 29th

News items are few and far between these days, at least in our neighborhood. This week I have succeeded in scratching up a few.

The men are all busy on the land, some seeding, some discing and others picking up roots and the ladies are busy with poultry and housecleaning, it being a little early for gardening excepting hot beds.

Mr. Hugh Mitchell came down from Edmonton on Monday. Mrs. Mitchell was not able to accompany him as she has been under the doctor's care since returning from Victoria some time ago. Mr. Mitchell will dispose of his car and household furniture, after which he and Mrs. Mitchell will return to Victoria to make their home there.

The regular monthly meeting of the M.A.S. will be held next Wednesday afternoon at the home of Mrs. A. J. Williams. All are cordially invited to attend.

Mr. Ralph Miller sold his farm to a family from Poland, not Holland, as was announced in one issue of the Mercury.

Mr. and Mrs. C. A. Ingram, Mr. and Mrs. A. Haukedal and little daughter, and Charlie Sears were guests of Mr. and Mrs. Geo. Lawson to dinner last Sunday.

Ralph Williams who has been very ill with pnemonia is now able to be up for a short while each day.

Mrs. Peter Lee and little grandson Gordon Ray, visited at the home of Mrs. Lee's daughter, Mrs. Roger Ray after services on Sunday.

Misses F. Fawcett and Helen Schultz visited at the W. A. Mitchel home on Sunday afternoon.

Mr. and Mrs. Harold Smith motored up from Camrose on Saturday afternoon and visited relatives until Sunday evening returning to Camrose in the evening.

Mr. and Mrs. Herman Lawson and family and Mr. A. Campbell motored down to Mr. Don Campbell of Round Hill on Sunday.

KINGMAN

Mrs. Harding Lamont is visiting with Mr. and Mrs. P. Radunsky for a couple of weeks.

Mrs. Ed Thompson returned from Clyde where she has been visiting Mr. and Mrs. T. Severson for one month.

A. Danielson is a patient at the St. Mary's hospital.

A. Asp and O. Bartness motored to Battle River on Thursday to bring back some evergreens.

D. Scramstead of Edmonton was a visitor here on Tuesday.

Mrs. J. Carlson of Edmonton visited with Mr. and Mrs. E. Erickson for a few days.

Mr. and Mrs. P. Scramstead of Camrose visited with Mr. and Mrs. Roy Melvik on Sunday.

Mr. and Mrs. E. Erickson and family and Mrs. J. Carlson of Edmonton were the guests of Mr. and Mrs. Thor Horte of Daysland on Sunday.

BARDO

There was a large attendance at the Ladies' Aid held at Jensen's last Wednesday, and a pleasant afternoon was spent. Mrs. Steen led in a very interesting discussion on "What Makes a Home."

Mr. and Mrs. E. Rude, Mrs. C. Rude, Nora and Irene, motored to Edmonton one day last week.

Mr. P. B. Anderson and Mr. Ness attended the banquet given in honor of Dr. Nordbye, at Camrose on Friday.

Miss Carey Brenham spent last Friday in Edmonton.

A very interesting U.F.W.A. meeting was held at the Rorem home on Friday. The roll call was answered with "Hints on Gardening," after which there was a discussion on "Care of Baby Chicks." Visitors were Mrs. I. H. Olson and Mrs. I. C. Olson. Mrs. Haukedal and Mrs. Rorem served lunch.

There will be a "Mother's Day" program at Bardo, on Sunday, May 12th, at three o'clock.

Quite a number of Bardo people attended a cantata, given by the Camrose choir, at Camrose, on Sunday afternoon.

LINDBROOK

The spring offensive has started here in earnest now. Wheat is being sown and other land got in shape for this year's crop. The only "casualties" in this offensive as far as can be ascertained are gophers and a good gopher is a dead one.

We are glad to report that Mrs. Hedley Burton is home again from the hospital having successfully recovered from her recent operation.

Cecil Carlson had a nasty accident the other day, the horse he was riding to school stumbled and fell, probably on him for since that he has not been able to walk. He is at home under Dr. Law's care and is to have an X-ray photo taken of the foot ot determine just precisely what the trouble is. We hope soon to see him on the road again. Luckily when it happened his sister Eileen and three neighbor's children in a buggy were with him and they drove him home after the accident.

A bush fire which swept the country north of Lindbrook last week destroyed a granary containing 100 bushels of seed oats belonging to Sidney Lamb. No one knows how or where the fire started, but they do start and if let go, no one knows what they will do before they die out, so it behooves everyone to be extra careful with friend fire.

Messrs. Hicks and Clarke unloaded a carload of their furniture last week the same being shipped from their home in England.

The school inspector, Mr. Robinson inspected the Lindbrook school this week.

The recent rains rendered the roads very bad, several cars being stuck, and now that the roads are dry they are rather rough going.

[illegible]

The farmers are now busy in the field again, the tractors are going early and late and a lot of wheat has already been seeded.

Astrid Moline was opperated upon for appendicitis at the Royal Alex Hospital last Wednesday. She is getting along as well as can be expected.

Emil Waagaard who was operated upon for appendicitis about three weeks ago will be able to come home soon.

Arvid Broten just arrived from Norway, is assisting with the work at P. O. Flaaten's farm.

The A. Patterson family motored to Edmonton last Sunday to visit with Arthur Patterson who is still at the hospital. We are glad to report that he will now be able to come home soon.

The Y.P.C. held a program in the church last Sunday evening, the attendance was fairly good considering seeding is on. The Rev. Bjelde led in the devotion and discussion.

The young people of this vicinity met at the Flaaten home last Friday evening for a social time. Lunch was served and they went home about midnight.

Mr. and Mrs. N. Sand and daughter from Ryley, Mr. M. Johnson and daughter and son from Viking were visitors at the P. O. Flaaten home last Sunday.

Mr. and Mrs. Anneho and family and Mr. and Mrs. Johan Nilson were guests at the B. Ness home last Sunday.

Mrs. I. H. Olson and son Ralph and Rev. Bjelde were visitors at the B. O. Berg home last Sunday.

LAKE SHORE

Mr. and Mrs. F. O. Ball and family were Sunday visitors at the home of Mr. and Mrs. W. Abernethy.

The Eaton families motored to Lamont on Sunday to visit Mrs. Owen Eaton's father who has been in ill health for some time.

Mrs. W. E. Seale spent Friday afternoon with Mrs. Jno. Wood

Mr. and Mrs. R. C. Phillips visited friends in Woodlawn district on Sunday.

Archie Munro from east of town spent the week end with the Phillips boys.

Mr. and Mrs. Everett Noland spent Sunday evening visiting Mr. and Mrs. Owen Eaton.

Thomas Schultz and son Walter of Deville spent Saturday and Sunday with friends in this district.

Mrs. Geo. Francis is caring for her sister, Mrs. Jim Francis and infant son at their home east of Tofield.

U.F.W.A. NOTES

The regular meeting was held on Thursday, April 25th. As Mrs. Ferguson the president was not present, Mrs. J. B. Warner, vice-president conducted the meeting. The secretary reported that Miss Bateman had stated that there would be no more cook books this year but would probably be more next year. Two new members enrolled. Mrs. Dodds gave a very interesting paper on women of other lands, which was much enjoyed by the members present. Mrs. Gray presented the report on the Canadian Council of Agriculture and Mrs. Baptist the report on co-operative marketing.

The next meeting will be held on May 9th, at the home of Mrs. Johnston Ferguson, at 2:30 p.m. The roll call will be answered by "Something my mother taught me." Mrs. J. Bowick will give a paper on insects of the garden and their control. This is a seasonable topic and promises to be interesting.

The finest tea you can buy—Red Rose Orange Pekoe. Made from juicy, flavor filled leaves—three days in bud. Every package guaranteed.

RED ROSE TEA "is good tea"

RED ROSE ORANGE PEKOE is extra good

In the best package—Clean, bright aluminum

Canada At War!

Canada is at war and with the passing of winter, operations are being renewed and extended on all fronts against the common enemy. Happily, it is not warfare directed against any other people or nation, nor, in the final analysis is it a destructive, life-taking, money-losing campaign in which the Canadian people are engaged. Rather, it is constructive, life-giving, money-making battle that is being waged.

The war to which reference is made is an unceasing one. It can never end, and victory can never be wholly complete. On the other hand unless the battle is fought and renewed from year to year, defeat for mankind is sure and inescapable. It is a case where eternal vigilance is the price that must be paid for life, liberty and happiness.

It is a war against dirt, disease, insects, bacteria.

In the spring of the year, as snow disappears and the frost leaves the ground exposing the accumulations of winter, it is imperative that every householder every community, "clean up." Failure to do so may, and in all probability will result in an epidemic of sickness, not to speak of the unwholesome effect upon the mentality and habits of people living amidst unsightly, disagreeable surroundings. The necessity of an annual spring "clean up" and the maintenance of clean surroundings, and sanitary conditions throughout the warm summer months, is applicable alike to the farm and farm home and the urban community and home.

The danger of the common house fly is now too well known to require emphasis. It is the greatest distributor of the filth and disease breeding germs upon which it thrives and breeds its countless millions. Destroy its breeding grounds and the battle is more than half won. When the first fly puts in an appearance, kill it, and you will be saved the trouble of swatting hundreds later on.

Then there is that most unpopular little humming bird, the mosquito, which turns so many of our long and lovely summer evenings and our beautiful summer resorts and sports grounds into places of torture. By taking early action this almost universal pest can be largely controlled. For years the citizens of Winnipeg have had life made miserable for them by mosquitoes and each season witnesses more energetic and concerted effort to destroy them. Regina, no worse sufferer than other places, is this year under the direction of the Kinsmen Club, assisted by other service clubs, the health authorities, Boy Scouts, and other organizations, taking part in the battle.

The mosquito breeds by tens of millions in stagnant water. Pools of stagnant water, slowly drying up sloughs, partially filled ditches, cannot all be drained, nor can their existence be wholly prevented, but through the simple expedient of scattering coal oil, and other oils, in these stagnant waters, there millions of potential mosquitoes will be destroyed. Regina is surveying the city and its surroundings from the air thus detecting every spot of stagnant water and these are to be impregnated with oil. If all our towns and villages locate these pools of stagnant water in and about them and take like action, life will be made more comfortable and enjoyable.

When cleaning old oil out of your motor car, tractor engine, or other machinery do not throw it away. Save it, and spread it about in any stagnant water in your vicinity and sink your old oil-soaked rags with a stone in such pools. By so doing you will prevent the breeding of mosquitoes.

This great and holy war is being waged in other directions and in even intensive fashion. Departments of agriculture and the research departments of our Universities and the National Research Bureau in laboratories and in the fields have for some years been engaged in the task of finding a means of eradicating rust from wheat, which takes its toll of tens of millions of dollars from the farmers of the prairies. According to latest authentic reports gratifying progress has been made, and the experts engaged in this work are now fairly confident they are on the right track, and that before long a rust resistant wheat will be developed fully equal to other wheats in its early ripening ability in yield per acre and in its bread making qualities. Such a victory will bring huge rewards for the time and money expended. It is a form of constructive warfare which will reimburse Canada for many of its losses occasioned by destructive human war.

Agricultural and health departments of governments are in the van of this great never-ending battle. The larger municipalities and many other communities are awakening to their responsibility. Semi-public organizations of many kinds are joining in the fray. As was the case in the Great War scientists are doing their part, and doing it well. But as the Great War developed into a struggle between peoples rather than armies and navies, in which every man and woman had a duty to perform, so in this other war in which Canada is engaged, everybody must be enrolled if the largest measure of success and victory is to be achieved. This is a war which recognizes no defined boundary lines: it must be waged everywhere. If the enemy remains unmolested in any one place or district, or even on any individual homestead, victories elsewhere will be of little avail. It is a universal war, demanding the active co-operation and alert vigilance of all.

Insanity is said to be decreasing. Maybe it's because so many things that used to be considered crazy aren't any more.

No jumpy feeling NOW *when I drive through traffic*

Nothing relieves tension so effectively as Wrigley's. The act of chewing, as motorists have discovered, has a gentle soothing effect. The healthful cleansing action of Wrigley's refreshes the mouth and steadies the nerves.

WRIGLEY'S after every meal

Ahead Of Schedule

First India-England Air Plane Made Trip In Seven Days

The first India-England aeroplane arrived at Croydon two minutes ahead of schedule. The air liner carried five passengers, 500 pounds of mail and negotiated the 5,000-mile trip from Karachi in seven days.

One of the passengers was Vice-Marshal Sir V. Vivian, who left Croydon on March 30 on the inaugural mail liner to India, arriving at Karachi April 6. He departed on the return flight within 24 hours, having thus covered 10,000 miles in fourteen and a half days.

Had Many Rulers

Warsaw, the capital of Poland, has in turn been ruled by Sweden, Austria and Russia. In 1807 Napoleon made it the capital of the Duchy of Warsaw and during the World War it was captured by the Germans who held it until peace restored Polish independence.

It would be interesting to hear Ananias tell what they allowed him for his old car.

Minard's Liniment for cuts and bruises.

Canadian Poultry Record Good

British West Indies and Other Countries Satisfied With Shipments

Breeding poultry carrying record of performance certificates are commanding wider and wider markets as their qualities become known. Some good shipments have been going forward to the British West Indies. The most recent shipment consisted of seven record of performance approved White Leghorn cockerels. This order followed a larger one of ninety-one birds shipped to Trinidad last September. H. S. Arkell, Dominion Live Stock Commissioner, announces that reports from the purchasers of these birds indicate that Canadian-bred poultry are giving every satisfaction in the southern temperatures.

RADIANT GIRLHOOD

Comes Through Rich, Red Health-Giving Blood

A girl with a full-blooded body and vital nerves has the foundation of an active healthy life. Allow her to grow wan and delicate and prolonged ill-health and general weakness may be the result. Many women who ought to be in the very prime of life are too frequently sufferers of headaches, back and side aches, easily tired and breathless, because of anaemia which stealthily attacked them in girlhood.

But fortunately there is a remedy within easy reach. Thousands of tired, worn-out women and delicate girls who have sought the self-help of Dr. Williams' Pink Pills are grateful for the way in which these pills have restored them to robust fitness. This effective tonic and nerve restorer always helps to make plenty of rich, red blood that speedily puts an end to anaemia. A wan, delicate girl, or tired, weary woman soon becomes brighter when this new blood courses through the system. Color comes to her cheeks and lips; her appetite increases, her nerves are steadied, and she becomes vital and active again. The following is an example, from among thousands, of what these pills have done and can do: Miss C. J. Martin, Kitchener, Ont., says: "For several years I was greatly distressed with pains in the back and sick headaches. I felt tired all the time, did not sleep well and had a poor appetite. I had been doctoring, but did not get much relief. My sister advised me to try Dr. Williams' Pink Pills and after taking six boxes I felt like a new person, and will not be without the pills again."

You can get the pills from your druggist, or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Alberta Coal For East

It is indicated that Alberta's coal shipments to Ontario during the special rate period will aggregate 200,000 tons.

Nervous and Run Down The Least Noise Would Bother Her

Mrs. R. Burton, Oshawa, Ont., writes:—"Three years ago I was so nervous and run down I could hardly bear to have the children make a noise it would bother me so.

"A friend advised me to take

MILBURN'S HEART AND NERVE PILLS

and after taking two boxes I began to feel stronger, looked better and the color came back into my cheeks, and now I am feeling fine again."

Price 50c. a box at all druggists and dealers, or mailed direct on receipt of price by The T. Milburn Co., Ltd., Toronto, Ont.

Scientists in Russia are working on a device to keep the blood of a person in circulation and thus prolong life after the heart and lungs have ceased to function.

TIRED, WEAK, NERVOUS WOMAN BENEFITED

Praises Lydia E. Pinkham's Vegetable Compound

Asbestos Mines, Quebec.—"After the birth of my second child, I was always feeling tired, nervous and weak and had headaches, backaches and terrible pains every month. I suffered two years before I tried Lydia E. Pinkham's Vegetable Compound. I got four bottles at first and it did me a world of good. I would not be without it in the house now, and have another six bottles in. I recommend it to every woman I know."—Mrs. T. Barrett, Box 114, Asbestos Mines, Quebec.

Head Colds — Vapors inhaled quickly clear head — VICKS VAPORUB

BABY'S OWN SOAP — Best for Baby — Best for You

Recipes For This Week

(By Betty Barclay)

LUNCHEON DELIGHT

- 4 eggs.
- ¼ cup grated cheese.
- ½ cup soft bread crumbs.
- ¼ teaspoon salt.
- 1 cup white sauce.
- Few grains cayenne.

Break the eggs into buttered baking dish and cook in hot oven until they begin to turn white around the edge. Then cover eggs with white sauce, and over this the mixture of crumbs, cheese and seasonings. Brown in very hot oven, so eggs will not be overcooked by time cheese is brown.

PEANUT RICE SALAD

- 3 tablespoons rice.
- 1 cup orange juice.
- ½ cup finely chopped peanuts.
- Cream cheese balls.

Wash rice and cook for 7 minutes in boiling salted water; drain. Cover with orange juice and cook in double boiler until rice is tender. Cool, mix with finely-chopped peanuts; sprinkle with salt and arrange on lettuce leaves with cream cheese balls. Serve with cream mayonnaise or French fruit dressing.

Canada Wins the Banana Trade

The Largest Banana Carriers Afloat Under Any Flag

The largest banana carriers afloat under any flag is the record claimed by the "Lady Somers" and the "Lady Rodney," the two new vessels of the Canadian National Steamships which went into commission recently. These steamers are equipped with the most modern cooling and refrigeration equipment, and are capable of carrying over 100,000 stems of bananas.

The "Lady Somers" sailed for Bermuda, the Bahamas and Jamaica, inaugurating the western service of the Canadian National Steamships between Canadian ports and the islands.

The ships are elaborately decorated, and the passenger accommodation is complete in every detail. Particular care has been paid to all details of the cargo space and the ship is completely insulated. The "Lady Somers" can carry fruits and vegetables requiring different temperatures. For cool climate the ship is equipped with devices to raise the interior temperature when necessary.

Frost Kills Insects

Hard Winter Expected To Be Factor For Eliminating Pests

The winter of 1928-29 was a hard one on insects scientists at the Dominion entomological laboratory at the University of Saskatchewan believe. A self-recording thermometer, the bulb of which was three inches below the soil level, registered 11 degrees below zero on March 9, the lowest recorded during the past ten years.

The effect will be severe on insects as the majority hibernate at a depth of two to four inches. The lowest temperature recorded beneath the soil in the winter of 1926-27 was 14 degrees above.

Miller's Worm Powders do not need the after-help of castor oil or any purgative to complete their thoroughness, because they are thorough in themselves. One dose of them, and they will be found palatable by all children, will end the worm trouble by making the stomach and bowels untenable to the parasites. And not only this, but the powders will be certain to exert most beneficial influences in the digestive organs.

"We are now," announced the guide, "passing through a rural hamlet."

"Oh," exclaimed the sweet young thing, "I thought a hamlet was a little pig!"

Neuralgia succumbs to Minard's Liniment.

Canada and Disarmament

Furthest Advanced Of All Nations On the Road To Peace

Of all the nations represented when the League of Nations' preparatory commission on disarmament convened at Geneva, Canada claims to have advanced furthest along the road in disarmament. That is, if all forms of armament, including frontier protection are taken into consideration.

Canada is represented in the deliberations by Dr. W. A. Riddell, Canadian advisory officer at Geneva, with Col. George Vanier as technical adviser. The Canadian delegation may possibly have some suggestions to make at a later stage in the proceedings, their part being largely dependent on the turn of events.

CORNS

Relief in 2 Minutes

Just a drop or two of Putnam's Corn Extractor, and the pain goes away. Relief is almost instantaneous. Removing corns with "PUTNAM'S" is so easy, so sure, so painless—thousands use this wonderful remedy, and say it is the best. Don't suffer any longer, use Putnam's Corn Extractor, the one sure relief for sore corns. Sold at every drug store.

Exports Tea In Lumps

China exports tea in solid lumps, like bricks, for consumption in Tibet and Siberia. The tea-leaves are pulverized, mixed with water, and moulded into hard cakes. The bricks weigh about 5 lb. each. In this form tea can be carried overland more easily, as it occupies less space.

A Real Asthma Relief. Dr. J. D. Kellogg's Asthma Remedy has never been advertised by extravagant statements. Its claims are conservative indeed, when judged by the benefits which it performs. Expect real relief and permanent benefits when you buy this remedy and you will not have cause for disappointment. It gives permanent relief in many cases where other so called remedies have utterly failed.

Train Of Tractors

A special train of tractors, valued at $400,000, recently reached Regina. There were 290 machines in all, occupying 70 railway cars. The tractors were distributed to farmer buyers in Saskatchewan and Alberta.

Religious Groups In House

Roman Catholics form the largest religious group in the Canadian House of Commons, about 30 per cent. of the total membership. Adherents of the United Church come next and Presbyterians follow.

Paulin's

ZIG-ZAG Cigarette Papers — Large Double Book 120 Leaves — Finest You Can Buy! — AVOID IMITATIONS — NOW 5¢

Rearing Game Birds

Business Being Taken Up As a Side Line By Many Farmers

The breeding and rearing of game birds and other species of ornamental waterfowl is being taken up by many farmers as a sideline in Alberta and also in Saskatchewan, Ontario and British Columbia. According to "The Game Breeder" (Canadian Department), the supplies of certain species of birds, both for ornamental and stocking purposes, cannot cope with the demand.

Mothers can easily know when their children are troubled with worms, and they lose no time in applying a reliable remedy—Mother Graves' Worm Exterminator.

Manitoba Farm Loans

Three hundred and four applications for loans totalling $733,212 were made to the Manitoba Farm Loans Association during the fiscal year ending April 30th, 1928, according to a report tabled in the Legislature. This makes 9,430 applications, aggregating $25,619,493 filed since the commencement of the association's activities in April, 1927.

Medicine Chests Are not complete without Minard's. Used for cuts, bruises and pains of all descriptions.

MINARD'S "KING OF PAIN" LINIMENT

Keep Your Farm Up-to-Date This Inexpensive Way

For Farm Homes

Faded or cracked walls and ceilings detract from the pleasure of farm life. Hundreds of farm owners, realizing this, have transformed their rooms into bright, colorful interiors by applying Gyproc over all the old, ugly surfaces—then decorating. Remarkably attractive results are thus achieved at small cost. Every room becomes much more beautiful, livable and up-to-date.

Barns and Poultry Houses

Gyproc lined barns and poultry houses provide the best protection against fire, cold, heat and vermin that your stock can have. You can erect strong, rigid Gyproc sheets yourself in short time and at little expense. After a few months you will be delighted with the improved health of your cattle and the increased laying capacity of your flock.

Utilizing Waste Space

Those musty, inaccessible waste spaces in your attic and basement! Why not convert them into extra rooms by erecting Gyproc walls and ceilings? You can have a playroom, a laundry room, a workshop, a special preserving closet or any other kind of room you wish.

For fast, economical, fire-proof construction on the farm there is nothing to equal Gyproc. Write us for information or see your nearest Gyproc dealer.

CANADA GYPSUM AND ALABASTINE, LIMITED

Head Office: Paris, Canada

Branches: Montreal, Toronto, Windsor, Winnipeg, Vancouver

GYPROC Fireproof Wallboard

TO READJUST CAPITALIZATION OF THE C. N. R.

Ottawa.—For the first time since the creation of the National Railways system, the government of the day, through a responsible minister, pledged itself to the policy of re-adjusting the capitalization of the public owned railway.

In the special committee of the House of Commons which deals with accounts of the National Railways, this question was discussed, and Hon. Charles A. Dunning, minister of railways, stated unequivocally that he regarded the recapitalization of the system as being of "very great importance" and that the government desired at the earliest possible moment to deal with it.

Curiously enough, opposition to the recapitalization of the National Railways arose immediately from Conservative members of the committee. R. B. Hanson, Conservative member for York-Sunbury, who has taken a leading part in the work of the committee, at once asserted that the carrying out of such a policy would bring demands for reductions in rates. He thought this was a very strong argument against any action being taken.

Mr. Dunning and Sir Henry Thornton, however, held out for the recapitalization, pointing out the innumerable advantages which would follow and asserting that only in this way could Parliament deal justly by the able and conscientious officials who are endeavoring to make the system a complete success and who find that their best efforts avail nothing in overtaking the needs of a huge, unwieldy and unjustifiable capitalization.

Mr. Dunning introduced the subject and in the course of his remarks made it quite clear that the action probably would have been taken this session had it not been for the intervention of junior shareholders of the old Grand Trunk Railway, who are seeking the right to sue the government for compensation on account of their securities.

He failed to inform the committee as to whether or not the government would permit these shareholders to take action in the courts, but it is commonly believed that a fiat will be issued and the case carried to the privy council.

Increase In Manufacturing

Products Of Prairie Plants Last Year Much Greater

Winnipeg.—Manufactured products of the prairies during the past year exceeded the sum of $327,000,000 in value, according to J. W. Ackland, retiring chairman of the prairie division of the Canadian Manufacturers' Association, at the annual meeting of the association.

Utilization of the mineral wealth of northern Manitoba and Saskatchewan, and exploitation of Alberta's oil resources promise tremendous increases in the industrial output in the three central provinces, he stated.

Starts Schedule May 19

Winnipeg, Man.—"The Confederation," Canadian National Railways crack passenger train operating from Toronto to Vancouver by way of Winnipeg, Regina, Saskatoon, and Edmonton, will go into service on May 19 from the east and on May 21 from the west. This train replaces the National which in the winter months runs between Toronto and Winnipeg.

Receives Fellowship

Saskatoon, Sask.—Dr. William Allen, professor of agricultural economics at the University of Saskatchewan, has had a fellowship conferred on him which will meet the expenses of attending a conference of agricultural economists to be held during August in Devonshire, England.

Spain Guards Against Plague

Madrid.—A royal decree has been issued forbidding the importation of all classes of fresh fruits, plants and trees from Canada, the United States, Japan and New Zealand. The action was taken as a defence measure against insect plague.

Cable Is Restored

Halifax, N.S.—The Halifax and Bermudas cable, which has been down for some time, has been restored, re-establishing direct communication between Canada and the British West Indies, via Bermuda.

Win Empire Competition

King's Trophy In Rifle Match Goes To South African Cadet

Ottawa, Ont.—Cadets from South Africa won the King's trophy in the rifle match in 1928, which was participated in by 32,000 boys from all parts of the Empire. Canadian cadets won this trophy in 1927, and finished second in 1928. The results have just been made public by the National Rifle Association.

Commenting on Canada's performance the National Rifle Association report says: "Not only does Canada possess many more brilliant individual shots than any other country but she has a limited number of units capable of achieving very special distinction. When mass efficiency becomes the principal object of the many and fewer low scores have to be included in her national team, the premier prize, the King's trophy will return to the Dominion."

While Canadian boys have lost the King's trophy they have had other remarkable successes in the match. They won 82 silver medals which are awarded for scores of 99 and 100 points, and 152 bronze medals for scores of 97 and 98. The rest of the empire combined won a total of only 124 of these medals.

Will Perform Election Duties

King George Desires To Carry Out Usual Royal Functions

Bognor, Sussex, England.—The steady progress being made by the King is permitting the drafting of tentative plans for future functions, and there is every prospect these will be carried out. Transfer of the court from Bognor to Windsor Castle before Whit Sunday, May 19, is contemplated in view of His Majesty's expressed desire to carry out the usual royal functions connected with a general election. The King will remain at Windsor Castle until the political situation permits him to go to Sandringham in Norfolk, where the east cast sea air has always agreed with His Majesty.

It is being suggested that a thanksgiving service for the King's recovery should be held in Westminster Abbey at the end of July, with similar services in other large cities.

Convict Train Travels West

Seventy Prisoners Are Sent To Stony Mountain Penitentiary

Winnipeg.—The convict train, bearing 170 prisoners from Kingston, Ont., to western penitentiaries, reached here recently. Seventy prisoners were immediately transferred to Stony Mountain penitentiary, a few miles north of Winnipeg, while the remaining hundred continued the westward journey to Prince Albert penitentiary.

The convict train consisted of four steel coaches, the windows of which were heavily barred. Guards armed with rifles, were aboard the train, while during the stop here forty provincial policemen, also armed with carbines, stood guard.

The journey from the penitentiary at Kingston was uneventful, according to the prison guards.

Lucky Gold Strike

Ontario Farmer Makes Discovery While Digging Post Hole

Matheson, Ont.—W. Rhoades, Beatty township farmer, has just finished digging a $60,000 post hole.

As a pioneer on the edge of the northern clay belt, he decided to fence in more of his property. He used dynamite to dig his post holes. The first blast uncovered free gold.

Rhoades sold his find for $60,000 cash and a large interest in the property.

Large Liners Projected

London, England.—The Cunard line is considering the construction of two new trans-Atlantic vessels which would be the largest in the world, it was stated on reliable authority. The liners would have a displace of 75,000 tons, length of more than 1,000 feet and breadth of more than 105 feet. They would be equipped with 150,000 horsepower engines.

Message For American People

San Francisco, Calif.—Sir Rabindranath Tagore, Indian poet and philosopher, sailed aboard the liner "Tayio Maru" for India, via Hong Kong. His final words to the American public were the expression of a wish that his people "would rise above indignities and insults to impart some beauty to the utter ugliness of the industrialization of the West."

Airmen Killed At Toronto

Machine Went Out Of Control and Crashed Near Flying Field

Toronto.—Noel Marshal and William MacKenzie, residents of Toronto, were killed when their aeroplane went out of control and crashed near the Leaside flying field.

It was reported that MacKenzie who had but recently been granted a pilot's certificate, was in charge of the Gypsy Moth plane, with Marshal, a qualified pilot, as a passenger.

The plane was said to have been but 150 feet from the ground when it went out of control and crashed with such force the engine buried itself.

Calendar Expert At Ottawa

M. B. Cotsworth Discussed Matter With Government Members

Ottawa.—To aid in the suggested establishment of a national committee in Canada to consider proposed calendar reform and its effect on the Dominion, M. B. Cotsworth, of Rochester, N.Y., originator of the 13-month calendar idea, has paid a special visit to Ottawa. Mr. Cotsworth conferred with Dr. O. D. Skelton, under-secretary of state for external affairs, and H. H. Coats, Dominion statistician, respecting his proposition.

ITALY DEMANDS EQUALITY AS TO NAVAL POWER

Geneva.—The problem of navy parity between France and Italy loomed out as a reef which might imperil the success of any five-power naval conference to reduce armaments.

Premier Mussolini is reported here as firm as a rock in demanding parity for Italy with France, both on land and sea, while France apparently fails to see the justice of such demands.

France thinks her communications with her extensive colonial possessions and her mainland open to two oceans are sufficient reasons for her having naval forces superior to Italy's.

This problem of satisfying Italy at least on paper is worrying delegates to the preparatory disarmament commission. Some are beginning to worry whether a real advance on the naval problem could not best be made by establishing first of all an understanding between the United States and Great Britain.

The Associated Press correspondent has received the impression that France would place no obstacle in the way of such a preliminary understanding if it did not affect her position in relation to other continental powers. A high French authority voiced recently enthusiastic approval of the speech of Hugh S. Gibson recently, because it gave a magnificent impetus to reduction in armaments as a whole.

This personality explained that France desired to hasten general reduction in armaments and hoped that delegates would even be able to submit a draft treaty to the September assembly of the League of Nations, thus permitting an international conference by 1930. This would involve a second session of the preparatory disarmament commission during the present summer, until which time he thought the naval question had better be adjourned.

A CHARMING PRINCESS

Princess Ingrid, only daughter of the Crown Prince Gustaf Adolf, of Sweden, whose engagement to the Crown Prince Frederick, of Denmark, has been reported from Stockholm.

Answers King's Message

Viscount Willingdon Sends Reply On Behalf Of Dominion

Ottawa.—On behalf of the Canadian people, His Excellency Viscount Willingdon, governor-general of Canada, despatched a message to His Majesty King George, expressing joy over the "glad tidings" contained in the affectionate cable sent by His Majesty to his subjects throughout the Empire.

The message follows:

"Your Majesty's word will be received with the greatest joy and gladness by your loyal people of Canada on whose behalf I beg very respectfully to thank you for the glad tidings contained in your beautiful message. During the past months we have been filled with anxiety and sympathy over your majesty's serious illness. We can now rejoice that your majesty is well on the way to recovery and that her majesty has been relieved from the strain of anxiety which has enlisted our deepest sympathy. We trust before long to have the opportunity of joining with all your majesty's subjects throughout the Empire in a prayer of thanksgiving for your safe recovery and in a profound hope your majesty may long be spared to reign over your loyal and devoted subjects."

Succeeds Lord Revelstoke

Paris.—Sir Charles Addis, director of the Bank of England, and noted English financial expert, has been appointed to succeed Lord Revelstoke as head of the British delegation at the conference on reparations. Lord Revelstoke died suddenly on April 19, wearied by the commission's abortive attempts to reach some settlement of the tangled problem of German payments.

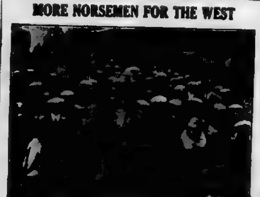
Gibson's Proposals

Geneva.—It was understood here that Ambassador Hugh S. Gibson, American spokesman at the preparatory disarmament conference, would prepare a memorandum outlining United States disarmament proposals and hand this later to delegations of the great powers.

British Election In May

London, England.—Premier Baldwin announced in the House of Commons recently the prorogation and dissolution of parliament for May 10, nominations for seats in the House on May 20, and polling on May 30.

MORE NORSEMEN FOR THE WEST



This photograph was taken at Winnipeg after the arrival of the first immigrant special train this season, over the Canadian National Railways, March 20. There were 206 broad-shouldered Scandinavians in a total of 369 arrivals, which included 22 British settlers. Two trains, which followed the first special a day later, brought the total of new-comers up to nearly one thousand. At least half were Scandinavians. All the immigrants have been placed by the Canadian National Railways' Colonization Department.

Germany Wants Aerial Bombs Abolished

But Objections Were Raised By Several Countries

Geneva.—The German proposal to abolish the use of aerial bombs in warfare was defeated before the League's preparatory commission on disarmament. Only five countries were in its favor—Germany, Sweden, Holland, China and Russia. Those against it, including Canada, the U.S. and Great Britain, registered their objections with a rider that a negative vote was not to be interpreted as in any way authorizing the use of aerial bombs against civil populations.

Count Von Bernstorff, of Germany, pointed out the toll that could be exacted by bombing planes over Paris, Berlin and London, and said that this method of warfare was horrible and cowardly, because the combatants were protected by defensive appliances.

F. Sokal, of Poland, said no one would deny the horror of such methods but the conference had not reached that point and under the Kellogg anti-war pact was not likely to reach it. When war had been outlawed, it was illogical to begin codifying rules of war, he remarked.

M. Litvinoff, of the Soviet, here interpolated that Poland was among those who last year rejected the Russian proposals for complete abolition of armaments.

Agrees With Gibson's Speech

British Government Shares Wishes Of U.S. On Disarmament

London, England.—Sir Austen Chamberlain, British foreign secretary, told the House of Commons that the British government shares fully the hope and wishes of the United States government on disarmament as set forth in Ambassador Gibson's speech at Geneva.

"The government desired me to take this opportunity to express its warm appreciation of the cordial conciliatory spirit shown by the American delegates and give assurances on its behalf that in the same spirit and with the most earnest wish to reach a complete understanding, it will consider the American suggestions," declared Sir Austen.

Sir Austen made his statement in answer to a question by Commander Joseph Kenworthy, Labor, whether Ambassador Gibson's speech had been called to his attention and what response his majesty's government proposed.

ANTI-SMUGGLING TREATY MAY GO TO ARBITRATION

Washington.—Terminating the diplomatic correspondence on the "I'm Alone" sinking, Canada replied to the United States rejoinder to the protest against the sinking by coast guards' gun fire on the high seas, of the Canadian schooner suspected of conspiracy against American liquor laws.

Hon. Vincent Massey, the Canadian minister, delivered to Secretary Henry L. Stimson, a note which is expected to reveal the Dominion's attitude to the "I'm Alone" case in particular, and the scope of the anti smuggling treaty of 1924 in general.

It is generally accepted here that the United States wants the case to go to arbitration. It is expected Canada will accept. Arbitration probably will proceed under the provision of the 1924 treaty itself, which leaves any dispute over the seizure of a ship to a tribunal composed of representatives of both countries.

Because of the whole question of the right of "hot and continuous pursuit," under the treaty will be involved the importance of the negotiations will transcend the single case of the "I'm Alone."

The British government is sitting back and letting Canada fight the case because the ship is of Canadian registry. But the decision will affect some far-reaching questions of territorial waters, and United States rights under the special treaty to claim the 12-mile limit specified in its own tariff act.

The treaty was signed by Great Britain, and technically London would have the right to say who would represent the British Empire on the arbitration board. It is likely that some prominent Canadian will be appointed, however, and he will serve for the Empire.

It is suggested here that the former secretary of state, Frank B. Kellogg, may represent the United States.

H.B. STRAITS ARE OPEN FOR FOUR MONTHS OF YEAR

Ottawa.—Hudson Strait will be safe for navigation for at least four months in the year. The report of the Hudson Strait expedition for 1927-28 tabled in the House of Commons gives the probable period as from the middle of July to the middle of November.

In his report N. B. McLean, officer in charge, says in part:

"Taking July 19 as the opening date for the Strait, and November 16 when ice was first reported at Nottingham in 1927, as the closing date, we get a season of 120 days or practically four months, during which commercial vessels could have navigated with safety and without assistance of ice breakers."

A further indefinable period would be added, he continues, with the use of ice breakers.

Some doubt is expressed in the report that two years' observations are sufficient on which to base any accurate statement on the length of the navigation season.

The extremes of temperature are given as 18 degrees Fahrenheit below zero at Nottingham in January, and 50 degrees above zero in July at Wakeham Bay.

Fog was noted on 39 days and on 14 of these it was dense. Many icebergs were seen. They drifted down through Davis Strait, were carried west along the north shore by the current and eventually met the easterly current on the south shore which took them into the Atlantic.

Three direction finding stations in addition to those at Cape Hope Advance, and Nottingham Island are recommended, and two ice-breakers, one based at Port Churchill and the other at a suitable harbor in the strait.

"The knowledge that an ice breaker is available if necessary," the report states, "gives confidence to masters, owners and shipping interests generally."

Other recommendations deal with charting the strait and providing a fuel base.

Observe Anzac Day

Australia Commemorated Landing Of Troops At Gallipoli

Sydney, N.S.W.—Anzac Day, set aside to mark the famous landing of the Australians and New Zealand troops at Gallipoli with the aid of strong naval forces on April 25, 1915, was fittingly commemorated in Australia and New Zealand. The outstanding New South Wales feature was the march of 20,000 ex-service men at Sydney.

At Canberra, the Federal capital, an impressive memorial service was attended by Premier Stanley Bruce and his cabinet, while Lord Stonehaven, Governor-General of Australia, unveiled the commemoration stone of Australia's war memorial which will cost $1,250,000.

Typhoid Fever At the Pas

Serious Epidemic Believed To Be Caused By Water

The Pas, Man.—Active measures to stamp out the outbreak of typhoid fever, which already has taken a toll of three lives, and stricken more than a score of persons in the little northern railway town at Mile 327, on the Hudson Bay Railway, are under way. Four doctors now are in the town; all residents have been inoculated, and the water supply has been chlorinated. Impure water is believed to have caused the epidemic.

Twelve of the stricken residents of the town have been conveyed to hospital in The Pas, while eight others are confined to the little hospital at Mile 327.

Organize Wheat Pool

Lincoln, Neb.—Wheat-raisers of Nebraska and Wyoming to the number of 200 have effected organization of a wheat pool giving it the name of the Middle West Market Association, non-stock co-operative. The Pool was said to represent 13,000 grain raisers in the two states and was declared to be the largest in the middle west.

Air Survey Completed

The Pas, Man.—Arriving here, Captain Charles Sutton, pilot and party have just completed an 8,000-mile aerial voyage which took them into the northern wilds, far beyond Fort Churchill. Motion pictures of the northern scenes and of the inhabitants, the Eskimos, were taken. This was the main objective of the journey.

THE SOW AT FARROWING TIME

(Experimental Farm notes)

The practice at the Dominion Experimental Station, Lacombe, is to raise two litters of pigs a year. In order to do this successfully it is necessary to arrange the farrowing dates in the spring and the fall so that the young pigs will not be subjected to severe weather conditions. We endeavour to have the fall litters farrowed by September 15 so as to have the pigs well developed and able to stand cold weather by November. In order to have the pigs born from the 1st to the 15th of September the sow must be bred between May 10th and 25th. If she is to wean her litter before being bred she must farrow during the latter part of March or early in April. This means that she would have to be bred for spring farrowing during the first two weeks in December of the preceding year.

A record should always be kept of the service date of all sows in a herd so that the date of farrowing will be known in advance and the necessary precautions taken. Many pigs are lost every season because no breeding dates are kept and the pigs are farrowed unexpectedly in an unfavourable place.

About ten days before the sow is expected to farrow she should be put in a clean, dry and reasonably warm farrowing pen so that she may become accustomed to the surroundings. A small amount of bedding preferably cut straw, should be left in the pen. The heavier and fatter the sow, the less amount of bedding. A fender placed about ten inches above the floor and eight inches away from the sides of the walls saves many pigs from being crushed by heavy sows.

In feeding brood sows just before they farrow, one of the principal points is to keep the bowels open and avoid a feverish condition. A good ration to feed the sow at this time is 3 parts bran and one part of oat chop fed as a slop.

About 24 hours before the sow farrows there will be milk in her udder and she will be nervous and uneasy and she should not be annoyed unnecessarily. An attendant should be on hand at the time of farrowing but should interfere unless necessary. If the building is cold some warm bricks and some blankets will prevent the little pigs from becoming chilled.

The first feed for the sow after farrowing should consist of a warm slop composed of middlings and water. Do not give cold water for at least 24 hours. The ration should be increased gradually with the milk flow of the sow as rapidly as the litter is strong enough to take it. Usually the sow can be on full feed by the end of ten days.

One of the very best meal rations for a sow during the suckling period is equal parts by weight of bran, middlings or shorts and ground oats supplemented when possible with a limited quantity of sweet skim-milk. Sour skim-milk or sour buttermilk should never be fed to a sow nursing a litter as it has a tendency to cause digestive disorders in the young pigs. The bran in the ration at this time is especially valuable as it keeps the sow from becoming constipated, a condition which must be guarded against if she is to suckle a good, vigorous, thrifty litter.

A constipated condition in the sow will invariably cause heavy losses in the young pigs and those that survive will tend toward being stunted and thick as they develope. Both sow and litter should have ample space for exercise. This will benefit the physical condition not the sow and prevent the young pigs from getting thumps and also promote rapid growth and proper development.

FLIES OR BABIES WHICH?

The above arresting title to a brief but a very telling little pamphlet issued by the Metropolitan Life Insurance Co. gives a very real meaning to the "Clean Up" week which is being urged on all communities at this season.

Filth and garbage of all kinds accumulate during the winter months. With the coming of the warm days the house fly appears. It is born in filth, and lives in filth and when not busy on butter, milk or the baby's bottles, is feeding in filth.

It is estimated that flies are responsible for more deaths than any single known disease. Babies are its particular prey since the infantile diseases are carried largely by the pest. Get rid of it by cleaning up all filth and garbage. Make a habit of burning all refuse. Give it no chance to breed. Screen doors and windows at the first hint of warm weather.

For literature on the summer care of babies send to the Canadian Red Cross Society, 407 Civic Block, Edmonton, Alberta.

A Good Many Do

QUITE FREQUENTLY as a "filler" line we run the sentence "Please Renew Promptly." We have this sentence good humouredly brought to our attention frequently, when one subscriber or another pays his or her subscription.

In a few days we will be sending out notices to all those whose subscriptions have expired and we hope to have a good response.

The "local" newspaper is a tradition of the North American Continent. At no other place in the world are type and presses assembled to serve so few people. People here call for their "local paper" and desire to know the everyday affairs of the town and district in which they live.

A new baby arrives and his arrival is chronicled in the local newspaper. A valued and respected citizen passes and his praises are printed in the local paper. Brown's, Smith's or Jones house burns down and the local paper reports it. Somebody's hen lays a very large egg; somebody's cow gives an extra quantity of milk; somebody's pigs grade extra special and the news is spread throughout the district by the local paper. All ordinary and extraordinary things of life find their way into the columns of the press. Not so big and bulky as the city newspapers; not so many columns of type, but much more intimate to the people it reaches is the local sheet.

We hope to retain all our present subscribers and add new ones to our list. When you receive the notice regarding your subscription, please give it attention. In most cases the amount is small to the subscriber but these small amounts in the aggregate is quite a sum to the publisher.

As your paper comes out week by week, read the advertisements. By trading with our advertisers one can frequently save more than the price of the paper.

[illegible] stand on reparations tends toward a new war, George Clemenceau, war time premier of France, said in an interview published in the Echo de Paris.

Financial conditions in the British West Indies are not very good at the present time, owing to the low price for sugar, according to Right Hon. F. A. Anglin, P.C., chief justice of Canada.

A special train recently carried 170 prisoners from Portsmouth penitentiary, Kingston, to penitentiaries of Western Canada. Seventy prisoners were exchanged to the provincial penitentiary of Manitoba and the remainder went to Saskatchewan.

Ching Ming King, Chinese, convicted on a charge of unlawfully importing opium into Canada, was sentenced to six years in the penitentiary by Mr. Justice D. A. McDonald, presiding at the spring session of the Nanaimo assizes.

An application by the Canadian attorney general's representative to the privy council to fix June 17 as the date for hearing of an appeal concerning the validity of the Canadian fisheries act was opposed [illegible] half of the provinces of British Columbia and Quebec.

Peeved because of asserted rudeness by American immigration officials at Vancouver, B.C., Sir Rabindranath Tagore, noted Hindu poet and philosopher declined to leave his ship, the liner Taiho Maru when she docked at San Francisco en route to Japan.

Increase In Gold Supply

Was Greater By Sixty-One Million Than Amount Minted In 1928

Gold holdings in the United States at the end of 1928 were reported by the federal reserve board in the April issue of its bulletin to have been 37.6 per cent. of the world's total, which amounted to $9,961,000,000.

The total gold supply was compiled from reports transmitted to the board from 40 countries and shows that the increase in gold of $444,000,000 in a year was greater than the amount of gold minted during the year by about $61,000,000. The increase was made the report said even though about $80,000,000 was absorbed by Great Britain and an unknown amount taken away for industrial consumption.

The bones of an average man weigh twenty-five pounds.

Airplane On Submarine

Big Innovation Has Been Added To Italy's Newest Craft

Italy's largest and best equipped submarine, the Franco Toti, has been launched at the dockyards at Taranto, Italy. The submarine has two 2,000 horsepower Diesel engines of special designs which can be used separately or together and which give a surface speed of 19 miles an hour. Two electric motors of 1,000 horsepower each propel the submarine at a speed of ten miles an hour under water.

The submarine's artillery is one anti-aircraft gun and several machine guns. The submarine is to carry a seaplane in a large tube adjoining the turret, a big innovation in submarine technique. The tube is able to resist over 300-foot depth water pressure.

THESE SIMPLE RULES MAKE TEETHING EASY

Be careful of Baby's diet during teething. Do not overfeed him. Watch his stomach and bowels and at the first sign of indigestion, gas or constipation, give him a few drops of harmless, pleasant-tasting Fletcher's Castoria. These simple rules are making teething easy on millions of babies—and mothers, too. For over thirty years Castoria has been the trusted standby of mothers everywhere. It soothes wakeful, cross babies to sleep quickly and easily—and it's purely-vegetable so you can give it as often as needed. It does the work of castor oil better and more gently. For your protection, the bottle of genuine Castoria always bears the Fletcher signature.

Draws Attention To Peace River District

Has Room For 2,000,000 People Says Major-General McRae

Major-General A. D. McRae will again draw the attention of parliament to the colonizing possibilities of the Peace River country. His visit to that area last year has more than confirmed his previously expressed opinion that 2,000,000 people can find homes for 400,000 farms of 240 acres each. General McRae will urge greater railway facilities, modern methods of preparation of scrub land and a national colonization and settlement policy extending over ten years.

Minerals In Alberta

Alberta is famous for its vast resources of coal, for the rapid development of its oil and gas resources, and for the extent of its unique deposits of bituminous sands.

The oldest steamship in the world is said to be the barque "Constance," built in 1771, and now in use as a training ship at Copenhagen.

Canada's Forest Products

One freight car in every six in Canada is loaded with forest products.

Soldiers' Settlement

31,300 Veterans Have Been Settled On Farm Lands

Veterans to the number of 31,300 have been settled on farm lands with and without loans, under the Soldiers' Settlement Act, according to a report tabled in the House of Commons. No fewer than 6,683 of these men established themselves without financial assistance from the Government. More than 6,000,000 acres in all, at an average price of $10 per acre, have been bought or homesteaded by the Vets.

SUNDAY SCHOOL LESSON

MAY 5

WHAT HILKIAH FOUND IN THE TEMPLE

Golden Text: "Thy word is a lamp unto my feet, and light unto my path."—Psalm 119.105.

Lesson: 2 Chronicles 34.1-33.

Devotional Reading: Psalm 19.7-14.

Explanations and Comments

The Temple Repairs Which Led To the Finding Of the Book Of the Law, verses 8-13.—When twenty-six years of age, Josiah turned his attention to the ruined temple and had it repaired. He placed in charge of the work the governor of Jerusalem, the official secretary and the official historian. They handed over to Hilkiah, the high priest the money which the people brought to the temple and gave to the Levites who were appointed to receive it. The overseers were Levites; other Levites encouraged the workmen with music, yet other Levites were scribes and officers and porters. The work was done faithfully and progressed rapidly.

The Finding Of the Book Of the Law, verses 14-16.—During the work upon the temple, Hilkiah, the [illegible] found the book of the law of [illegible] given by Moses. This is believed to have been the legal portions (chapters twelve to twenty-six, and chapter twenty-eight) of our Book of Deuteronomy, which calls itself "The Book of the Law" and also "The Book of the Covenant." [illegible] scholars believe that this had been long known, but had been forgotten during the idolatrous reigns of Manasseh and Amon, and Hilkiah found the copy in the temple and read it to Josiah for the first time. Others hold that it was "a new and enlarged edition of the Book of the Covenant prepared for the needs of the times and brought forth now because Josiah was a righteous king and would enforce its decrees." Dr. George Adam Smith points out that it is precisely from this time onward that the style and phraseology which are characteristic of Deuteronomy begin to affect the literature of Israel.

The Effect Upon Josiah Of the Reading Of the Book Of the Law, verses 17-21.—After telling the king that the work upon the temple was progressing well, the money having been given to the overseers and the workmen put at work, Shaphan spoke about the newly discovered book and read it aloud (the entire roll, according to 2 Kings 22.10). On hearing the words the king rent his robes in token of his troubled mind. "For," [illegible] said, "great is God's wrath against us, because our fathers have not done as this book commands." If we would see the effect the book must have had upon the susceptible soul of Josiah, we are advised to read chapters 28-30 of Deuteronomy ourselves with Josiah and his times in mind. The book contains explicit directions as to worship and conduct, and the penalty of national disobedience decreed was the loss of home and country. "For many generations warnings and [illegible] had been neglected, and when the day of doom should come, the sins of the fathers also would be visited upon the children. Could the doom be averted by speedy and complete obedience and penitence?"

"It is not enough to read our Bible. Its messages must be heeded. Learn and observe these words found in an old Bible:

When thou readest what here is writ,
Let thy best practice second it;
So twice each precept read shall be—
First in your books and next in thee.

The Care Of Books

Many women who take beautiful care of their clothing and their kitchen utensils, their linen closets and their refrigerators, are careless about those choicest treasures of the home—the books. We are all apt to stick books away in bookcases or on open shelves and forget all about them except to which an occasional duster along the fronts of the [illegible].

Books need just as much care as rugs, household linens, and fine leather shoes, if they are to enjoy long life and keep their shape and their freshness. Dust accumulates on book shelves almost more quickly than anywhere else in the house, or at least it seems to, perhaps because there are so many edges exposed to the sweeping dust particles.

The light wool or feather duster should be used daily, and, at least once a month, every book in the house should have individual care. Take it down and wipe off the cover and the tops and sides of the pages. Many little-used books have a yellowed edge of dust along each page, which could be avoided if they were wiped off frequently. If you have choice leather-bound books in your collection, whether sheepskin, calf, or morocco, give them a light coating of pure neatsfoot oil once a year, to preserve the leather.

Keep all books out of the direct rays of the sun. This dries out the glue and tends to loosen the binding and will dismally fade all of the colored cloth covers. Another way to keep books in good condition is to see that they stand upright at all times, whether between the book ends or on the shelves. A book tipped sideways gets its covers pushed out of shape and tends to come apart. If books do not support each other by standing close together, a small japanned book end may be inserted here and there on the shelves.

The way a new book is opened has much to do with its future health. By opening a few pages at a time and gently pressing them back, the books will not be broken nor will the glue and the stitching be strained. A book that is grabbed and cracked open violently may be permanently injured.

Make Your Priming Coat

By a primary coat is meant the first, or primary, coat of paint or varnish on any surface of wood, metal or plaster. The first object of the priming coat is to stop most of the suction, present to a great extent in wood and plaster, so that the finishing coats will stand out with a uniform degree of gloss, or, in the case of flat-wall paint, with a uniform degree of flatness.

In this connection, please note that no such uniformity can be obtained until the porous nature of the surface, or suction, has been satisfied. In the case of metal surfaces the degree of suction, or porosity, is far less noticeable, therefore, such surfaces will naturally call for a different priming treatment.

The second object to be aimed at in the first class priming coat is a proper degree of penetration of the face, so that the paint will to the greatest possible extent become a part of the surface—not merely so much pigment and oil spread out on top of, and insecurely bound to, the surface.

Bearing these objects in mind, the salesman will readily understand that a thick priming coat cannot possibly be a good priming coat. Why? Take the first object outlined above. If a thick priming coat is applied on wood or plaster the porous nature of the surface will suck away most of the oil from the paint, which, mind you, needs just this quota of oil to bind it and form a good film. The result is, that instead of having stopped the suction, you have merely superimposed another surface, porous in nature because it has been deprived of too much oil and insecurely bound to the surface for the same reason—and that also kicks the props from under our second support—the second object.

So we arrive at the natural and logical conclusion that priming coats on wood and plaster must be thin coats—it is almost impossible to get them too thin. If a priming coat can be said to be too thin, such a claim can only be advanced from the covering or hiding viewpoint,—a defect which can be easily remedied by an additional coat. But if too thick a priming coat is applied, a dozen coats will not cover up the blunder, because it will be exposed by the almost inevitable result—peeling of the paint from the surface.

When in doubt — thin priming coats.

Literature On Farming

Some Must Turn Deaf Ear To Educational Matter Supplied

When one reads of the poor methods that are used in farming by a number of men who are engaged in that profession, one is tempted to wonder whether the enormous [illegible] of educational matter that is being run from presses and the multigraphs by the department of agriculture is reaching the proper quarters, or whether the farmer turns a deaf ear to the good advice and goes on [illegible] dirty seed, his scrub herd, his runty shoats and his unprofitable poultry run, out of sheer cussedness.

Tallest Building

Construction has begun on the Marine Building in Vancouver, which, when completed, will be the tallest building in Canada west of Toronto, towering 18 storeys above the northwest corner of Burrard and Hastings Streets.

Dora (to Freshi): "Do you know who I am."

Fresh: "No, I don't, but if you can remember your address, I'll take you home."

"Have faith in your fellow man," says a paragraphist. But be sure you get his signature on the dotted line.

When Pain Comes

What many people call indigestion very often means excess acid in the stomach. The stomach nerves have been over-stimulated, and food sours. The corrective is an alkali, which neutralizes acids instantly. And the best alkali known to medical science is Phillips' Milk of Magnesia. It has remained the standard with physicians in the 50 years since its invention.

One spoonful of this harmless, tasteless alkali in water will neutralize instantly many times as much acid, and the symptoms disappear at once. You will never use crude methods when once you learn the efficiency of this. Go get a small bottle to try.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

Make Sure Your Fence Is FROST TIGHT LOCK!

Your fence requirements on the ranch are no small item; you want your fence to last a lifetime. Put your faith in Frost Fence; more than 25 years of square dealing with the farmer are behind it. There is only one Frost Fence, only one Frost [illegible] the lock that HOLDS ... all Western conditions of strain and extremes of temperature.

If there is no Frost dealer in your neighborhood, write to our nearest office.

CHAPTER XVIII.—Continued

Donald's heart ached for this man, whose great love for his wife was as passionate at this moment as when she was living. "How he loved her!" he thought.

When Wainwright spoke again his voice was spiritless. "You are the first person to whom I have spoken of my past; even Constance does not know." As he turned to leave Donald gripped his hand in silence, but with a pressure eloquent of heart-felt [illegible].

Andy had noticed Donald's increasing interest in Connie and had wisely refrained from accompanying him on his nightly visits. On this particular night Donald came into the kitchen whistling a lively air, his face wreathed in smiles. He slapped Andy heartily on the back as he asked him for a lunch. His gaiety was so pronounced that Andy studied him closely.

"You look 'appy, Donnie," he remarked.

"I am, Andy; I'm the happiest man in the world."

He finished eating, then sat staring dreamily at the smoke of his cigarette as it circled about his head. Andy discoursed lightly on various subjects, but Donald did not seem to hear him. After he left Andy heard him singing merrily in his cabin.

"Strike me pink, but I do 'ope Donnie has waked up! What a pair, what a pair!" he said to himself.

In the morning Donald rode north on the gas-car to the scene of logging operations near the upper lake. He left orders with the men to bring Wainwright's baggage to the station. What Connie's absence would mean was brought forcibly to him as he met the trapper leading Pegasus and her pet deer down the trail to his cabin.

Two hours later Connie and her father stood on the station platform. Connie was dressed in an inexpensive blue suit, and wore a neat blue hat with a jaunty feather. Her golden hair was piled high in loops and coils that held a sheen of brightness like the shine of metal where the sun touched it. She appeared mystified and confused as the time for the train to pull out drew near. Andy, standing by her side, cursed softly as he saw her looking toward the mill, a look of poignant disappointment in her eyes.

"Donald 'ad to go up the line, Connie; guess somthing 'as 'appened," he mumbled.

At that moment Donald was heaping opprobrium on a recalcitrant gas-car that had died on his hands.

The conductor called "All aboard!" Connie turned to Andy. "Good-bye, Andy," she said sweetly, her eyes swimming with tears.

Andy took her gloved hand. "Good-bye, Connie," he returned, attempting a brave smile. "When are you coming back?"

"Maybe never." She choked as she stumbled up the car steps.

As the train started to move Connie came to the rear platform. A small, pathetic figure she seemed to Andy as she strained her eyes toward the north in a vain hope that she would see Donald. Andy stood in the centre of the track waving his hat until the flutter of Connie's little handkerchief vanished around a curve.

As the train roared through the cut, the last view of her loved valley flashed before her eyes. Her face strangely white, she clung to the brass rail and gazed with tearful eyes at the only home she had ever known.

As they passed the trapper's cabin, the noise of the rushing train sent Pegasus galloping madly about the pasture. With flying hoofs that tore up the sod he circled around the field, then came to the fence and with his beautiful head held high on the arched neck he looked with startled eyes at the speeding train.

With a gesture intensely eloquent, Connie flung out her arms. "Good-bye, Peggy! Good-bye!" She found her way to a seat and covered her face with her hands.

Donald flung himself from the gas-car before it had ceased moving. "Train gone, Andy?" he shouted.

Andy stood with arms folded. "Gone?" he yelled, "of course it's gone. Why in 'ell wasn't you 'ere?"

"I had to go up the line to look over some logs, and the car broke down," replied Donald bitterly.

"Of course," Andy with withering sarcasm, "the timber couldn't 'ave waited another day."

"Andy," asked Donald excitedly, ignoring the remark, "did Connie leave you her address?"

"Why the 'ell should she give me 'er address? Aren't you 'er address?" was Andy's unaccommodating reply.

"No, I haven't. I know that they are going to England, and that is all."

Donald sat down dejectedly.

Andy's face softened. "Do you [illegible]?" he queried.

"Like her? I love her!"

"In that case I don't see 'ow she didn't let you know where to find 'er," puzzled Andy.

"She doesn't know that I care for her," said Donald gloomily.

Andy's mouth opened. He seized Donald by the shoulder. "Do you mean to tell me that you let that girl get away from you without letting 'er know hat you wanted 'er?" he demanded incredulously. "Strike me 'andsome," blazed Andy, "of all the blinkin' mutts in this 'ere world—you—you——" Speech failed him for a moment. "You let that dear little girl go away broken-'earted."

"Andy," interrupted Donald eagerly, "do you think Connie cares for me?"

For a moment, as he looked into his friend's face, Andy was tempted to tell him of the scene after his fight with Hank. But the promise to Connie sealed his lips.

"'Ow the 'ell should I know?" he mumbled. "But," he added with fine sarcasm, "if bone was ten cents a cubic foot you'd be a multi-millionaire, you blinkin' pie-eyed nincompoop—you—you——" He clapped a tragic hand to his brow. "You give me a 'eadache," and muttering to himself, he trudged up the hill.

The next day Donald went to Vancouver. He scanned the registers in hotels, inquired at docks and depots, but no traces of the Wainwrights could he find. He walked the streets with a forlorn hope that he might meet them. The hearts of many slender golden-haired girls were set fluttering that day as a tall, handsome young man subjected them to a close scrutiny.

Two days later he returned to the lake. That night he switched off the light and sat by the open window looking out on a night of stars, with a new moon making a ghostly light on the lake. An owl's mournful hoot was answered by the uncanny cry of a heron. The faint sighing sound of streams in distant gorges became a haunting chorus to this dust. He thought of Connie's cabin up the mountain, now cold and dark. How he would miss her! What an idiot he had been not to have known long ago that he loved her. He knew now that he had loved her from the first. Dear little Connie!

Donald walked the floor until midnight. Once in bed, he tossed restlessly until the early morning, then fell into fitful sleep in which he dreamed of a small, winsome face and big blue eyes surrounded by a wealth of golden hair.

September with its days of mellow sunshine passed. October brought heavy hoar frosts that covered the earth with a robe of diamonds, and formed ice in the small pools and marshes. Winter comes early in the mountains. In mid-winter the valleys between the peaks of the Coast Range will have five feet of snow when, a few hundred feet below, where the warm waters of the Pacific lap the gentle slopes, the grass is green and there is none of the chilly whiteness that mantles the towering hills above.

There came a day in November when the air held a solemn stillness. The firs and pines pointed straight to the sky without a quiver in their branches. The brown earth seemed to say, "I am ready." The cry of the loon in it had a dreary sound, a note which seemed to say that winter was coming. Squirrels working in the tops of big pines increased their efforts. The cones, nipped off by their sharp teeth fell pattering to the ground, to be garnered by these busy little workers and secreted in their nests in hollow trees. The bear of the hillsides ate the frozen berry or the pulp of rotten log to cleanse its stomach before starting its long winter sleep in windfall or cave. Thus does Nature give to the wild things of the forest an instinct unknown to man.

(To Be Continued.)

The longest railroad run is from Riga to Vladivistock 6,800 miles.

Minard's Liniment relieves pain.

To Check "FLU," Grippe

Fights the Germs in the Throat Before They Invade Other Parts of the Body.

EFFECTIVE PREVENTIVE MEASURES EXPLAINED

Simple precautions taken now will enable you to fight dreaded "Flu" which is sweeping rapidly through the whole country. The germs of Influenza gain access to the body through the mouth and throat. Keep the throat healthy and you go a long way towards stopping the trouble.

Milk Exports

Canada exported over nine million dollars worth of milk and its products for the twelve months ended February 28, 1929, an increase of three million dollars over the previous corresponding 12 months.

A GREAT PUZZLE TO CAREFUL PARENTS

One of the greatest puzzles to the careful parent is to know just what medicine to give the little ones. When the child falls ill with griping pains; is seized with cold or fever, refuses food or vomits what he has taken, when he cries a great deal and cannot get the sleep so necessary to the growing child, the parent is in a quandary. What is to be done on such occasions? As often as not there is not a suitable medicine in the house. The puzzle is what to give him to set him right quickly.

It is to meet such emergencies that Baby's Own Tablets were designed. These pleasant little Tablets quickly reduce fever, break up colds, relieve constipation and indigestion and allay teething pains. They quiet the nerves and promote restful health-restoring sleep. They are guaranteed absolutely harmless and safe for even the youngest and most delicate baby.

Baby's Own Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Lobster Industry In Canada

Lobstering is a distinctive industry. In 1870, there were three lobster canneries on the Atlantic coast of Canada; in 1927 the canneries numbered 436, and gave work to 6,180 people; 30,000,000 lobsters is a normal catch.

An Oil For All Men.—The sailor, the soldier, the fisherman, the lumberman, the out-door laborer and all who are exposed to injury and the elements will find in Dr. Thomas' Eclectric Oil a true and faithful friend. To ease pain, relieve colds, dress wounds, subdue lumbago and overcome rheumatism, it is excellent. Therefore, it should have a place in all home medicines and be amongst those taken on a journey.

New Author: Could you use my story if I were to boil it down?

Editor: No chance. Boil down a gallon of water to a pint and it would still be water, wouldn't it?

Little Helps For This Week

"I know the thoughts that I think toward you, saith the Lord, thoughts of peace and not of evil, to give you an expected end."—Jeremiah xxix. 11.

His perfect plan I may not grasp;
Yet I can trust Love Infinite,
And with my feeble fingers clasp
The Hand which leads me to the light.
My soul upon His errand goes;
The end I know not, but God knows.

Every human soul has a complete and perfect plan cherished for it in the heart of God,—a divine biography marked out which it enters into life to live. This life, rightly unfolded, will be a complete and beautiful whole, an experience led on by God and unfolded by His secret nurture, as the trees and the flowers by the secret nurture of the world. We live in the divine thought. We fill a place in the great, everlasting plan of God's intelligence. We never sink below His care, never drop out of His counsel.—Horace Bushnell.

Weather Heads the List

Stratford Editor Finds It Most Widely Read Article

What is the most read section of a newspaper? Sports writers will say their page is; editorial men will press the claims of the editorial page, reporters will be certain to assert that they have first place with local stories, while we have no doubt that the lady editors will be quick to claim precedence for the women's page.

All wrong. One day last week the weather, through an error, was left out of the paper, and we had more calls over the omission of that little item than anything else that has ever happened.

An Oil That Is Prized Everywhere.—Dr. Thomas' Eclectric Oil was put upon the market without any flourish over fifty years ago. It was put up to meet the wants of a small section, but as soon as its merits became known it had a whole continent for a field, and it is now known and prized throughout this continent. There is nothing equal to it.

Preservation Of Eskimo

Tribute was paid to the Dominion Government, the Royal Canadian Mounted Police and the Hudson's Bay Company, for the splendid work being done for the preservation and the well-being of the Eskimo, by Ven. Archdeacon A. L. Fleming, appointed recently to take charge of Anglican mission work in the Arctic.

Minard's Liniment—good for tired feet.

Many railways in Germany are being electrified.

IT'S folly to suffer long from neuritis, neuralgia, or headaches when relief is swift and sure, thanks to Aspirin. For 28 years the medical profession has recommended it. It does not affect the heart. Take it for colds, rheumatism, sciatica, lumbago. Gargle it for a sore throat or tonsilitis. Proven directions for its many uses in every package. Every drug store has genuine Aspirin which is readily identified by the name on the box and the Bayer cross on every tablet.

ASPIRIN

Aspirin is a Trademark Registered in Canada

Capital Invested In Irrigation

Construction costs of ten major irrigation projects, now operating in southern Alberta amount to about $31,800,000, or an average cost of approximately $31 per acre for the area of slightly more than one million acres.

Corns cripple the feet and make walking a torture, yet sure relief in the shape of Holloway's Corn [illegible]

Floorwalker (rebuking assistant for contradicting a customer): Miss Jones, remember, in this establishment the customer is always right."

Miss Jones: "Well, sir, she said you were an old shark."

COMPLEXION IMPROVED ... QUICKLY

Get rid of that pasty, sallow, blemished complexion! Instead of spending many dollars on fancy creams and skin lotions, buy a 25c pkg. of Carter's Little Liver Pills and remove the constipation poisons. Your skin will be quickly cleared, and your health improved. All Druggists 25c and 75c red pkgs.

The super feature "Ben Hur" drew a big house at the Variety on Saturday night last. The Friday night house was not as good as hoped for. The feature was well liked and generally voted the best film production seen here for a long, long time.

Many new and bright cars are to be seen on the streets these days. The popularity of the new car never appears to wane, and the thrill of driving a new "bus" is as great as ever.

Save a date for "The Trail of 98."

Hockey fans of Tofield and district will be pleased to learn that Archie Pruden, at one time star of the Tofield Hockey Club, has recently finished a season of hockey at High River. Here he was a member of the High River team which won the senior amateur hockey championship of Alberta this year. Hockey fans of Tofield will remember Archie's "wicked" shot and his speedy back checking.

Word has been received that Mr. John Lee has sold his business to Mr. F. O. Ball. This includes the harness and leather goods, and building. Mr. Lee will retain the grain business.

Many people of the town are busy of an evening raking and cleaning their yards. The accumulation of winter refuse is being cleared away as fast as weather conditions permit.

Everything

you want or need in a modern automobile

FORD

UNTIL YOU ride in the Ford car, share its comfort—know the thrill of guiding it easily and safely through thickest traffic or stepping it up on the open road, you cannot begin to appreciate the value that has been built into this car.

It is difficult to believe that so much beauty and comfort, safety, speed and power can be had at such a low price.

The low price of the Ford car and its exceptional performance are the result of manufacturing practices as unusual as the car itself. This car is more than a new automobile. It is the advanced expression of a wholly new idea in modern economical transportation.

For here at a low price, is everything you want or need in a car—beautiful low lines and a choice of colors, remarkable acceleration, 55 to 65 miles an hour, smoothness at all speeds; four Houdaille hydraulic shock absorbers, shatter-proof glass windshield, a low first cost and economy of operation and Ford reliability and long life.

Come in and let us demonstrate the performance of this car. You'll get a real thrill in driving it.

"THE TRAIL OF 98"

LOCAL AND PERSONAL

Born.—To Mr. and Mrs. Nels Myers, on May 4th, a daughter.

Rev. Father Morrison of Galahad, spent Thursday at the Foreman home.

Miss Marion Forman spent the week end at home.

Mr. and Mrs. Clements of Daysland, Alta., were visitors at the Hopgood home on Sunday.

The W.M.S. of the United Church will meet in the basement of the church on Thursday, May 16th, at 3.30 p.m.

Mrs. Punk of Edmonton is visiting her sister, Mrs. Barden of Tofield.

Mr. and Mrs. Lovel motored to the city last week, Mr. Lovel's aunt returning with them.

Mr. Ross and Mr. Eldridge motored to Kinsella on Sunday, taking little Bessie Brind home.

Mrs. McLean, Mrs. McClurg and Mrs. Webb were visitors to the city on Thursday.

Mr. and Mrs. Clutterham motored to the city on Sunday.

Mr. and Mrs. J. W. Chapman, Mrs. Emery and Mrs. E. Rogers motored to the city on Monday.

Mr. and Mrs. Cap Lee visited Camrose on Sunday.

Mr. and Mrs. Pincott and Mrs. Bissett motored to the city on Thursday.

Mrs. O'Harra visited the city on Wednesday.

Mr. and Mrs. Hobson motored to Edmonton on Monday.

Mr. J. Whyte, and Mr. J. Robinson motored to Vegreville on Saturday where they wrote examinations in connection with steam engineering. Bob Whyte and Bill Worton accompanied them.

CORNHILL MUNICIPAL DISTRICT COUNCIL MEETING

The third regular meeting of council, Municipal District of Cornhill, was held at the District Office, Tofield, on Tuesday, May 7th, 1929, commencing at 2 p.m. All members were present. Prior to the meeting and at 11 a.m., Mr. D. W. Ritchie representing the Department of Public Works, Edmonton, met the Council and apportioned the capital grant of $1400.00 and revenue grant of $2391.00 as follows:

Capital grant on district highways, $1400.00, municipal $1400.00, total $2800.00. Tofield north 4 miles, $1200.00, division 5 and 6. From N.E. 22-49-19, w4m $600.00. Division 1, south of section 2, 3 and 4-49-20 w4m, $1000.00. An amount of $800.00 being $400.00 from revenue grant and $400.00 from the district was allotted each division, making a total of $4800.00. Mr. H. C. Bellamy of the Alsask Chemicals interviewed the council as to the purchase of Weed Chemicals for the coming season. An order was placed for five 45 gallon drums for Tofield, and two 45 gallon drums for Kingman. It was decided to hold the Court of Revision for Annual Assessment on July 6th.

The triennial assessment was discussed at length, new assessments are to be made during the summer to be used in 1931.

The council passed a resolution to the effect that all road work performed by ratepayers must first be applied in full of all taxes before any cash is paid out. Meeting adjourned at 6 p.m. to meet again on Saturday June 1st, 1929.

SUNDAY "MOTHERS" DAY

On Sunday next, May 12th, people all over the American continent will honor their mothers, or the memory of their mothers. Specials services will be held in the churches and of Tofield, and special music and hymns will be sung.

LADIES' GOLF CLUB MEET

The ladies' golf club met at the home of Mrs. McLaughlin on Wednesday evening. It was decided to lower the fees to $3.00 per member, with the exception of teachers and high school students; teachers to pay $1.00 per month and high school students $1.00 for the season. All children whose parents do not pay are requested not to play. Members are asked to kindly pay fees as soon as possible so that the work on the two new greens may proceed at once.

LAKE SHORE

Mr. and Mrs. Walter Stumph and family of Camrose visited Mr. and Mrs. R. C. Phillips on Sunday.

Mr. and Mrs. Owen Eaton motored to Lamont on Sunday.

Mrs. Tom Schultz of Deville came on Saturday to spend the week end with relatives. Mr. and Mrs. Everett Noland returned to Deville with her on Sunday.

Sunday school was reorganized for the summer months and will be at 11 o'clock every Sunday in the school house.

Mr. and Mrs. Lester Noland and Miss Pearl Gray were visitors at the J. H. Johnston home on Sunday

Edward, son of Mr. and Mrs. Elmo Ferguson was able to return to school on Monday after being detained at home for some time with a fractured arm.

TENNIS MEETING NOT VERY WELL ATTENDED

The tennis meeting held on Monday night May 6th, was not very well attended but what was lacking in numbers was made up in enthusiasm. It was the intention at this meeting to elect officers for the coming year, but due to the small number present this was postponed to a later date. It was decided, however, to go ahead and get the courts into shape and get all general work done that has to be done. This of course all requires money, so hurry up members and buy your season tickets now! The prices this year are: public school children $1.00; high school students $2.00; ladies' $3.50; gents $4.00; and a double ticket, $6.00. The books show that the tennis club has a deficit on their hands which will have to be paid this year. So let's go and play tennis!

IS TOFIELD GOING TO HAVE A SENIOR BASEBALL TEAM THIS YEAR

This is the question that is bothering a lot of baseball fans this year. In past years Tofield has always been able to put a team on the field that would hold their own with the best of them and during their exploits have won and successfully defended the McCallum cup for a number of years. There has been two challenges sent in for this cup already this season and these have to be accepted within a few days. There is no reason why Tofield should not have a real baseball team this year as well as past years, if only the boys get down to work and organize. Some of the boys were out on Tuesday night having a little practice, but there are at least eight to ten more who should turn out. So come on you old baseball players, let's get a team to defend this cup and put Tofield on the map as regards baseball. The next practice will be held on Friday night at 7 p.m. sharp. All the last year ball players and those who wish to tryout with the team are requested to turn out.

SUITERS BRIDGE CLUB HAVE FINAL PLAY OF SEASON

The Suiters Bridge Club held the final play of the season last Thursday at Mrs. Pincott's, and a most pleasing afternoon was spent. The prizes were won by Mrs. Thompson and Mrs. Galloway. The members are much pleased with the success of the club after its first season, and look forward to starting early again in the fall. They found it very pleasant to come together once a week and pass such pleasant afternoons in a very sociable and harmless way and at the same time win some useful prizes. Mrs. Pincott served a tasty lunch after the game.

W.I. NOTES

The Women's Institute are holding their regular meeting on Tuesday, May 14th, at three o'clock in the institute rooms. Miss Isabel Noble of Daysland will speak on "The New Canadian," and all women of the town and district are cordially invited to attend. Hostesses: Mrs. Beirnes, Mrs. Hobson, Mrs. Imler.

The station tennis court has again this season been put into shape and is very frequently occupied.

KINGMAN

A. Danielson returned on Tuesday from the St. Mary's hospital at Camrose.

Sam Hardin of Alliance visited with Mr. and Mrs. P. Rodomsky on Sunday.

Mr. and Mrs. E. Erickson and son Harry visited near Daysland on Sunday.

Mr. and Mrs. J. Munson and family of Camrose, Mr. and Mrs. Gustafson of Water Glen, Mr. A. Danielson and Mr. and Mrs. A. Asp, visited with Mr. and Mrs. C. R. Slyckert on Sunday.

H. Farmer spent a couple of days in Edmonton last week.

H. Sparby spent the week end at his home in Bawlf

Mr. and Mrs. M. Thompson motored to Koby on Sunday.

KETCHAMOOT

Mothers' Day will be observed next Sunday, May 12th. There will be no Sunday School, but a special program and music at 11:00 o'clock. Everybody welcome.

Mr. H. Mitchell returned to Edmonton on Thursday for a few days after which he and Mrs. Mitchell expect to come down to visit friends and relatives.

Mrs. Monty, of Erskine is visiting her aunt, Miss F. Fawcett at the Ketchamoot home.

Mrs. O. Barnes has been under the doctor's care the past week having had an attack of the flu.

Mrs. E. McMullen visited Mrs. Frank Holt at her home on Sunday.

Mr. and Mrs. Whitaker of Lamont were the guests of Mr. and Mrs. Harrison over the week end. Mrs. Whitaker is Mr. Harrison's sister.

Miss Viola Lee is trying her hand as telephone operator at Tofield in the afternoons

Mrs. M. Ingram Sr. visited a few days last week with her children and families

Mr. and Mrs. Frank Shaps and daughter were Sunday guests of Mr. and Mrs. A. Harrison

Misses Viola Lee and Mildred Lawson visited Miss Fawcett on Monday.

Mr. Russell school inspector paid a visit to our school on Tuesday afternoon

AMISK CREEK

The regular monthly meeting of the Ladies' Aid was held at the home of Mrs. S. Olson of Shonts on Wednesday of last week, the attendance was fairly good considering the busy time

Mrs. J. H. Olson attended the W.C.T.U. convention held in Lavoy last week

Conrad Patterson and Mr. and Mrs. Walch from Shonts left last Monday for different points in Alberta and Saskatchewan where they are going to paint elevators for the Security Co. They expect to be away most of the summer.

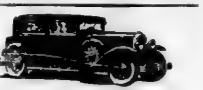
Mr. and Mrs. R. O. Berg motored to Camrose last Monday.

The brooderhouse and fortyfive young chicks were destroyed by fire over at the O. Harschberger's farm last Monday. Fortunately no other damage was done as the other buildings stood far enough away so that they did not catch fire.

Mr. and Mrs. E. A. Moen and children visited at the J. Jacobson and W. Anderson homes north of Tofield last Sunday.

P. J. Ans from Tofield was a visitor in this neighborhood last Monday.

"In power, ease of driving, and flexibility, the new McLaughlin-Buick outperforms any car I have ever driven." (name on request)



THE owner quoted above has been driving automobiles for 15 years, and has an intimate knowledge of motor car performance and value. Yet his enthusiastic comment merely typifies that of thousands who have turned to McLaughlin-Buick after making their own exacting tests.

Not only have motorists in all parts of the country accepted McLaughlin-Buick's invitation to get behind the wheel and get the facts about McLaughlin-Buick performance . . . but they have entered orders for more than twice as many McLaughlin-Buicks as any other car at or above its price.

Be sure to drive a McLaughlin-Buick! Try it in traffic—on the straightaway—up the steepest hills. The more thorough your tests, the more careful your comparisons—the more inevitably will they lead you to McLaughlin-Buick!

Paint Pointers

In finishing wood it is important that the groundwork be sandpapered and thoroughly dusted off before the next coat is applied. Dusting is indispensable to good workmanship, particularly in the case of woodwork, furniture and automobiles, where a high gloss is the aim of the finisher, and this holds good whether the work is to be finished in varnish, enamel, color varnish, or even in a high gloss oil paint. Without the duster, even when other conditions are perfect, work will present a blotched, dirty looking and seedy appearance, and, the higher the gloss in the finishing product, the more this condition will be reflected. "Dusting off" does not mean that the dust is to be scattered from any given surface with a rag or anything that comes handy. It simply means that a soft bristle painter's duster is to be used and that the dust is not only to be removed from the surface under treatment, but also from everything in close proximity to the scene of operations.

In the application of paint to ironwork, the first thing to be done is to get the surface absolutely free from rust. A mere scratch with a knife will seldom be sufficient; a good scrubbing with a wire scratch brush is more effective. The success of varnishing does not depend altogether on the quality of the varnish itself. The conditions necessary to ensure satisfactory work are numerous, but the most important are cleanliness of brushes and surroundings and a warm temperature.

The first coat on new plaster should be very thin in order that the paint may penetrate and harden the surface so as to form a key for the following coat. Abundance of time should be allowed between each coat.

Split, curled up shingles, even when re-stained or painted, represent a depreciation far in excess of the cost of periodical painting.

Too Much ACID

Many people, two hours after eating, suffer indigestion as they call it. It is usually excess acid. Correct it with an alkali. The best way, the quick, harmless and efficient way, is Phillips' Milk of Magnesia. It has remained for 50 years the standard with physicians. One spoonful in water neutralizes many times its volume in stomach acids, and at once. The symptoms disappear in five minutes.

You will never use crude methods when you know this better method. And you will never suffer from excess acid when you prove out this easy relief. Please do that—for your own sake—now.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

FLU Germs Breed In the Throat.

First Appear As A Common Cold, But Gain Tremendous Headway In the Bronchi

SOME SIMPLE PRECAUTIONS AGAINST INFLUENZA

Simple precautions taken now will enable you to fight dreaded "Flu" which is sweeping rapidly through the whole country. The germs of influenza gain access to the body through the mouth and throat. Keep the throat healthy and you go a long way towards stopping the trouble. An effective means of prevention is to gargle the throat three or four times daily with Nerviline. Half a teaspoonful of Nerviline in water makes a most efficient gargle. The germ-killing properties of Nerviline quickly destroy any bacteria in the mouth or throat. If the chest is sore, if the throat is hoarse, if you have a cough—be sure to rub the neck and chest with Nerviline. Every drop of it will rub in, and out will come the congestion.

Of course it is absolutely necessary to house-clean the system with Dr. Hamilton's Pills which stimulate the eliminating organs, and rid the system of disease-breeding germs. This combination treatment of Nerviline and Dr. Hamilton's Pills will give prompt and entirely satisfactory results.

PRIMROSE DAY IN EDMONTON

While the English woodlands are carpeted with the simple little wild flower, the yellow primrose, in the capital city of Edmonton there bloomed on one day twenty-five thousand blossoms closely resembling their English sisters.

Made of paper and daintily fashioned with true artistry by hundreds of Edmonton school children, these modest memories of woodland and valleys of other lands across the seas had a mission of their own to perform.

They were offered for sale on the annual primrose tag day of the Junior Red Cross on behalf of the sick and crippled children of the province who are in hospital in Edmonton.

Taggers in tiny uniforms greatly appealed to the public and many a small child dressed as a nurse was able to turn in a weighty box on Saturday, April 27th as her contribution to the work of the Red Cross.

It is expected that the grand total will reach the objective of one thousand dollars, a remarkable good day's work for the school children of Edmonton and their friends.

The desire to assist the little patients was widespread, and offers of help came in from many interesting sources. One old lady of eighty assisted in flowermaking, and some tiny cherry-blossoms from Japan called at the Red Cross Headquarters asking for materials for posies. Radio friends of the Red Cross weekly broadcast the friendly hour, joined in the spirit of the day and some fifty districts responded to the appeal of a tag day over the air, even a blind listener in the country sending his mite towards the good work.

A few posies are still available and may be had on application to Red Cross Civic Building, if any friends care to be tagged in connection with Primrose Day of Red Cross.

WAINWRIGHT PRESBYTERY MEETS

The Presbytery of Wainwright met on April 30th at Viking.

The attendance of members was good. Lay delegates were appointed to the forthcoming conference which meets in Calgary the last week of May.

Rev. R. W. Ross, D.D., evangelist, is expected to serve about two months in the presbytery in the fall.

The Presbytery declared its attitude towards the liquor traffic as follows:

"Whereas throughout human history alcohol used as beverage has been responsible for the degradation and destruction of individuals, homes and even national civilizations and whereas the liquor traffic ever seeks to expand its business which means an ever increasing tide of drunkenness with its consequent sin and misery, therefore be it resolved that we the Presbytery of Wainwright declare the liquor traffic to be an evil in itself and that the sale of alcoholic beverages is an immoral business whether conducted by an individual, corporation or a government and also that in the process of temperance education the immoral nature of the liquor traffic be insistently impressed upon the minds of our people."

FORTY-FOOT GIFT FOR RIDEAU HALL

This totem pole is one of the finest examples of Indian art. Right, Their Excellencies Viscount and Lady Willingdon and the C.P.S.S. "Princess Norah" on which the first vice-regal tour of the west coast of Vancouver Island was made.

When Viscount Willingdon, Governor-General of Canada, and Lady Willingdon visited the West Coast of Vancouver Island on the inaugural cruise of the new Canadian Pacific steamer "Princess Norah" two new epochs were marked for that far-flung corner of the Dominion.

It was the first time that a Canadian Viceroy had ever seen, and in turn, been seen on the rugged coast that is now looming as one of the nation's important industrial and tourist regions; further the arrival of the Norah brought the most luxurious passenger steamer ever to ply in regular service in West Coast waters, now to be the permanent run of the staunch little Clyde-built vessel.

The West Coast had decked itself in gala attire for the visit of the great white chief from Ottawa, tremendous excitement prevailing among whites and Indians alike at the various ports of call. Local interest was heightened by the fact that Their Excellencies cast formality to the four winds, and entered into the spirit of the many receptions and celebrations with a zest not exceeded by any tourist on the coast. Incidentally, Lord Willingdon intimated after the termination of his voyage that it would not be the last occasion on which he would see that particular part of Vancouver Island.

Loyalty of the Indians, evident at all points touched, was particularly demonstrated at Friendly Cove, historic spot discovered by Captain Cook in 1778, where a lineal descendant of the great Chief Maquinna, who first saw the white man, gathered his tribe, the Nootka Indian band, in the great council hall to greet the vice-regal party. It was here that Lord and Lady Willingdon were recipients of one of the most valuable gifts in the bestowal of the coast Indians, a huge forty-foot totem pole that has stood for years on the sandy shores of Friendly Cove, the envy of collectors from many parts of the world.

Presentation of the totem was touching in its simplicity yet its significance was not lost. Chief Maquinna, head of the Nootka Band, descendant of Maquinna, was first to extend the Indians' official welcome, elaborate ceremony which included the famous dance of the Thunder Bird, marking this part of the rites. Later, the Indians led the vice-regal [illegible] to the site of a huge totem [illegible] standing near the council hall, and Chief Jack, another of the Nootka Band, mounted the pedestal to deliver an impassioned peroration in his native tongue.

His Excellency stood attentively until the Indian Chief had finished his speech, taking it, probably, for the usual honeyed words of welcome. His astonishment and that of many of the chief's hearers was great when "Billy" Lord, well-known industrial leader on the west coast, acting in the role of unofficial interpreter, told His Excellency that Captain Jack had presented the big forty-foot carving as a gift.

Significance of the gift lies in the tremendous value which the Indians themselves place on their historical totems. It would have been a somewhat parallel case, one of the men familiar with west coast customs said, if a white man, on being visited by vice-royalty, had with one magnificent gesture given away his house and the greater part of his fortune.

Their Excellencies, sensing this, accepted the gift with delight, and announced that plans would be made to have it removed from its present historical setting to Rideau Hall as soon as possible.

IMPORTANCE OF THINNING VEGETABLES

(Experimental Farms Note)

Beginners in vegetable gardening are almost sure to make the mistake not only of sowing seed much too thickly, but also of leaving the plants too thick in the row. A very large amount of seed is wasted each year because of this and failure to have plants develop properly is another result of more consequence to the sower of the seeds than the waste of seed. Thinning of all vegetables is desirable as soon as the plants are large enough to catch hold of, that is, quite small. Lettuce can be used even though the plants are thick, but to have satisfactory individual plants of leaf lettuce the plants should be thinned to eight inches or more apart. They will not develop satisfactory heads if much closer than this. It has been found in the Horticultural Division, Experimental Farm, Ottawa, that the larger varieties of head lettuce give the most satisfactory results when the heads are nearly one foot apart. Carrots should be thinned to about an inch and one half apart; beets to two inches apart; parsnips to two inches apart; onions to one inch apart; spinach four to six inches apart. Radish, if sown rather thinly are thinned as ready for use. Often too many kernels of corn are left in a hill. Five plants are quite sufficient to leave after the cut worms and birds have taken their toll. Bean plants should be from two to four inches apart and peas about one inch apart.

Vegetables will not develop satisfactorily if the plants are thick, hence judicious thinning is very important.

W. T. McCoun,
Dominion Horticulturist

NOTICE TO CREDITORS AND CLAIMANTS

IN THE MATTER OF THE ESTATE OF ARTHUR McMULLEN, late of the Town of Tofield, in the Province of Alberta, Farmer, deceased.

Notice is hereby given that all persons having claims upon the estate of the above named Arthur McMullen, who died on or about the first day of December, 1928, are required to file with The Canada Permanent Trust Company, Edmonton, Alberta, by the 30th day of June, 1929, a full statement, duly verified, of their claims, and of any securities held by them, and that after that date the administrator will distribute the assets of the deceased among the parties entitled thereto, having regard only to the claims which have been brought to its notice.

Dated at Edmonton, in the Province of Alberta, this 29th day of April, 1929.

NEWEL LINDSAY EMERY & FORD,
Solicitors for the Administrator,
Canada Permanent Building,
Edmonton, Alberta.

A Good Many Do

QUITE FREQUENTLY as a "filler" line we run the sentence "Please Renew Promptly." We have this sentence good humouredly brought to our attention frequently, when one subscriber or another pays his or her subscription.

In a few days we will be sending out notices to all those whose subscriptions have expired and we hope to have a good response.

The "local" newspaper is a tradition of the North American Continent. At no other place in the world are type and presses assembled to serve so few people. People here call for their "local paper" and desire to know the everyday affairs of the town and district in which they live.

A new baby arrives and his arrival is chronicled in the local newspaper. A valued and respected citizen passes and his praises are printed in the local paper. Brown's, Smith's or Jones house burns down and the local paper reports it. Somebody's hen lays a very large egg; somebody's cow gives an extra quantity of milk; somebody's pigs grade extra special and the news is spread throughout the district by the local paper. All ordinary and extraordinary things of life find their way into the columns of the press. Not so big and bulky as the city newspapers; not so many columns of type, but much more intimate to the people it reaches is the local sheet.

We hope to retain all our present subscribers and add new ones to our list. When you receive the notice regarding your subscription, please give it attention. In most cases the amount is small to the subscriber but these small amounts in the aggregate is quite a sum to the publisher.

As your paper comes out week by week, read the advertisements. By trading with our advertisers one can frequently save more than the price of the paper.

Radio—An Agency For Peace

The sittings now being held by the Royal Commission on Radio appointed by the Dominion Government to study the whole question of broadcasting and make report to the Government as to best policy for Canada to adopt in the national interests of the whole Dominion, is having the effect of directing attention from the purely local and entertainment features of this latest of great modern discoveries and causing people to appreciate more fully the tremendous possibilities of aerial communication, both in a national and international sense.

While undoubtedly there is a feeling of regret in Canada that because of natural causes it is much easier for people in Western Canada to "listen in" on stations in the Central Western States than it is to "get" stations in Eastern Canada, and for Eastern Canadian listeners to receive the programmes broadcast from New York, Philadelphia, and other Eastern United States cities than it is for them to "tune in" on Western Canadian Stations—a condition for which it is hoped the present Radio Commission can find some solution, the fact remains that a closer community of interest between Canada and the United States and consequently a still better understanding is being developed by means of the radio. And community of interest and understanding is the greatest of all bulwarks to Peace.

But to many in this country it will come as a welcome surprise to learn of the great strides made by radio in Europe and the effect it is having in promoting greater understanding among the diverse nationalities and languages of that war afflicted continent. It is almost inconceivable that within less than eleven years of the signing of the Armistice ending the Great War the radio should be used in Germany and England to teach the people, not merely school children but adults, the French language; that international hook-ups of Germany, Poland, Austria, Hungary, France, and other countries are being regularly carried out, so that people in Paris and Warsaw can listen to German concerts in Berlin and Hamburg, and the German people can enjoy the opera in Paris, or a great symphony orchestra in Vienna or Budapest.

There are some good people in Canada who still retain the old fashioned idea that it is unpatriotic and liable to undermine British institutions in this country if children are taught in our schools to speak and read French, German or any language but English. In entertaining such ideas Canadians are far behind the times; they are not nearly so far advanced as they are in England and other countries where the learning of foreign languages is compulsory. If every Canadian child, whether of British or French descent, was obliged to learn both English and French, Canada would in a generation become more powerful, influential and prosperous. It would open to our people the rich literature of both races; it would give us greater prestige among all nations; it would help to promote our export trade in all the markets of the world. In this Canada, by reason of its two great races, has an opportunity no other nation enjoys, yet we are not only neglecting it but many people urge that it would be disloyal to our British connection to encourage it. Yet Britain herself is doing it.

It is predicted that within three years, five years at the most, Canadians will through the development of national broadcasting at home, and the use of the beam system of wireless across the ocean, be able to sit in their homes and "listen in" on the finest programmes in the world broadcast from London, Paris, Berlin, Vienna and other European centres of culture, art and music.

We can now speak with Europe by telephone from the heart of Canada's prairies, and the day is fast approaching, so those in a position to know authoritatively state, when by radio we will be in more or less constant communication with Europe, receiving the best they have to offer in public addresses, vocal and instrumental music, and the important news of the day. In turn, Canada will be brought equally close to them. And, in all probability "seeing" Europe and European happenings through the instrumentality of the radio will more or less rapidly follow "hearing," just as, in reverse order, the "talking" picture has followed the silent movie.

And these things are all to the good, in the cause of world peace. As we know people and understand them our prejudices and suspicions are removed. We learn they are human just like ourselves; that they have high ideals and are inspired by lofty motives, that they love the things we love, and hate the unclean, the ugly, the vicious, just hate them. As we come to understand their problems, difficulties and aspirations, and they come to understand ours, mutual sympathy will develop, followed by a desire for co-operation rather than antagonism.

It is only so, through mutual understanding, that permanent world peace can be maintained and the maximum of true progress be made.

Protecting Canada's Fisheries

Means Taken To Guard Against Depletion Of Finny Tribe

River and lake fisheries, territory, and sea fisheries probably, if left to themselves, conform to the economic law of diminishing returns. The Canadian Government, accordingly, has had for a main object the prevention of depletion, the enforcement of close seasons, the forbidding of obstructions and pollutions, and the regulation of nets, gear and fishing operations generally. In addition, an extensive system of fish culture has been organized, the Dominion operating 25 main hatcheries, 6 subsidiary hatcheries, and 4 salmon retaining ponds in 1927.

Minard's Liniment for cuts and bruises.

False Economy

There are not many people who would die of starvation rather than dig into their savings, but we often see men who do not know how to enjoy their money. They save by denying themselves the natural pleasures of life and in the end are forced to leave their money to people who never helped to earn it.

At 452 degrees below zero some metals, such as silver and copper, lose their resistance to electricity, becoming superconductors.

Sunnie—Her face was like five miles of detour.

Minard's Liniment—good for tired feet.

Cuticura Heals Face Disfigured With Itchy Pimples

"I had pimples all over my face. They were hard, sore and red and some of them were large and others small. Some of them festered and scaled over and itched and burned causing me to scratch. Scratching caused eruptions and the irritation prevented me from sleeping. They disfigured my face for many weeks.

"I tried different remedies without any results. I began using Cuticura Soap and Ointment and it was only a few weeks before my face was completely healed, after using two cakes of Cuticura Soap and one box of Cuticura Ointment." (Signed) Miss Harriet Hamilton, Box 772, Yarmouth, N. S.

Make Cuticura Soap and Ointment your every-day toilet preparations and have a clear, sweet skin, soft, smooth hands and a healthy scalp with good hair.

Soap 25c. Ointment 25 and 50c. Talcum 25c. Sold everywhere. Sample each free. Address Canadian Depot: J. T. Wait Company, Limited, Montreal. Cuticura Shaving Stick 25c.

Measuring Lightning Flash

No Part Of It Ever Lasts For Appreciable Time

A lightning flash takes about one-seven-thousandth of a second to complete itself and no part of it lasts more than approximately one-thirty-five-hundredth of a second. This is the first time in history that the speed of a lightning flash has been measured. It has also been proved that lightning starts from the clouds and the ground at nearly the same instant, and approximately one-seven-thousandth of a second later the two ends unite in mid-air. These facts were determined by Dr. C. D. Boys, a British physicist, who has been attempting hundreds of photographs for the last twenty-six years, until a stroke of lightning in New York at last gave him this information.

Northern Air Ports

Settlements In Northern Manitoba To Have Air Mail Service

Manitoba's northern settlements of Oxford, Godsland, and Island Lakes will be added to the growing chain of northern air mail points of call, Hon. P. J. Veniot, postmaster-general, announced in the House of Commons.

Mr Veniot stated that arrangements had been completed for the conveyance of mail to and from these northern points once a week by aeroplanes of the government forestry patrol at Norway House, at the north end of Lake Winnipeg.

RHEUMATIC PAINS

Cannot Be Rubbed Out — The Trouble Must Be Treated Through the Blood

The pain of rheumatism is something that you cannot rub out. Every sufferer from rheumatism has been advised to rub this or that liniment or oil on the affected part, but after all the rubbing the pain remained. Thin blood and rheumatism come together and if they are properly treated will go together. Anaemia means thin blood, and thin blood is something that can be corrected, so why not build up the blood until the rheumatic poisons are driven out?

This is exactly what is done in the treatment of rheumatism with Dr. Williams' Pink Pills. Rheumatism in any form shows improvement as the thin blood is built up, and when the poisons in the blood are overcome and driven out rheumatism disappears and does not return so long as the blood is kept rich and red. The great value of Dr. Williams' Pink Pills in the treatment of rheumatism is proved by the case of Mr. Thomas Martin, of Novar, Ont., who says:—"For some years I was so badly troubled with rheumatism that I could hardly walk and suffered great pain. I had medical treatment but did not get much relief. Then I decided to try Dr. Williams' Pink Pills, and after taking the pills for some time the trouble disappeared and has not since shown the least sign of returning."

You can get these pills from your druggist, or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Pedigreed Hatching Eggs

A record shipment of pedigreed White Leghorn hatching eggs was made recently by the Poultry Breeders' Association of British Columbia to a hatchery at Petaluma, California. The shipment consisted of 30,000 eggs valued at $3,000.

Illness Kept Her From Work

"I took Lydia E. Pinkham's Vegetable Compound because I was so sick every month that I had to keep my bed for two days and I suffered so that I felt badly all the time. I had been working in a factory but for a long time was not able to work as I was so run-down and nervous. My friends told me of the Vegetable Compound. I am now sound and well and have gone back to work. I have a good appetite, my color is good and I am in good spirits."—*Evelyn Bourque, 132 Alma Street, Moncton, New Brunswick.*

Lydia E. Pinkham's Vegetable Compound

ADOZEN different things may cause a headache, but there's just one thing you need ever do to get immediate relief. Aspirin is an absolute antidote for such pain. Keep it at the office. Have it ready in the home. Those subject to frequent or sudden headaches should carry Aspirin in the handy pocket tin. Until you have used it for headaches, colds, neuralgia, etc., you've no idea how much Aspirin can help. It means quick, complete relief to millions of men and women who use it every year. And it does not depress the heart.

ASPIRIN

Aspirin is a Trademark Registered in Canada

New Death Dealing Ray

Electrical Driver Recently Invented Develops Three Million Volts

H. H. Nelson-Smith, engineer on the staff of the Pacific Gas and Electric Company in San Francisco, said a "death ray" device had been invented by J. R. Martin, electrical engineer of San Francisco. The new device, he said, was capable of developing three million volts.

The Martin machine, Nelson-Smith stated, is housed "somewhere in San Francisco," but its exact whereabouts is being kept secret. The invention has been working in co-operation with the electric company.

"Anyone who got in the path of the ray would be instantly snuffed out, the chemical composition of his blood would be changed and the life cells disintegrated," he said.

Praises This Asthma Remedy. A grateful user of Dr. J. D. Kellogg's Asthma Remedy finds it the only remedy that will give relief, though for thirteen years he had sought other help. Years of needless suffering may be prevented by using this wonderful remedy at the first warning of trouble. Its use is simple, its cost is slight, and it can be purchased almost anywhere.

Discovers Hungarian Tribes

Historian Finds Ancient Settlement In Heart Of India

Professor Stephen Gujard, archeologist and historian, has returned from a 12-months exploration trip in India and announced that he had discovered two Hungarian tribes in the heart of that country. He said they were named Mar and Marva.

He also said that he had found the ruins of an ancient palace, together with manuscripts, statues and ceramics which proved that the palace belong to Huns.

These tribes, the professor said, were descendants of Magyar nomads who left their homeland to conquer Europe with the army of Attilla 1,300 years ago.

B.C. Salmon Pack

The position as regards the salmon pack of British Columbia is improving under present conservation methods. The 1928 pack is now reported at 2,035,637 cases, which is only 29,041 cases lower than the record pack of 1926. The pack of pinks totalled 792,362 cases, or 19,369 cases more than the 1926 record.

Miller's Worm Powders can do no injury to the most delicate child. Any child, or infant in the state of adolescence who is infested with worms can take this preparation without a qualm of the stomach, and will find in it a sure relief and a full protection from these destructive pests, which are responsible for much sickness and great suffering to legions of little ones.

The Teacher—You have failed in geography again.

Bobbie—No'm. You only ast me did I know the capital of Minnesota an' I said I didn't which, was true.

Worms cause fretfulness and rob the infant of sleep, the great nourisher. Mother Graves' Worm Exterminator will clear the stomach and intestines and restore healthfulness.

From July 14 to 17, 1911, 88.15 inches of rain fell at Baguio in the Philippine Islands. More than 45 inches fell on one day.

Neuralgia succumbs to Minard's Liniment.

Attractions For Tourists

Vast Extent Of Canada Offers Visitors Interesting Holiday

Canada has a million square miles of forest, countless lakes and thousands of miles of rivers and brooks, providing the finest hunting, fishing, canoeing and camping. The vast extent of Canada and the diversity of conditions in different sections make it difficult for the prospective visitor who is not familiar with the country to decide which particular section interests him most. To overcome this the Department of the Interior has published "Vacations In Canada," a 96-page handbook which sets forth the attractions which Canada offers to tourists and sportsmen. This booklet describes the tourist attractions of each region in the Dominion — the climate, the motor roads, the points of historic interest, the fishing, hunting, canoeing and camping, the principal cities and the popular summer and winter resorts. In addition it gives a summary of the Canadian Customs regulations. "Vacations In Canada" is distributed without charge, from the Natural Resources Intelligence Service, Department of the Interior, at Ottawa.

Wins Oratorical Contest

Marcelline Brunet, 17, of Norwood, Man., representing the French-speaking schools of the province, won the Manitoba oratorical contest the other day. She was opposed by ten entrants from English-speaking schools in the final match. Miss Brunet will represent Manitoba in the Canadian oratorical finals. She attended convent at St. Adolphe, Man.

Sore Corns Drop Off If You USE "Putnam's"

When you notice any sign of callous on the feet or toes—that's the time to paint on a few drops of PUTNAM'S CORN EXTRACTOR. Do this, and you prevent corns. No matter if the corn is hard or soft. Let it be on top or between the toes, Putnam's will remove it without pain. Insist on PUTNAM'S CORN EXTRACTOR. It does the work—and roots out the corn, quickly and without pain.

Health and Motor Accidents

Men with high blood pressure should use extraordinary care in driving automobiles, according to recent experiments conducted by psychologists of the personnel research federation. These experiments showed a definite relation between health and motor accidents. Men with high blood pressure were found to have more than twice as many accidents as those with normal pressure.

No surgical operation is necessary in removing corns if Holloway's Corn remover be used.

Forty automobiles can be driven abreast at low tide on the beach of Jacksonville, Fla. The sand is as firm as on a paved street.

Minard's Liniment relieves pain.

Einstein should make a good train caller or bellhop, as nobody can understand what he is talking about.

A Young Linguist

George Grando, 4, of Vader, Wash., is a linguist of ability. He speaks English or Croatian with equal facility. He was born in America, but his parents came from Dalmatia. He reads the letters of the alphabet in both English and Croatian, can count to 30 in both languages, and converses freely.

More than 50,000,000 rabbit skins are made into felt hats in the United States every year.

Could Not Sleep Heart Would Start Pumping and Pounding

Mrs. Fred. P. Averill, 126-12th Ave., Calgary, Alta., writes:—"I was bothered so much with my heart I could not sleep. I would waken up in the night screaming, and my heart would start pumping and pounding. A neighbor lady told me to try

so I started taking them and I can truthfully say I am a different woman. Altogether I only took two boxes."

Price 50c a box at all druggists and dealers, or mailed direct on receipt of price by The T. Milburn Co., Ltd., Toronto, Ont.

TO POSTPONE DISCUSSION OF NAVAL PROBLEM

Geneva.—Complete agreement has been reached by the big five naval powers to refrain from detailed examination of the naval problem at the present session of the preparatory commission for a disarmament conference, it was learned here in responsible circles.

The question of reduction of the fleets as a supplement to the Washington naval treaty will be adjourned to a date which will be left unfixed. Meantime, the five powers will continue conversations on the naval problem. The form of these conversations was understood to be not yet determined, but would presumably be exchanges of notes between the five nations.

These may possibly develop into a meeting of experts from Great Britain, the United States, Japan, France and Italy.

The main theme of these conversations will be the American suggestion for agreement on the formula for estimating the equivalent tonnage of cruisers, destroyers and submarines by considering such factors as age, units, displacement and calibre of guns.

It was understood that Japan in particular, the most distant of the five countries from Geneva, wants ample time to study the American ideas, which are understood to be received by the powers generally with favor.

Tribute To Wheat Pool

Reference Made To A. J. McPhail In United States Senate

Washington. Running through much of the discussion of the farm relief bill in the Senate are references to the Canadian Wheat Pool and its workings as explained recently before the Senate committee on Agriculture by A. J. McPhail, of Regina, head of the Pool. It was frequently pointed out in the debate that the stabilization corporations under the pending farm relief bill are expected to function much as the great co-operative pool of Canada functions.

Senator Norbeck, of South Dakota, prominent member of the Senate committee on agriculture, paid high tribute in a speech recently to Mr. McPhail. Senator Norbeck said Mr. McPhail was sincere and careful in his statements. He emphasized, however, that the Canadian Pool had not brought Canadian wheat farmers a very large increase in prices.

Senator Norbeck, in summing up, said Mr. McPhail stated frankly that the big result of the Canadian wheat pool was the better spirit of co-operation that had been developed among the farmers. He did not count the small additional price they had secured as the most prominent reward.

Canada Had Good Year

League Review Shows Dominion Enjoying Unprecedented Prosperity

Geneva.—"Canada enjoyed a year of unprecedented prosperity," says the Review of Economic Conditions in 1928, issued by the League of Nations, as a basis of the work of the consultative economic committee.

North America, the report continues, it seems probable was the continent where trade developed most rapidly. The United States not only maintained its position of the world's leading commercial country but increased its excess of exports over imports.

Need Coal Agreement

Geneva.—The economic committee of the League of Nations, which has made exhaustive investigation of the world crisis in the coal industry, reported that international agreements between producers concerning output and markets must be made if there is to be hope for improvement. A similar conclusion was recently reached by experts on the sugar situation.

Loyalty Of Acadians

Ottawa, Ont.—In replying to the criticisms levelled against him in the House of Commons, Hon. Peter Veniot, in a spirited speech dwelt on the loyalty of the Acadians of which he was one, to the British crown. He did so, he said, because his loyalty had been attacked by certain newspapers.

Rioting In Berlin

Communists Suffer Casualties In May Day Battle

Berlin.—Communists in an attempt to "conquer the streets" for May Day, caused an ugly riot in the working class quarter in northern Berlin. They created barricades, using street repair material, and held off police with rifle and pistol fire until armored cars forced the obstructions and enabled the authorities to clear out the surrounding houses.

At midnight the casualties for the day had mounted to eight dead and 78 seriously wounded. Hundreds of others suffered bruises from missiles or policemen's clubs.

The rioters erected barricades in the main thoroughfare of the Pankstrasse and its side streets. The police charged them repeatedly with batons until the commanding officer realized that his force was too weak for these tactics and ordered his men to open fire. Then armored cars were brought up by the police and finally captured the barricade.

Opening Canadian Legation In Tokio

Hon. Herbert Marler Will Take Up Duties As Minister

Ottawa, Ont.—It has been announced from the department of external affairs that Hon. Herbert Marler, before undertaking his duties as Canadian minister to Japan, is making a short visit to England. In the meantime, arrangements are being made for opening the Canadian legation in Tokyo. Mr. Hugh L. Keenleyside will be appointed first secretary and Charge D'Affaires until Mr. Marler's arrival in Japan, and James A. Langley, Canadian trade commissioner in Japan, will also act as commercial secretary of the legation. A third appointment will be made during the summer.

Dr. Keenleyside was born in Toronto, but has resided from an early age in Vancouver. He is a graduate of the University of British Columbia and of Clark University. Iyemasa Tokugawa has been appointed by the Japanese government as its representative at Ottawa.

Canadian Press Meeting

Officers Are Elected At Annual Gathering In Toronto

Toronto.—The annual meetings of the board of directors and the members of the Canadian Press, the co-operative news association of the daily newspapers of Canada, extended over three days, were concluded by the election of officers for the year as follows:

Honorary president, E. Norman Smith, Ottawa Journal; president, John Scott, managing director of the Toronto Mail and Empire; first vice-president, M. E. Nichols, Winnipeg Tribune; second vice-president Henri Gagnon, Quebec Le Soleil.

J. F. B. Livesay, continues as general manager and secretary.

With a view to giving increased representation to the French language, daily newspapers of Quebec and also to the western provinces, the annual meeting enlarged the board of directors from 15 to 21.

Italian Arrested For Killing Chancellor

Assassinates Official When Application For Documents Was Refused

Brussels, Belgium.—While walking along a street, Alfonso Arena, chancellor of the Italian legation in Luxembourg, was shot and killed.

His assailant, who was arrested, was an Italian cobbler, named Gino, 29 years of age, a native of Massa Carrara, who recently settled in Luxembourg. He had applied to the legation for certain documents, but his application was refused.

World's Largest Cattle Team

Harlowton, Mont.—The biggest cattle yoke ever made in the Northwest is too small for what is considered the largest cattle team in the world. That was the discovery made by Guy Howard after he completed a seven-foot yoke. Now he's engaged in making a 10-foot yoke which he believes will "fit" the team. The cattle together weigh 7,000 pounds.

Punished For Native's Death

Pretoria, South Africa.—For the first time in many years a white farmer was flogged for injuring a native. Jack Nafte, who tied a native employee head downward by the legs from a tree and lashed him so severely that he subsequently died, was sentenced to seven years at hard labor and the farmer received ten lashes in the Pretoria jail.

CENSURE MOTION IS DEFEATED BY MAJORITY OF 24

Ottawa.—The House of Commons defeated another want of confidence motion involving censure of the postmaster-general. This time the amendment, which, like its predecessor, was moved by H. A. Stewart, Conservative member for Leeds, was defeated by 24 votes.

It was a general amendment declaring that "the administration of the post office department by the present postmaster-general has been characterized by inefficiency, disregard of the provisions of the civil service act, the post office act and other statutory authority, and merits the disapproval of this House." Mr. Stewart's former amendment, moved a few days ago, involved censure of the postmaster-general in connection with the appointment of a postmaster at Simcoe, Ont., it was defeated by 27 votes.

In the division today, the Conservatives carried with them in support of the amendment the majority of members of the U.F.A. group in the House, Liberals and Liberal-Progressives united in opposition to the amendment.

Votes recorded in favor of the amendment numbered 68, and against, 92.

In moving his amendment Mr. Stewart said facts had been brought out which had startled the country. The whole background of the matter was the civil service commission and the attitude of the postmaster thereto. From October 1, 1926, to February 1, 1928, the postmaster-general has dismissed 86 postmasters, and from February, 1928, to April, 1929, eight more dismissals had been made.

In 22 cases of appointments by the commission, rejections had been made by Mr. Veniot. In some cases returned soldiers had been rejected in favor of civilians. He had dismissed for petty shortages men and women of the postal department all over Canada, but in the case of an inspector who it was shown had taken funds improperly, Mr. Veniot had not only increased his salary, but had given him an higher responsibility in office. The postmaster-general had impaired the efficiency of the civil service commission, and his attitude toward its was akin to contempt.

In reply, Mr. Veniot declared Mr. Stewart had omitted to point out in what way his administration was inefficient, or in what manner he had violated the civil service or any other act.

It was charged, he added, that he had disregarded certificates issued by the civil service commission. That was correct. But he had done so only for valid reasons, and was given authority to do so under the act. He had only done his duty, said the postmaster-general, as head of the postal service of Canada.

There had been charges which questioned his loyalty. These were unjust, Mr. Veniot said.

Would Welcome Naval Reduction

Tokio. It was learned here that Count N. Sako, Japanese delegate to the preparatory commission on disarmament at Geneva, had been instructed to agree to a proposal whereby a sub-committee would be formed by delegates from the five leading powers to consider proposals of the United States delegate, Hon. Hugh S. Gibson, for broad naval reduction.

WESTERN PILOT

Louise Burke, a student with Great Western Airways, Ltd., is believed to be the first woman pilot in Western Canada to take a passenger up in an aeroplane.

Plan Second Air Derby

Winnipeg and St. Paul Will Stage Event This Month

St. Paul, Minn.—The second international air derby from St. Paul to Winnipeg was set for May 24 and 25. More than 25 planes are expected to enter this race, according to Julius Perit, aviation secretary of the St. Paul Association. The derby will be held in conjunction with the Canadian aviation meet and aircraft exhibition to be held in Winnipeg on the same dates.

The derby will leave St. Paul, May 24, and will arrive in Winnipeg the following day. The route is expected to take in Fargo and Grand Forks, N.D.

Announcement of the date of the derby was made following the visit to St. Paul of several members of the Winnipeg Flying Club on a good-will tour to arouse interest in their air carnival.

The first air derby from St. Paul was staged last May as a good-will tour to Winnipeg.

Aviators Found Dead

Two Australians Meet Fate In Search For Lost Southern Cross

Sydney, N.S.W.—Suffering agony from thirst and exhausted by desperate efforts to take off from the ragged ground where they landed, Robert Hitchcock and Lieut. Keith Anderson of the aeroplane Kookaburra died some time either on or after April 12.

The grim story of the fate of the two men who had taken part in the search for the aeroplane Southern Cross, was revealed in the notes of a diary scrawled on the rudder of their 'plane.

First definite news of the death of the men came with the report from a land party that had made its way over the rough country to the stranded rescue 'plane.

Miner's Fund Closed

London, Eng.—The Lord Mayor's fund for distressed miners, was closed after it had reached $4,251,000. To this amount the government pound-for-pound grant must be added. The total amount for relief will therefore be $8,430,000.

Postpones Long Flight

Berlin.—Captain Helmann Koehl, noted German trans-Atlantic flier, told the Associated Press that his projected flight to the United States with Col. James Fitzmaurice, could not be expected this year and possibly not for another two years.

Tynside Trainees

Immigrants from Great Britain arriving on board the Canadian Pacific Liner "Duchess of Richmond" at Saint John on that vessel's first voyage to Canada. The men, who hail from Tynside, have all been trained in Canadian farming methods under the British Minister of Labor, in co-operation with the Canadian Pacific Railway. They are destined for all parts of Canada.

Battle With Bandits

Detroit Policeman Shoots Assailants In Attempted Hold-Up In Ontario

London, Ont.—Shot in the stomach, Robert Schact, alleged bandit, aged 20, Windsor taxi driver, and formerly of Yorkton, Sask., died on the highway, following an attempted hold-up of D. McLellan, a Detroit policeman and his wife, who were motoring on a holiday. Leo Derouches, 19, Ford City, Ont., was shot in the hip and lies in a London hospital under guard. A third bandit got away in the darkness.

On a crime cruise in a stolen car, Schact and his companions crowded McLellan's car into the ditch. Schact ordered the Detroit policeman to hand over his money. He picked the wrong man. McLellan for an answer ripped out a .32 revolver and fired twice from the hip. Schact dropped to the road mortally wounded, along with Derouches. The third bandit picked up Schact and half carrying him, vanished into the darkness.

Prairies Not Represented

Have No Men On This Year's Bisley Team

Ottawa.—The personnel of the Canadian Bisley team has been announced from the office of the Dominion of Canada Rifle Association. There are five Toronto men on the team this year. Ottawa comes second with three, while Victoria and Vancouver have two each.

Five riflemen, including two from Hamilton, who won places on the team, have been unable to accept and the five next in order in the Bisley aggregate, fired during the D.C.R.A. matches last August, will go in their stead. The team sails from Montreal on the S.S. Montrose on June 12 and will be inspected the day previous.

Those who made the team, but who found it impossible to accept, included Sergt. H. W. Burton, Victoria.

FAVOR PRINCIPLE OF INSURANCE FOR UNEMPLOYED

Ottawa. The principle of insurance against unemployment, sickness and invalidity is accepted and endorsed by the special committee of Parliament on industrial and international relations in a report presented by its chairman, Cameron R. MacIntosh, Liberal, North Battleford, in the House of Commons. The insurance should not be based on compulsory contributions derived from the state, employer and employees, the report states.

The report continues:

"Your committee recognizes that, while it is highly desirable that such legislation should be uniform in all the provinces, and while social insurance has a federal aspect, nevertheless, according to the department of justice, under our constitution legislative jurisdiction in relation to the establishment of a compulsory system of unemployment insurance is vested exclusively in the provincial legislatures.

"Your committee finds that the provinces, on being consulted by the department of labor with regard to their attitude towards the establishment of a general scheme, do not appear to be prepared to take immediate action.

"Under these circumstances, your committee submits the following recommendations:

"(a)—That, with regard to sickness insurance, the department of pensions and national health be requested to initiate a comprehensive survey of the field of public health, with special reference to a national health program. In this, it is believed that it would be possible to secure the co-operation of the provincial and municipal health departments, as well as the organized medical profession.

"(b)—That in the forthcoming census, provision should be made for the securing of the fullest possible data regarding the extent of unemployment and sickness, and that this should be compiled and published at as early a date as possible.

"(c)—That the federal government be requested to bring the subject matter of this reference before the next federal-provincial conference; and your committee suggests, when the agenda for such a conference is arranged that the provincial governments be invited to send representatives of the employer and employee to discuss the subject matter of this report."

REQUIRE LARGER VESSELS FOR THE BAY ROUTE

Ottawa.—Adopting the annual report of the Canadian government merchant marine, the parliamentary committee on railways and shipping canvassed the whole of the government's shipping activities.

A suggestion by Hon. H. H. Stevens, Conservative, Vancouver Centre, that Sir Henry Thornton, president of the company, address himself to the task of reconstructing the finances of the C.G.M.M. with a view to eliminating the deadweight losses incurred year after year met with Sir Henry's approval.

He was giving that matter his consideration, he said. Hon. C. A. Dunning, minister of railways asked if Mr. Stevens would support such a project if it were brought down by the government next year, and Mr. Stevens replied in the affirmative.

The commercial value of the Hudson Bay was discussed, but Sir Henry was opposed to Mr. Stevens' suggestion that the smaller boats of the company be put on that route in the beginning in order to demonstrate its feasibility. Mr. Dunning felt that in order to give the route a real "try-out" it would have to be done with vessels better equipped than the government steamers. He was confident however, that when everything was ready a proper trial would be given.

So far as the feasibility of the route was concerned, this had been demonstrated by the department of railways and canals whose ships had constantly gone into Hudson Bay. Mr. Dunning, expounding on the advantage of the route, cited how one ship, not belonging to the C.G.M.M., had loaded 3,000,000 feet of lumber at Vancouver, had come via the Panama Canal, and discharged its cargo at Churchill. An analysis of the costs showed that it was cheaper to transport the lumber in that way than to bring it in by rail from Vancouver to Churchill, even if the railway had then been laid to Churchill.

When the port was ready to ship grain there would be means found to carry it, said Mr. Dunning. The situation was unique. Most ports had grown, like Topsy, but this one had been made.

Canoe Trip Across Canada

Two Montreal Youths Commence Journey From Vancouver

Vancouver.—Paul Paquin and Richard Lesage, two Montreal youths, started out recently on what they hope will be a canoe trip across Canada. Their 16-foot canoe was laden with camp equipment and supplies as they pushed off from the recreation pier at English Bay to the farewells of a crowd which had gathered to wish them "bon voyage."

The canoeists plan to travel up the Fraser River to Lytton and from there up the Thompson River to Sicamous, as the first part of their trip. They expect to reach Halifax in seven months.

Plane Races Thousand Miles To Hospital

Carried Woman Critically Ill From Alaska To Seattle

Seattle, Wash.—Ending a one thousand mile race against death, the aeroplane Juneau landed here with Mrs. Peter Kostrometinoff, of Sitka, Alaska. A waiting ambulance rushed the woman, who was in a critical condition from septic poisoning, to hospital. The woman was brought in the plane from her Sitka home to Seattle when physicians said she had no chance of living unless afforded expert treatment and hospital facilities such as were unavailable in Alaska.

China's Name For Hoover

Peping.—President Herbert Hoover has been given a new and more honorable name by the Chinese press since his assumption of the Presidency. The old name was "Hua-wu," and had no special meaning. The new name "Ha-hwa," contains the character for Buddha, and is extremely "honorable." Both names are an attempt to reproduce Mr. Hoover's name into Chinese characters.

Hon. R. B. Bennett Bereaved

Vancouver.—Mrs. H. Weldon Coates, wife of Dr. H. Weldon Coates, and sister of Hon. R. B. Bennett, leader of the Conservative party in Canada, died at her home here following a long illness.

OIL GUSHER DRAMA WILL PLEASE THEATRE GOERS

SATURDAY NIGHT

"Gusher" which will be shown at the Variety on Saturday night, is a dynamic tale of a woman who sacrifices everything for ... and she loves ... rush ambition ... what ... world ... cross, leads her through a mental Gethsemene before he comes to his senses and the marriage altar. It is adapted from the story by Adela Rogers St. Johns and is a powerful and heart stirring drama of primitive passions with suddenly acquired wealth derived from an oil-well gusher, the "menace"

Dolly Wall is a dance hall girl in a southern oil boom town. When she meets Royce Wingate, a handsome, worthless philanderer, she goes straight. Wingate and trouble walk hand in hand. Dolly decides he has too much leisure, and, looking about to find a vocation for him, buys an interest in an oil lease in a new field just opening in California. Anxious for money, Wingate falls in with the idea and goes west with Dolly's business partner, Jim, an old time gambler.

They bring in a gusher. Dolly arrives on the scene and with Wingate goes to San Francisco to sell their holdings. A year passes, during which Wingate has established himself as a wealthy man-about-town, giving lavishly to charity in exchange for an entree into society. Dolly, meanwhile, is domiciled in an expensive, but overdone apartment.

The story goes on and on, through many dramatic episodes until at last Wingate and Dolly work out their own happy destiny.

After you buy the car

...What will it cost!

RUNNING EXPENSE is a ... The car ... stimu- ... lay out, ... and ... or you ... using ... are no ... ctures. ... and ... of con- ... Ford ... give it ... all of ... keep ... submit similar reports that leave no room for doubt.

You save money when you buy a Ford car, you save money every mile you drive, and your depreciation is lower than in any other car. These are motoring facts worth considering.

In addition to sound economy, the Ford car gives you beauty, speed, safety and driving comfort.

We shall be glad to give you a demonstration drive at your convenience.

"The Trail Of 98"

LOCAL AND PERSONAL

Born.—To Mr. and Mrs. J. A. Heidelbrecht, on May 11th, a son.

The Women's Institute are holding a tea and sale of home cooking in the Institute rooms on Saturday, May 25th.

Mr. and Mrs. Warner sr., spent Sunday at the J. W. Warner home.

Mrs. Beatty of LeGolf visited her sister, Mrs. Lee, here this week. She was on her way to her new home in Ontario, where Mr. Beatty has been ...

Miss Law of Innisfail is visiting at her brother's home here.

Mrs. Cooper of Edmonton spent Monday at Tofield with her daughter, Miss M. Cooper.

Mr. J. Noland and men left on Wednesday for Bruce, where they will work on the highway. Mrs. Noland will join Mr. Noland on Friday.

Mr. and Mrs. McLaughlin motored to the city on Thursday.

Mr. and Mrs. Hay were Edmonton visitors on Thursday, travelling by automobile.

Miss Minnie Wood returned home from Edmonton on Wednesday. She is gradually improving in health.

Mr. and Mrs. Carver visited the city on Sunday.

Mrs. Lott of Edmonton visited friends and relatives on Wednesday and Thursday of this week.

LEAVE FOR AUTO TRIP TO THE STATES

Mr. J. Brenneman accompanied by Mr. D. Stutzman left on Monday for a trip to the U.S.A. in Mr. Brenneman's McLaughlin Buick. They will go direct to the Mennonite Mission Board meeting at Garden City, Mis., from there to Lawrance, Kansas where they will pick up Fred Brenneman who is attending medical school there, and from there they will go to Hesston, Kansas, where three other Brenneman boys are in school. The trip will last about a month.

PASS STEAM ENGINEERS' EXAMINATION

Friends of Mr. J. Whyte and Mr J. W. Robinson will be pleased to learn that they have been awarded third class steam engineers certificates.

It will be remembered that we reported their journey to Vegreville recently, where they wrote the examinations, both successfully passing.

HOWARD LEE WELCOMED AT NEW WESTMINSTER

"Scotty" Lee, rated as just about the best baseball pitcher to hit these parts and who had a habit of poling out home runs in the pinches when hurling for Jack Morgan's Fraser Cafe team last summer, arrived in New Westminster this morning after spending the winter on the prairies, where he played amateur hockey.

"Are you going to play here this year?" asked a ball fan.

"I don't know," replied the slugging pitcher. "What kind of a team will they have?"

Jack Morgan and Alex Courtney will break the news to "Scotty" this afternoon that Fraser Cafe will be British Columbia champions this year. A signature to a contract is expected to result.

W.I. NOTES

The Tofield Women's Institute held their regular monthly meting in the W.I. rooms on Tuesday, May 14th. Owing to the condition of the roads Miss Isabelle Noble of Daysland postponed her address until our June meeting.

The holding of a flower sale was discussed and the idea abandoned. It was decided to hold a tea and sale of home coking in the W.I. rooms on Saturday, May 25th.

Mrs. Volge was appointed delegate to the convention to be held in Edmonton the last wek in May.

An invitation was received from the Ryley W.I. inviting the Tofield W.I. to be their guests at their meeting June 20th. Arrangements will be made at the next meeting for cars to take our members to Ryley.

A dainty lunch was served by the hostesses, Mrs. Beirnes and Mrs. Hobson.

TOFIELD LOSES McCALLUM CUP TO RYLEY

In a very ragged baseball game which became batting practice for Ryley in the third inning, Tofield lost the McCallum cup to Ryley on Tuesday night. The weather was suitable to good ball and play was very loose.

In the first inning Ryley went right to work and collected two runs, while Tofield was unable to get any men across the home plate. In the second inning neither team were able to get any runs. But, Oh boy! in the third inning, what Ryley didn't do to Tofield isn't worth relating. Every man to bat was in top form and walloped the ball so hard that Reg. Shitch thought he was back in France and cannon balls were falling around him. When the smoke had cleared away, Ryley had collected no less than 15 runs, while Tofield still clung to their goose egg. In the fourth inning Tofield changed pitchers, Glenn Wood going in, taking the place of Martin Lawson.

In the remaining two innings there were only six innings played) neither team got any runs and Ryley won the cup by a score of 17—0.

Lack of practice spelled the downfall of Tofield, some of the players being on the diamond for the first time this year.

The highlights of the game were of course the free hitting of Ryley in the third; A. Oslund for Ryley pitched good ball; Bud Hannan made a nice two bagger; and a double play, Lawson to Hannan to Calvert was nice to see.

"WHY SAILORS GO WRONG" A LAUGH PICTURE

Never has there been turned loose perhaps, such a riot of fun and laughter in one picture as there is in "Why Sailors Go Wrong," which will be shown at the Variety, Tofield, on Saturday night. This one of the latest Fox film feature is the story of a boy and girl played by Sally Phipps and Nick Stuart and two cab drivers, all of whom are made prisoners on board a yacht which after a storm at sea is wrecked on a tropic island.

Their adventures with lions, apes, crocodiles, and cannibals are filled with thrills, suspense and above everything else with hilarious, laugh provoking situations.

Here is a picture that is sure to drive away all care for the most confirmed pessimist and will prove equally entertaining for every member of the family.

PICTURE CARRIES MANIFOLD APPEAL

There have been many good pictures, a few marvelous productions and two or three magnificent epics. It is among the latter I would classify "The Trail of '98."

It has love, human interest, magnitude, strength, grandeur, power. Flawlessly it tells an epic. It is as different from the average northern snow picture as day is from night. The very screen lives and breathes as the characters enact their roles and the plot of the story unfolds before your eyes.

It has a strength of appeal while telling the story that no pen has ever had. It shows you visually what pens only feebly describe. It shows the puniness of man against the forces of nature in desperate and unabating conflict.

For the sake of future generations "The Trail of 98" should be preserved. A hundred years from now the mists of time can be wiped away and future generations can see clearly the period of the maddest gold rush the world has ever known.

From a standpoint of direction it is almost flawless. From a standpoint of acting few pictures can compare with it. You see every sort of individual reacting to the same circumstances. That, in itself, is a story. The cast is a magnificent one and the members have made screen history.

Ralph Forbes, Dolores Del Rio, Harry Carey, Karl Dane, Tully Marshall, George Coper and dozens of others have contributed all they can toward helping Director Clarence Brown turn out a perfect picture.

"The Trail of 98" will be shown at the Variety Theatre, Tofield, on Monday, Tuesday, and Wednesday, May 27—28—29.

AMISK CREEK

Seeding is getting nearly finished, exept the greenfeed. Some wheat is getting green already. A good rain would be very beneficial.

The Y.P.S. gave a nice program for the mothers last Sunday evening. The Ryley choir was out here and gave two nice renderings. Mrs. Lagerquist spoke on behalf of the mothers and there were solos, readings and recitations in English and Norwegian. The mothers received a beautiful boquet of flowers each distributed by Ruby Berg and Lilian Patterson. The church was packed to the last seat. A light lunch was served at the very last.

Mr. and Mrs. R. O. Berg and Arnold motored to Edmonton last Friday returning the same evening.

Mr. A. Erickson and Carl visited the city last Saturday.

Mr. and Mrs. N. Sand and daughter were callers at the P. O. Flaaten home last Saturday on their way from Edmonton to Ryley.

Mr. and Mrs. A. Patterson, Arthur and Norman visited at the J. Jacobson home, north of Tofield, on Thursday of last week.

Mrs. P. O. Flaaten and Gunvald motored to Camrose Saturday evening bringing home with them Ruby Berg, and Hennie Annebo who are attending school in Camrose. They spent Sunday at their parental homes here. Miss Julia Hethborne accompanied them and was a guest at the R. O. Berg's home until Monday morning when R. O. Berg motored to Camrose with them.

Several from this neighborhood attended the programme held in Bardo Lutheran Church last Sunday.

Little Palmer Annebo has been ill with bronchitus but we are glad to report he is on the way to recovery.

Emelia Pearson and Mr. E. Pearson were visitors at the J. A. Nilson home last Sunday.

BARDO

There was a large attendance at the Ladies' Aid held at Mrs. Eggen's last Wednesday. Mrs. P. B. Anderson gave a very interesting talk on "Pleasures in the Home."

The U.F.W.A. meeting held at the church on Friday evening was not very well atended. Mrs. McNaughton, director of this constituency was present and spoke on the work of the Junior U.F.A.

Don't forget the cemetery meeting at the Bardo cemetery on Friday, May 24th. Come in the forenoon.

Rubin Lode was suddenly reminded of the fact that he has reached the quarter century mark on Thursday evening, when a number of friends gathered at his home to help celebrate his birthday. A very jolly evening was spent.

The Mothers' Day program on Sunday afternoon was a decided success. There was a very large attendance and a splendid programme was rendered. The services held in the morning were also well attended.

Sunday school will commence on Sunday, May 19th. Mrs. George Hendrickson will be superintendent.

LINDBROOK

The grass and crops are exceedingly late around here this year, owing to the cool weather; the ground however, is in good shape. Seeding wheat is practically over here now and coarse grains being sown.

We regret to report that Miss Hazel Westlake is in hospital at Edmonton and that her conditionn is very serious; however, we hope it may not prove to be as bad as thought and that she will soon be in good health again.

Mr. and Mrs. Smith and family of Newcastle, Northumberland, Eng., have moved onto the Carlson farm under the auspices of the Empire Settlement scheme. Mr. Smith is a veteran of the war, serving with the East York's Regt. and later the Lincolns. We all wish them the best of luck in their new home in Canada.

Arbor Day was observed at the school here, several trees being planted (it certainly needs a few up there) and gardens being laid out. What worries the kidies now is the fact that if the school is moved, what about their trees.

KETCHAMOOT

Mothers' day service on Sunday was largely attended there not being seating accommodation for nearly all the people. Mrs. Carlisle, as superintendent of the Sunday school was leader. Rev. Gordon gave an address. Miss Mabel Lawson at the organ and Martin Lawson violinist, rendered special music and also accompanied the singing. Mrs. John Brown sang a solo "Tell Mother I'll Be There"; Gertrude Ingram and Harold Shultz both gave readings. Let's encourage our minister next Sunday with just as large a congregation.

Mrs. John Lee received a telegram stating mother had passed away on May 6th, at their home in New York. All of her Ketchamoot friends extend their sincere sympathy to Mrs. Lee in her sad bereavement.

The Pioneer grain elevator at Bardo was sold to the Pool. The grain is now being shipped away.

Mr. Herman Lawson is loading a car of wheat at the siding.

Mr. and Mrs. D. H. Mitchell motored down from Edmonton on Sunday they were accompanied by their parents, Mr. and Mrs. Mitchell sr., who remained for a longer visit.

Miss Edith Riley of Lakeshore is lending a helping hand at the Frank Hall home.

Mrs. G. R. Owen, Mrs. Donald Cressey and little daughter came down from Vilna on Sunday and visited a few days with friends and relatives in town and in our district.

Mr. and Mrs. P. O. Moline and family of Amisk Creek were Sunday guests of Mr and Mrs. C. A. Ingram.

Mr. and Mrs. L. Carlisle motored to Edmonton on Saturday returning home the same day.

Mrs. A. J. Williams entertained the M.A.S. at her home on Wednesday. In spite of the busy season a fairly large crowd of members and visitors were present and enjoyed the afternoon.

The Poland family who recently bought the Miller farm had their six week old baby's face badly bitten by a gopher, presumably the bushy tail gopher. It was taken to an Edmonton hospital where it was thought skin would have to be grafted. It seems the mother had taken the baby to the field and made a bed on the ground for it, and was helping her husband with the field work.

KINGMAN

The sowing of wheat in the district is almost complete, and about 40 per cent of the oats has been sown. Ample moisture still prevails.

Mrs. E. Erickson motored to Camrose on Friday.

Mrs. Chas. Lindberg and family spent the week-end in Edmonton.

J. K. Detwiler and L. Orvison are busy unloading a carload of lumber for the local yard.

Mr. and Mrs. C. R. Blychert were Camrose visitors on Saturday.

H. Sparby spent the week end at his home in Bawlf.

Misses Lily Erickson and Alphonsine Charlebois and Messrs. Allan Hartchen and Rudolph Arneson of Edmonton attended the dance here on Friday evening.

Mr. and Mrs. E. Erickson and Mr. and Mrs. T. Horte of Daysland motored to Edmonton on Saturday.

M. D. Stutzman left by car on Monday for Missouri.

We are glad to hear that Mrs. Hedley Burton is home again from hospital having recovered from her recent illness, and we hope that she may remain well henceforth and for ever more, amen.

Several cases have been heard of lately of our bovine friends filling up on the lusious poison weed that grows in the sloughs and creeks. This is due to lack of grass and the weed is about the earliest green thing to grow. Mr Burton was unfortunate enough to lose one good milk cow and nearly lost another, being just able to bring her round to life again in time.

Misses Lorna and Adele DeLisle of Edmonton visited friends here over the week end.

Cuticura Soap
WORLD-FAMOUS FOR DAILY TOILET USE
The every-day use of Cuticura Soap, assisted by occasional applications of Cuticura Ointment, when required, is your best insurance against skin troubles. They not only cleanse and purify, but also enhance and preserve the natural qualities of the skin and hair.
J. T. Wait Company, Ltd., Montreal.

WORLD HAPPENINGS BRIEFLY TOLD

Lord Revelstoke, who died recently in Paris, where he was attending the meeting of the reparations conference, left half a million dollars to King Edward's Hospital fund for London.

The estimates tabled in the Newfoundland legislature provide for a total expenditure for 1929-30 of $10,547,708 as against $10,436,130 for 1928-29. The total funded debt of the colony is $41,424,149.

The British sloop "Cyclamen" has left Irak to protect British subjects in Abadan, Persia, where mobs have got beyond control of police. Persian troops have been called to restore order.

Profound secrecy surrounds the building programme of the French Air Ministry. Everything around the Ministry building is in a turmoil and aviation factories are working day and night to carry out the programme.

A country-wide search for Miss Barbara Fischer, missing McGill University student who disappeared in Montreal March 21, was brought to an end with the finding of the young woman's body in Back River, near a convent at Sault au Recollet.

To provide an outlet for surplus stocks of potatoes, the New Brunswick Department of Agriculture is encouraging the erection and operation of starch plants in the potato raising sections as a means of taking care of the small and otherwise unmarketable potatoes from the crop of succeeding years.

The Nationalist government state council announced that henceforth decapitation as a method of execution in China would be prohibited. Decapitation had been discarded by previous regimes but it was still used by the police and military authorities for executing bandits and robbers. Its complete abolition has now been ordered.

Magnetic North Pole Reached By Canadian

Wireless Message Has Been Received From Major Burwash

A wireless message from under the mythical shadow of the Magnetic North Pole is the latest achievement of Canadian science.

Within a hundred miles of the place where Sir John Franklin and his men disappeared and died, Major L. T. Burwash, Canadian explorer, engineer and scientist, has sent word to the Northwest Territories branch of the ministry of the interior of his safety and whereabouts.

Major Burwash went into the Arctic alone over a year ago to make scientific observations at the Magnetic Pole, and to search for further relics of the Franklin expedition. Where Franklin and his men perished and died of starvation Burwash lived on and carried out his scientific mission. He has now been ordered by wireless to make an investigation into the long-famed copper deposits along the Coppermine River.

Search For the Brightest Boy

Thos. Edison To Grant Scholarship To Candidate Passing Test

Thomas A. Edison, grown grey in achievement and fame, has started out to find a boy to whom he may pass on some day the torch of his genius. He started a search for the brightest boy in the United States. When he finds him, he is going to send him to college first of all.

A scholarship, taking care of all tuition fees for four years at whatever technical school the winner wishes to enter, will be awarded the high school or preparatory school boy who most intelligently answers a questionnaire to be made up by Mr. Edison.

The winner will be one of 49 to be picked, one from each state and one from the District of Columbia.

Mr. Edison will pay the expenses of all 49 boys from their homes to his laboratory at Orange, N.J., about August 1. There he will put to them his questionnaire.

Canadian Legion

Dominion Convention To Be Held In Regina In November Of This Year

The Dominion Convention of the Canadian Legion B.E.S.L., will be held in Regina on November 25th 1929.

To those ex-service men who are not members of the Legion, the present is an opportune time to become identified with the organization that has done much to promote the welfare of returned men, their widows and dependents.

The work of the Legion is not diminishing as the years go by, but rather is growing. The membership likewise is increasing and particularly so in Saskatchewan since the Provincial Convention, but in the province there are still a number of men who are eligible to join, and who have not as yet identified themselves with the organization, possibly due to lack of opportunity to do so.

With the increase of branches throughout the province, there is now local representation in practically every district, and the provincial secretary, Canadian Legion, Regina, will be pleased to advise anyone, on request, of the nearest local branch.

Unity among returned men was accomplished when the Canadian Legion came into being some years ago. All that remains is to complete the membership and make the organization even more representative than it is today.

On its record of achievement alone, the Legion deserves the support of all ex-service men, and it is hoped that the next few months will see every eligible man in Saskatchewan enrolled. The dues are nominal, but the presence of every returned man in the ranks of the Legion will be of the utmost value in furthering the aims and objects of the organization, and in promoting that comradeship which is one of its biggest assets.

Useful in Camp.—Explorers, surveyors, prospectors and hunters will find Dr. Thomas' Eclectric Oil very useful in camp. When the feet and legs are wet and cold it is well to rub them freely with the Oil and the result will be the prevention of pains in the muscles, and should a cut, or contusion, or sprain be sustained nothing could be better as a dressing or lotion.

A dentist is the only person who can tell a woman to open and shut her mouth at will and get away with it.

FOR ALL your baking, use MAGIC BAKING POWDER
Made in Canada – No Alum!

Recipes For This Week

(By Betty Barclay)

FRUIT OMELET

1 egg.
Few gratings orange rind.
1 teaspoon orange juice.
Few grains salt.
1 orange.
2 teaspoons butter.
2 teaspoons powdered sugar

Beat the egg slightly, adding the orange rind and juice and salt. Peel the orange, removing all white membrane, and cut into very thin slices. Sprinkle with one teaspoon of the powdered sugar. Melt the butter in hot individual omelet pan or frying pan. Pour in the egg mixture and cook over a low heat, shaking the pan and pricking the mixture with a fork until all the mixture is cooked. Roll or fold and turn out on to serving dish. Sprinkle with remaining sugar and surround with slices of orange.

A BALANCED MEAT DISH

Shred one pound of lamb, beef or pork and brown in its own fat in a frying pan. Add one cup of chopped celery and celery tops, one tablespoon minced onion and one tablespoon salt. Cover and cook about ten minutes. Add two tablespoons flour and two tablespoons butter mixed together and two cups canned strained tomato juice. Stir until the mixture is thick and bubbling, then serve.

SUNDAY SCHOOL LESSON

MAY 19

JEREMIAH CALLS TO OBEDIENCE

Golden Text: "Hearken unto My voice, and I will be your God, and ye shall be My people."—Jeremiah 7. 23.

Lesson: Jeremiah 7.1-28.

Devotional Reading: Psalm 96. 7-13.

Explanations and Comments

Outward Ritual Is Not Religion, verses 1-4.—Jeremiah felt impelled to stand at the gate of the temple and warn the people. To all who entered in at these gates to worship in the temple, Jeremiah cried: "Thus saith Jehovah of hosts, the God of Israel, [illegible] ... Trust not in the lying words of false prophets who declare unto you that God will never permit this holy temple to be destroyed." The threefold repetition of the words "the temple of Jehovah" suggests the energy of iteration that belongs only to Eastern fanatics, Dean Stanley observes. Recall the repeated cries of the fanatics in the theatre at Ephesus, "Great is Diana of the Ephesians" (Acts 19.)

"Is it not thus that the children of godly parents presume on the results of ancestral piety? Is it not thus that evil-living men will risk the consequences of sin, because they are prepared to make liberal gifts to religion? The drink-seller, the opium-smuggler, the slave-impostor, have all, in one form or another, administered sedatives to conscience, saying: 'The temple of the Lord! The temple of the Lord!'"—F. B. Meyer.

There Must Be Obedience To the Covenant Of Old, verses 5-7.—The continued security of the people in the land of their fathers would depend upon their reforming and practicing the social virtues, Jeremiah declared,—the security of justice between a man and his neighbor, the freeing from oppression of the stranger, the fatherless and the widow, and the avoidance of the shedding of innocent blood—and also upon the avoidance of the worship of false gods. The stranger was the sojourner from away, the alien resident temporarily in Judah. He and the fatherless with the widow had no voice in the administration of affairs and could be easily oppressed.

"As the potter has power over the clay to make and to change as he pleases, so is the nation in the hands of God to do with as seems best to Him. It is not for us to try to mould the national life and purpose without God and His Son Jesus Christ, into whose hands the nations of the world have been given; it is for us to make sure first of all that our nation is right with God and that we have the spirit of submission and obedience to him. Then the vessel will come out a vessel of honor, for the hands of God will be moulding the clay on the wheel."—The Youth's Companion.

Saskatchewan Hemp

Feasibility Of Hemp Growing Has Been Demonstrated

With the object of promoting hemp growing in the district, the Rosthern Board of Trade has instructed its secretary to purchase and distribute quantities of hemp seed. The feasibility of hemp growing as an industry has been demonstrated by seven farmers in the area who have all had plots of four acres under cultivation. Although the seed was not sown until June last year, a month late, the hemp grew 13 feet in height. The Provincial Government is assisting in building up the industry. The nearest factory is at Portage La Prairie, Manitoba.

Short of Breath Smothering Feelings Choking Sensation

Mrs. H. Day, Dartmouth, N.S., writes:—"For over a year I was troubled with smothering spells and shortness of breath, and it was impossible for me to walk, even a short distance, because of the choking sensation which followed.

After trying many treatments, in vain, I at last decided to try MILBURN'S HEART AND NERVE PILLS and in a surprisingly short time they did me much good."

Price 50c per box at all druggists or dealers, or mailed direct on receipt of price by The T. Milburn Co., Ltd., Toronto, Ont.

Customer—You say this material is the very latest fashion?

Assistant—The very latest madam.

But will it fade in the sun?

No, it's been in our window for two years.

When intensely angry and searching for a fitting word to express yourself, say "Roosevelt," which, we are reliably informed, is the biggest dam [illegible].

A nautical mile is 6,080 feet, or 800 feet more than a land mile.

Bay Route Cannot Operate This Year

Impossible To Have Things In Readiness Early Enough

While the Hudson Bay Railway may be ready for traffic early this autumn, it is altogether unlikely that harbor development at Churchill or the aids of navigation which must be installed in Hudson Straits will be sufficiently advanced to permit of commercial navigation of the new northern route.

In order to open the route this year it would be necessary to have everything in readiness by October, as the season of navigation cannot be relied upon to extend past December, this is not deemed to be possible, but the route probably will be in full operation in the summer of 1930.

Sheep are old at 12; an ordinary domestic pig has been known to live to the age of 30.

Worms feed upon the vitality of children and endanger their lives. A simple and effective remedy is Mother Graves' Worm Exterminator.

Little Joe opines that the splinters in the ladder of success won't bother you unless you are sliding down.

Silk is considered unclean by the Mohammedans because it is the product of a worm.

Cutting Corns With Razor Leads To Lock-Jaw

Don't cut corns with an old razor blade. Infection followed often by death may result from paring corns with an infected razor. Quick safe relief comes from using PUTNAM'S CORN EXTRACTOR. If afflicted with corns, callouses or sore foot-lumps, use "PUTNAM'S"—it's reliable and sure to shrivel up the corns so they drop right off. No pain, no soreness, but quick relief from sore corns comes to all who use PUTNAM'S PAINLESS CORN EXTRACTOR. 25c. at all dealers.

Alberta Pool Elevators

The Alberta Wheat Pool made a definite start the other day in extending its country elevator system when it was officially announced that 18 of these elevators had been contracted for and 12 others bought over from different interests.

"Why couldn't they get on together?"

"Well, you see, he's a Scot and she would persist in washing out his shaving brush every morning."

British piano manufacturers have captured both the American and New Zealand markets from their American rivals.

Okanagan Fruit Prospects

Despite hard winter weather there is very little injury to the fruit trees of the Okanagan Valley, and indications are for a fair setting of all fruit with fine prospects for the apple crop at the southern end of the valley.

Heck—A producer says that the movie of the future will be a combination of silence and sound.

Peck—I see. Like a man carrying on an argument with his wife.

Nation-Wide Fame.—There is scarcely a corner of this great Dominion where the merits of Dr. Thomas' Eclectric Oil have not been tried and proved. It is one of the world's most efficient remedies for sore throat, lame back and many other ailments arising from inflammation. Rubbed on the skin its healing power is readily absorbed, and it can also be taken internally.

People expect too much of a boy who is at the growing age. When he has done his eating and his growing he has put in a pretty full day.

We would say that a stable government is one in which the people remain hitched.

CANADIAN AIR MAIL PLANE ESTABLISHES WORLD'S RECORD

The entire world recognizes that Canada, in proportion to her population, is making greater practical use of aircraft than any other country and the "work" records of Canadian airplanes are regarded as even more important contributions to the advancement of aviation than the endurance and other stunt achivements of other countries.

Canada's latest and most impressive practical record in air is in speedy delivery of air mail and Capt. D. S. Bondurant, pilot for Canadian Airways (subsidiary of International Airways of Canada, Limited), as a result of a record flight between Toronto and Montreal, now holds the world's air mail speed record.

Capt. Bondurant, flying a Fairchild "71," powered by a Pratt & Whitney Wasp engine, on March 21st, covered the 340 miles from Toronto to Montreal in just one hour and forty-four minutes, and this has now been established as the world's fastest air mail flight.

Remarkable as this time is, Capt. Bondurant would have bettered it, but for fog encountered a little over 100 miles from Montreal. Up to this point he has flown 215 miles in just 60 minutes, maintaining a speed of over 3½ miles a minute.

Throughout the record-breaking flight Capt. Bondurant reported perfect performance from his plane which was fueled with Imperial Aeroplane Spirits and lubricated with Imperial Marvelube Motor Oil products which have become the almost universal preference of Canadian aircraft operators who choose them for 90 out of every 100 miles flown in Canada.

The International Boundary

The work of keeping the International Boundary between Canada and the United States in a state of effective demarcation was made one of the functions of the International Boundary Commission by a treaty signed at Washington on February 24, 1925.

An English physician claims that crying is good for one's complexion—provided, of course that one's complexion is one's complexion.

Indigestion
PHILLIPS' MILK OF MAGNESIA

What most people call indigestion is usually excess acid in the stomach. The food has soured. The instant remedy is an alkali which neutralizes acids. But don't use crude helps. Use what your doctor would advise.

The best help is Phillips' Milk of Magnesia. For the 50 years since its invention it has remained standard with physicians. You will find nothing else so quick in its effect, so harmless, so efficient.

One tasteless spoonful in water neutralizes many times its volume in acid. The results are immediate, with no bad after-effects. Once you learn this fact, you will never deal with excess acid in the crude ways. Go learn—now—why this method is supreme.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

THE CRIMSON WEST

—BY—
ALEX. PHILIP

Published by Special Arrangement With Thomas Allen, Publisher, Toronto, Ont.

CHAPTER XIX.—Continued.

Connie had rehearsed this moment a thousand times. She stood quietly on the steps for a moment, then slipped gracefully to the platform. Connie herself could not have imagined how changed she was. From coiffure to dainty French heels she was dressed as if fresh from the hands of an expert Parisian costumer. So dazzling was she that she positively took Donald's breath away. It seemed to him that she had grown like a magic rose, all at once from a tiny bud to a full blossom. No fault could be found with the perfect oval of her face, or with the delicate white rose skin, from which every trace of tan had gone. The long lashes that fringed her big blue eyes had turned a shade darker than the curling waves of her abundant golden hair.

Andy, whose small form had been hidden in the rear, moved bashfully forward, fumbling the wide hat held in his hand. "'Ello, Connie," he blurted, his lips parted in a wide smile of welcome.

Instantly Connie forgot her assumed dignity and became her warm, impulsive little self. With a glad cry she flung her arms about Andy's neck and kissed him.

"Strike me pink!" breathed Andy, as his hand stole up to touch the spot where Connie's lips had brushed his cheek.

Connie turned to face the lake. "Oh, Dad!" she cried in ecstasy, "isn't it good to be back here again?" She stretched her arms toward the ice-clad peaks. A gentle breeze swept down the wooded slope to fan her face as though in welcome. The blood surged beneath her smooth white skin and went singing through every vein. "Ah!" she sighed happily, as she inhaled a deep breath of air laden with the odour of pine from the hills she loved. Donald, gazing at her hungrily, saw tears brimming under her long lashes.

From the far end of the train a tall, grey-haired man assisted a slender sweet-faced woman to the ground, and then walked towards the station. As they stepped to the platform the woman's eyes rested on Donald, who stood with his back to her. Instantly she became rooted to the spot, eyes wide, one hand fluttering toward her heart. With the supreme, wondrous mother-love shining in her eyes, she held out her arms.

"Donald!" she cried passionately, "Donald!"

Donald whirled at the sound of the loved voice calling his name. His heart throbbed wildly, his throat felt constricted and his face paled under stress of strong emotion.

"Mother!"

His arms were around his mother, yearning, tender, hungry, after those long months of separation. Her face upturned to his was white and drawn, but her eyes shone with hallowed joy. He felt his hand gripped in his father's strong fingers, and saw his eyes shining with tears. John McLean patted his boy's dark head with a shaking hand.

"Donnie! My boy, Donnie!"

For some time Donald was oblivious to all save the great happiness of meeting his parents. His mother's embrace almost unmanned him, and it was with difficulty that he kept back the sobs that tightened his throat.

He led his parents to the other end of the platform and introduced them to his friends.

Robert Rennie's comments were simply gasps and a reiterated, "Well! Well!"

Andy offered his usual contribution. "Strike me pink!" he said.

Connie's eyes were filled with soft eagerness as she greeted Donald's mother. The glow in Donald's face as he spoke to Connie was poignantly significant of his deep love for her. But Connie, to his consternation and dismay, met his ardent glances with a look of cold indifference.

Since Connie's arrival Janet's features held a look of disquietude, but she acknowledged the introduction to Donald's parents with a radiant smile.

A moment later, Connie, with skirts held high, was running down the railroad track.

"Going after her horse," smiled Wainwright in answer to Donald's question.

"Will you have dinner with us?" invited Donald.

"Yes, thank you," responded Wainwright. "We will sleep in the car tonight," he continued, "but Constance insists that we must return to the old home as soon as possible. She has been busy drawing plans for a chalet she intends building on the bluff."

Connie returned with the old trapper, the latter leading Pegasus.

At dinner Connie showed no signs of her former shyness. She was as self-possessed, calm and perfectly poised as a goddess. A glad light filled her eyes as Gillis and his crew of "redshirts" filed into the big dining-room. She sprang to her feet and greeted them joyfully, shaking hands with each and everyone.

"I'm so glad to see you, Jack," she smiled.

The big logger took her tiny hand in his. "We're sure glad to have you with us again, Connie."

"May I bring Andy in to dine with us, Mr. McLean?" she asked as she came back to the table.

Donald nodded assent. She ran gleefully to the kitchen, and a moment later the loggers grinned broadly as she came through the door leading the protesting cook by the arm.

"Now," she said as Andy sat down, "we're all here." She looked about her and clasped her hands rapturously. "It seems as though I had been gone for years. And oh, it is so nice to be home again!" She sank to a chair between Andy and the trapper. "Do you remember, Andy, when you were dressed as a butler and danced with John at your party?" She threw back her golden head and her silvery laughter filled the room.

Janet was unhappy from the moment of Connie's arrival. She had caught the look of adoration in Donald's eyes as Connie stepped to the station platform. Standing there then she had quite definitely abandoned any hope of winning him. And Janet had been so sure that once she had held a place in his heart. A great depression, a great weariness of spirit, settled upon her.

That evening, as Donald walked with his parents by the lake-shore, he turned to his father. "Dad," he said anxiously, "do you think I have made good? Will you forgive me for—for——"

John McLean's eyes grew suddenly misty. "Donnie," he began gently, "Mr. Rennie has told us all about you. And no man could speak more highly of another." He drew a newspaper from his pocket. "Haven't you seen this?"

It was Vancouver's morning paper with a full-page devoted to the visit of the Eastern lumbermen. There were several photographs of the Summit Mill and one of Donald. The paper spoke of him as "the able young engineer whose modern ideas and energy had given to British Columbia a logging plant and mill that were a credit to the Province."

Donald saw the proud light in his father's eyes, and his heart was filled with a great peace.

The next day carpenters and material arrived for the construction of Wainwright's new home. That afternoon Connie, clad in fashionable riding habit, came to the mill office with her foreman to place an order for lumber. Pegasus in silver-mounted bridle and English saddle was proudly restive. With neck arched he curvetted and rocked while Connie sat on his back with that complete lack of self-consciousness that is the heritage of a born horsewoman. Before leaving she rode up the hill among the toiling workers, her irresistible smile bringing an answering grin from the "redshirts," who doffed their hats and shouted a joyous greeting.

All day pack-horses and men struggled up the hill, staggering under the weight of building material. But although Donald strained his eyes for a glimpse of the golden-haired rider, he saw her no more that day.

(To Be Continued.)

Little Helps For This Week

"Obey My voice, and I will be your God, and ye shall be My people."—Jeremiah vii. 23.

Three roots bear up Dominion;
Knowledge, Will;
These twain are strong, but stronger yet the third,
Obedience; It is the great tap-root that still,
Knit round the rock of Duty, is not stirred,
Though heaven-loosed tempests spend their utmost skill.
—James Russell Lowell.

Tenacity of will lies at the root of all courage; but courage can only rise into true manliness when the will is surrendered; and the more absolute the surrender of the will, the more perfect will be the temper of our courage and the strength of our manliness. "Strong Son of God," cries the poet, "Immortal Love, our wills are ours to make them Thine;" and that strong Son of God, to whom this cry has gone up in our day, and in all days, has left us the secret of His strength in the words, "I am come to do the will of my Father and your Father."—Thomas Hughes.

Minard's Liniment relieves pain.

Simple Precautions Against FLU Sore Throat — — The Danger Signal

Health Authorities Point Out The Necessity Of Treating The Simple Cold At Its Beginning

Nearly every case of "Flu" starts with a simple cold. At first the throat is sore—often just a little hoarse—soon the infection goes lower—then the chest is affected. A safe plan is to gargle the throat three times daily with "Nerviline"—this will keep the throat free from germs. If there is any sign of tightness in the chest, rub on Nerviline—every drop will penetrate deeply—congestion will be relieved—the cold will break up quickly. Many a dangerous case of "Flu" can be avoided by this simple home treatment.

Of course it is always wise to take some relaxing medicine, and for this purpose immediate results will be secured from Dr. Hamilton's Pills—they purge the system of impurities and carry off a lot of disease—breeding wastes.

This combination treatment of Nerviline and Dr. Hamilton's Pills is very effective for Grippe, Influenza, Bad Colds, etc., and can be relied upon to give very satisfactory results.

Heating By Radio

French Scientist Says Wireless Waves Can Be Used To Warm Homes

Wireless beams from the Eiffel Tower may be employed to furnish heat for the residents of Paris, if tentative plans drawn by French engineers are put into effect.

Heating plants deriving their power from radio waves are operating successfully in Germany, according to Jacques Risler whose report forms the basis of these plans. Risler said that while the question of wireless heating houses is still in the experimental stage, the feasibility of it has been definitely established.

Explaining how the wireless heating plant would operate, Risler said, "In the laboratory two posts were set up about 30 feet apart. The sending post sent out from 600 to 800-volt current waves of two to three meters in length. All that is to be done is to interpose on the receiving post circuit a filament 'in vacuo,' and it is raised to an incandescent state and gives out quite appreciable heat.

"There is therefore no theoretical difficulty in installing in a house a series of receiving posts which would in reality be just so many electric radiators. This system could be extended ultimately to an entire district or to a whole city, which would derive its heat from one central broadcasting station.

Rents House By Wireless

Member Of Byrd's Party Closes Deal In New York

Willard Vander Veer, one of the motion picture operators with Commander Byrd's South Pole expedition, closed a lease for a Westchester apartment by radio from a point somewhere near the southern extremity of the world. The lease covers a suite in the Dorset, Bronxville Knolls, which had been selected by Mrs. Vander Veer.

Several days ago she sent by radio a description of the apartment, the rent asked and other particulars to her husband in the great expanse of ice near the South Pole, never really expecting that it would reach him. She was surprised, therefore, to receive a message at her home, 431 Homestead Avenue, Mount Vernon, from her husband to close the deal.

Neuralgia succumbs to Minard's Liniment.

California is likely to become the first horseless state in the United States, for horses are rarely used there now except in isolated regions.

NO MEDICINE LIKE BABY'S OWN TABLETS

Once a Mother Has Used Them She Will Use Nothing Else

To once use Baby's Own Tablets is to use them continually—that is as long as there are young children in the home. That is the testimony given by mothers from all parts of Canada. They all say that they know of nothing to equal the Tablets, that they find them safe and efficient and at the same time pleasant to take.

Mrs. John Hollinworth, Maidstone, Ont., writes:—"I have three children, the eldest fourteen and the youngest nine months old. I have always used Baby's Own Tablets for them and have found no other medicine to equal the Tablets as a relief for the many ailments of childhood."

Baby's Own Tablets are a mild but thorough laxative which regulate the bowels and sweeten the stomach. They drive out constipation and indigestion, break up colds and simple fevers and make the cutting of teeth easy. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

A Foremost Fur Producer

Canada is one of the foremost fur producers of the world. Raw furs are the chief commercial product of the wild life of the northern half of the continent and as such represent the only economic return from large areas in the Dominion.

Great works are performed not by strength, but by perseverance.

Largest Thermometer Seventy Feet Long

Has Been Erected In Museum Tower At Munich

The largest thermometer in the world was recently erected in the tower of the Deutsche Museum at Munich. It is 22 metres about 70 ft. long and shows not merely the temperature of the moment, but the maximum and minimum of the previous day. It is regulated by another instrument of normal size, connected by electrical apparatus. Not until a thermometer becomes more than about 60 ft. long do you realize how exciting it can be. Blow hot, blow cold, the temperature of the breeze changes from minute to minute. The mercury ebbs and flows like a ripple on the seashore, and the spectator finds difficulty in tearing himself away from contemplation of the restlessness of the atmosphere.

Egyptian papyri 2,000 years old are in better condition today than some of the paper which went under the printing presses during the World War.

HEADACHE RELIEVED . . . QUICKLY
The Purely Vegetable Pill quickly corrects the digestive disturbance, removes the intestinal poisons, and sick headache quickly disappears. Your whole system enjoys a tonic effect, constipation vanishes, and you feel a renewed vigor. Avoid bromides and dope they are depressing and harmful. All Druggists 25c and 75c red pkgs.
CARTER'S LITTLE LIVER PILLS

The Invisible difference

Many motor oils look alike, but there is a vast difference in the way they perform. Unfortunately this difference is difficult to detect.

The invisible difference which makes one motor oil better than another must be inherent in the crude from which it is made.

There you have the reason why Marvelube gives better engine lubrication than oils refined from ordinary crudes. Imperial Oil searched the world over for a better crude—and in South America they found it. From it they make Marvelube—a pure, carbon-free, full-bodied oil that resists the extreme heats and pressures of modern engine operation.

Aircraft operators prefer Marvelube because better lubrication means greater safety and longer intervals between overhauls. Motorists prefer Marvelube because it is the ideal oil for modern motors. It ensures greater power, greater flexibility and greater economy.

There is a grade of Marvelube refined to meet exactly the specifications of your car. Consult the Marvelube Chart at Imperial Oil service stations and dealers.

ONE OF THE CLOTH

Perhaps because it is universal, criticism of the man of the cloth is more amusing than harmful "writes" "One of the Cloth" in the Aberdeen Press. From my experience, I have summed up the [illegible] as follows.

If a minister [illegible] married, he ought [illegible] be [illegible] married and has two or three [illegible] family, how can he be expected [illegible] look after his [illegible]. If he spends [illegible] time in study people say he [illegible] visit more, if he [illegible] and [illegible] interested in organization, they say he ought to spend more time in [illegible]. If his sermons are careful and learned, they are too heavy; if they are topical and interesting there is nothing in them. If a minister [illegible] in his conduct, he is too stiff, if he unbends and is human he is lacking in dignity.

So not being able to keep up the standard set him the poor man [illegible] and goes his own way.

Cream Shippers

The busy season will soon be here and most of you when in town will want to conduct your business in quick time so as to make every minute count.

"IF THE MOUNTAIN WILL NOT COME TO MAHOMET, MAHOMET MUST GO TO THE MOUNTAIN."

In explanation let us say that we have an arrangement with the "Farmers' Supply" whereby those wishing to do so can leave their cream there. The Creamery truck will call at the store TWICE DAILY and pick the cream up.

Phone the Creamery and leave instructions as to your cream cheques.

ALWAYS at your service.

FIRST FORTNIGHTLY CROP REPORT

Issued by Department of Agriculture, Government of Alberta, Edmonton, May 11th, 1929

Approximately seventy-five per cent of the wheat crop in the province has been seeded and steady progress is being made with the seeding of coarse grains, according to telegraphic reports received on Friday by the Department of Agriculture. A peculiar situation exists, as in the part of the province where moisture has been most abundant, spring work has in consequence been retarded to the greatest extent. A number of central and northern sections report that wheat seeding has been completed, while as a result of intermittent rains and falls of snow over the southern part of the province, not more than thirty or forty per cent of the wheat has been sown in some localities.

Moisture conditions are reported to be generally satisfactory, particularly in the south where the effects of the open fall and light snow fall of the past winter have been largely offset by the recent precipitation. In some northern districts winds have been more than usually prevalent, and while the soil moisture is sufficient to promote germination, further rains will be required at an early date if rapid growth is to be expected.

An increase of from five to ten per cent in the wheat acreage of the province is anticipated, as compared with last year. This gain will be especially noticeable in central and northern sections, where a large amount of new land was cleared and broken in 1928 in readiness for the present year's crop. Very little difference is expected in the acreage seeded to coarse grains, except in areas where seeding of wheat has been unduly delayed.

Good stands of fall wheat and rye are reported, as these crops have come through with a negligible amount of winter killing. In a number of districts an increased acreage will be seeded to sweet clover and other forage and fodder crops.

Wheat seeding has been practically completed in the Peace River country and moisture conditions are satisfactory at the present time, although additional rains will be needed shortly to support the present excellent prospects. In this section of the province a very marked increase is noted in the acreage being seeded this season.

Owing to the abundance of feed available during the past winter, live stock generally has come through in good condition, and pastures are already showing good growth.

NOTICE TO CREDITORS AND CLAIMANTS

IN THE MATTER OF THE ESTATE OF ARTHUR McMULLEN, late of the Town of Tofield, in the Province of Alberta, Farmer, deceased.

"Notice is hereby given that all persons having claims upon the estate of the above named Arthur McMullen, who died on or about the first day of December, 1928, are required to file with The Canada Permanent Trust Company, Edmonton, Alberta, by the 20th day of June, 1929, a full statement, duly verified, of their claims, and of any securities held by them, and that after that date the administrator will distribute the assets of the deceased among the parties entitled thereto, having regard only to the claims which have been brought to its notice.

Dated at Edmonton, in the Province of Alberta, this 29th day of April, 1929.

"McLaughlin-Buick *get-away, power, speed* and *easy riding* surpass any car I have ever driven. I do not think there ever was a more beautiful car made." *(Name upon request)*

MEN and women in every community have discovered that this dynamic car provides an advanced standard of motoring—that it out-runs, out-climbs, out-performs any automobile they have ever driven—that it is exactly what McLaughlin-Buick owners say it is: the finest performing automobile ever built!

More than twice as many people have purchased McLaughlin-Buicks as any other automobile at or above its price. And additional thousands are getting behind the wheel, getting the facts and entering orders for McLaughlin-Buicks with each passing week.

Matchless style, matchless comfort and, above all, matchless performance, are the reasons. Come, prove these things to your own satisfaction. Take the wheel of this car—test it against any other—and you, too, will join in the countrywide endorsement of McLaughlin-Buick!

Tuesday Is The Day

On TUESDAY, MAY 21st, we will be mailing subscription notices to all our subscribers whose subscriptions have expired or will expire before May 31st. We trust that we will have an early and good response.

In most cases the amount owing and the cost of renewal is small and it might seem to some—so small as not to call for immediate action. These amounts, however, multiplied many times become a fairly large one. Subscribers will therefore not only be following the lines of good business in paying their subscription account promptly, but they will be confering a favor upon the publisher.

The "local" newspaper is a tradition of the North American Continent. At no other place in the world are type and presses assembled to serve so few people. People here call for their "local paper" and desire to know the everyday affairs of the town and district in which they live.

A new baby arrives and his arrival is chronicled in the local newspaper. A valued and respected citizen passes and his praises are printed in the local paper. Brown's, Smith's or Jones house burns down and the local paper reports it. Somebody's hen lays a very large egg; somebody's cow gives an extra quantity of milk; somebody's pigs grade extra special and the news is spread throughout the district by the local paper. All ordinary and extraordinary things of life find their way into the columns of the press. Not so big and bulky as the city newspapers; not so many columns of type, but much more intimate to the people it reaches is the local sheet.

The Tofield Mercury

The Power Of Small Things

The following item was recently printed in a large number of newspapers:

"Forty-five years ago there was a strike in an Ohio coal mine. A group of enraged miners took a car of coal, set it afire, and pushed it down into the mine. That fire is still burning under ground, spreading many miles, destroying valuable coal deposits and rendering hundreds of acres of surface ground sterile. Today it threatens to destroy a school building and some homes in a village. Burning beneath them it is undermining the ground and may cause them to collapse. The fire that a moment's anger started 45 years ago certainly turned out to be a bigger thing than the men who started it ever imagined."

There is a moral to this incident which might well be heeded, for, after all, it is but an illustration, a spectacular one, it is true, of almost every day happenings. The moral is that a small act may have far-reaching consequences either for good or for evil.

A cow kicked over a lamp in a barn in Chicago, and the Great Chicago Fire resulted.

A frenzied student assassinated an Austrian Grand Duke and his wife, and the Great War was the immediate outcome with its sacrifice of ten millions of lives and hundreds of billions of dollars in property and other losses.

An employee is dismissed in anger, and perhaps unjustly, and a nation-wide strike follows bringing suffering and ruin in its wake.

A careless workman, or a dishonest contractor, neglects to put a sufficient quantity of cement in the foundations of a building or in the piers for a bridge, or the retaining wall of a dam, and disaster follows taking heavy toll in human lives.

A rotten timber is used in building a ship and the vessel sinks, a faulty rail is laid in a track and a train is wrecked, a careless camper neglects to put his fire out and a terrible conflagration wipes out a forest.

And how often has a hasty word, an insulting remark, led to family and business estrangements with dire results to all concerned.

How often too has the peace and friendliness of an entire community been destroyed because of some whispered scandal, the unguarded reflection upon the honor and integrity of another, the prejudiced utterance casting aspersions upon those of different races or religious beliefs.

All are things in comparison to their terrible effects and disastrous results."

Fortunately, for the human family, the reverse is also true.

We still recall our childhood's interest in the story of the little Dutch boy who by sticking his finger in the small hole in a dam saved his country from inundation. We delight in the personal histories of great men and women who were started on their careers by the kindly, encouraging word of some friend.

We know too by personal observation that the mighty oak is born of the humble acorn, that it was in a single kernel of wheat the hundreds of millions of bushels of Marquis wheat annually harvested in Western Canada had their origin.

If we would but remember and give heed to the fact that, just as a pebble thrown into the water causes ever widening circles of little waves to sweep its surface until finally they lose themselves upon the shore, so does every word and act of ours create little circles of influence radiating out [illegible] our communities and the world at large, and for good or ill affecting the lives and future of others and of our country, then perchance we would be more careful, more considerate, a little less hasty and impatient of others, and more inclined to extend that degree of sympathy and tolerance to others which we naturally expect will be displayed towards us.

Encouraging Business Outlook

The World's Air Centre

British Ports Will Be Headquarters In Next Decade Is Prediction

Only a decade or two hence and airplanes and airships may be leaving British ports for all quarters of the Empire and of the world as regularly as steamers do now. From coach to railway, from sailing ship to the steam and oil-driven leviathans of today, from the horse to the car, from the balloon to the airplane the great job of annihilating time and space goes on. And at each new step, in each successive phase, British inventiveness, British engineering, and British pluck are to the fore. In the air as on the waters Nature has marked us down as the centre of the world.—London Daily Express.

WOMEN WHO SUFFER

Anaemia Responsible For Most Of the Ills Of Girls and Women

Medical science shows that most of the ills that afflict growing girls and women are due to the fact that the blood is either poor in quality or deficient in quantity. This anaemia is the cause of low spirits, languidness, the poor appetite, breathlessness and the aching backs that make life a burden for so many women. There is no need for any woman to suffer in this way, for all the miseries of anaemia can be quickly banished by taking Dr. Williams' Pink Pills. It is an established fact that these pills create an abundance of new rich blood—their wonderful reputation is based on that.

Thousands of formerly weak and ailing women have cheerfully testified to the fact that they owe their restoration to good health to Dr. Williams' Pink Pills. One of these is Mrs. Napoleon Gallant, Tignish, P.E.I., who says: "I am among those who can strongly recommend Dr. Williams' Pink Pills. Before I began using them I was in an extremely nervous condition. I could not sleep, neither could I eat, and was constantly growing weaker. I got medicine from a doctor, but it did not seem to meet my condition, and then, on the recommendation of a friend I began to take Dr. Williams' Pink Pills. By the time I had taken a couple of boxes there was no doubt they were helping me. I continued their use until I had taken six or seven boxes when I was again in the best of health. I always keep Dr. Williams' Pink Pills in the house, and if any member of the family feels run-down the pills soon put them in good condition."

The best time to begin taking Dr. Williams' Pink Pills is the moment you feel the least bit out of sorts. The sooner you do so the sooner you will regain your old-time energy. You can get these pills through any medicine dealer or by mail postpaid, at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Agricultural Wealth Of Canada

Figures Show the Importance Of Our Basic Industry

The gross agricultural wealth of Canada for the year 1928 is estimated at approximately $8,637,201,000, an increase of $19,252,000 over the 1927 estimate.

The total agricultural revenue of Canada last year is placed at $1,730,804,000 with the following allotments for the nine provinces: Ontario, $300,821,000; Saskatchewan, $332,063,000; Quebec, $277,050,000; Alberta, $264,026,000; Manitoba, $118,967,000; ...

Baby's restless nights might be avoided

Scalded skin and other skin troubles are common causes of restlessness, and often could be avoided by careful bathing with Baby's Own Soap.

Its fragrant lather cleanses and heals Baby's skin, and prepares for restful sleep.

"Best for you and Baby too"

Age No Bar To Flying

Lindbergh Says Properly Trained Pilot Is Always Efficient

Lindbergh will be flying as long as he can drive an automobile, he told a group of reporters recently in answer to the query as to whether he expected to taper off his flying as he grows older. In the opinion of America's foremost pilot, an aviator skilled in youth can fly as long as he can drive a car. Tersely he disposed of the oft-repeated conjecture that he might give up the air as greater responsibilities caused many persons to think that he would be safer on the ground.

"I see no reason why I shouldn't fly," said Colonel Lindbergh. "If a pilot has been properly trained he is just as good when he is old as when he was young. Some of the best pilots in service today are getting along in years."

A QUICK WAY TO END BABY'S UPSET SPELLS

Final Production Of Radium

Particles Expelled In Final Analysis Appear To Be Lead

Radium is practically the most expensive product in the world and is valued at approximately $2,000,000 an ounce. Now hospital authorities are anxious because their stocks of radium are slowly transmuting themselves into one of the commonest and cheapest of metals. At varying rates, which cannot be controlled by any known scientific methods, it expels five particles from its [illegible] and these five particles are atoms of helium. Radium is a very heavy element, its atomic weight being 226. Helium is one of the lightest of elements, with an atomic weight of 4. Thus the original radium after expelling five helium atoms has an atomic weight of 226—4 x 5, or 206. And 206 is practically the atomic weight of common lead. It seems certain, therefore, that the final product of this rare and costly element is simply lead.

Takes Millions Of Years

It has recently been computed that the most remote objects made visible by the largest telescope are so far away that it takes light, travelling at 186,000 miles per second, 140 million years to span the distance between them and us.

Asthma Doesn't Wear Off Alone. Do not make the mistake of waiting for asthma to wear away by itself. While you are waiting the disease is surely gathering a stronger foothold and you live in danger of stronger and yet stronger attacks. Dr. J. D. Kellogg's Asthma Remedy taken early, will prevent incipient condition from becoming chronic and saves hours of awful suffering.

—Mrs. W. V. Russell, R. R. No. 4, Prescott, Ontario.

REPARATIONS PLAN UNFAIR TO THE DOMINIONS

Paris.—It was confirmed that the plan for revision of reparations payments by Germany, proposed by Owen D. Young, of the United States, at the reparations conference, would leave Great Britain nothing for the Dominions or for arrears of interest on debt. It would award that country just enough from Germany to pay the U.S. from now on.

The British experts here refute the contention that this is all that is demanded in the Balfour note. They point out the note excludes reparations due the Dominions from its terms.

The absence of direct representation for the Dominions at the conference is considered by the British delegation as all the greater reason for not yielding on the question of the Dominions share of German reparations. The delegation is practically certain to reject that phase of the Young proposals which would reduce the German payments to the Dominions to zero.

The proposals brought forward by the U.S. delegate were by way of a compromise after the conference had become deadlocked on the amount Germany should pay. The Germans refused to meet the Allied demands and Mr. Young advanced a plan involving some reduction.

Eclipse Of Sun In South Seas

Thousands In Manila See Phenomenon Through Smoked Glasses

Manila.—The eclipse of the sun cast a shadowy streak across Polynesia and the South Seas.

Manila witnessed the phenomenon with great interest, as seen here, 90 per cent of the face of the sun being obscured as the moon's bulk came between the solar rays and the earth. The observation cast a spell over the city but did not prevent the sun from casting shadows.

If the natives feared the phenomenon there was no sign of it here. Thousands of all ages viewed the eclipse through smoked glasses or other improvised instruments.

Word was eagerly awaited from Iloilo, south of here, where five scientific expeditions located their instruments to view the phenomenon of a total eclipse.

Disappointed In Arms Parley

Stresemann Deplores Failure To Reach Definite Decision

Berlin.—Gustave Stresemann, foreign minister of Germany, discussed disarmament and the Paris reparations negotiations in a speech at the annual banquet of the Foreign Press Association. Although he specifically disclaimed any desire to give a pessimistic touch to these situations, yet his remarks, especially regarding disarmament, showed disappointment and even alarm at the failure of the Geneva conference to reach concrete and definite decisions.

Riots Cause Controversy

Part Played By Police In Berlin Rioting Is Criticized

Berlin, Germany.—Bitter controversies continue in the Berlin press and among the public as to the part played by the police in suppressing the Communist riots which broke out on May day. Postmortem examinations of twenty-four victims of the riot are said to have revealed that 17 had been killed by police bullets.

The official inquiry has been unable to establish that a single shot had been fired by a civilian against the police. Only one policeman of the 40-odd injured had received a bullet wound and that wound he had accidentally inflicted upon himself.

One hundred and fifty shopkeepers of the Wedding district, where rioting was said to have been very severe, declared that the streets were quite safe from Communist excesses and that a simple police patrol would have sufficed.

Meanwhile, 44 persons of 117 arrested had been sentenced to short terms of imprisonment for breaking the peace. The rest were released for want of evidence.

Should Not Be Disfranchised

Committee Thinks Persons Receiving Charitable Aid Entitled To Vote

Ottawa.—The parliamentary committee on privileges and elections has decided to recommend a change in the Elections Act so that persons receiving charitable assistance would be allowed to vote. The act as it stands prevents persons receiving such assistance either by direct gifts or by living in a charitable institution, from voting.

The committee felt that with so many and varied forms of assistance now being extended to persons in unfortunate circumstances it would be too far reaching to disfranchise them all and it would be almost impossible to differentiate.

The committee refused to agree to the suggestion that the clause preventing judges from voting be eliminated. The general opinion seemed to be that the judges did not want the law changed, they did not wish to be placed in the position of either supporting or opposing the government by casting their ballots.

L. J. Ladner, Conservative, Vancouver South, argued it was absurd to disfranchise the judges. He considered it was an insult to the judges.

Cannot Attend Function

Alberta Women Unable To Accept Invitation From England

Edmonton.—None of the five Alberta women who were expected to visit England on June 17, when the Privy Council is to hear their appeal from the decision of the Supreme Court of Canada, which decision declared that they are not "persons" within the meaning of their national charter, the British North America Act, will be able to attend a great public function to be held in their honor in London.

The invitation, which also carried with it an offer of assistance, has ...

Marooned Trains Released

Were Held Up During Ten-Day Blizzard In Northern Manitoba

Winnipeg.—Freed from northern snows by a let up in low temperatures, two Canadian National Railway work trains were able to proceed on the way to Churchill, the prairie outlet on Hudson Bay. Both trains had been held up during a ten-day blizzard that had swirled down from the northland almost to The Pas.

After days of almost unavailing effort the snow plows succeeded in battling through the trains, on one of which were 100 men on route to Churchill for the department of railways and canals.

AMENDMENTS TO ELECTION ACT TO BE FORTHCOMING

Ottawa.—Candidates should be allowed to hire automobiles or other conveyances to carry voters to the polls on election day, it was decided by the special committee of the House of Commons reviewing the Dominion Elections Act. Sec. 11, which makes the practice an offence is to be deleted. There are at present one-third too many polling subdivisions throughout the country, Colonel O. M. Biggar, former chief electoral officer stated. Approximately $150,000 would be saved in each election by a revision of subdivision boundaries. Sec. 28 is to be amended to meet the difficulty.

Sec. 27 is to be amended so that an election officer guilty of a wilful act or omission shall be subject to a fine of from $200 to $500, and one half the fine is to go to the informer.

A new section, "3-A," was added providing that election notices or documents may be fastened to posts or wooden structures despite any municipal bylaw.

Sec. 4 was amended so that although hand bills or otherwise must bear the name of the printer, the candidate cannot be unseated if they do not. It was explained that the section is to prevent anonymous material being circulated.

Farmers and labor organizations may hereafter contribute to election expenses as a result of removing Sec. 8. The action provided that no association could furnish money unless it was specially formed for election purposes. The chairman, C. G. Power, Liberal, Quebec South, said that the section operated unfairly in the case of farmers and labor organizations.

Alaskan Survey Planned

Washington, D.C.—Inventory of the vast resources in timber and hydro-electric power that lie hidden beyond inaccessible mountain ranges in southeastern Alaska is to be taken this summer by navy aviators. Flying photographers with multiple lens cameras will unfold the secrets of hidden lakes and inaccessible forests like a magic carpet beneath them.

SPOKESMAN FOR GERMANY

Dr. Hjalmar Schact, president of the Reichsbank, and spokesman at the reparations conference in Paris.

Suspect Grain Mixing

Think United States Soft Wheat Is Mixed With Hard Wheat Of Canada

Vancouver.—Possibility that some United States soft wheat is brought to this port and mixed with Canadian grain, is interesting the Saskatchewan Royal Grain Commission just now. Evidence has been produced that at least one such vessel from Seattle was in port, this spring, with a part cargo of soft wheat, and loaded the balance of the ship with Canadian grain. The port warden was before the commission, to explain just what safeguards there are to prevent anything of this sort. His evidence was clear on the point, that in such an event, no government certificate would be issued to cover such a mixed cargo, but that there was nothing to prevent mixing after the Canadian grain had been inspected into the vessel. In such an event however, the Canadian certificate could not be construed as certifying to such a mixture, though overseas buyers might be deceived as to just what kind of cargo they were buying. It was pointed out that ships en route to the Orient from Seattle, frequently come in here for grain, and many of them have soft American grain aboard. There is a mixture made in Oriental ports of 35 per cent. Canadian hard wheat, and the balance soft, from the United States, but this is not covered by a Canadian certificate.

Plans Flight To Sweden

Second Attempt Will Be Made By U.S. Aviator

Chicago.—Another flight to Sweden from the Middle West is being planned by Bert Hassell, Rockford, Ill., aviator.

Hassell, who piloted the "Greater Rockford" on its projected Rockford-Sweden flight last summer and was forced down in the snow fields of Greenland, declared his next flight would be over a route with nine refuelling points.

Hassell predicted that within five years aeroplanes with "pay loads" ...

To Circle the Globe

Plans Being Drawn Up For Graf Zeppelin To Make Flight Around the World

Washington, D.C.—The post office department was advised by U.S. diplomatic officers in Germany that plans are being made for the Graf Zeppelin airship to make a round-the-world trip, starting and ending at Lakehurst, N.J.

A trip from Germany to the United States and back is due to start soon, after which the post office department was advised the airship would return to this country to start circling the globe.

Must Watch His Colors

Party Workers In England Must Be Wide Awake

London.—The party worker who skips lightly from constituency to constituency during the general election campaign will have to keep a sharp eye for his colors. For by a curious practice in British elections no party has national colors accepted in every constituency. Sometimes the colors in one constituency are completely reversed in another. Occasionally it is a bit awkward for the party enthusiast who wanders far afield.

SAY POOL WILL NOT SELL GRAIN AT A SACRIFICE

Winnipeg.—If western wheat pools are blamed for the grain blockade at Port Colborne and Montreal they [illegible] at the situation in which they are found. But they refuse to be made the "goats," according to Pool officials' statements in answer to Montreal allegations.

"We could mitigate the situation if we wanted to sell our grain at a sacrifice," commented a senior official, "but we refuse to make our farmers pay for a situation that is not our fault. Don't misunderstand. We are selling a certain amount—we are not refusing sales."

"The world surplus is not of our making. There is an enormous amount of grain in the world, and the buying is not exactly brisk. If we wanted to take sacrifice prices we could move the stuff, but we don't intend to penalize our farmers by doing it.

"Why should we relieve the congestion for everybody's benefit but our own? Montreal officials can blame whom they like—we refuse to be the 'goats.'"

Saskatoon.—A report from Montreal which blames organizations of Western farmers for grain congestion at the port of Montreal and which suggests that Western agrarians should accept a lower price is taken exception to here by George H. Williams, president of the United Farmers of Canada, Saskatchewan section.

"The report published by the Montreal Star" ...

MARITIME GRAIN RATES CASE IS POSTPONED

Ottawa.—Application of the maritime board of trade for a reduction in grain rates from Fort William to St. John, N.B., and Halifax will be heard at three sittings of the board of railway commissioners. Chairman H. A. McKeown and his colleagues on the board, it was announced, will hold local sittings at St. John and Halifax some time in July. Later a final hearing on the application will take place here.

A rate of 18.34 cents per hundred pounds on grain shipments from Fort William to the two ports on the Atlantic seaboard is sought by the application as against the prevailing rate of approximately 34 cents. The rate now effective from Fort William to the port of Quebec under the general freight rate revision is now 18.34 cents a hundred pounds.

Hearing of the application was scheduled before the board here, but owing to the illness of Alistair Fraser, K.C., counsel for the Canadian National Railways presentation of the case has been postponed until July.

Heads Victorian Nursing Order

Hon. Geo. P. Graham Re-Elected President Of Board Of Governors

Ottawa.—Right Hon. George P. Graham was re-elected president of the Board of Governors of the Victorian Order of Nurses for Canada at the [illegible] session of the thirty-first annual meeting of the Order here. Hon. W. K. Mulkins of [illegible] is one of the five vice-presidents.

Tribute was paid to Mrs. James MacCauley of Vancouver and Mrs. William Dennis, Halifax, as "the two splendid women with whom the idea of the V.O.N. first originated." Letters of gratitude and congratulations were sent from the conference to Mrs. MacCauley and Mrs. Dennis.

Miss Elizabeth Smellie, chief superintendent of the Order, gave a comprehensive resume of the work during the past year. Victorian Order Nurses attended 43,291 patients and made 515,196 visits, an increase of 34,868 over the preceding year. Of these 45,974 were free nursing visits.

Wheat Nipped By Frost

Grain In Brandon District Will Grow Again Say Farmers

Brandon, Man.—Wheat shoots on hundreds of acres in the Brandon district have been nipped off by continued night frost. Grain that in some cases reached a height of one and one-half inches has been levelled. Farmers state that the grain will grow again without re-seeding and some contend that the new growth will be a benefit, strengthening the ...

VARIETY THEATRE

Saturday, May 25th

LON CHANEY
—in—
A Passed U Picture

"West Of Zanzibar"

The setting for this picture is in the central, southern part of Africa and with Lon Chaney as principal actor. It is certainly a picture during which your breath comes in spasms.

NEXT MONDAY, TUESDAY and WEDNESDAY

"The Trail Of 98"

Why did men fight and die for gold? Why did they brave the hardships of the terrible Yukon winters because of this hunger for gold. See this great picture yourself next week and answer these questions for yourself.

Admission 75c., 35c.

SATURDAY, JUNE 1st

'The Bellamy Trial'

It is enough to say that this was one of the first talking pictures shown at the Capital Theatre in Edmonton

Admission: 50c., 25c., 10c.

LOCAL AND PERSONAL

Mrs. Taylor and Mrs. Innis and Joan are spending a few days in the city this week.

George Hill and a friend spent Sunday with his cousin Miss Thelma Noland.

Mr. and Mrs. J. W. Chapman motored to the city on Wednesday.

Miss Vera Clement and Miss Peggy Bowery spent the week end with Lois and Stella Clement.

Mrs. Firth is attending a Missionary convention in Calgary this week.

Mrs. Geo. Agnew and Kieth left last week for her home in the east where her father is ill.

Visitors to the city on Wednesday were Mrs. J. O. Letourneau, Mrs. Hobson, Mrs. Abbott, Mrs. McClung.

Kathleen Hobson returned from Edmonton on Tuesday, for afew days.

Arthur Preston, cousin of Richard Cory visited at the Cory home for a few days. He will accompany Richard on the survey.

Anglican services will be held at Lindbrook on Sunday, June 2nd, at 11:00 a.m. Rev. Symes will conduct the service.

On Wednesday evening Richard Cory was host to about fifty-five guests at a party which was held in the Curling rink. The evening was taken up in dancing. At midnight a most delicious lunch was served to which everyone did justice. After lunch dancing was once more resumed. The party broke up about an hour or two later with the singing of "He's a Jolly Good Fellow." Richard is leaving soon to go to work on a survey party at British Columbia. We all wish him success with his new work.

A special Empire Day program was broadcasted from the University of Alberta on Thursday afternoon. The program was specially prepared for school children and school principals were requested to arrange for their pupils listening in. The Tofield school pupils listened over the sets of A. B. Clutterham, R. W. Pinceti, Geo. McLaughlin, W. C. Swift, Dr. Law, C. W. Rowe, and F. O. Ball. The program which was of a patriotic nature was much enjoyed.

CHANGE OF BUSINESS

Frank O. Ball has bought out the stock of harness, building and the the two lots on the corner opposite Taylor's store, from Mr. John Lee. Frank has now moved his office up there and is now ready to do business in his new premises.

INTERMEDIATE BALL TEAM REORGANIZES

The intermediate baseball team re-organized last Friday night. After a practice a meeting was held at the ball diamond and Kenneth Ball was elected captain, succeeding Edward Hill who handed in his resignation because he lives too far out of town and has no telephone. It was decided to try and arrange to enter some tournament in some neighboring towns. On Monday morning an entry was phoned into Vegreville and accepted. This is an intermediate tournament, with about six teams participating. The trip will be made possible through the kindness of Mr. F. O. Ball and Edward Hill in taking their cars. Good luck, boys!

FINE TROPHY FOR CAMPAIGN AGAINST CROWS AND MAGPIES

Farmers, ranchers and other sportsmen, wishing to get pheasant eggs for hatching and live pheasant chicks in connection with the stocking movement which is spreading rapidly throughout the province, have been able to secure supplies through the Calgary Fish and Game Association. The association operates without profit. It is actuated by the desire to help the stocking movement.

Those who are interested may secure information by communicating with the secretary of the Calgary Fish and Game Association, care of The Calgary Herald.

The Alberta Association and the local associations are also conducting a vigorous campaign against crows and magpies. The suggestion emanating from the Hanna Fish and game association, that a trophy for competition between the thirty-five locals in the province be donated, resulted in a generous contribution by Mr. A. F. Cross, of Calgary, of a trophy for this purpose.

The regulations respecting the trophy will be announced later.

The Alberta Association is backing up the U.F.A. and Alberta government in the war against pests.

KETCHAMOOT

There will be no preaching services next Sunday, May 26th, it being conference Sunday. Sunday school at the usual hour, 10:00 a.m.

Mrs. E. McMullen and Mrs. B. Cookson visited at the W. A. Mitchell home on Wednesday afternoon of last week.

Mr. and Mrs. J. H. Ingram and son, Bill, Mr. and Mrs. Hanson and family motored down to Round Hill on Sunday and spent the evening at the home of Mrs. Hanson's sister, Mrs. Scrogman.

Miss Tensdale of Hughenden, now a student of Camrose normal visited over the week end with her cousins Mrs. Sam Stirritt and Mrs. M. Lawson.

Mr. and Mrs. Lawson, Mr. and Mrs. Herman Lawson and family, the Misses Mabel and Mildred Lawson and Viola and Roy Lee motored down to Camrose on Sunday and visited at the Harold Smith home.

Mrs. Henderson entertained a number of friends and relatives to Sunday dinner in honor of Mr. and Mrs. Mitchell Sr. Those present were: Mr. and Mrs. W. A. Mitchell and family, Mr. and Mrs. B. Wildman and daughter, Mrs. E. McMullen, Mr. and Mrs. S. Stirritt and family, the Misses Tensdale and Ethel Coombes and Angus Mitchell.

Mrs. Albert Sutton is assisting Mr. Henry Sutton in the home during the busy season.

Mr. and Mrs. Hugh Mitchell and Mrs. W. A. Mitchell and son were guests of Mr. and Mrs. Robert Stirritt of Farmington on Monday.

Mr. and Mrs. Tommie Welsh visited their uncle and aunt, Mr. and Mrs. Sam Nomeland on Sunday. Mrs. Welsh arrived from Portland, Oregon, on Saturday. Mr. and Mrs. Percy Sutton and [illegible] daughter were also guests at the Nomeland home.

CINEMA PROVIDES METHOD OF PRESERVING LORE OF THE KLONDIKE

Some years ago when Robert W. Service wrote "The Trail of '98," a thrilling story of the Klondike rush, he penned a fervent prayer which motion pictures have at last answered.

In writing his description of the battles between men and relentless forces of nature, he modestly admitted his descriptive powers were unable to cope with the scenes he witnessed in man's greed for gold.

In depicting the mad stampede over the terrible Chilkoot Pass into the Yukon he said:

"Oh, for a medium to express it all! Your pedantic poetry can't hog enough; prose isn't big enough. What we want is something between the two, something that will interpret life, and stir the great heart of the people."

His prayer is granted in "The Trail of '98" Metro-Goldwyn-Mayer's northern film epic which has been directed by Clarence Brown and is now being shown at the Variety Theatre on Monday, Tuesday, and Wednesday of next week.

The camera gives to the eye a picture faithful to descriptions given by hundreds who participated in the "rush."

Brown has made this picture the real epic of the north and has given to millions an opportunity to see exactly how thousands of men, lust for gold, acted as they stampeded over a trail which claimed hundreds of victims. You actually see the battle between man and nature, the great snow slides roaring down the mountains and claiming their victims; the gold seekers fighting bravely in the teeth of the icy gale; you see them dying of disease, starvation, cold, as the survivors push on, lured by the glitter of yellow metal in the shadow of the Arctic.

UTILITY INDUSTRY IS TRUSTEESHIP INSTEAD OF TRUST, SAYS "FOGG"

Those who have attacked the public utility as a "trust," now find the ground suddenly taken from under their feet by the sudden realization that this "trust" is really a trusteeship of millions of wage earners, families and business men in every section of the country, Oscar H. Fogg of New York, president of the American Gas Association, declares.

Professional detractors charge the public utility industry with the crime of being big, according to Mr. Fogg, who says that the industry of today is big, and properly so, because it rests on a base of almost universal service. Under such circumstances, he states, great size is not an achievement in itself, but rather a manifestation of the intimate relation between utility service and the prosperity and progress of the nation.

"The most reliable estimates available show that during the last ten years the number of stockholders in public utility companies alone have been increased by hundreds of thousands of individuals," Mr. Fogg says. "This does not take into consideration billions of dollars of public utility stocks and bonds owned by life insurance companies, savings banks and other guardians of the people's funds.

"Positions of power and preferment may be won by favor, but there is only one thing that makes an investor, and that is confidence.

"The people can be trusted to look after their own interests, when they know where those interests lie. Twenty years ago the average man gave little thought to his gas or electric service except as he hoped to reduce his monthly bills. Today he is an investor, and, as a writer in the New York Times recently expressed it, 'The butcher, the baker, and the candlestick maker are beginning to bring critical analysis to bear on the views of agitators against corporations however small their portions of interest may be.'

"This idea is well summed up in the words of a recent editorial in the Philadelphia Bulletin, which states that 'The people of the United States in 1929 are not fearful of Big Business. It cannot even be said that they are prejudiced against it. They have become better acquainted with it. By tens of thousands they are each year becoming stockholders' in it. This popular stock ownership has had a distinct influence on the attitude of the public toward the big corporations and also on that of the big corporations toward the public."

"The public will do its share, if we do ours and see that it has full and accurate information about the problems, aims and progress of our business."

LAKESHORE

The Misses Pearl and Edna Gray spent the week end with their sister Mrs. Lester Noland.

Mr. and Mrs. T. R. Murray and family were callers at the Geo. Francis home on Sunday afternoon.

The Lakeshore Ladies aid society met with Mrs. Elgin Seale on Wednesday afternoon. In spite of the busy season a goodly number was present and two new members were added to the roll. These were Mrs. Thos. Jones and Mrs. Anderson a newcomer in the district.

Plans were discussed for a strawberry social to be held on June 21st at the Phillips home. More particulars will be given later.

Mrs. Seale served a tempting lunch after the meeting.

Mr. and Mrs. Everett Noland visited friends at Deville on Sunday.

MASSY HARRIS AGENCY TAKEN OVER BY WOOD BROS.

As we go to press we hear that the Wood brothers (Glen and Frank) have taken over the Massy Harris Agency. They are building their office on the lot where the old bakery used to be situated. Mr. Bearistow and Glen are doing the building.

BARDO

We are pleased to report that Mr. Hendrickson who has been very ill is quite well again. Mr. Hendrickson is with his son, George of Bardo, at present.

A number of Bardo people attended the seventeenth of May Festival at Ryley on Friday evening. The concert was very good.

Messrs. George Hendrickson, John Jevning and P. B. Anderson were Camrose visitors on Wednesday.

Mr. and Mrs. Ben Anderson motored to Edmonton on Thursday, returning the same day.

Sunday School commenced on Sunday morning and was quite well attended. The teachers will meet at the home of P. B. Anderson on Wednesday evening to discuss plans for improving and making our Sunday school more interesting.

A party in honor of Mrs. Saxton was held at Mr. and Mrs. A. Haukedal's on Sunday afternoon. A very large crowd was present and an enjoyable afternoon was spent. Mrs. Saxton was presented with a sum of money from her Bardo friends. Mrs. Saxton and children are leaving for Flin Flon, Manitoba, on Monday, to join Mr. Saxton who has been there for a time.

Mr. and Mrs. John Ness of Bellingham, Wash., paid a short visit to Bardo last week. They left for Edmonton on Monday morning, where they intend making their home for a while.

Mr. and Mrs. George Hendrickson took their little son Gordon, to Edmonton on Monday to have his tonsils removed. We hope he will be well soon.

AMISK CREEK

Mr. A. Erickson had to be taken to an Edmonton hospital on Saturday morning. He is now getting along as well as can be expected, but will have to stay at the hospital for some days.

Several from around here attended the Norwegian festival held in Ryley on the 17th of May.

Mr. and Mrs. P. Flaaten and Gunvald, also Lilian Berg, visited with the U. Garthees family near Viking last Sunday.

The Annelo family visited at the Berg home on Sunday evening.

The I. C. Olsen family motored to Lavoy last Sunday and visited with Mr. and Mrs. J. Blackburn.

KINGMAN

Mrs. P. Rudomsky, Esther and Hymie visited in Edmonton a couple of days last week.

Mrs. S. T. Severson and children of Clyde have been spending a week visiting with relatives here.

Mrs. T. Welsh arrived here on Saturday from Oregon to join her husband.

Mr. and Mrs. John Anderson were the guests of Mr. and Mrs. E. Erickson on Sunday.

Miss Ray Hardin spent the week end in Edmonton.

Mr. and Mrs. C. R. Blychert spent the week end with Mr. and Mrs. Joe Munson of Camrose.

Mr. and Mrs. Simovich of Roundhill visited with Mr. and Mrs. P. Rudunsky on Sunday.

A. Aag and children motored to Edmonton on Saturday.

Albert Danielson left on Sunday on a few months trip to Finland.

BAD FIRE AT MR. MORTON'S FARM

On Saturday night a disastrous fire broke out in Mr. Morton's chicken house. The cause was that gasoline was put in the brooder stove by mistake instead of coal oil and it exploded. The fire occurred about 7.15 p. m. The damage done was the burning of the chicken house, brooder and two hundred chickens. The wind was in the right direction and the fire did not cause any damage to the other buildings.

Mr. Morrison kindly took the editor and wife [illegible] the new Chevrolet [illegible] Mr. and Mrs. [illegible] [illegible]

ARBOR DAY OBSERVED AT THE SCHOOL

Arbor day last week was well observed at the local school. Teachers and children all united in making a clean sweep of the school grounds, while Mr. McHaffey general in chief, lent his valuable aid. Old grass was burned off and much cleaning done both inside and out.

The high winds of Thursday very industriously scattered quite a lot of waste paper on main street to say nothing of the dust and dirt. One citizen who evidently delights in seeing a clean street (a very laudable desire) called up the Mercury office to see if something could not be done to keep main street cleaner. He suggested that we put something in the paper about it—and here it is. We are of the opinion that his interest in a cleaner town is highly commendable and we feel quite complimented that he should call us up on the matter but we are doubtful of an immediate response from the [illegible] that is.

The high wind of Thursday resulted in a light rainfall in this district. As we go to press there is promise of more, though one can never be sure and Friday morning may dawn bright and clear. A good rain, would however, be of great benefit to the seeded crops, as the land is dry though not parched. A rain would stop seeding operations temporarily, but the gain would be greater than the loss.

HOLY TRINITY CHURCH

Sunday School, 11:00 a.m.
Evensong at 7:30 p.m.
11:00 a.m. Morning service at Lindbrook.

Rev. R. Symes

F. O. Ball moved the J. Lee building to the corner lot last week and it now faces main street.

General Automotive Work

There are very few cars in the district, which after winter storage or use would not be the better for a spring overhauling. If you place any value upon your car, the cost of a spring overhauling is money well spent, the improved service being worth more than the work costs. We are thoroughly experienced and suggest you bring your car in early.

ECZEMA CAUSED MUCH PAIN

On Fingers. Lasted Ten Years. Cuticura Healed.

"When I was two years old eczema broke out in a rash between my fingers and caused much pain. My fingers were swollen and inflamed. The itching and burning caused me to scratch which made it worse. I lost sleep on account of it.

"The trouble lasted about ten years before we began using Cuticura Soap and Ointment. After one week's use it looked better, and after using three cakes of Cuticura Soap and two boxes of Cuticura Ointment I was completely healed." (Signed) Miss Eileen Cavanaugh, Kemptville, Ont., June 3, 1928.

[illegible]

C.P.R. Branch Lines

Heavy Programme Of Extension For the Season Of 1929

Under its policy of development and expansion, the Canadian Pacific Railway has already this season let contracts for 208 miles of branch lines construction in Western Canada, according to D. C. Coleman, vice-president [illegible]. This figure was reached following the announcement of four additional contracts totalling 112 miles and it is expected that when the contracts for the newly authorized Lanigan-Prince Albert branch are let that the construction programme for the season of 1929 will call for slightly more than 300 miles. Work on these contracts will be commenced immediately.

Contracts announced follow:

Nipawin toward Prince Albert, 38 miles; contractor F. Mannix, of Calgary.

Kootenay Landing to Proctor, 25 miles; contractor Dutton and Grant, of Winnipeg.

Archive to Wymark branch from Lake Johnson to Wymark, 27 miles; contractors Riley, Reid and Sandgren, of Edmonton.

Suffield to Hilda branch from Arrowwood to Mackie, 23 miles; contractor Tomlinson Construction Co., Ltd., of Winnipeg.

Contracts already given this spring and which call for 174 miles of construction follow:

[illegible]

In making the announcement Mr. Coleman stated that [illegible] had recently been received to the legislation authorizing the construction of the branch line from Lanigan to Prince Albert and that it was proposed to let contracts for this work at the earliest possible moment, and immediately following the acceptance of the plans by the Board of Railway Commissioners at Ottawa. This line will be 117 miles in length and will form an important link in the western branch line system. [illegible]

The dirigible mooring mast that has been erected at St. Hubert aerodrome, Montreal, Quebec, to accommodate the British dirigible R-100 on her first flight to this side of the Atlantic this summer. The 200-foot steel tower is the first of its kind in Canada.

SUNDAY SCHOOL LESSON

MAY 26

GOD'S LAW IN THE HEART

Golden Text: "Thy word have I laid up in my heart, that I might not sin against Thee." Psalm 119.11.

Lesson: Jeremiah 31.1-40; John 1.17; Hebrews 8.7-12.

Devotional Reading: Psalm 119.9-16.

Explanations and Comments

Individual Responsibility For Sin, Jeremiah 31.29. There was an old saying among the Jews that the fathers have eaten sour grapes, and the children's teeth are on edge. The proverb puts the responsibility for the sins of one generation upon the preceding generation. In Jeremiah's day the people were complaining that they were being punished, not for their own sins but for the sins of an earlier generation. In the future, Jeremiah declared, individual responsibility would be recognized, a man would realize that he was judged for his own sins, not for those of others, and this proverb would no longer be repeated. The fathers had sinned, but the children had sinned, too, and the children would be held responsible for their own sins. To express this, Jeremiah amended the proverb to read: "Every man that eateth the sour grapes his teeth shall be set on edge."

Most people like to lay the blame for their misfortune or faults upon anyone or anything rather than upon themselves. It is the fault of circumstances that they are not more successful in life. It is their unfortunate heredity that has made their character what it is. Some one else to bear the blame is "a long-felt want" of humanity. Jeremiah placed the blame where it usually belongs.

In our soul God is constantly speaking to us—He warns us against evil. He exhorts and encourages us to good. Suppose a boy has done another a bad turn. The one who has been wronged has been brooding over his wrongs, when suddenly he learns something about his companion, the knowledge of which by others will do him immense harm. He will have his revenge, he thinks, but while he is comforting himself in this way, a voice is heard, soft but most persistent, saying to him: "It is a mean thing that which you have in mind to do, it is a cruel thing; don't return blow for blow, leave him to his thoughts, keep your own unstained." That is the voice of God.

Perhaps you are out somewhere bent upon your own amusement, when you see some sad accident happen. [illegible]

Many Conveniences In British Post Office

People Accommodated In Many Ways For Small Charge

The British post office officials are capable and obliging and if anyone should lose himself, he can go to the nearest post office and mail himself home. An express messenger is sometimes given charge of a person and takes him to his destination, where he obtains a receipt. The charges, based upon the distance travelled, are quite moderate. If you merely wish to prove that a letter has been posted, there is no need to register it. The Post Office will supply you with a "certificate of posting" for a halfpenny. If you miss the last collection of letters and have an urgent communication to send, ring up the head post-office of the district, tell them your plight, and dictate the letter. It will be written out and sent off with the night mail. The charge is threepence for the first thirty words, a penny for every ten afterwards, and the ordinary postage and telephone fee.

ALEX. PHILIP

Published by Special Arrangement With Thomas Allen, Publisher, Toronto, Ont.

As dusk fell over lake and mountain, Donald returned from Wainwright's cabin. Andy glanced up expectantly as his friend appeared, but quickly averted his face as he saw Donald's features. Donald sank disconsolately to a seat outside the kitchen door. He had found Wainwright alone and wondered if Connie had purposely absented herself. Her treatment of him since her return puzzled him sorely and had filled him with a great despondency. As he rose and walked toward his cabin, Andy gazed after the retreating figure, eyes filled with compassion, then turned to speak to one of his helpers in such an irritable tone that the flunkey's mouth opened in astonishment.

For three evenings it was the same. Donald failed to find Connie at home; nor did she come to the mill. He regretfully decided that it was no coincidence, but that she was deliberately avoiding him.

On a Sunday afternoon Andy saw Donald gaze yearningly toward the bluff, then turn up the trail leading to the dam.

At Donald's request Gillis had diverted logging operations to circle the little oasis in the heavy timber, [illegible]

hers and felt the flutter of her long lashes as she pressed the softness of her own closer. The quick, exquisite indrawing of her sobbing breath were lovely answering things, and he thrilled to hear her whisper: "Yes, Donald! Yes, Donald!"

Andy came walking meditatively up the path, his hands clasped behind him, his blond head bowed in deep thought. Not finding Donald at the dam, he walked up the hill to enter the meadow just as Donald clasped Connie in his arms. For an instant the little Australian stood rigid, his eyes bulging, then retreated hastily to the shelter of the trees. Any one seeing Andy at that moment would have thought him suddenly gone mad. He whirled about in a wild dance, hugging himself in an ecstasy of joy. Ceasing his mad gyrations, he dashed his hand across his eyes and bolted like a runaway down the hill.

Gillis and his "redshirts" sat sunning themselves on the steps of the dining-room. They sprang to their feet as Andy came tearing down the hill. Breathlessly Andy told them of the scene he had witnessed. "We'll give them a blinkin' good reception when they come down," he panted. He issued several sharp orders and the men scurried happily to execute his commands.

The train that was to carry the excursionists to the Coast was being made up on the siding. While they were awaiting this, the visitors watched with curious interest the mysterious preparations being made by the loggers.

Woman Doctor Receives Appointment In Winnipeg Laboratory

Dr. Lillian Hollingshead has been appointed to the plant-breeding staff at the Dominion rust research laboratory, Winnipeg. She is a Canadian, her home being in Saskatchewan. She graduated with honors in arts and took post graduate work in botanical science at the University of [illegible] at Saskatoon where she worked with Dr. W. P. Thompson on the cytology of wheat hybrids.

Miss Hollingshead has been working three years in California with Drs. Goodspeed, Clausen and Babcock specializing in cytology and has made some quite interesting discoveries in the cytology of tobacco hybrids, which findings were presented at the recent meeting of the American Association for the Advancement of Science at New York. At the rust research laboratory at Winnipeg she will co-operate with the plant breeding specialist in attempting to produce rust resistant varieties of wheat.

Little Helps For This Week

"The example and shadow of heavenly things." Hebrews viii. 5.

From the eternal shadow rounding
All our sun and starlight here
Voices of our lost ones sounding
Bid us be of heart and cheer,
Through the silence, down the spaces,
Falling on the inward ear.

Know we not our dead are looking
Downward with a sad surprise,
All our strife of words rebuking,
With their mild and loving eyes?
Shall we grieve the holy angels?
Shall we cloud their blessed skies?
—John Greenleaf Whittier.

If ever I am tempted to do [illegible] thing which is easy and pleasant, instead of something hard and disagreeable, which nevertheless I ought to do, if I can only think of those lost saints of mine, who always expected me to do right, and always [illegible]

Riding abreast of the times

You expect more from your motor car today than you did ten years ago. And you get it. Greater speed, smoother power and more responsive performance are common to modern cars as a result of the development of higher speed, higher compression motors.

These improved engines demand a better oil—fuller-bodied, with greater resistance to heat and wear.

To ensure a better motor oil, Imperial Oil Limited goes all the way to Peru for the crude from which to make Marvelube. Marvelube is made from a base that is rich in all the qualities necessary for better lubrication of the modern motor. It is today the oil standard for high-speed motors from coast to coast.

Marvelube is preferred by over half a million motorists in Canada and is the choice of aircraft operators because of its superior lubricating qualities.

There is a grade of Marvelube refined to meet exactly the specifications of your car, truck or tractor. Consult the Marvelube Chart at Imperial Oil stations and dealers.

The Prince of Wales has again extended his patronage to the Banff Highland Gathering and Scottish Music Festival to be held this summer at the Banff Springs Hotel in the Rockies. Pipers, dancers, and athletes from all parts of the country compete in these popular games.

Two baby black bears were great attractions recently at the Detroit Sportsmen's Show. They were from Phil Lamothe at Mattawa, Ontario, and were escorted to their destination by a member of the C. P. R. general tourist department, who had sundry scars to show in proof of the existence of the babies' first teeth.

Enough flowers are planted by the Canadian Pacific Railway each year to beautify a couple of cities. The floral branch each year sends out to station agents and employees along its line plants, bulbs, shrubs, seedlings and seeds by the tens of thousands to decorate the company's right-of-way.

Five railway cars were required to move the equipment of the mammoth Casavant Organ recently installed in the new Royal York Hotel in Toronto. The hotel is the tallest building in the British Empire.

Tyndall stone, which shows to such great effect in the famous Banff Springs Hotel in the Rockies, is to be used in the construction of the new building for the T. Eaton Company in Toronto, the first unit of which is now being built.

The year's champion cattle raiser in British Columbia is Annie Turner twelve-year-old daughter of James Turner, Cadboro Bay stock breeder. Her 14-month-old shorthorn steer, sired by Braishill Marquis and weighing around 1,100 lbs., won the grand championship of all breeds at the Kamloops bull sale and fat stock show.

Each set of equipment of the Trans-Canada Limited and Mountaineer, and there are eighteen of them, is worth upwards of a million dollars this year the new rolling stock having added considerably to the value as well as to the attraction of the famous flyer. The C. P. R. Angus Shops at Montreal were busy all winter building special sleeping, dining and solarium lounge cars for this special de luxe service between Montreal and Vancouver and Chicago and Vancouver.

The Indian of old could wield a wicked tomahawk but to-day he can handle a mean brassie. The pale-face is threatened on the golf links by Indian golfers and it is likely that at Banff Alberta, the redskins will develop even greater prowess. Indian caddies it has been decreed are to be used on the eighteen hole golf course at this famous mountain resort and the rising generation of Stoney Indian braves are likely to become ardent golf fans.

WHEN SHOULD WE CUT SWEET CLOVER FOR HAY

(Experimental Farms Note)

In the prairie provinces the increasing popularity of sweet clover as a forage crop for certain classes of live stock brings many new growers of this useful legume face to face with difficulties in handling it, particularly as a hay crop. The inexperienced grower quite commonly allows it to become too mature before harvesting it for hay thereby rendering it less palatable as a fodder crop. Moreover, two cuttings of hay are usually obtained during the second season and the longer cutting of the first crop is delayed after the proper time to harvest the smaller is the yield of the second crop.

At the Dominion Experimental Farm, Indian Head, Saskatchewan, the practice is to cut sweet clover for hay as soon as the first blossoms begin to appear, or better still while it is in the bud stage. This practice ensures the hay, when properly cured, being in the most palatable condition for feeding. Even commencing to cut as promptly as possible it frequently happens that the field is well advanced in the flowering stage before cutting can be completed.

After the flowering stage is reached sweet clover rapidly becomes woody. Experiments have shown that the percentages of ash, protein and fat decrease as development progresses while there is an increase in the percentage of crude fibre.

CONTROL OF CANADA THISTLE

(Experimental Farms Note)

A weed so well established as is Canada Thistle, will not be exterminated by any means at present in sight, but a reasonable measure of control is both possible and economically sound.

This control, for its success, demands attention to two things,—the seeding habit and the rooting habit of the plant. While the latter is receiving suitable attention in the fields, the former must be watched beyond their borders.

The seed menace requires that all stragglers in waste places, along roadsides, etc., be destroyed before maturity, by cutting, salting and pasturing, plowing under, or otherwise. Each neighboring farmer must be likewise concerned; a state of things which inspection under provincial weed laws is intended to bring about. Each farmer, moreover, must avail himself of all the protection in the matter of seed purchases, that the Seeds Act of Canada offers. No amount of work performed in the field, will keep them free of Canada thistle, while its exceptional facilities for seed dispersal are being ignored.

Field infestations themselves are ordinarily best dealt with by the method of starvation. By the time a rotation of crops has come around to hay, following grain, thistles will have reached their maximum recovery from previous suppression. If the choice of hay crop, and its stand is such as to make a good smother crop, this is the first step. Legumes, especially alfalfa and sweet clover, make a heavy cover. They are removed in ample time to forestall seeding of the thistles, and to allow a long period of after-harvest fallowing. As soon as thistles begin to show after mowing, the ground is plowed, and, through the balance of the season, the underground parts are kept deprived of nourishment from the foliage, by use of the broad shared cultivator. A somewhat deeper plowing late in the fall is a good finish to the season's work; and a cultivated crop the following year keeps the foe at bay.

It will be seen that only the livestock or mixed farmer can make full use of the method outlined. The crux of the matter is that only to the extent that the straight grain farmer can modify his practice in this direction, can he hope for much success in combatting a weed so well at home in a grain crop.

Sprays and other chemical expedients that have been experimented with may yet provide additional offensives for use on small areas, but experience at the Dominion Experimental Farm has not proved them generally economical. All they can do usually, is to deprive the thistles of foliage, and by repeated application thus starve the rootstocks, a process more satisfactorily accomplished under field conditions, by tillage methods. Other tests to be conducted this season may justify a better word concerning one promising material.

SOW THISTLE

Editor's Note.—The following written by a weed inspector is of interest to farmers here. It is being reprinted particularly as it has reference to chemicals a matter in which those with any sow thistle on their farms are interested in.

The attention of the ratepayers of the M.D. of Lockerbie is drawn to the campaign against Sow Thistle (perennial), it is most important that all farmers should watch their fields for this weed, the situation is a serious one and must be faced, as once this weed becomes established it is hard to get rid of without lots of work in the nature of cultivation. The weed is deep rooted with running rootstocks. The plant ranges from one to five feet high, the whole plant is filled with a milky and very bitter juice. The leaves are from four to six inches long, pointed, deeply cut, the lower divisions are directed backwards, clasping the stem with a heart shaped base, and edged with soft spines. The flowers are bright yellow about one and a half inches across, the flower stalk and the scaly bracts surrounding the flower heads are covered with long glandular hairs. The seed can easily be identified being about one eigth inch long, dark reddish brown, bearing a tuft of white silky hairs which spread in drying allowing the seed to be carried in the wind long distances.

Wherever the weed is established it will choke out any growing crop completely, its rapid growth is remarkable.

In the matter of cultivation small patches may be dug out and the patch kept black with a hoe for one or two seasons, larger patches or fields require plowing to a depth just below the root stock and such patches or fields should be treated with a broad sheared cultivator at least once in eight days for a whole season or possibly a second season. The land should be kept absolutely black at all times during the period of cultivation, for obvious reasons harrows should be kept off the infested land.

Regarding treatment by the use of chemicals it should be stated that this method is still in the experimental stages, but at the same time we are able to say that certain experiments carried out in this district during the past year has been highly satisfactory, as a result of which the municipal council have ordered a supply of chemicals for use this year.

This chemical is in the form of powder and can be used either as a powder or it can be liquified and used as a spray, to use same as a powder it may be dusted upon the foliage of the plant in calm and dry weather at the rate of one pound to one hundred square feet, as a spray use one pound of powder to one gallon of water, stir well and apply with a pressure spray to one hundred square feet being sure all foliage is well wetted, do not apply either forms of chemical in real hot or wet weather, while the dew is on the plant is found to be the best time for treatment.

The ratepayers of this district can shortly procure this chemical from the [illegible] councillors at cost. I am [illegible] in a position to state the price per pound but would judge no higher than 20c per pound. Your local councillor will advise you upon receipt of the shipment. Dusting cans of the capacity of three and one half [illegible] can also be secured at a [illegible] cost. It is advisable to keep the chemical in an air tight container as it will liquify.

Weed Inspector M.D., No. 480

SERVICE FOR ALL

For every class of account—business or personal, farming or commercial—the facilities are provided in the Bank of Montreal. The service of this Bank is adapted to all, and the quality of that service is the same wherever and whenever it is rendered.

We shall be pleased to have you consult with our nearest branch manager

BANK OF MONTREAL
Established 1817
"A Bank where small accounts are welcome"

WATCH FOR YOUR LETTER

You will receive a letter concerning an opportunity to become a profit sharing partner in Northwestern Utilities Limited. This letter will explain what you gain by sharing in the dividends of your Gas Company.

How You Benefit By Owning This Safe Investment

1. You share in the earnings that you as users of Gas help to provide.
2. The Company in which you share ownership serves your own community as well as the nearby capital City of Edmonton.
3. You receive regular dividends every 3 months by mail.
4. Supplying an essential public service the growth and progress of the Company is inseparably linked with the steady development and increased population of Northern Alberta.
5. A resale service is provided for those who wish to buy or sell.

THESE SHARES HAVE MANY ATTRACTIVE FEATURES
1. Preferred as to assets and dividends.
2. Par value $100. Price $96 per share.
3. You get dividends yielding 6¼ per cent on your investment.
4. Dividend requirements are being earned more than 4 times over.
5. The Company serves your own community.
6. A resale service is provided. You can get your money out if you need it.
7. Under the partial payment plan you can purchase shares out of your monthly income; viz: $10.00 down and $10.00 per month on each share purchased. Interest at the rate of 6 per cent per annum allowed on each installment.

Another Opportunity

In a 7 Day Campaign, starting Tuesday, May 28th, 2000 6 per cent Cumulative, Prior Preference Shares will be offered to the Company's customers at $96 per share.

YOUR MONEY WILL EARN 6¼ PER CENT WITH SAFETY

We recommend Northwestern Utilities shares to you and to every customer. This is the third issue offered to the Company's customers—the first two issues were largely oversubscribed long before the Campaigns were completed.

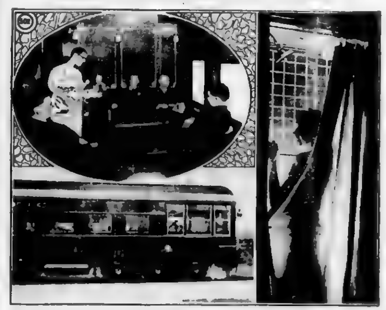
Sunshine and Showers—New Version



Above is an interior of the men's smoking-room, below a view of the rear end of the "solarium" car. The lady on the right [illegible]

Over ninety thousand dollars has been spent on each of the new "Solarium" cars designed for use on the long-distance all sleeping car trains of the Canadian Pacific Railway. Fifteen of them have been built at the Company's Shops at Montreal, and the one pictured above; the River Thames, will be one of those in use on the Trans Canada Limited. These cars are given over entirely to the use of the passengers and contain, among other things, two green-tiled shower baths, a ladies lounge a large smoking-room, an observation lounge and a Solarium. This latter, which takes the place of the open platform is glazed with vita-glass which admits all the beneficial sun rays, and permits an unbroken view in luxurious comfort. The main observation lounge and the ladies lounge are furnished in various tapestries. The smoking-room and the Solarium in soft leather, blue and red in the smoke-room and sand colored in the rear compartment. A small buffet will provide refreshment as auxiliary to the dining car which is also of new and novel design.

The Red Rose Tea guarantee means what it says. If not satisfied return the unused part in the package and the grocer will refund your money.

RED ROSE TEA "is good tea"

In the best package—Clean, bright aluminum

Science in Service of Mankind

When the [illegible] story of human progress is told probably the salient contribution credited to the present generation will be the alliance of science with pursuits of peace and the mobilization of scientific minds for the common good.

This generation more than any previous generation in human history perhaps has effected the divorcement of science from war. In the past, the best scientific minds were directed to the chemistry and physics of warfare, industry and commerce for the most part having to content themselves with the second best or rely upon adaptation of some invention or process originally devised for war.

That is a broad generalization which in the specific case may not be true but which in the main can be substantiated and the fact remains that war has been the great stimulus to scientific research and invention and until the present generation a greater stimulus than industry, commerce and the pursuits of peace. It might also be said that science in its first alliance with industry and commerce had a background of war—of economic war. Now however, the science laboratory is a workshop in the true sense of the word.

Illustrative of this idea is the little country of Denmark, where agriculture has reached a scientific plane higher than in any other country. The great stimulus to scientific agriculture in Denmark was war. Following the war with Germany, in which Denmark lost the provinces of Schleswig and Holstein, the Danes turned their attention to the intensive cultivation of their very limited resources [illegible]

[illegible]

Noteworthy already have been the achievements of the scientists at work in the Dominion Rust Research Laboratory at Winnipeg. The progress already made toward the production of a rust-resistant wheat that will meet requirements as to milling and yield, have been so impressive as to presage an epoch-marking development in the near future.

Always Come Through

Call it luck or national stamina whatever you will, there is something about the British that pulls them through. They are paying more taxes than the average German, Frenchman and Italian put together, they have commitments all over the world and they have a surplus population with tremendous problems of employment and trade. Yet they never quail.

B.C. Onion Growers

The Vernon Fruit Union, which has closed its onion pool is giving the growers $46.61 net, including local rebates, for every ton of onions delivered to them on consignment during 1928. This price is recognized as particularly good. Hitherto $34 to $35 a ton has been deemed high.

Canadian Graphite

Canadian graphite is marketed as refined flake, the product of concentration of disseminated ore. The mines and mills are situated in the Perth, Bancroft and Calabogie districts in Ontario, and in the Buckingham, Guenette and St. Remi districts in Quebec.

Minard's Liniment for cuts and bruises.

Canada's Largest Organ

Installation of the Royal York Hotel Casavant organ, the largest in the Dominion has begun after months of preparation made for it. It was made in the world-famous workshops at St. Hyacinthe, Quebec, and its parts conveyed to Toronto in five railway cars.

Guard Against FLU — Sore Throat The First Warning.

Few families will escape. This epidemic constitutes a real danger. Health authorities everywhere warn the public of the danger of the common cold. "Flu" usually starts with Sore Throat. Unless the germs are killed by some antiseptic treatment a serious malady may develop.

A simple treatment is to gargle the throat three times daily with Nerviline. The antiseptic properties of Nerviline quickly destroy the germs in the throat. Of course if the chest is sore Nerviline should be rubbed over the affected area—lots of rubbing—it can't burn a blister, but will bring out the congestion and break up the cold.

To prevent "Flu" or colds from gaining headway Nerviline will prove most effective. It is hardly necessary to point out that the bowels should be stimulated, and the system purged of all waste materials. For this purpose Dr. Hamilton's Pills are recommended. They act without griping or discomfort of any kind. This combination treatment of Nerviline and Dr. Hamilton's Pills will prove a very satisfactory prevention for Grippe, Flu, etc.

A Big Business

Postal Department In Canada Handles Millions Every Year

Rural routes have been extended and the inauguration of the air mail service has made it possible to deliver mail in the winter time to many isolated spots which have never before received mail during that season, thus bringing comfort to the people of the Magdalen Islands, the north shore of the St. Lawrence River, northern sections throughout the Mackenzie River district, Cold Lake, Flin Flon and north to the Yukon. The postal department has some 36,750 employees in the Dominion of Canada. Of these, between 12,000 and 13,000 are postmasters. The department handles resources of revenue somewhere in the neighborhood of $30,000,000, approximately $30 for every person in Canada in one year.

DO YOU VALUE HEALTH?

Sickness Almost Always Due To Weak, Watery Blood

If your health is poor, if you are pale nervous and easily tired, if you suffer from headaches or backaches, if there are touches of indigestion or twinges of rheumatism you may depend upon it that these symptoms come from an impoverished condition of the blood, and that unless this condition is remedied a complete breakdown may follow. To any who are in this condition, Dr. Williams' Pink Pills will be found the perfect medicine. The whole mission of this medicine is to build up the blood, promote appetite and good digestion, and strengthen tired, frayed nerves. Men and women alike benefit through the use of this medicine. Therefore if you are weak or ailing give Dr. Williams' Pink Pills a fair trial and you will be pleased with the beneficial results that will speedily follow.

Among the thousands who have found Dr. Williams' Pink Pills a real blessing is Mrs. Geo. M. Andrews, Halifax, N.S., who says: "My first experience with Dr. Williams' Pink Pills was as an anaemic young girl, when they completely restored my health. Then a few years ago I became pale and run down, and my husband got a supply of the pills for me. I gave them a good trial and when my baby was born she was a big healthy baby and I did not have a day's sickness. My friends all tell me how well I look and I certainly feel that way and I give all the credit to Dr. Williams' Pink Pills. I hope my experience will help some other woman who needs a good medicine."

You can get the pills from your druggist, or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Farmers Will Grow Peas

Ambitious Planting Programme In the Taber Irrigation District

The other day a carload of dried peas, being 16 tons, arrived from Gallatin Valley, Montana, for planting by Taber, Alta. irrigation farmers in the interests of the Broder Canning Company, whose headquarters are in Edmonton and Vancouver. While pea gardens have been common in the district for many years the present planting programme is much more ambitious than anything in the past.

Miller's Worm Powders not only make the infantile system untenable for worms but by their action on the stomach, liver and bowels they correct such troubles as lack of appetite, biliousness and other internal disorders that the worms create. Children thrive upon them and no matter what condition their worm-infested stomachs may be in, they will show improvement as soon as the treatment begins.

False Economy

There are many people who would die of starvation rather than dig into their savings, but we often see men who do not know how to enjoy their money. They save by denying themselves the natural pleasures of life and in the end are forced to leave their money to people who never helped to earn it.

As a vermicide an excellent preparation is Mother Graves' Worm Exterminator. It has saved the lives of countless children.

Women Archaeologists

This archaeological season in Palestine shows a new feature of social interest. For the first time archaeological excavations are being carried on by a staff of women. This plan has been initiated by the British School of Archaeology, Jerusalem, which sent a party consisting of Miss Garrod, Miss Kubank, of Cambridge; Miss Kitson Clark, of Oxford, and one American woman to continue the work near Athlit, South Haifa. The direction is in charge of Miss Garrod.

Work joined with courage enables us to overcome all obstacles.

Neuralgia succumbs to Minard's Liniment.

Canadian Press Excursion

Newspaper Editors To Enjoy Extended Holiday In Europe

Newspaper editors from all over Canada who leave Montreal early next month for a two months' visit to England and the continent, when they return the visit paid to Canadian newspapers two years ago by the Newspaper Society of Great Britain, will be entertained royally wherever they go. Full plans for the visit, which is being organized by Rupert Davies, editor of the Kingston Whig-Standard, were announced recently, following his return from the meeting of the Canadian Daily Newspaper Association at which many of those who are going to Europe meet.

Among the high spots of the visit which, although entirely unofficial, will be of great benefit to Canada and to the prospects of increasing immigration, are a dinner to be tendered jointly by the Newspaper Society of Great Britain and the Empire Press Union in London, a gala performance at the State Opera House in Vienna and a garden party at which the president of Czecho-Slovakia will be the host.

There is to be much private entertainment with such hosts as Lord and Lady Astor, Lord Beaverbrook, Major John J. Astor of The London Times, Col. Grant Morden, and Sir Richard Winfrey, who was one of the leaders of the British party which spent some months in Canada in 1927 and who will receive the Canadian editors at his home in Peterborough.

The complete itinerary commences with the sailing of the Canadian Pacific liner "Montclare," on Friday, June 6, and includes visits to France, Austria, Czecho-Slovakia, Germany, Belgium, Holland, Great Britain and Scotland. Five weeks will be spent on the other side of which three will be in Great Britain. The editors will return to Canada from Liverpool on the liner "Duchess of Atholl," reaching Montreal, July 26.

Origin Of National Anthem

Is One Musical Mystery Nobody Has Solved Yet

The origin of the British National Anthem is a musical mystery which has never been solved. It is known that it was first sung in public at Drury Lane and Covent Garden in 1745, when the news of the defeat of Sir John Cope's army at Prestonpans reached London. But it was written a few years earlier than this. One thing students of the subject are fairly sure about is that it was written as a national prayer for the safety of George II. against the Jacobites, and the version given in the "Gentleman's Magazine" in 1745, makes it peculiarly applicable to the fervent prayer of today, though for a very different reason.

Simple and Sure.—Dr. Thomas' Electric Oil is so simple in application that a child can understand the instructions. Used as a liniment the only direction is to rub, and when used as a dressing to apply. The directions are so plain and unmistakable that they are readily understood by young and old.

Not An Affectation

True Courtesy Is Outward Expression Of Sympathetic Nature

Many people regard the graciously mannered man distrustfully, and look with disfavor on displays of extreme politeness—and there certainly is a type of manner which repels because of its patent artificiality. But true courtesy is not an affectation. It is the outward expression of a thoughtful and sympathetic nature. We cannot all achieve outstanding success in life, we cannot all perform great services for our fellowmen, but it is possible for the least of us to act graciously in our dealings with others—to behave beautifully in the ordinary affairs of every day. Let us then cultivate that "finest of the fine arts"—courtesy.

Cheapest Of All Oils.—Considering the qualities of Dr. Thomas' Eclectric Oil it is the cheapest of all preparations offered to the public. It is to be found in every drug store in Canada from coast to coast and all country merchants keep it for sale. So, being easily procurable and extremely moderate in price, no one should be without a bottle of it.

Melting of the Antarctic ice cap, according to an Australian scientist, would raise the levels of the oceans by fifty feet.

No matter how deep-rooted the corn may be, it must yield to Holloway's Corn Remover if used as directed.

An Imperial Airways liner covered the distance from London to Paris in 100 minutes.

Minard's Liniment relieves pain.

Firestone is the Toughest Tire in the WORLD

Tune in "The Voice of Firestone" Every Monday Night, 8 p.m. Eastern Time NBC Network

TOUGHNESS—durability—long-mileage—safety! That is what you want in tires. And you find them all in Firestones. The best non-skid tread ever put on a tire grips the slippery roads you travel at this season. Firestone tires give the greatest mileage, the greatest safety at the lowest cost per mile. See the Firestone Dealer today.

The Wonders Of Chemistry

Will Be Used To Build and Change Character Is Prediction

The American Chemical Society, meeting at Columbus, Ohio, held out a few alluring prospects for the future.

For instance, the time may be coming when a man won't have to build his own character but can depend on chemistry to do it for him.

Then persons owing cows, if they're fortunate enough to have a little woodland, will have the cow-food problem solved for all time because cows will eat wood.

Wood, chemically treated, is already being used for cow-fodder in some countries, according to C. L. Emelen, Boston chemical engineer, who addressed the society.

Dr. J. E. Matthews, of the University of Wisconsin, predicted that chemistry would be used to change and build character and in this connection he believes the insane will be made well and that the censored criminal will become a law-abiding citizen.

Future generations may be giants, one chemist said, if scientists can discover by synthesis the cause of growth which lies hidden in the cell nuclei. The discovery, he said he believed, would hinge upon the balance of atoms.

Toes Made Comfortable Sore Corns Removed

Quick, safe relief is almost instantaneous if you apply PUTNAM'S CORN EXTRACTOR. Shoes won't pinch or hurt. One single drop of Putnam's stops the pain. A few applications make the corn dry up and drop off. Putnam's Corn Extractor gives satisfaction. Thousands use it every day. Get a bottle from your druggist. Refuse a substitute for "Putnam's" the one sure relief for sore corns.

How many people do you know who are spending money they have not yet earned for things they don't need to impress people they don't like.

The prairie provinces with manufactured products during last year valued at $327,000,000 begin to have tall chimneys of their own.

Another X-Ray Victim

French Doctor No Longer Able To Use Hands

Another specialist has been added to the list of X-ray victims. Dr. Sebastien Turchini, of the Charite Hospital, Paris, has had to resign on account of injuries received. Since 1916 he has undergone a number of operations, and has lost several fingers, so that he is no longer able to use his hands for manipulating the X-ray apparatus. For 30 years Dr. Turchini has been associated with the development of the X-ray treatment, and, although suffering ill-effects, has shown great devotion.

Could Hardly Live For Asthma, writes one man who after years of suffering, has found complete relief through Dr. J. D. Kellogg's Asthma Remedy. Now he knows how needless has been his suffering. This matchless remedy gives sure help to all afflicted with asthma. Inhaled as smoke or vapor it brings the help so long needed. Every dealer has it or can get it for you from his wholesaler.

May Make Polar Trip

Graf Zeppelin Likely To Make Expedition Next Year

In addition to being groomed for a round-the-world trip this summer, the Graf Zeppelin is destined to show its silver sides to the white waste lands of the Arctic before another year has passed.

The International for the Exploration of the Arctic Regions by means of aircraft has entered into a contract for the use of the big ship for an expedition from Leningrad to either Nome or Fairbanks by way of North Polar regions. The trip will take place in April or May of 1930.

A new laboratory in Berlin, Germany, is equipped to produce temperatures as low as 452 degrees below zero, or about 8 points from absolute zero.

HUNTER-MARTIN & CO., REGINA, SASK.

NEW TAX ON SALE OF SHARES TO BE LEVIED

Ottawa.—The new tax on sale of shares of stocks scheduled to come into effect on July 1 next, again received the endorsation of the House of Commons. By a vote of 96 to 56 the House defeated the amendment moved by Hon. R. B. Bennett, Conservative leader. The amendment would have had the effect of leaving the tax on shares as it is at present.

The amendment was moved when the resolution to give effect to the tax changes came up for second reading. This resolution had a rough time when the House was in committee of ways and means but emerged successfully after two votes. The new taxes were attacked along much the same lines. A conspicuous opponent was Malcolm Lang, Liberal member for Temiskaming South, who condemned the proposal in no uncertain language and voted against it when the House divided.

A number of Conservative members voiced their opposition to the new levy but the other groups took little part in the debate.

Following the division, the resolutions received second reading and a bill based on them received its first reading.

During the debate the minister of finance, Hon. J. A. Robb, said there was never a time in recent years when so much speculation had taken place on the exchange throughout the country than had been witnessed during the past year. He submitted there was a general feeling that the nation should profit by this speculation. If men decided to gamble on the market and risk their money there was no reason why they should not assist the national treasury, Mr. Robb said.

Engine Driver Acquitted

Verne Alexander Found Not Guilty Of Criminal Negligence

Parry Sound.—Verne Alexander is a free man acquitted by a jury of his peers on charges of manslaughter and criminal negligence. Alexander was the engine driver of the ill-fated Canadian National train No. 2, which crashed head-on into another train after running past its ordered meeting point at Drocourt in the early morning hours of March 20 last. Seventeen and possibly 20 lives were lost, and criminal proceedings were launched against the three surviving members of the train crew.

After a trial lasting two days and a half, Alexander was found not guilty by a jury under Mr. Justice Raney. The charges against Fireman Edward Riley, of Winnipeg and Brakeman Charles Gorries, of Toronto, will not be proceeded with.

The chief defence offered was the distraction under which Alexander was laboring — the operation of a "tame" engine — coupled with the failure of the warning signal which is ordinarily given by the conductor as a train approaches a meeting place. Alexander admitted he forgot his orders and dashed past Drocourt.

Honorary Degrees

Five Degrees To Be Conferred By University Of Manitoba

Winnipeg.—Five degrees of doctor of laws, honoris causa, will be conferred by the University to the list prepared by university officials.

Those who will receive the honorary degree are: Henry Mark Ami, director of Canadian school of prehistory in France; David M. Duncan, superintendent of schools, Winnipeg; Rev. R. G. MacBeth, pastor of St. Paul's Presbyterian Church, Vancouver; Chester Martin, professor of history, University of Manitoba; Walter C. Murray, president, University of Saskatchewan.

Appointed To Calgary Post

Ottawa.—Lieut.-Col. C. E. Connolly, officer commanding Lord Strathcona's Horse, Royal Canadians, is to take over the duties of general staff officer, Military District No. 13, Calgary, it was announced at the department of national defence. He will succeed Captain H. T. Cock, of the R.C.R., who returns to regimental duty at St. John's.

Cruiser At Victoria

Victoria.—H.M.S. Colombo has arrived at Esquimalt naval base here from Bermuda in command of Captain C. C. Dodson, D.S.O. The cruiser will remain in British Columbia waters until August.

Urges Outlets For Peace River Country

Railway Would Lengthen MacKenzie River Season Says General McRae

Ottawa, Ont.—Construction of railway outlets for the Peace River country from the Mackenzie River to Vancouver, through Peace Pass, which is claimed would increase the present season on the Mackenzie to the Arctic from two and one-half, to four and one-half months, was advocated in the House by General A. D. McRae, Conservative, Vancouver North.

The railway, as advocated by General McRae, would be joined in its course by the present railway from Peace River Crossing and Edmonton and would meet the MacKenzie River or somewhere below Great Slave Lake in the vicinity of Fort Providence. It would give, General McRae estimated, a 60-hour rail service from Edmonton to that point. This would compare with the present "infrequent boat journey of eight days downstream and 12 days return, and that for a limited time each year.

"The railway, by missing all boat delays due to ice in Great Slave Lake in the spring, would make it possible," he declared, "to reach the MacKenzie River six weeks earlier in the spring and two weeks later in the fall, increasing the present season on the MacKenzie to the Arctic from two-and-one-half to four-and-one-half months, thus opening up a new Arctic for us."

With such a railway line the MacKenzie River season would be from May 15 to early in October, General McRae stated.

Would Cost Forty Million

Charter Being Asked For Manitoba Line To Hudson Bay

Winnipeg.—Approximate cost of the proposed Emerson-Churchill Colonization Railway which would act as a feeder to other railways and bring Winnipeg 200 miles nearer Churchill terminus of the Hudson Bay Railway, is $40,000,000, Charles F. Gray and Fred C. Hamilton, directors of the company seeking a charter for its construction from the Manitoba government, told members of the law amendments committee at a special session held here.

The committee ordered the bill reported to the legislature with an amendment providing that construction be commenced within three years and completion of the line in seven years.

The line would be constructed from Emerson, 60 miles from Winnipeg on the Manitoba-Minnesota boundary.

Ask Higher Duty On Eggs

Poultrymen Have Made Application To Tariff Advisory Board

Ottawa.—For the first time on the records of the tariff advisory board, the western provinces have produced an application for an increase in duty.

There are 40,000 poultry men of the western provinces and many more from Ontario, as well as more than 2,000 merchants from British Columbia and the prairies in sympathy with the application placed before the tariff advisory board recently for 200 per cent. increase of duty on imported eggs.

The increase asked in the applications is from 3 cents to 9 cents on every dozen of eggs brought into Canada in the "extras" class. The item probably affects more individual producers than any other which has ever come to the attention of the commissioners.

Phillips To Retain Post

Ottawa.—Hon. William Phillips, first United States minister to Canada, will continue here during the Hoover administration. Mr. Phillips returned from Washington where he conferred with President Hoover, and Henry L. Stimson, Secretary of State. There was no indication, he said, that there would be any change of representation in Canada.

Postal Bill

Ottawa.—The House of Commons gave second reading to the bill which provides for adjustment of salaries of the postal employees who participated in the Winnipeg strike of 1919 and were subsequently re-employed at reduced wages. The bill now stands for third reading.

Celebrated Liberation

Sofia, Bulgaria.—Tens of thousands of Bulgarians from the most remote towns and villages of this little kingdom were on a pilgrimage here May 16, to participate in the fiftieth anniversary of Bulgaria's liberation from [illegible] Turkish rule.

EXPLOSION IN HOSPITAL TAKES A HEAVY TOLL

Cleveland.—Poison gas and two explosions which followed burning of X-ray films in the Cleveland Clinic claimed 124 lives.

There were 98 known dead, and hospital authorities worked desperately to administer artificial respiration to 43 more who were overcome. Victims from the disaster were dying at short intervals, and physicians sent out appeals for additional oxygen for fear that the supply in the city might prove insufficient.

Nearly all the deaths were attributed to the deadly gas which filtered through the four-storey brick building—slowly at first, and then augmented by a second and greater explosion than the first, rushed up from the basement and cut off escape down the stairways and elevators.

It was ironic that the disaster occurred in a very place where the most advanced instruments and laboratories of science had been turned against pain and death. The clinic was owned principally by Dr. Geo. W. Crile, nationally-known physician, who was too occupied with relief work to comment on the catastrophe.

Identity of the powerful gas which wrought one of the worst tragedies in the history of the city had not been determined.

It is probable, however, it was a mixture of gases coming from many forms of chemicals in the building. In addition, the burning films gave off a gas said to be bromide.

Although doctors and nurses got out a few patients at the start hardly a minute went by before the fumes filtered out from every opening, forcing rescuers back. When the gas began to lift, they rushed into a scene of shrieking horror.

Bodies littered the floor like flies that had been sprayed with poison. Some of them were scarred by flames, their clothing still smouldering. Others who had not lost consciousness were crying out in agony.

Among the most pitiful sights of the disaster were suffering patients who in agony dragged themselves to windows seeking fresh air and who were too weak to break the glass to get it. They clawed their hair and shrieked, but their voices were drowned out by other noises. For a moment they stood at the windows beating helplessly, then slid down to the floor out of sight to die in horrible fear.

The Cleveland Clinic is a separate building from the Cleveland Hospital. The Clinic, a four-storey building, houses many laboratories of physicians, and the death toll was from both the staff and patients who came for consultations.

Coal Rates From Alberta

Edmonton.—Coal from Alberta mines will move to Ontario at the special freight rate for the same period in 1930 as this year. A. Chard, freight traffic supervisor for the province, has received notice from the Canadian Railway Board, of an order setting January 15 to July 15 as the coal movement season for next year, thus continuing the present arrangement for one year more.

PRESIDES AT NEWSPAPER GATHERING

Henri Gagnon, president of the Canadian Daily Newspapers' Association, who presided at the tenth annual meeting of that organization.

All-Canada Telephone Line

Plan Would Link Up East and West On All-Canada System

Edmonton.—Planning an all-Canadian telephone line between east and west, which might be in operation this summer, prominent telephone company officials arrived in the city for a conference with the provincial government. In the party are H. L. Harris, executive vice-president of the Associated Telephone and Telegraph Co., Chicago; W. N. Curtis, vice-president and general sales manager of the Automatic Electric Co. Inc., Chicago, who are accompanied by G. H. Halse, chairman of the British Columbia Telephone Board.

At present Alberta and British Columbia are the only two provinces that have inter-provincial telephone service. Now it is planned to link up all the provinces so calls can be handled on an all-Canadian line without having to utilize services in the United States.

After leaving here the officials will confer with the governments in Saskatchewan and Manitoba. Mr. Halse will go on to Ottawa, while the others will return to Chicago.

Pay Fines On Instalments

Bill Before Senate Would Amend Criminal Code

Ottawa.—A bill sponsored by Senator Beaubien amending the criminal code so as to provide that fines may be paid on the instalment plan was given third reading in the Senate.

The Senator pointed out that there were 220,000 people convicted and fined last year in Canada. Of these 40,500 paid and the remainder went to jail. He thought it unfair to brand as jail birds many who were unable to pay their fines.

Death Of Pioneer

Winnipeg, Man.—William Elliott Macara, K.C., 70, registrar-general of Manitoba, and pioneer of the province, died at his home here, May 15. He had been ill for several months. Mr. Macara was born in London, Ontario, and he came west in 1882. He had been connected with the land titles office here for more than 43 years. Mrs. Macara survives.

Feed Grain For Poultry

Alberta Wheat Pool To Assist Poultry Raisers Of B.C.

Vancouver.—With the object of supplying British Columbia poultry farmers with feed grain at prices lower than those now charged, the Alberta Wheat Pool is turning its attention to this phase of marketing and is expected to institute a service which will benefit the poultry industry, particularly in the Fraser River Valley.

This makes the gist of an announcement made by G. G. McGeer, K.C., before the Saskatchewan Royal Grain Enquiry Commission. The sitting was devoted to the hearing of witnesses from among British Columbia poultry raisers. Mr. McGeer intimated that he would call witnesses to bear out his announcement regarding the plans of the Wheat Pool.

Two farmers who had retired from the prairies to raise poultry in the Fraser Valley painted a gloomy picture of present conditions in the industry. They agreed that without cheaper feed British Columbia farmers are faced ruin.

Will Tour Western Canada

New Head Of Salvation Army To Make Visit Next Fall

Toronto.—General Edward J. Higgins, recently chosen head of the Salvation Army in succession to General Bramwell Booth, will tour western Canada in the course of his first visit to the Dominion next fall.

Accompanied by his wife, he will arrive at Montreal on August 30, and after visiting a number of eastern centres, will proceed west. His western itinerary, however, has not yet been planned.

General Higgins will attend the National Congress of the Salvation Army in Canada, to be held from October 11 to 16, inclusive.

KING GEORGE RETURNS TO WINDSOR CASTLE

Windsor, Eng.—The King came back to his own friends in this ancient home of British sovereigns like a conquering hero.

All Windsor and the surrounding countryside were out to welcome their monarch back after his long illness, which for many weary months had kept him from them.

Windsor was decorated as seldom before. Not a single house or shop on Castle Hill or in the main street of the city was without gay decorations.

The King, accompanied by Queen Mary, had a remarkable reception throughout their 2½ hours' trip from Craigwell House, near Bognor, where the King had spent several months of convalescence. But it remained for the "old home town" to outdo all the others as it welcomed again its most prominent resident.

Thousands of cheering spectators, including two thousand school children and one thousand Eton boys in silk hats and quaint jackets lined the ancient thoroughfare. As the royal car drove through, bags of rose petals were emptied from windows and fell in a crimson cascade about the machine.

It was the first time most of the inhabitants of Windsor had seen the King since the beginning of his illness late last year. All along the line there arose cries of "God bless your majesty!" and "Welcome home!"

The King and Queen were smiling happily as they bowed towards the white sea of fluttering handkerchiefs and once or twice the Queen brushed moisture from her eyes.

At the bottom of Castle Hill which rises steeply up towards the ancient grey stone pile were waiting, the mayor in his golden chains of office with his aldermen. The royal car halted and the door near which the King was sitting swung open. His smiling face appeared and he grasped the hand of the mayor as he said:

"Thanks very much. We are pleased to be back in Windsor and I am very glad to see so many old ones here."

The King shook hands with the rest of the deputation and the car then swung up the hill towards home.

It was officially stated at the castle that the King bore the journey well and that His Majesty showed no signs of undue fatigue. Soon after arriving at the castle the King and Queen lunched together.

Announcement has been made recently that Queen Mary would hold courts at Buckingham Palace on June 26 and 27.

Deer Permit Petting

This photograph is submitted by W. E. Round, of Banff, Alberta, as evidence of what protection does in the way of overcoming timidity. These deer, native to Banff National Park, will use either back door or front while visiting and now have so much misguided confidence in humanity that they allow themselves to be petted.

TO URGE RIGHT OF WOMEN TO SIT IN SENATE

Ottawa.—Proposed amendment of the British North America Act to enable women to sit in the Senate and the subject of women having equal rights with men in the selection of political candidates, were among the outstanding questions under consideration here by members of the legislative committees of the National Federation of Liberal Women of Canada.

In welcoming the delegates drawn from all parts of the Dominion, Mrs. Mary Ellen Smith, of Vancouver, B.C., president of the Federation sounded a note of optimism.

"The citizenship we enjoy demands our best," she said. "It requires our utmost endeavor; it deserves our serious thought in that our principles are near and dear to us and we are assembled to decide what the best methods of promoting good will are also to cement the ties that bind us."

Mrs. Smith urged that the work of the federation be coordinated and constant care exercised to help in the best manner possible to prove that we are big enough whether east or west to see the other woman's viewpoint. Members should be tolerant enough to compromise and always to feel that their motto should be "charity towards all."

Parliament Will Sit On Wednesday Evenings

To Put Through Balance Of Session's Business Without Delay

Ottawa.—Prorogation of parliament begins to loom on the horizon. With a view to expediting the remainder of the work of the session, Premier W. L. Mackenzie King has given formal notice on the order paper of the House of a motion for the Commons to sit on every Wednesday evening beginning at once.

The usual practice is for a six o'clock adjournment each Wednesday evening but towards the end of each session Wednesday night sittings are introduced for the purpose of putting through the balance of the session's business with as little delay as possible.

New Branches For Red Cross

Society Added Fifty-Three To Organization Last Year

Ottawa.—A definite advance in the unifying activities of the Canadian Red Cross Society during 1928 was reported by Dr. J. L. Biggar, national commissioner, of Toronto at a session of the central council of the society.

At the end of the year under review 483 local branches are functioning. This total included 53 new branches and reorganization of 52 inactive branches.

The commissioner's report indicated that, although ten years had elapsed since the end of the world war there had been no material diminution of Red Cross service for ex-soldiers.

Amend Metal Marking Act

House Of Commons Passes Bill In New Form

Ottawa.—In amended form the bill amending the precious metals marking act 1928 was passed in the banking and commerce committee of the House of Commons. The measure as it now reads provides that if an article imported under the act has applied to it any mark, it must, if manufactured in Canada, bear also the name of the [illegible]. If the article is imported and has applied to it any mark it must also bear the trade mark of the importer or the name or trade mark of the manufacturer or dealer, together with the word "imported."

Purchase Timber Rights

Oshawa Firm Will Supply General Motors With Timber Needs

Oshawa, Ontario.—Gale and Trick, of this city announced their firm has purchased a block of [illegible] timber rights in northern British Columbia and has a mill under construction to cost approximately $150,000.

The limits are about 90 per cent. spruce, and the company will supply the timber needs of the Regina plant of General Motors of Canada. The balance of the production will be shipped to the Oshawa and Walkerville plants.

General Automotive Work

Day after day use of an automobile, truck or tractor must necessarily wear some of the moving parts. It is real economy to have your car checked over by an expert mechanic once or twice a season so as to detect minor troubles which if allowed to go would become major troubles with added expense. At the first sign of trouble bring your car to the McLaughlin Garage and we will be pleased to repair it for you. Our work is reliable and our charges are reasonable.

Congoleum Rugs

HAVE RARE BEAUTY

Congoleum Rugs are made in many beautiful designs. The colorings are permanent and always retain their beautiful fresh appearance. There are many patterns, some originating in the Congoleum designing room, while others are patterned after some of the famous rugs of earlier days. The beauty of Congoleum Rugs permit them to be placed any where in the best of homes, the lady of the house realizing that in beauty and tastefulness, they cannot be excelled.

HAS DURABILITY

The durability and wearing qualities of Congoleum rugs have always been one of their most valuable qualities. Whether laid in the kitchen, dining room, or hall way, anywhere where there is considerable wear, they will "stand-up" and give years of service. This makes them suitable for the humblest cottage as well as the finest home.

LOW COST

Congoleum Rugs are low in price and considering their durability, one of the best floor coverings you can buy.

Mercury Adopts New Style

With this issue The Tofield Mercury adopts an entirely new style. Since the last week in August 1918, the Mercury has been published as an eight page paper. This has only been made possible by using what are technically known as readyprints. These readyprints are prepared and printed in Regina and expressed to a large number of country papers weekly. On the whole they are well printed, carry considerable news of general interest and advertising. They are purchased by the local publisher at a certain price. To what extent the patent inside pages of a country weekly are read is an open question. Today, printed matter, when produced in large quantities is about the cheapest thing there is. Great roaring presses producing anything up to 60,000 32 page papers per hour, reduces the cost per single copy to a very small sum, and there are few homes to wrich one or more (generally more) papers do not find their way. Consequently, in most cases the ready print section of the country weekly contains a repetition of what has been read in other journals reaching the home.

A country weekly newspaper is nothing at all, unless it has real local interest. Regardless of size, it must cover its field reasonably well in order to retain and increase the number of subscribers, thus making it sound business for merchants to advertise in its columns. This is what The Mercury intends to do. As far as possible all news of interest in town and throughout the district will be published. In this we can be greatly assisted by secretaries of different organizations, such as U.F.A., U.F.W.A., W.I., fraternal lodges, sport clubs, church and school organizations, etc. We intend giving the paper a little smarter appearance typographically and reserving the front page for news only.

We fully realize that a four page paper appears small when compared with the production of the city. But it must necessarily be so. Tofield main street is smaller than Jasper Avenue and Tofield town hall would be lost among some of the city buildings. Here is the escence of the subject—a local paper must have the LOYALTY of its readers. Up to the present we are glad indeed to say we have been fortunate in this respect. If we can retain this loyalty with a four page paper our subscribers have our sincere thanks.

The price, $2.00 per year, while it may appear high, compared to the number of printed pages obtainable for the same amount from the city, in reality is not high. There is no similarity between the country publishers' problems and the city publishers' problems.

Now we are writing about ourselves we would mention that communications on matters of public interest are always welcome. If any subscriber feels inclined to write to us regarding our change of style or any other matter connected with the Mercury, the communication will be doubly welcome. In fact, this and any future move we make will be made with the aim of serving our subscribers better.

LOCAL AND PERSONAL

The United Church W.M.S. will will hold a silver tea and sale of home cooking in the Institute Rooms on Saturday June 8th.

Miss Eva Clutterham and her friend were in town for a few days last week.

Mr. and Mrs. Rose of St. Albert visited their daughter Miss Lorett Rose on Thursday.

Mr. Richard Cory and his cousin left on Wednesday night for British Columbia where they will work on a Survey party.

Mrs. Coombes and Mrs. Barden invited a few friends in for afternoon tea on Monday. The event being Mrs. Coombes and Mrs. Barden's birthday. A most delicious lunch was served.

Mrs. H. Rollans and children of Viking visited last week with friends and relatives.

A number of Tofielders visited Vegreville on Friday. Among those there were; Mr. and Mrs. Geo. McLaughlin, Mr. and Mrs. Calvert, Clara Abbott, Annie Booth, Gordon Jobb, Bert Swift, Mr. and Mrs. Emler and Mr. Mike McCusker.

Miss L. Rose spent the week end in the city.

Mrs. Carver sr. visited at the home of her son here last week.

Mrs. Calvert left on Monday morning for the city where she may have to undergo an operation.

Mr. and Mrs. Rose motored to the city last Friday afternoon.

Throughout June, July and August Lucille's Beauty Parlor will be closed during the summer months.

Miss Stella Clement, teacher of the primary school was taken down with mumps on Tuesday. The school is temporarily closed.

Mumps have made their appearance in town having invaded the Fawcett, McCauley and Snell households.

The Holy Trinity W.A. will meet at the home of Mrs. J. W. Robinson on Wednesday, June 5th at 2:30 p.m.

Miss Mabel Thompson spent last week end with Miss Annie Bruhn.

Mr. and Mrs. Hugh Mitchell, Mrs. Wm. Mitchell and son, visited with Mr. and Mrs. Wm. Thompson last week.

Miss Annie Bruhn, Mable Thompson and Eleanor visited last Sunday with Mr. and Mrs. Anderson north of Tofield.

Mrs. Porcke, from Olympia, Washington, was called home to see her mother, Mrs. Bailey, senior, who is very ill.

Miss Marion Forman spent Victoria day with home folk. On Saturday Mr. and Mrs. W. L. Forman and daughter Marion, motored to the city on Saturday last.

The W.M.S. of the United Church will hold a silver tea and sale of home cooking in the Institute Rooms on Saturday, June 8th.

Miss Bertha Lee was home over the week end.

KINGMAN

Chas. Ayre of Camrose took stock at the local lumber yard on Monday.

Andrew Johnson is working in Edmonton for a couple of weeks as a painter.

C. F. Sealund was a business visitor in Edmonton for a few days last week.

Oscar Thompson made a trip to Cold Lake last week.

Mr. and Mrs. Henry Bray motored to Vegreville on Friday.

Miss Lily Erickson and Alphonse Charlebois of Edmonton spent the week-end with Mr. and Mrs. K. E. Erickson.

Mr. and Mrs. Dan Scramstead and family of Edmonton spent the week end with Mr. and Mrs. Roy Melvin.

A number of Kingmanites attended the funeral of the late Mrs. Andrew Olson on Thursday.

Mr. and Mrs. O. K. Heiberg were the guests of Mr. and Mrs. C. O. Pederson on Sunday.

Mr. and Mrs. W. Goebel and daughter Kathleen, of Edmonton, were the guests of Mr. and Mrs. W. Hartchen on Sunday.

Mr. and Mrs. Charles Lindberg and family visited with Mr. and Mrs. Chas. Matson of Pigeon Lake on Sunday.

Mr. and Mrs. E. Erickson visited with Mr. and Mrs. Axel Larson of Bawlf on Sunday.

Mr. and Mrs. W. Jardie spent Sunday with Mr. and Mrs. Ed. Tollefson.

LINDBROOK

The school children here listened in to the Empire Day speeches etc also their Majesty's address broadcasted from Radio station C. K. U. A. over the set of Mr. and Mrs. Hooper of of this district. The programme came over fine and it was appreciated by all.

No! the excavation in front of the store is not the Lindbrook swimming pool nor the foundation for the new civic block, neither a Toc H branch as some might think from the red light at night. No messrs Clarke and Hicks are installing a new visible supply gasoline stand.

Mr. A. Hollas of Vermilion and his gang have just completed the new bridge north of Lindbrook. Some fast work too! Still it needs grading up to now.

Mrs. M. Swain left last Saturday for the coast where she will join Mr. and Mrs. J. Leahy and family recently of Lindbrook.

Sunday school and Divine service started last Sunday week here by Rev. Symes of Tofield were well attended. The next Service being on Sunday June 2nd at 11 a. m. and Sunday School at 10 a. m.

KETCHAMOOT

Dr. Tuttle, principal of St. Stephen's college, Edmonton, will conduct the services at the school house on Sunday, June 2nd, at 3 o'clock in the afternoon. Sunday school at 2 o'clock. Please take notice of the change of time just for the one Sunday.

Mrs. Mabel Lawson accompanied the Misses Florence and Astrid Moline to Lacombe on Friday returning home Sunday evening.

Mrs. W. A. Mitchell took her little son to an Edmonton hospital over the week end, for a minor operation on the foot.

Mr. and Mrs. D. McCowan and son Jimmie, and Mr. and Mrs. C. A. Ingram were Sunday guests at the Schultz home.

Mr. and Mrs. O. Barnes, Mr. and Mrs. J. K. Ingram and Mrs. T. D. Ferguson motored to Camrose on Tuesday.

Mr. and Mrs. Harold Smith of Camrose visited over the week end with relatives in our district.

Mr. and Mrs. Leslie Coombes and little daughter, Coleen, motored up from Red Deer on Sunday and spent the day with their mother Mrs. E. McMullen.

Mrs. J. Cookson, Mrs. A. J. H. McCauley, Mrs. Swift, and Mrs. Gordon visited Grandma Mitchell at the W.A. Mitchell home on Monday afternoon.

Mr. and Mrs. T. D. Ferguson and little son of Lakeshore spent Sunday at the J. R. Ingram home. Mrs. Ferguson and son remained home for several days visit.

TOFIELD WIN AT VEGREVILLE BASEBALL TOURNAMENT

On Friday, May 24th, the Tofield intermediate baseball team journeyed to Vegreville to take part in a baseball tournament.

There were four teams entered, Ryley, Lavoy, Vegreville and Tofield. In the draw which took place at one o'clock, Tofield was drawn against Lavoy. This was quite a close game and many good plays were made. The hitting feature of this game was the home run of Joe Kallal in the sixth inning. Tofield won this game by the score of 11—6 thereby qualifying to play the final with Vegreville, who after a hotly contested battle defeated Ryley by the score of 6—5. The battery for Tofield in the game with Lavoy was Ed Hill and W. Worton. Ed. pitched a good game and the other players all played well.

The final game was played with Vegreville at four o'clock and proved to be a walk-a-way for Tofield. In the first inning things looked rather dark for the locals when with some loose fielding coupled with some heavy hitting, Vegreville were able to slip six runs into the scoring column. Some teams would have been downhearted at having to pull down such a load, but not Tofield, it just made them work all the harder. In their turn at bat in the first inning they collected three runs. In the second inning the locals held Vegreville scoreless and collected four runs. From here on it was just batting practice for them. Everyone hit the ball a lusty clout and Vegreville in trying to stop the onslaught used three pitchers but to no avail. Tofield just kept on hitting. In the fifth inning Vegreville was so far behind they decided to call it a day and left the field.

When the score was totalled up it was found that Tofield was on top by the score of 22—8. Except in the first inning, Tofield played real base ball. The battery in this game was Ed. Hill and W. Worton.

Ed. Hill pitched a real game and was backed up by some excellent fielding. Ray Martin proved to the fans that he was a real fielder in making some good catches in the garden.

The line-up in both games was as follows. Ed Hill, pitcher, W. Worton, catcher; Joe Kallal, 1st base; H. Bowick, 2nd base; K. Bell, short stop; S. Worton, 3rd base; H. Phillips, right field, E. McLean, centre field; R. Martin, right field.

GOLF CLUB ANNUAL MEETING

The annual organization meeting of the Tofield Golf Club was held in Carver and Hannan's office, on May 20th, 1929, the president, Mr. J. Carver, presiding.

The minutes of the 1928 annual meeting were read and approved on motion of A. E. Calvert, seconded by G. A. Agnew.

The 1928 financial statement was then read and approved on the motion of A. E. Calvert, seconded by M. C. Hammond.

The following officers were then elected:

President: A. E. Calvert.
Vice-President: Geo. McLaughlin.
Secretary Treasurer: Gordon Jobb.
Committees were appointed as follows:

Grounds—M. C. Hammond, Dr. A. McClurg, C. H. Rowe, A. E. Calvert.

Tournament—Jas. Carver Jr., G. A. Agnew.

Membership—J. D. Hannan, C. H. Rowe.

The grounds committee were authorized to proceed with the construction of two additional greens as soon as finances permitted, also with the improvement of existing greens and fairways.

On motion of G. A. Agnew, seconded by Jas Carver, the fees for 1929 were set at $8.00. Teachers and non-resident fees $5.00.

What might have been a very disastrous fire occured at the Harrison farm on Thursday night of last week, when fire broke out in their hog house, where 40 some pigs were housed. Fortunately they were all got out and the wind was in the right direction to keep the fire away from the other buildings. It is a mystery how the fire started as there had been no burning around.

Mrs. M. Ingram sen., of town, is visiting her friend Mrs. E. McMullen.

Misses Edith Riley, Lillian Carlisle, and Nevada Fry, and the Misses Arthur Williams, Lawrance Gill and Stanley Smith motored to Elk Island Park on Sunday afternoon.

The Canteen Fund

Editors' Note:—We have been requested to publish the following relative to the canteen fund. The article appeared as an editorial in the Legion Rally, a paper published in the interests of the returned soldiers.

This important act is one that should claim the attention and interest of every ex-soldier, but as far as Alberta is concerned very few enquiries indeed have been received by the Board of Trustees asking for information, and it is a fairly safe statement to make that not one per cent of our comrades have ever seen and read the Act. When the grim talons of distress grips the family, however, the funds have been ever-ready to give a helping hand, and for the past three years many cases of this kind from all parts of Alberta have been helped in a very substantial way.

Few will deny the fact, that to keep going on year after year, doing nothing more than relieving cases of distress (worthy indeed as such work is) cannot be regarded as a "policy," or a main and ultimate purpose to which the Canteen fund can most usefully be put. It is true that the poor and needy will always be with us; the helping hand in their direction will always be a welcome one, but the thoughtful element among ex-soldiers undoubtedly looks for the inauguration of some monumental work to be carried out, to which the the Canteen Fund (or a substantial portion of it) can be finally and definitely allocated. The act itself enjoins upon Trustees the duty of taking measures to ascertain the wishes of ex-soldiers themselves in the matter of the ultimate disposal of the funds, and whilst the trustees have exercised careful efforts in this direction, both by addressing veterans, branches, conventions, and by correspondence, no definite schemes or proposals from these organizations, leading to a main policy have as yet been presented.

On March 31st, 1929, the three year term of the present Board in Alberta expires; the same three Trustees may or may not be reappointed, but it has been decided that their final report shall include the very definite recommendation to allocate the sum of $125,000.00 or more for the purpose of creating a home as a sanctuary for our aged Comrades, broken in health and estate, so that there may be made available to them a measure of comfort and help in their declining years. No nobler purpose can be found for the main part of the fund and it is to be further recommended that the balance of approximately $45,000.00 be held in reserve to meet the class of cases that have been assisted during the past three years, together with such other equally worthy claims for recognition as may later come forward.

All branches of the various ex-soldier organizations in Alberta, as well as their members individually are urged to give this entire question immediate and serious consideration. Their conventions are to be held during the summer months, and these event will give opportunity of expressing concrete opinion by resolution, having the effect of showing the Trustees whether the recommendations above quoted are worthy of endorsation, or such conventions may, perhaps, suggest some other substantial project upon which to expend the Canteen Funds. So far, however, there appears to be the popular demand that whatever policy is finally adopted it will be such that the funds will be fully used up in the next fifteen or twenty years.

CAPONS AND CAPONIZING

(Experimental Farms Note.)

Two years of experimental work at the Poultry Division, Central Experimental Farm, in which careful account was kept of weight and gains, feed consumption and cost, prices obtainable, and profit over cost of feed, have given interesting information.

It seems apparent that any additional profit arising from caponizing is mainly due to the fact that a premium of from five to ten cents per pound is paid on certain markets for capons. In one instance greater weight was made by the capons. In one instance greater weight was made by the capons, while in another the cockerels made superior weight gains and in no case was there an appreciable difference between the two. Consequently, in considering caponizing it would be well for the poultryman to ascertain whether or not a premium can be obtained for capons at his nearest market.

Another factor of importance is the condition of the broiler market. If a high price can be obtained for broilers the advantages of caponizing are doubtful since labour, depreciation, interest on investment and lack of suitable space and accommodation are factors which must be considered in arriving at the excess of profit obtainable from capons over broilers. If but a poor price is paid for broilers, as is often the case, a greater return can be obtained by caponizing. During one experiment a profit of thirty-six cents per broiler and $1.82 per capon was obtained over cost of feed. In another, profits of twenty-nine cents and $1.78 were obtained for each respectively. Labour, depreciation, etc., were neglected. In considering these figures it is essential to bear in mind that a premium of ten cents per pound was allowed for capons.

It is for the individual farmer or poultryman, considering his local conditions, to determine the advisability of caponizing. Using the above figures as an approximate guide and taking into consideration the cost of labour, availability of land and equipment, the price obtainable for broilers, capons and roasters and any other factors of importance, one can readily determine the practicability of caponizing.

THEIR MARK

THE WRITER read, some years ago, a story entitled "His Mark". It opened by relating the return of a daughter to the parental home—unwelcomed. The daughter had, so the story related, married, much against the wishes of her father, an illiterate, though otherwise desirable man; who, within a year of their marriage had died, leaving her penniless and unable to do anything else but to return to the parental home, there to become a drudge. The title of the story, "His Mark," came about through the inability of the young woman's husband to sign his own name, and therefore of necessity, when signing any document, placing only "his mark" upon it. The mark, an X was held up scornfully to the girl by her disgruntled parent, who on every occasion reminded her of her unfortunate venture. However, after months of silent suffering, one evening there came a thunderstorm, and after a particularly vivid uash of lightning, the father of the girl was found lying on the kitchen floor and on his forehead was—"His Mark." The writing of the story was pure fiction; the theme tragedy; the surprise element divine intervention.

Yet after all, as applied to the passage through life of most of us, there is something that can be pointed to after we have passed on as "our mark."

Some years ago there came to Tofield a relatively young man. He was a Christian minister who had left his native territory to minister in the West. Not of a robust physique, he spent some years in California, but loving his native country, returned to the West to minister. Upon his arrival at Tofield, he found a small, out of the way, none too well cared for church building. He resolved to enlarge it, improve it, and move it to a better location. Many said it could not be done. There were many reasons; the building was old, the sils were poor, the snow was too thin, these and many other reasons were all quite sound—but the building was moved and improved. By sheer force of personality and constant encouragement the somewhat squat and uninviting church was moved and made into an attractive house of worship. Nor was that all. This man from the east, started a movement among boys , which during the years that have passed, have done a great deal of good among the boys of Tofield.

Later came another minister to Tofield, this time from across the water. He found here a small Catholic church, (converted house). Soon he was planning something better, and before he left there was standing upon the site of the little makeshift church and exceptionally well built village house of prayer. With painstaking attention to detail, this Catholic priest watched over construction from foundation to spire, and it is often mentioned, how, when the building was completed and painted, he discovered a small almost inaccessible place where paint had not been applied. From the ground he directed operations and the workman tied the paint brush on a stick and reached the small place on the spire.

Rev. Firth and Father Quirk have, long before the biblical allotment of three score years and ten, passed from off this planet, which, even with finite intelligence, we know to be one in a universe of such magnitude as to be beyond our comprehension. As they passed along the journey of life on this earth, they left in this little Tofield of ours, their mark. A mark that stands to the glory of God and the welfare of mankind. Though even in their lifetime having gone out from our immediate circle, to other fields, we of Tofield regret their passing into the great beyond, but at the same time take pride in their achievements here.

THE 1929 motoring season is already upon us, and more and more individuals are becoming automobile drivers. Already quite a number of new cars have been sold by local dealers, and the "used car" market has been quite active. With the great increase in the number of cars on the road, it is logical that there would be some increase in the number of accidents due to motor traffic. It is inevitable that when there is so much travelling on Alberta roads, (some of them a long way from being good) and when automobiles travel at 35, 40, 45, 50, 55 and occasionally 60 miles per hour, there are a number who are going to make front page news items for the daily newspapers. The modern automobile is a marvel of mechanical ingenuity—even the automobile which is not so modern is a marvel of mechanical ingenuity. But every machine has its limitations—which is only another way of saying its wrecking point. Reading the other day, we were interested to learn that a United States Air Mail aeroplane is carefully checked over by two different men working separately after each flight. There are about 200 checks for each man to make. A railroad engine is inspected by expert mechanics after ever run—yet many people go bouncing along the road at 35 miles or more per hour, day after day in a car that has been a stranger to awrench for goodness knows how long. Steering gear, brakes, lights, and other things that tend to make a car unsafe should be checked over with reasonable frequency, and preferably by an experienced garage man. Even if the garage man does charge you something, it is likely to be less than a hospital bill or even undertakers' charges.

Nine Year Murder Mystery Solved

A nine year old mystery that kept the Alberta Provincial Police active throughout the entire period was solved on Sunday when Elbridge Lockhardt discovered the skeleton of a man, which has been conclusively proved to be that of Thomas Mund in a slough near Manola in the vicinity of Westlock.

Mund, wanted for the brutal murder of Sylvia, aged 15, and Andrew aged ten, children of Otis MacDonald, widely known farmer of that district, mysteriously disappeared after the tragedy, no trace of him having been found, save the footprints in the slough in which the crime was committed.

There is no question that the man had committed suicide after the full enormity of his crime came home to him.

The skeleton partly embedded in the sod of the slough, showed a bullet hole in the right temple and an aperture in the top middle part of the head showed where the bullet had made its exit. Lying on the right side of the remains was found a .38 revolver with one expended shell and two live rounds. This has been positively identified as belonging to a neighbor, William Theatt. It had been borrowed by Mund the night before the double murder.

Sergeant Watt of the provincial police and Dr. A. M. Crawford viewed the spot where the bones were found and are positive they ar those of Mund and that he had ended his own life.

Thus a case that has caused considerable worry to the police department and occupied a large amount of space in the files has been wiped out. Commissioner Bryan and Inspector Hancock are well pleased that a solution was reached.

It was on June 2, 1920, that the bodies of the two children were found in a small bush in a hollow near Mund's home. They had been clubbed to death in the most brutal manner. The bodies had been covered by Mund with an old over coat.

The neighbors highly incensed, organized and a posse and an intensive search was made for the murderer over a wide area of country, but save for a few footprints, no trace was found of Mund, who apparently had disappeared in thin air.

The story of the crime shows that jealously was at the bottom. Mund was deeply in love with Sylvia, a bright attractive girl, but she did not respond to his advances, as since his return from overseas he was of a moody disposition. A few days before the murder the girl had gone to a ball game with a boy friend and this incensed Mund, who made threats against his rival. At this time neighbors thought Mund was irresponsible, but harmless. Mund enticed the girl to his shack on the pretence of showing her some pictures and her brother Andrew went over shortly afterwards. Then according to what could be deduced afterwards, Mund invited them over to take some saplings from the slough and when he had led them to the woods, set upon them and clubbed them to death.

The location of the crime spot is about eleven miles west and one mile south of Westlock near what is called Horse Shoe Lake, an old river bed of the Pembina and about 100 yards from the lake trail.

Mr. Lockhart's discovery was due probably to the fact that logs had fallen over the usual trail and he was obliged to walk out of his way to visit a neighbors house

The hunt by the Provincial Police will go down in the annals of the department as a record one. Year after year the correspondence has piled up in connection with the case. Vigilance has never relaxed and no clue, no matter how slight, has been neglected. The expenditure in circulars, despatching of special constables to distant points, on pack trains patrolling far away sections of the northern part of the province has been enormous running well into the [illegible]

Every peace officer in the United States and Canada had been circularized and descriptions were even sent to Yorkshire where Mund was said to have had a sweetheart. Special officers travelled to Spokane, Portland and the Pinkerton Agency had been employed at Seattle.

"Clues came from all directions," said Commissioner Bryan today "as the case created a furore at the time. There was no let up in our vigilance despite the fact that we had the feeling that he had made an end to himself in an out of the way place. Sloughs were searched time and again despite the difficulties attached to that work. Tips came from the north country from men who thought they had run across the sought for criminal and pack trains were sent out only to discover that the trips had been wild goose chases."

At the time of the tragedy inspector Piper, then of the provincial police, informed the Journal, "I am told that Mund was 'dead gone' on the girl. In my forty years of experience in cases of this kind it almost invariably has been the rule that murder has been followed by suicide."

This prophecy of nine years ago has come true. Mund undoubtably ended his life when the full realization of his crime came home to him.

The Bank of Montreal announces the appointment of Mr. Wm. McDonnell as superintendent of Alberta Branches, with headquarters at Calgary, to succeed Mr. C. W. Chesterton who has been appointed Superintendent of Branches in British Columbia. Mr. McDonnell, who was born and educated at Peterboro, Ontario, entered the service of the Bank at Moncton in 1899, and after experience at other branches in Eastern Canada was transferred to Winnipeg in 1906. A few years later he became Accountant at Moose Jaw, and after holding a similar position at Port Arthur returned as manager to Moose Jaw in 1912. From 1917 to 1923 he was Assistant Manager in Winnipeg, and in the latter year was promoted to the position of Inspector of Branches in the Western Division, in which capacity he was in intimate touch with business activities throughout the three Prairie Provinces. For the past four years Mr. McDonnell has held the position of Assistant District Superintendent of Ontario Branches.

in districts where moisture is not the limiting factor in crop production and on land which is not infested with perennial weeds.

After you buy the car
...What will it cost?

RUNNING EXPENSE is a big feature always. The car that will stand up to continuous driving day in and day out, goes lightest on fuel, and knows no repairs is the car you are looking for.

The reliability and low running costs of the Ford car are no longer matters of conjecture. Experienced garage men and mechanics, large industrial concerns operating fleets of Ford cars, and officials of Drive-It-Yourself companies, all of whom are in a position to keep day by day cost figures, submit [illegible] reports that leave no room [illegible]

You save money when you [illegible] Ford car you save money [illegible] every mile you drive and [illegible] depreciation is lower than in any other car. These are motoring facts worth considering.

In addition to sound economy, the Ford car gives you beauty, speed, safety and driving comfort.

We shall be glad to give you a demonstration drive at your convenience.

THE SUMMER-FALLOW

(Experimental Farms Note)

The object of the summer-fallow is to conserve moisture, control weeds and prepare the land as a seedbed.

Experiments conducted at the Dominion Experimental Station, Lacombe, indicate that any method of summerfallowing which will prevent the development of weeds on the fallow will result in comparatively good yields per acre. In other words, ploughing is not always essential for the summer fallow. Medium loams, such as that which obtains at the Experimental Station, will produce good crops without ploughing, providing the land is not infested with perennial weeds. Annual weeds can be destroyed with ordinary tillage machinery other than the plow, although if allowed to make too much growth several workings are necessary, in which case ploughing might be as cheap and more effective. The plow is an essential implement in controlling perennial weeds such as quack grass, Canada and Sow Thistle.

The date of starting cultivation on the summer-fallow is important in years with a normal precipitation when weed growth starts early in the season. Under such conditions, cultivation should begin as early in the spring as possible, although early cultivation shows but little advantage in seasons when May and June have very little rainfall. Under ordinary circumstances a good farm practice is to disc or cultivate the land to be summer fallowed immediately after spring seeding is completed, and then plough when convenient. The early cultivation before ploughing will destroy weeds which germinated in the spring and provide a mulch to conserve moisture and promote the growth of another crop of weeds to be destroyed by subsequent cultivation or ploughing.

These experiments indicate that a summer fallow substitute can never wholly replace the black fallow. Intertilled crops give fairly satisfactory results as summer-fallow substitutes on fairly clean land, but are of little value in controlling or eradicating perennial weeds. Oat greenfeed when used as a cleaning crop is more effective in controlling annual weeds than a poorly cared for fallow. Sweet Clover is an excellent cleaning crop and adds materially to the fertility of the soil. Oat greenfeed and sweet clover can be used to advantage as summer-fallow substitutes.

CANADIAN CHAUTAUQUAS TO PROMOTE ESSAY FOR TOFIELD AND DISTRICT SCHOOL CHILDREN

We have received word that the Canadian Chautauquas of Calgary will promote an essay to be written by the School children of Tofield and district. The essay will be written on "Why is Stefansson the greatest living Canadian," and any boy or girl in the district covered by the Dominion Chautauqua's visit here will be eligible to compete.

The prizes, of which there are three, will be one of Stefansson's books. The judging will be done during chautauqua week, during which week, Stefansson himself will be here to lecture.

A full list of the rules of the contest can be procured from the Dominion Chautauquas, Calgary, Alta., together with a list of books written by this famous traveller.

NOTICE
Re: Weekly Half Holiday in the Town of Tofield

Notice is hereby given that all shops, and places where merchandise or goods are sold by retail, will be required to close at 1 o'clock in the afternoon on each and every Wednesday during the months of June, July and August. This is required under the provisions of By-Law No. 212 of the Town of Tofield which was regularly passed pursuant to "The Early Closing Act of the Province of Alberta."

Dated at Tofield, this 23rd day of May, 1929.

J. W. Chapman,
Secretary-Treasurer

NOTICE

I have disposed of the business of the Tofield Garage and request that all accounts owing me be settled at once as I am leaving Tofield. Please pay to the undersigned or to Mr. G. Richardson, Tofield.

Thanking the patrons of the garage for their loyal support and bespeaking the same for my successors.

(Sgd.) P. M. HAUGEN

UNITED CHURCH ANNIVERSARY SERVICES TO BE HELD SUNDAY

Rev., Dr. Tuttle of St. Stephen's College, Edmonton, will conduct services at both Tofield and Ketchamoot.

At Tofield services will be held at 12:00 noon and at 7.30 p.m. At Ketchamoot service will be held at 3:00 p.m.

THE BELLAMY TRIAL AT THE VARIETY THEATRE ON SATURDAY NIGHT

Sue Ives and Stephen Bellamy are on trial for the murder of the latter's wife, Mimi, who once was engaged to Pat Ives, Sue's husband.

The testimony is damaging to both defendants, it being the prosecution's contention that Sue and Stephen discovered Mimi and Pat keeping a clandestine tryst in a gardener's cottage and killed her with a knife thrust.

Stephen at first denying having been at the cottage on the night of the murder, is obliged to retract his denial when Sue, on the witness stand, is forced to admit that she and Stephen were at the cottage and did see the body on the floor.

Pat, called as a witness, admits authorship of love letters found at the murder scene but protests that they had been written during his courtship, ten years before. He explains their being in the murder cottage by revealing an admitted blackmail demand for $100,000 made by Mimi. He is unable to explain how they got to the murder scene, under cross-examination, unless his wife took them there, the prosecution showing that she was the only person who might of had possession of them at the time.

In vain, Pat tries to prove his wife's innocence but only serves to tighten the prosecution's chain of evidence to convict her and Bellamy. Bellamy, as a witness, insists that he and Sue left the murder cottage without revealing the crime because of the obviously incriminating circumstances.

Just as the case is about to go to the jury a surprise witness comes forward. Sue and Bellamy are acquitted. A confession, coming from an unexpected quarter, clears the murder mystery.

COHEN IN GRUDGE FIGHT FOR GIRL

A grudge fight which starts in New York City is continued clear across the continent and ends in California is one of the comedy highlights of "Homesick," Fox Film which is coming to the Variety Theatre on Monday June 3rd. It features Sammy Cohen, popular screen comic, and has a supporting company which includes Marjorie Beebe, screen star Comedienne, and Harry Sweet, who starred in a half hundred short comedy subjects a few years back.

The comedy incidents "Homesick" revolve around a transcontinental bycycle race with a prize of $25,000 and Cohen and Sweet as contestants for the cash and Marjorie.

At each stop across country Cohen and Sweet engage in fistfights in an effort to settle an old grudge. There is a stampede of cattle which involves the riders, a forest fire and other calamities.

DECLARATION OF DISSOLUTION OF PARTNERSHIP

I, Peter M. Haugen, of Tofield, Alberta, formerly carrying on business as garage proprietor at Tofield, Alberta, under the name and style of the Tofield Garage, do hereby certify that the said partnership was, on the 29th day of May, 1929, dissolved.

All accounts owing by the firm will be paid by me, Peter M. Haugen.

All accounts owing to the firm are payable at the office of the Tofield Garage, either to myself or to Mr. G. T. Richardson.

Witness my hand at Tofield, Alberta, this 29th day of May, 1929.

P. M. HAUGEN

Witness: Raymond W. Pincott.

Congoleum Rugs

HAVE RARE BEAUTY

Congoleum Rugs are made in many beautiful designs. The colorings are permanent and always retain their beautiful fresh appearance. There are many patterns, some originating in the Congoleum designing room, while others are patterned after some of the famous rugs of earlier days. The beauty of Congoleum Rugs permit them to be placed any where in the best of homes, the lady of the house realizing that in beauty and tastefulness, they cannot be excelled.

HAS DURABILITY

The durability and wearing qualities of Congoleum rugs have always been one of their most valuable qualities. Whether laid in the kitchen, dining room, or hall way, anywhere where there is considerable wear, they will "stand-up" and give years of service. This makes them suitable for the humblest cottage as well as the finest home.

LOW COST

Congoleum Rugs are low in price and considering their durability, one of the best floor coverings you can buy.

THE KING OF KINGS

The impersonation of Christ during the last three years of his life on Earth.

LOCAL AND PERSONAL

Born.—To Mr. and Mrs. P. Sorohn, on May 30th, a son.

Born.—To Mr. and Mrs. Charlie Nashman, on June 3rd, a son.

Born.—To Mrs. H. Swanson, a daughter.

Born.—To Mr. and Mrs. J. Dorakto, a son.

Lady Rodney of Fort Saskatchewan visited Rev. Symes on Wednesday of this week. Lady Rodney is interested in the settlement of British boys on Canadian farms.

Rev. Symes visited Edmonton last week where he attended a very large gathering of boy scouts.

Mr. and Mrs. Bruce and son Jimmie and Mrs. Hammond motored to the city one day last week.

A number of members of the local Masonic lodge visited an Edmonton lodge last week.

The Camrose Normal School has finished its term and among the normalites home are Miss Thelma Jobb and Miss Ellen Walker.

Mrs. Tofield of Edgerton visited relatives here last week.

Mr. and Mrs. Moore and family of Jarrow, visited here on Sunday at the Francis homes.

The stores closed last Wednesday afternoon for the first half holiday of the season. They will continue to close each Wednesday afternoon during June, July and August.

Mr. McLaughlin and Mr. Calvert visited the city on Sunday.

Mrs. Carver, Mrs. Bissett and Miss Lorett Ross motored to the city on Tuesday afternoon to visit Mrs. Calvert who is in the hospital.

Mr. and Mrs. Chapman, Mrs. E. Rogers and Miss Thelma Noland motored to Bruce to visit the Noland camp. Miss Noland returned on Monday by train.

Mr. Gordon Jobb is away on his holidays.

Mr. R. Griffin visited his sister Mrs. Bissett on Sunday.

Sam Turzanski ran into a barbed wire fence last Saturday and cut his face underneath the eye. It was necessary for Dr. Law to put in three stitches.

Miss Cooper took her grade III pupils for a hike last Saturday afternoon. They arrived at Mr. and Mrs. J. W. Robinson's place, played games, made a bonfire, toasted weiners and cheese, ate lunch after which they ran races. All had an enjoyable time. It was a little cool, but ideal for playing games, etc. The children appreciated Miss Cooper's thoughtfulness in planning the affair.

LATEST HAROLD LLOYD COMEDY SETS FAST PACE

"Fast and furious" is an expression that carries little weight any longer owing to its misuse by motion picture press agents but nothing more aptly described Harold Lloyd's newest production "Speedy" which comes to the Variety Theatre, on Saturday, June 8.

From start to finish it is literally a whirlwind of comedy, as the name implies. Lloyd, in the breezy character of a New York boy, whose principle vocation is losing jobs gives one of his most likable characterizations, and in addition has a story that is appealing, as well as based on fact.

Lloyd as a variety of position in "Speedy" ranging from soda jerker to the chauffer of a horse car, with a taxicab pilot, and several others sandwiched in between.

Finding new fields of comedy is a job worthy of the sturdiest pioneer, yet Lloyd finds plenty for his humorous adventures, and in "Speedy" he covers territory that as far as motion picture comedy is concerned, is virginal.

"Speedy" is the kind of universal picture that will make the whole world laugh. Its comedy is the kind that knows no nationality and while typically American, and New York in particular, will be just as popular in London as it will be in Manhattan.

Lloyd has one of those likeable characters for which he is noted, and when he gets into trouble, which he does early and often, his audiences are as anxious to see him out of it, as he is to get from beneath.

TO OUR FRIENDS AND CUSTOMERS IN THE TOFIELD DISTRICT

Having sold our premises and machinery business to Mr. S. Stauffer who will now be conducting the business under the firm name of S. STAUFFER & SON. We wish to take this opportunity of thanking you for your patronage and business and sincerely trust that our successor will continue to be favored with your good will and business in the future as we have in the past. We feel quite safe in saying that you will get good service and a square deal from Mr. Stauffer, who has had considerable experience in the machinery business.

CARVER & HANNAN will continue to operate all lines with the exception of the machinery business. The Imperial Oil, Insurance and Grain will be under the management of Mr. Carver, while Mr. Hannan will give his whole attention to auctioneering business and Live Stock Shipping. Will buy stock outright or will ship on commission of 50 cents per hundred.

Trusting to be favored with a continuation of your business and assuring you of our best efforts to please, we are,

Yours sincerely,
CARVER & HANNAN

On Friday evening, Mrs. Pincott assisted in the program of the physical and expression pupils of Mrs. McPherson at Ryley by giving two violin solo numbers. She was accompanied by Mr. and Mrs. John Lee, Allen and Mrs. Galloway and all enjoyed the evening immensely. Society hall was filled with invited guests and the pupils did credit to themselves and instructor. Several Ryley ladies assisted in the program as well.

We made an error last week when we stated that Lucille's Beauty parlor would be closed during Jne, July and August. We should have stated that the parlor would be closed on Wednesday afternoon's of these months. The announcement created something akin to consternation among the ladies, as now it is generally admitted that a beauty parlor is not only an acquisition to a town, but a necessity. Instead of closing there is an added attraction, a shipment of large hair … having arrived, and some new felts expected daily.

BASEBALL ON FRIDAY

On Friday evening, June 7th, the local intermediate baseball team will play the Ryley intermediates. This promises to be a real ball game. Tofield will have the same team which won so decisively at Vegreville. Ryley can be counted on to put a strong team on the field and a close game is expected. The game will start sharp on 6.30, so as to be able to get in a full game. Everybody is requested to turn out and help the boys. No admission will be charged at the gate but a collection will be taken. Tofield has some promising ball players and they are asking for your support. Don't forget the date and time, Friday, June 7th, at 6.30 p.m. sharp.

Flash: Game Cancelled

HOLY TRINITY CHURCH
Sunday, June 9th

11.00 a.m. Matins and Corporate Communion of W.A. All members of W.A. are urged to be present.
7:30 Evensong
Preacher: Canon Cornish.

Mr. Stanford R. Espedal, principal of the Czar High School, Czar, Alberta, will be at Tofield on July 7th with a troop of boys. Readers of the city papers will remember this gentleman as being the one who with his boys gave a performance at the recent Grade basketball game in the arena at Edmonton. On this date the Tofield chautauqua will also be here and there will no doubt be a large number present to see the performance. We understand Mr. M. C. Hammond will have charge of the arrangements, also that there will be no admission charge.

TOFIELD "LOOKING UP"

Apparently when F. O. Ball moved his building on to the corner lot, and John Lee and Wood Bros. commenced to erect office buildings on 3rd avenue they "started something." A day or so ago a letter was received at the local bank addressed to "The Manager, Bank of Montreal, Lombard Street, Tofield, Alberta, Canada." We puffed out our chests with pride when we learned that Tofield had a Lombard Street, (though so far the town clerk has not verified it) for the name Lombard is so redolent of history and historic associations. Lombard Street in London, England, is named after the "Lombards" a class of Italian merchants and brokers who settled in England from the 12th to the 16th century. In 1338 King Edward III. pledged his jewels to the Lombards in order to raise money for the French Wars and Lombard street even in recent time has been often reputed to be the wealthiest street in London.

Now after this high honor has been accorded the town and local bank we feel sure that Manager Rowe would allow the editor to raise ten thousand dollars on note of hand, whether it rains or not.

THREE BUSINESS CHANGES

It is not often that we have to record three business changes in one week yet this week it can be done.

The newly formed Tofield Co-operative Society has purchased the business and stock of the Tofield Farmers' Supply Company and will we understand take possession in October.

Mr. Hay who is manager of the Tofield Farmers' Supply Company has been in business here since 1913. In 1919 the present company was organized and Mr. Hay continued on as manager until the present time.

Who the manager of the new co-operative association will be has not yet been announced.

In October Mr. and Mrs. Hay will go to the Western States for the winter.

Another business deal of importance was the selling of the business known as Carver and Hannan. The premises and machinery end of the business has been purchased by Mr. S. Stauffer who along with his son will operate the farm machinery and groceries. The oil and grain end of the business will be retained and Mr. Carver will attend to this. The stock and auctioneering end is also retained and Mr. Hannan will attend to this.

The third business to change hands is the Tofield Garage, Mr. P. Haugen selling out to Morden and Pearson. Mr. Haugen has been connected with the garage first as partner and then as proprietor for a good many years and has built up a very well equipped shop.

Messrs. Morden and Pearson are retaining the mechanical help previously employed. Mr. Haugen is we understand, leaving the town and district some time in the near future.

AMISK CREEK

Mr. and Mrs. E. A. Moen entertained a number of young and older people on the evening of the 24th of May. The young folks were playing games while the older ones were visiting. They all had a good time and a delicious lunch was served about midnight and everyone went home happy.

Mr. A. Erickson was operated on at the Royal Alexandra Hospital on Friday of last week. He is getting along as well as can be expected.

Mr. and Mrs. R. O. Berg visited at the Anneho home last Sunday evening.

Myrtle and Marvin Moen, twins, celebrated their eighth birthday last Monday, the 3rd of June.

We are compelled to hold over until next issue part of Amisk Creek and Ketchamoot.

Will the correspondent from Ross Creek kindly sign his or her name to the news sent in. It is necessary for us to have this, not for publication but as a guarantee of good faith.

LAKESHORE

Mr. Lloyd Wood and sister Margaret motored to Edmonton on Wednesday of last week.

Mr. and Mrs. F. A. Jones were visitors to the city on Saturday.

Mr. and Mrs. Craig and daughters Marie and Ethel of Tofield were Sunday visitors at the J. H. Johnston home.

Mr. H. D. Stone and little daughter Verna visited Mrs. R. C. Phillips on Wednesday.

A number of young people of this district attended the dance at the Summer school house on Thursday evening and report a very enjoyable evening.

Mr. R. C. Phillips is having running water installed in his recently built home. The Mundare sheet metal works is doing the work.

U. F. A. NOTES

The regular meeting of the U. F. W. A. was held on May 9th at the home of the president.

There was an unusually good attendance in spite of the busy season. After some discussion it was decided that only one meeting be held in May and only one in July but that the programs for the omitted meetings be sandwiched in with the meetings which are held so that nothing of interest be missed. It was decided that Mr. Pincott be asked to give a talk on "wills" at some future meeting.

Mrs. McNaughton our district director was present and gave a little talk on the conference which will be held in Tofield on July 23rd. This is the constituency conference and has never been held in our town before so we are very pleased to make this announcement.

Our next meeting will be held at the home of Mrs. Warner on June 13th. The roll call will be answered with short cuts in house work.

Mrs. T. J. Seale will give a paper "How to make our organization most effective."

Don't forget the Women's Institute have very kindly invited our members to attend their meeting on June 11th when Miss Noble will give an address on the "New Canadian."

KINGMAN

T. J. Rogness and A. Bronnum were Edmonton visitors on Monday.

Mrs. Linton of Calgary visited with her sister Mrs. Ike Berg for a week.

Mr. and Mrs. Thor Grahn motored to Edmonton on Tuesday.

Mr. J. A. Ullberg has taken the agency for the W. Watkins Company of Winnipeg and is now busy selling their products.

M. D. Stateman returned on Thursday from a couple of weeks visit in the States.

Mrs. P. Radounsky was a business visitor in Edmonton on Thursday and Friday of last week.

Miss Lilie Lindberg spent the week end in Edmonton.

Mrs. D. M. Thompson and daughter spent a few days visiting in Kelsey.

Mr. and Mrs. John Haugen and family of Edmonton visited with relatives here on Sunday.

Mr. and Mrs. S. Simowitch and family of Round Hill and Mrs. Slutsky of Foam Lake, Sask. visited with Mr. and Mrs. P. Radounsky on Sunday.

Mr. and Mrs. C. R. Blyckert were the guests of Mr. and Mrs. C. Anderson on Sunday.

Mr. J. B. … visited with his son in Leduc on Sunday.

Miss Ray Hardin spent Sunday and Monday in Edmonton.

Mr. and Mrs. Thor Grahn and family motored to Alliance on Sunday.

INK FROM STRAW

Most Western Canadian farmers are acquainted with the fact that it is quite possible to make paper from straw. We imagine there are few however, who know that printing ink can also be made from the same product.

The following taken from an English printing trade paper will therefore be read with interest.

The fact might help the Mercury out some. Should the time ever come when we cannot pay our paper and ink bills, the Mercury man can go out to J. Warner's, Kallal Bros. or a number of other farmers in this district and get some straw and after getting Pete Haugen and Maurice McGinitie to invent a suitable machine for us, will be able to stuff the straw in it and get paper from one end and ink from the other. Quite a rosy prospect. Here is the article, not quite so foolish as the opening paragraphs.

Ink manufactured from straw can be used for printing. This discovery is reported to have been made by George H. Harrison, president of the Harrison Paint and Chemical Company of Merril Wisconsin. A recent edition of a newspaper was entirely printed from ink made from straw it is said, and it is planned to continue the use of this ink for the printing of the paper.

The discovery of the value of straw as a source of materials was made quite by accident. Mr. Harrison was spending the night at the home of a Canadian settler about twenty years ago when a straw burning stove exploded. He determined to find out what could cause such an explosion, and began to experiment with straw. The experiments, over a period of two years, revealed the valuable properties of straw, and Mr. Harrison set about determining processes and uses.

The "straw gas" which caused the settler's stove to burst was not the most valuable product he found. He experimented with the gas, however, and condensed it and used it to operate an automobile. In his plant at Merrill it is drawn off and compressed in a storage tank and burned to supply heat, effecting a material saving in fuel, estimated at a car load of coal a day.

According to Mr. Harrison a ton of straw yields 640 pounds of carbon, 15 to 20 gallons of crude "straw oil," and 400 pounds of pitch, as well as a small amount of tar. The straw oil is similar to the phenol obtained in making coal tar products.

The ink used to print the Merrill paper is straw carbon mixed with other substances to make a smooth, stable, quick drying ink.

EGG DELIVERIES ARE EASING OFF

The Market Examiner of May 30th has the following to say regarding egg deliveries.

Receipts on the egg market during the past week have been lighter with most of the jobbers, which they believe is due to many of the early-laying hens having reached the end of their production and getting broody. Another reason why the supply is light is believed to be on account of many country grocery stores shipping direct to hotels and restaurants in the city.

The quality of the stock which is being handled is not very good, for some sections of the trade estimate that over fifty per cent of them are grading seconds. This is chiefly on account of their being dirty, and as the storage stocks are now being put away the grading is being watched very closely. Stocks in the warehouses are reported as piling up fairly fast.

Prices on the extras and firsts are unchanged from last week, but seconds and cracks have been dropped one cent each.

FOUND—A sum of money in Tofield. About two weeks ago. Owner can have same by proving property and paying for this advt. Apply in first instance to Mercury Office.

POOL TERMINAL STORAGE TO BE INCREASED

The Alberta Wheat Pool is continually increasing its elevator system. On Monday of this week the contract was let, more than doubling the storage of the new Pool terminal at Vancouver. The number of Pool elevators in Alberta has been increased until the total is close to the 400 mark.

The Pool's continual objective is to handle as much of its members wheat as possible through Pool elevators. Each year sees an increase in the volume of Pool wheat handled through Pool facilities. This year the total is around 65 per cent.

The new Vancouver terminal was completed last fall and had storage facilities to handle 2,500,000 bushels of wheat. With the proposed additional storage of 2,750,000 this elevator will have a total capacity of 5,250,000 bushels. This will provide total terminal space owned and controlled by the Alberta Wheat Pool on the Pacific coast of 8,150,000 bushels.

The contract for building the additional storage in Terminal No. 1 was let to Carter, Hall & Aldinger of Winnipeg. C. D. Howe and Company, Port Arthur, are consulting engineers.

WHEN SHOULD WE CUT SWEET CLOVER FOR HAY

(Experimental Farms Note)

In the prairie provinces the increasing popularity of sweet clover as a forage crop for certain classes of live stock brings many new growers of this useful legume face to face with difficulties in handling it, particularly as a hay crop. The inexperienced grower quite commonly allows it to become too mature before harvesting it for hay thereby rendering it less palatable as a fodder crop. Moreover, two cuttings of hay are usually obtained during the second season and the longer cutting of the first crop is delayed after the proper time to harvest the smaller is the yield of the second crop.

BUTTERFAT PRICES DROP

The Market Examiner of May 30th has the following to say regarding butterfat prices.

Monday of this week saw a further reduction in the butterfat values when they came down to special 33c, first 31c and second 28c, making a 2c drop. Receipts are said to be showing a marked improvement now, but the bulk of this is reported by creameries having country point branches. Other concerns who are located only in the cities are finding an improvement but it is not so large.

Creamery butter prices were also cut on Monday, but the drop was only 1c. thus making No. 1 cartons 40c, No. 2 38c, No. 1 prints 39c and No. 2 prints 36. This drop was reported to have been caused through Saskatchewan offering butter at the coast at a low figure, and makers in this province in order to compete with them had to get in line. Lower prices in the east are also believed to have been responsible. There is a good demand within the province while some of the creameries are shipping to the coast.

WATCH YOUR BROODERS

It may be a little late to warn those operating brooders regarding fire, but this spring particularly, there seems to have been many fires with considerable financial loss from this cause. Edmonton, Sarrcedale, Vegreville, Tofield, all come to mind as being losers by fire of brooder houses, brooders and chicks. Poultry raising by the incubator and brooder method is becoming more popular every year, but the recent season has proved that considerable care must be exercised as regards fire.

At the Dominion Experimental Farm, Indian Head, Saskatchewan, the practice is to cut sweet clover for hay as soon as the first blossoms begin to appear, or better still while it is in the bud stage. This practice ensures the hay, when properly cured, being in the most palatable condition for feeding. Even commencing to cut as promptly as possible it frequently happens that the field is well advanced in the flowering stage before cutting can be completed.

After the flowering stage is reached sweet clover rapidly becomes woody. Experiments have shown that the percentages of ash, protein and fat decrease as development progresses while there is an increase in the percentage of crude fibre.

HOW TO SUCCEED

(Canadian National Railways Magazine)

EVERY NORMAL man wishes to be successful. We need not stop to inquire wherein success consists; but the statement may remain that it is the desire of the majority of men to move up the ladder. Ambition is ingrained in human nature and is one of the driving forces in civilization; being so, it is a good thing, except the vaulting kind of which Shakespeare speaks, "that overleaps itself and falls on the other side."

There are, however, conditions attaching to success, for generally speaking life is an investment and we must pay something into it to secure a return; and, as a rule, the investment must be made not only in bulk but with wisdom and discrimination. Now and then, men seem to reach their goal without effort or expenditure; for example, some chance rumor is dropped about a certain security on the market; a man acts upon it and wakes up to find himself wealthy; there was no effort on his part, no analysis of conditions; he acted on the suggestion of another and luck was with him. Sometimes, one finds oneself in a position of which he never dreamed; a fortuitous concourse of circumstances conspired to lift him up. Miracles of that kind do happen, and successful men are sometimes made by accident.

But the great mass of successful men must obey the laws governing success and are compelled to travel a long, and often weary road, before they discover their Eldorado. This is so, whether it be in the realm of commerce, learning, or any other. First of all, they must have an objective to which they must push on with resolution, choosing the things that matter, rejecting the things that don't. This process of selection is one of the indispensable considerations in a successful life. Dreams without determination count for nothing in this grim world; they are unsubstantial, and, unless transmuted into action, are a dissipation.

But having his goal one must have interest in one's work. The rock on which most careers is wrecked is precisely this lack of interest. To get through one's daily task with as little effort as possible is a sure and certain road to mediocrity. For one man who takes a genuine interest in his work ten do it perfunctorily; therefore, as an inevitable result, for every man who wins his way, ten fall by the wayside and accommodate themselves to whatever chance may bring. We often meet men of this type with their doleful tale of never having had a chance; someone else stepped in before them, but that someone else did not step in accidentally but walked in, or was pushed in by merit. One large employer of labor informs me that in his experience few men ever learn to read a blue print; here and there some man, who is interested equips himself, and when the time comes for advancement he is the selection for the more important job. It is a case of the survival of the fittest, because that much used and much abused phrase has a world of meaning in it.

In addition to interest in one's work, one must give concentration to it. Concentration, says Emerson, is the secret of success in politics, in war, in trade, in short in all the management of human affairs, concentration not only on the work as a whole, or on the end to be achieved, but on the details as well. We have queer notions of small and great and are quite ready to overlook the small because of our interest in the great; but he who cannot do a detail well is quite unlikely to succeed in the larger thing.

We might take a lesson here from nature, who spends as much care in making the frond of a feather as in the making the bole of a giant oak.

Genius has been defined as the "infinite capacity for taking pains." It may be defined equally well as the infinite capacity for fixing one's thought on details—both mean the same thing. In education, one can accomplish more in six hours' honest study per day with concentration than in ten hours of desultory reading; and the difference between the dull scholar and the bright one usually consists in definite, fixed attention to work.

The two elements of concentration and interest are interdependent; withou interest there cannot be concentration. This explains why the dullard at school often succeeds in a remarkable way in after life. He has found something which interests him and, as a consequence, he concentrates upon it. Much discussion goes on regarding the benefits of higher education as an equipment for a business career. This depends on what such education has done for a man; if it has taught him habits of concentration, it will be a great benefit to him in business; if not its utility is problematical.

Concentration is something which may be acquired. It is possible by exercise to fix one's attention on a given thing and, like any other habit, it grows by use. I can make myself feel that the thing I am doing is important, however dull or mechanical it may appear, and that is one of the first steps on the road to success.

HIDE RECEIPTS ARE ONLY FAIR

The Market Examiner of May 30th has the following to say regarding hide receipts.

Receipts on the hide market during the past week have been fairly heavy, while the quality has shown improvement, although a number of the skins are hair slipped and grubby. It is expected that it will be about three or four weeks before the good skins make there appearance.

Trading during the past week has been rather slow for tanners are not making any purchases for they have a fairly large value of supplies on hand which will carry them over for some time, and they are hoping that when they do step into the market they will be able to get stocks at a lower level than that which is prevailing now.

Trading in the horsehair market is on the slow side. Receipts are light, for the bulk of the good stuff in this line has already reached the hands of the jobbers and only small lots are coming now.

PROVINCIAL NEWS BULLETIN

Issued by Publicity Commissioner, Province of Alberta

Many to Attend Institutes of Co-operation

Judging from the number of inquiries already received from the committees in charge of arrangements, a large attendance of farmers and others interested in crop marketing problems is promised for the Alberta Institutes of Co-operation to be held at Lethbridge, Olds and Vermilion during the week of June 24th. Arrangements for the programs at the three points have been practically completed and the calibre of the speakers secured leaves no doubt as to the success of the meetings. Arrangements at each of the three points are in charge of an enthusiastic local committee and those who plan to attend either the adult or junior sections of the Institutes should communicate at an early date with the registrar of the Institute they will attend.

Travelling Health Clinic Starts Season

The travelling clinic under the direction of the Alberta Department of Health which has rendered splendid service in many outlying sections of the province during the past two years has started on its itinerary for the 1929 season during the past week. Some 34 centres will be visited and the doctors, dentists and nurses in attendance will follow up the work which has been done in advance by the inspection staff of public health nurses through rural schools. The clinic will again be in charge of Dr. R. T. Washburn, Medical Superintendent of the University Hospital. Dr. Margaret Owens, the first woman doctor employed by the Department of Health, is a member of the clinic staff and will pay particular attention to the treatment of women and children. Included in the party also will be Dr. A. E. Haycock, Provincial Institutional dentist; Dr. H. E. Gilchrist of the University of Alberta and four trained nurses.

Survey Party Leaves for North

The geological survey party under the direction of Dr. Allan Cameron which will make a survey of mineral resources in the northern part of the province under the direction of the provincial government, left during the past week for their summer's work. The survey will be facilitated by the use of photographs of the area to be covered which were taken last year by the Dominion government air photographers.

In addition to the two soil survey parties which have already gone north a third party in charge of J. I. Doughty, has gone during the past week to the area east of Lesser Slave Lake where comprehensive investigations of soil types will be made.

Labour Placements Indicate Industrial Growth

Indicative of the industrial growth in Alberta during the last year is the preliminary report submitted during the past week by Walter Smitten, Commissioner of Labour. Total placements through the provincial employment service numbered more than 2,000 over the previous year's [illegible] Act in the male section increased by 24 per cent and in the female section by 22 per cent over the preceding year.

Of vacancies for males reported 98.2 per cent. were filled and of male applicants 80.2 per cent were placed, corresponding figures for female employment being 94.2 per cent and 80.6 per cent.

Sugar Beet Crop is Promising

Reports from the southern part of the province indicate very satisfactory prospects from the beet growing areas. It is estimated that some 9,000 acres have been seeded to this crop, the largest acreage in the history of the province. Seed germinated uniformly, and in a number of early sown fields thinning has been started. New loading platforms to handle the shipments of beets to the factory at Raymond will be constructed at Iron Springs, Picture Butte and Regal.

Northern Indian Reserves Opened for Settlement

Keen interest is being shown in the announcement that an additional 20,000 acres of Indian lands in the Peace River district will shortly be opened for settlement. A public sale of several reserves located on the north side of the Peace River will be held in Fairview on Saturday, June 15th. The largest single tract to be included is the Beaver Indian Reserve adjoining the town of Fairview and as this comprises some excellent farm land, bidding is expected to be brisk.

Cream Prices Paid at Creameries

For the week ending May 25, 1929, the following prices were reported paid per pound of butterfat in the several grades of cream and at points shown, according to information received by the Dairy Commissioner of the Department of Agriculture:

Macleod—Special Grade 33, Number One 31; Number Two 28c.; Off Grade 22c.

All other points— Special grade 35c.; Number One 33c.; Number Two 30c.; Off Grade 25c.

Women's Institutes Elect Officers

The officers of the Alberta Women's Institute elected at the close of the convention held at Edmonton during the past week are as follows: Provincial president, Mrs. H. J. Montgomery, Wetaskiwin; Vice-president, Mrs. A. H. Rogers, Fort Saskatchewan; secretary-treasurer, Mrs. J. N. Beaubier, Champion; Provincial District Directors, Mrs. W. R. Roberts, Sexsmith, Mrs. W. C. Short, Woodbend; Mrs. J. P. Ferguson, Trochu; Mrs. A. C. Aleock, Champion.

You will like the Easy-Riding Comfort of the Ford Car

THE FORD car is one of the easiest-riding cars on the road because of its low centre of gravity, minimum unsprung weight, Houdaille hydraulic shock absorbers and the unique construction of its transverse springs.

Furthermore, you are as comfortable in mind as in body when you drive the Ford Car. You have confidence in the performance of the car because you know something of the quality that has been built in to it.

Remember these two points when you select your next car. These are combined to an uncommon degree in the Ford.

Come in and drive a Ford car yourself through thickest traffic, up steepest hills, over roughest roads. A thirty-minute demonstration will convince you that there is nothing quite like it anywhere in simplicity of design, quality, price and [illegible]

RURAL MUNICIPAL COUNCIL MINUTES

[illegible] he fourth regular meeting of the Council of Municipal District of Council No. 187 held at the Municipal office, Tofield, on Saturday, June 1st, 1929, commencing at the hour of 2 p.m.

The reeve, A. J. Willsome, in the chair. All councillors present.

The minutes of the previous regular meeting were read

Moved by Councillor Verge that the minutes of the previous regular meeting be adopted as read.—Carried.

Mr. J. W. Thompson, Assistant Assessor, was present at Municipal Affairs Edmonton, addressed the Council regarding the triennial assessment. Mr. Thompson advised the Council that Questionnaires re-ads of 1924 had not been satisfactory, so that considerable extra work would be necessary this year if the field [illegible] was to be done.

Mr. Peter, representing the Chipman Lake Co., also addressed the Council regarding Weed Killer in powder form.

Mr. Mitchell, Sanitary Inspector of the Salvation Army gave the Council an outline of the work carried on by the Army in the [illegible] district.

Mr. A. A. Trent was present and discussed the road situation and the [illegible] matter of Tofield Industrial Exhibition.

Moved by Councillor Verge that the Secretary-Treasurer be authorized to advance the Cooking Lake School District No. 1893 the two hundred dollars on their third installment.

Moved by Councillor Morden that the minutes of last regular meeting not being actually read, be adopted as read. July 6th 1925 be amended to read as at September 7th 1925 on account of [illegible] assessed property, to assess mines and minerals for the first time.—Carried.

Moved by Reeve Williams that an [illegible] be passed at last regular meeting appointing Mr. Hall as Court of Revision for Triennial Assessment. Final assessment is to be taken from the 1924 supplemental amended be rejected, on account of Department of Municipal Affairs' statement to the effect that 1924 supplemental was very unsatisfactory and would not be accepted by them as a guide for 1929 triennial assessment.—Carried.

Moved by Councillor Brown that C.P.R. be paid for road diversion allowing the N.W. 19-49-20 w 4 at the rate agreed upon, viz: $12.00 per acre.—Carried.

Moved by Councillor Morden that on behalf of the petitioners Mr. Verge interview the solicitor for [illegible] grande Trent road work be already been stopped out. If agreeable, [illegible] satisfactory provisions for the right of way [illegible] the road allowance, that [illegible] some arrangement may be made [illegible] 1930 programme is being suggested.—Carried.

Moved by Reeve Williams that Councillor Verge be given full power to deal with Mrs. Annie Poole re house as to the sale, price and terms of lot 14, block 7, North Cooking Lake without full report to secretary treasurer.—Carried.

Moved by Councillor Verge that the said reeve for Ward 1, Municipal No. 2020 be placed at twenty mills for 1929. Reeve mills to be used in reducing present indebtedness, proceeding school to not exceed during 1929 [illegible] and [illegible] by the Alberta to take care of past due payment on debenture.—Carried.

Moved by Councillor Morden that the cancelled sub-division known as Tofield Industrial Heights, be sold to Mr. G. A. Trent for the sum of $2000. Terms $500.00 cash, balance in two equal annual payments together with interest at seven per cent per annum until paid. Option to be granted Mr. Trent to pay any [illegible] at any time [illegible] rest [illegible] without being. The above is subject to the approval of the Department of Municipal Affairs.—Carried.

Moved by Councillor Verge that [illegible] be instructed to report any orders issued by individual [illegible] during the road work.—Carried.

A number of accounts were presented, passed, and order paid.

Moved by Councillor Verge that Mr. J. G. A. Letourneau be appointed annual assessor for 1929.—Carried.

Moved by Councillor Morden that the Salvation Army be allowed a grant of $100.00 for 1929.—Carried.

Councillor Brown was requested to bring in a report as to the interest of Mrs. Helga Grunland in her fathers' estate, in order that Council may know how to deal with St. Mary's Hospital account of $61.60.

Moved by Councillor Wood that Councillor Morden be authorized to purchase one road plow for his division.

Moved by Councillor Wood that Mr. Thos. Holmberg be appointed assessor for triennial assessment covering Municipal District No. 687, and that Reeve Williams and Councillor Christenson be authorized to contract with Mr. Holmberg as to remuneration.—Carried.

Meeting adjourned at 6.30 p.m.

FIRST TRANS-ATLANTIC FLIGHT

The first Trans-Atlantic flight was successfully accomplished by two British airmen, Captain John Alcock, D.S.C. pilot, and Lieutenant Arthur Whitten Brown, navigator, the a time used was 16 hours. Vimy is the Rogue twin engines.

It was a marvellous flight and greatly attaches to because it was made under bad weather conditions, [illegible] fog on almost every hour. Just that the machine was discovered to be flying upside down and save only by [illegible] feet from the sea.

The project of the Atlantic flight was offered by Lord Northcliffe in the London Daily Mail in April, 1912, and suspended during the war.

Captain Alcock and Lieutenant Brown left Newfoundland at 1.13 P. M. Saturday June 14th 1919, and landed near Clifden, Galway, Ireland at 8.40 the next morning, a flight of 1890 miles, taking only fifteen hours, fifty-seven minutes, a truly marvels ous flight, which was for the victors a prize of 10,000 pounds.

Both Captain Alcock and Lieutenant Brown were knighted by His Majesty the King in 1919. Sir John Alcock [illegible] a flight about a year later and was killed.

SECOND FORTNIGHTLY CROP REPORT

Issued by Department of Agriculture, Government of Alta., Edmonton.

May 27, 1929.

Seeding of wheat has been practically completed over the province and approximately seventy-five per cent of the acreage for oats and barley has been sown, according to the telegraphic reports received by the Department of Agriculture on June 1st. Work has been retarded to considerable extent in a number of districts by rains, but the remainder of the wheat acreage will be sown within the next few days.

Conditions in a number of southern and central districts have been materially improved by moist rains during the past week, and little concern is felt over general crop prospects from the moisture standpoint. Germination has been uniformly good and much of the early sown wheat is making rapid growth. Warm weather is required however to ensure rapid growth, especially in areas where seeding has been delayed by a heavier than usual precipitation.

The season has been somewhat unfavorable for the early destruction of weeds as growth has been too slow to permit much cultivation by surface cultivation prior to seeding. Some localities report a considerable increase in the acreage of grain stubbed in, and this will undoubtedly be reflected in greater difficulty in destroying the weed stimulus in following years.

Frost seeding has been practically finished in the south and seed has germinated well. Some damage to [illegible] reported as a result of late frosts. A marked increase is noted in the acreage devoted to sweet clover, alfalfa and the other pasture crops.

A uniformly good stand of grass is reported in the Peace River district where seeding has been completed for some time. All the winter is above the ground and oats are making a good showing. The moisture supply in the soil is sufficient to carry the crop for some time and prospects are really very promising.

Pastures are making satisfactory growth and live stock is in good condition. Shearing of farm flocks is expected to start shortly and under range conditions a start will be made within the next few weeks. Some losses have been experienced in the lamb crop on the ranges as the result of snow and rain during the lambing season.

LOCAL AND PERSONAL

Born—To Mr. and Mrs. Hans Holling, on June 10th, a son.

Born—To Mr. and Mrs. Joseph Hanson, on June 11th, a son.

The W.M.S. of the United Church will meet in the church basement on Thursday, June 20th, at 3 p.m.

Dr. McClurg and W. Webb motored to Lethbridge on Tuesday where they will attend Grand Lodge sessions of the Masonic order.

Mrs. Jobb and Mrs. McClurg are on a motor trip to Banff and the Turner Valley. Mrs. Jobb will visit her brother during the trip. Mrs. W. Webb will join them at Calgary and accompany them on the trip.

Mrs. Carver and children are visiting in the city.

Mrs. Hall and Mr. W. Clark visited friends in town last Sunday.

Mr. Calvert spent Sunday in Edmonton with Mrs. Calvert who is still in the hospital.

... Mr. and Mrs. Hay motored to the city on Thursday.

... or perhaps we should say Mrs. Lang, motored to the city last week. The Edmonton Journal ran a competition among their district agents regarding the number of subscriptions renewed and obtained during a given time. Mr. Chittenham came in on the list and has awarded a particularly handsome lamp. Mrs. Lang, being broody, comb, mirror, and several other articles of beauty and use. Congratulations.

MARJORIE CRAIG BEVERLY BURNS AND LATER SUICIDE

One of the most distressing accidents to happen in Tofield occurred Sunday last when Marjorie Craig received burns which later proved fatal.

Marjorie had been to the United Church Sunday School as usual and was as happy and cheerful as ever. Returning home some domestic duties demanded her attention which required lighting the stove. To hasten things along Marjorie used some coal oil and the flames jumped from the fire to the can and in a fraction of time Marjorie's clothing was burning.

Mr. Craig, her father, immediately on hearing the screams of Marjorie and subdued the flames, but unfortunately she had received bad burns on the arms, face and legs.

Dr. Law was immediately summoned and advised taking her to the hospital at Edmonton and Mr. Gallaway and Mr. Craig drove to the city with her.

The occurence cast quite a shadow over the town on Sunday, and many sincere sympathies are extended to Mr. Bentley, frequent enquiries obtained the information that she was doing well and her many friends were rejoicing because a very dangerous accident had occurred without fatal consequences. Even on Tuesday morning word was passed around of many anxious friends that Marjorie was brighter and would recover, and the news arrived on Tuesday afternoon that she had passed away, and quite a gloom over the community.

Marjorie who was only eight years old, leaves to mourn her loss, her father and mother, Mr. and Mrs. A. C. Craig, two brothers, William and Ross, and three sisters, Georgina, Minnie and Evelyn.

The funeral will be held on Friday, June 14th, at two o'clock, from the United Church, and interment will take place at the Tofield cemetery.

The unfortunate occurence is particularly sad and the sympathy of both town and country residents goes out to the family in their sad loss.

OLD TIMER PASSES ON

The death occurred on Monday of William Rowland, old timer and long time resident of this district. Billy Rowland, the name by which he was most widely known was born in Edmonton and had seen some years of summers. He leaves to mourn his loss several sons and daughters, some at home and some away.

The funeral was held on Wednesday from the Anglican Church, interment taking place in the Tofield cemetery.

JAIL - BIRD - IN FILM COMEDY

What promis, might both Mr. & country before, if reformers have their way, is amusingly portrayed in "Brotherly Love," starring Earl Dane and George K. Arthur, which is coming to the Variety Theatre on Saturday June 15th.

Arthur is an inmate, Dane a guard, in an institution which has such chubby features as a football team, [illegible], fraternities and a campus. The Room home last Sunday. Other visitors were, Mr. and Mrs. Fenno Mr. and Mrs. Geo. Hendrickson, Miss Carey Brenkan and Mrs. Nora Olson and family.

MANY SCENES OF RARE BEAUTY IN "DR. MILLE'S "THE KING OF KINGS"

Climaxing of the Temple, Trial and Crucifixion of Jesus Are Remarkable

CECIL B. DE MILLE'S motion picture Life of Christ under the title of "The King of Kings," is well on its triumphant nationwide and foreign tour, which ran for many months at enhanced prices in New York, Chicago, Boston and other cities, will be on view at, "The Variety Theatre" on June, 17, 18, 19.

Dr. De Mille begins the story with the greatest Galilean military event Jesus makes the counter motive the opposition of Scribe and Pharisee and High Priest, and develops the first grand climax in the Cleansing of the Temple. Here arrives the second opposition, the resentfulness of Judas when Jesus refuses the temporal throne.

Many Wonderful Scenes

For the theatre-goer, certain beauty in and around Bethany—in the children in the Olive Grove and the raising of Lazarus—the action goes to the Upper Room of the Lord's Supper and thence to the Garden of Gethsemane, Mt. and Mrs. Kindley, Mr. & Mrs. John Johnson, the Simonson young folk, Mable Fosbrae, Anna and Mable Jovening and Joe Eide.

Mr. O. Johansen, Aksel Prestmoen and Joe Eide left for Fort McMurray on Monday. They expect to work there during the summer

KINGMAN

Miss Irma Stutsman who was taken suddenly ill on Wednesday was rushed to the St. Mary's hospital where she had an operation for appendicitis and she is now progressing favorably.

A. Ang and C. F. Sanlund motored to Edmonton on Wednesday.

Mr. and Mrs. Oscar Thompson and Miss Ida Thompson motored to Edmonton on Thursday.

Mr. and Mrs. A. Ang and family spent Sunday at Dried Meat Lake.

Mr. and Mrs. Henry Gray took in the basketball game between the Innest Centrals and the Edmonton Grads in Edmonton on Saturday.

Mr. and Mrs. F. Carlstrom and family of Hay Lakes were the guests of Mr. and Mr. E. Erickson on Sunday

Mr. and Mrs. Jos Munson and family and Mrs. Helen Bychart of Camrose were dinner guests of Mr. and Mrs. C. H. Bychart on Sunday.

Mr. and Mrs. Hanson and family of Seattle are staying with the latter's father Mr. A. Brunsoun for a couple of months.

WEDDING
Carlisle—Spies

A pretty wedding was solemnized at McDougal United parsonage on Saturday June 8 at 2 p.m. when a daughter of the late Mr. A. Solene and Mrs. Spies of Sherwood, became the bride of John Abner Carlisle, B.Sc., son of Mr. and Mrs. T. V. Carlisle, Wellfleet, Nebraska, U.S.A. The Rev. Wilfred Gantz officiated.

The bride was lovely in a dainty gown of printed chiffon in Hindu blue and gold with matching hat and [illegible] and carried a beautiful bouquet of [illegible] roses.

Miss Barbara Carlisle of Wainwright, sister of the bridegroom, was bridesmaid and wore a frock of pink georgette with picture hat to match. She carried a bouquet of pink and white carnations. Mr. E. F. Bullock of Regina attended the groom.

The bridegroom's gift to the bride was a necklace, to the bridesmaid an enamelled mesh bag, and to the best man a white gold tie pin, pearl set.

After the ceremony a wedding dinner was served at the Macdonald. Invitations for bridal party only were Mr and Mrs. H. A. McNabb, Miss Monica Beck, Mr. and Mrs. J. D. McLean, Fort Saskatchewan, Mr. R. H. Carlisle, Amisk, Alta., and Mr. E. J. Pritchlow of Wainwright, Alta.

Among the beautiful gifts received was a silver tea service from the staff of Liggett's drug store, where the bride was employed for the past two years

Mr. and Mrs. Carlisle left for a honeymoon trip to Calgary and Banff, the bride traveling in a coat of [illegible] green chevronne with tuxedo collar and a chic hat of soft straw trimmed with angora in pastel shades. On their return they will make their home in Medicine Hat.

BARDO

A large number of the school children are sick with the Measels, some have been quite ill, but they are improving now.

Mr. and Mrs. Chester Benning of Camrose and Miss Alma Benning who is visiting her brother Chester for a few days, while enroute from Monmouth to Grand Prairie, visited the Room home last Sunday. Other visitors were, Mr. and Mrs. Fenno Mr. and Mrs. Geo. Hendrickson, Miss Carey Brenkan and Mrs. Nora Olson and family.

Mr. and Mrs. Fenno who have been visiting here left for a short visit to Grand Prairie on Thursday, before leaving for their home in Bellingham, Washington.

Mr. - Anna Jevenning who has been at Vermilion the last few weeks has returned home by car on Monday

Miss Margret Ness who is training at the Royal Alexandra hospital at Edmonton visited her home Monday afternoon.

The service held last Sunday was not very well attended. There has been [illegible] Sunday School in the Wesley residence

Mr. and Mrs. Cofferil of Edmonton visited the Fenwick home for a short while Sunday afternoon.

Mr. and Mrs. [illegible] Rude and family, Mr. and Mrs. Emil Rude and family, Miss C. Bergsjel, Raymond Nordhus, and Peter and Roloff Baarnes visited at the Bergsjel home at Banff on Sunday

Visitors at the Erickson home on Sunday were; Mrs. Nordhus, Mrs. Lorne, and Mrs. Kindley, Mr. & Mrs. John Johnson, the Simonson young folk, Mable Fosbrae, Anna and Mable Jovening and Joe Eide

KETCHAWOOT

(Too. too late from last issue)

Mr. and Mrs. Harrison or. Mr. and Mrs. R. E. Harrison and family all of Lamont visited over Sunday with their son and brother and family Mr. and Mrs. A. Harrison.

Mr. Ang or Mitchell entertained a few of his friends at the Nesmeland home on Friday evening in honor of his birthday anniversary. The boys all reported a good time

Mr. and Mrs. Stone and four children just recently from England are living in the Owen house. Mr Stone is working for Mr. Leslie and their oldest son for Mrs. Henderson.

Mr. and Mrs. John Brown were in Edmonton on duty last week, bringing home a five month old baby girl who they will care for. We wish them every good wish in their kind of deed

Grandma Mitchell left Thursday evening for Edmonton where she visited a few days with her children there. Mr. Mitchell joined her on Monday and in the days will proceed on to Victoria where they will make their future home. May their every good wish in their journey follow them to their new home

Mr. and Mrs. Pearson and little daughter also Frank Borden, motored from Monticello, Ontario recently. Mr. and Mrs. Pearson have been visiting here with Mr. and Mrs. J. C. Appleby, but are soon moving to town to take over the Tofield Garage. Tofield should be pleased to welcome them.

Mr. and Mrs. Chester Coombes and two children motored to St. Paul de Metis on Saturday, to visit relatives, returning home Saturday. They were accompanied home with Mrs. Coombe's mother and brother, Mrs. Cook and Jessie. The Tofield Garage Sunday dinner at the Owen home at Vilna.

W.I. NOTES

The W.I. held their regular meeting on Tuesday, June 11th, and were pleased to have as their guests the ladies of the U.F.W.A.

Miss Isabelle Noble of Daysland, gave a very interesting talk on "The New Canadian," reminding us of many instances where the New Canadian was showing remarkable ability and standing for a fuller understanding of the foreign immigrant and a fuller realization of the hard ships which confront him.

The Tofield Institute received an invitation from the Round Hill Institute to visit them at their meeting on Thursday evening, June 13th, at which Mrs. Rogers of East Saskatchewan will give an address

All Institute members are invited to visit the Ryley W.I. on the afternoon of Wednesday June 26th. An interesting and highly entertaining programme is being furnished jointly by the Ryley and Tofield Institutes.

There will be no meetings of the Tofield W.I. during July and August

LOCAL AND PERSONAL

The old Queen's hotel is nearly down-locked. Frenske and Son purchased this building some time ago and have been steadily tearing it down. Here is a case of history repeating itself, it being the season of her birthday, many good wishes extended to her. A very nice lunch was served and [illegible]

The weather stays dry. Up to the present there is no real cause for alarm, yet the situation is anything but satisfactory. This district has yet to suffer a crop failure from drought, and if the rains are late in coming, many old timers fear the first will be late in coming also. We only have two more signs of rain. One Mr. J. W. Cookson told us some years ago, viz: that when the wind blows from the east it invariably brings rain. This is mostly true, but was a fluke this year. The other, and no one presumed for laughing, is that when the editor comments on the dry weather, it is bound to rain and if he remains on the wet weather, it will [illegible] dry. Well, we've commented on the dry weather.

Cream Shippers

The busy season will soon be here and most of you when in town will want to conduct your business in quick time so as to make every minute count.

"IF THE MOUNTAIN WILL NOT COME TO MAHOMET, MAHOMET MUST GO TO THE MOUNTAIN"

In explanation we may say that we have an arrangement with the Farmers' Supply nearby those wishing to do so can leave their cream there. The creamery truck will call at the store TWICE DAILY and pick the cream up.

Phone the Creamery and leave instructions as to your cream delivery.

IN ARRANGING low fares for prairie residents, we regard this part of our work as a great and important public service, always ready with men, equipment plus the experience which enables us to care for any movement with smoothness and efficiency.

Suggestions: Jasper National Park, Pacific Coast, Alaska, Minaki, Ontario, Quebec, Maritime Provinces, Eastern Lines.

THIS SUMMER—except for a little while from the dull sameness of succeeding days. Our low fares from May 15th to Sept. 30 (with a final return limit Oct. 31, 1929) make it easy.

OUR TRAINS pass through a territory replete with scenic grandeur, of historical and educational value to the traveller. Nothing superior to our sleeping and dining car service. . . Radio, an added feature on through trains.

THINK IT OVER!

Whatever vacation spot you have in your mind, our local agent will be pleased to give every assistance. He will be glad to quote lowest fares and make all arrangements for you—or write

J. MADILL, District Passenger Agent, Edmonton

CANADIAN NATIONAL RAILWAYS

Job Printing

Every business man requires a certain amount of printed matter. Such things as Letterheads, Envelopes, and Statements are as necessary to modern business correspondence as a telephone is to a modern business office. The Mercury Office is equipped to turn out all kinds of job printing. The next time your supply is running low, call us up and a representative will be at your place of business in a short time to receive your instructions and take your order. Prices fair and just.

The Tofield Mercury

CHANGES CORPORATE NAME

The world famous old concern, the J. I. Case Threshing Machine Company, Inc., of Racine, Wisconsin, has just announced a change in its corporate name. Henceforth, the organization will be officially known as the J. I. Case Co. Inc. There will be no change made in the personnel or established policies of the institution.

Recently Case acquired all outstanding rights to the use of the names "Case" and "J. I. Case" on plows, harrows and certain other farm tools, and now has the exclusive right to the use of the names "J. I. and Case" on all farm machinery and implements. "Now there is only one Case organization, and that is the J. I. and Case Co., Inc., of Racine, Wisconsin, formerly called the J. I. Case Threshing Machine Company.

This change in name was deemed necessary due to the fact that the Company has outgrown the name given it a great many years ago, when its principal products was threshing machines. From the very beginning the line of products steadily expanded, until now it includes a full line of farm operating equipment, so the words "Threshing Machine" in its corporate name no longer indicates adequately the classes of product it manufactures and sells.

HOLY TRINITY CHURCH
Sunday, June 16th, 1929
11.00 a.m. Sunday School.
7.30 p.m. Evensong.
—Rev. Symes.

The annual departmental examinations commence on Monday. Students in the high school grades have been studying pretty steadily for some time now and the Mercury wishes them all good fortune in the final test.

Subscriptions to the Mercury have been coming in fairly well. Still we have not been swamped with coin of the realm. Just wait till it rains and the farmers are happy—then we will all rejoice.

Here and There

More than 1200 employees will comprise the personnel of the Royal York Hotel when the Empire's greatest hostelry throws open its doors to the public in June. The chef has between 135 and 175 skilled culinary experts under his control and the head-waiter commands a group of over 300 workers. There is a corps of 45 trained telephone operators and there is a printing establishment with three presses and a linotype machine.

With a score of 1102 out of a possible 1200, highest ever made since the contest was inaugurated, Canadian Pacific Railway police, Ontario No. 1 team, have been awarded the Dominion Revolver championship for the Chief Constables Association Trophy. Thirty-six teams competed for the title. The winning team was made up of Investigator E. O'Brien, Sudbury; Constables H. H. Gyves, Port McNicoll; J. H. B. MacDonald, Toronto; D. Prendergast, Sudbury; and W. E. Tinsman, White River, Ont.

Addressing the Quebec branch, Canadian Manufacturers Association annual meeting in Montreal recently, Henri Rolland, retiring chairman, said Canada had the second largest per capita installation of water power in the world with its 512,000 h.p. per thousand of the population, being second only to Norway. Today $500,000,000 or $100 for every person is invested in hydro-power plants and there will shortly be another $290,000,000 added by numerous undertakings now in their initial stage.

Fine progress is being made in seeding in the Prairie Provinces, according to reports to the agricultural department of the Canadian Pacific Railway at Winnipeg. Lost time due to backward weather is now made up, it is claimed, the soil being in excellent condition. Pastures are somewhat backward but stock are in good shape.

Under its policy of development and expansion the Canadian Pacific Railway has already this season let contracts for 296 miles of branch line construction in western Canada, according to D. C. Coleman, vice-president of western lines. It is expected that when contracts for the Lanigan-Prince Albert branch are let that construction programme for 1929 will call for slightly more than 400 miles.

Hon. Narcisse Perodeau, former Lieutenant-Governor of the Province of Quebec, returned from a six months trip to India and the East recently. His Honor was taken ill with bronchial pneumonia when in Benares and for a time his condition was very serious. When he alighted from the Trans-Canada Limited at Montreal from Vancouver he was however looking well and stated that but for his illness had thoroughly enjoyed his holiday. It was his first visit to India and he was much impressed by the scenes witnessed there.

Alberta Institute Of Co-Operation

LETHBRIDGE OLDS VERMILION

June 24-29th, 1929

Arrangements have been completed for the holding of three separate Institutes of Co-operation in the Province, similar to the one which proved so successful at Edmonton last year.

The meetings will be addressed by speakers who are outstanding authorities on various phases of co-operation in many parts of the continent, and special attention will be paid to the problems in co-operation effecting Alberta farmers. The Co-operative marketing of wheat livestock, dairy products, and poultry and eggs, and the consumers' co-operative movement will be considered and discussed...

Special arrangements are being made for the junior section of the Institute, and for the instruction and entertainment of the young people who will attend.

Plan to attend the Institute nearest your home and in order to ensure accommodation communicate at an early date with the registrar.

M. L. FRENG, Dis. Agriculturalist, LETHBRIDGE
F. S. GRISDALE, Principal, School of Agriculture, OLDS, Alta.
W. J. ELLIOTT, Principal School of Agriculture VERMILION, Alta.

BABY CHICKS—Canada's Bred-to Lay, 100 per cent alive. DRAMA OF SEA SALVAGE

Inset, Captain J. M. Hewison of the Salvage King, which is seen above, left, the Canadian Pacific S.S. Empress of France.

WHEN the Canadian Pacific liner Empress of France and the Pacific Salvage Company's big steam tug Salvage King rubbed sides near the entrance to Victoria Harbour recently greetings were exchanged between two principal actors in an outstanding drama of Canadian seamanship. They were Captain Bunker, former master of the freighter Havilah, and Captain J. M. Hewison, master of the Salvage King, the former being a passenger on the giant passenger liner.

The tug after sixty days out of her own port was returning after performing the heroic feat of towing the disabled freighter Havilah from Dutch Harbour, Alaska, to Osaka, Japan, through days of constant gales, terrific seas and under almost every kind of marine handicap, a distance of 3,100 miles in the treacherous Bering Sea and stormy North Pacific.

At one time with fifty-foot waves dashing over both vessels and only a fitful moon peering through snow-filled darkness, the deckload of lumber on the 9,000 ton Havilah shifted and her steering gear went awry and she listed over fast. The "S.O.S." and fateful message "We are sinking" went [illegible] to the little 1,000 ton Salvage King, lifeboats were swung out, and men stood by ready to sever the steel tow line with an acetylene torch. The freighter survived the storm, however, and was towed through gales and mountainous seas for nine more days to Osaka, Japan, covering 3,100 miles in 25 days. When she met the Empress of France, on which the captain and crew of the freighter were passengers, she was completing a voyage of 10,000 miles after having performed a task that no other salvage vessel on the Pacific had been able to undertake.

CO-OPERATIVE INSTITUTE, VERMILION, June 24th to 29th

Things are beginning to take shape for the Co-operative Institute which is to be held at the School of Agriculture, Vermilion from June 24th to June 29th inclusive.

A number of speakers of international reputation will be present to address the gathering. Among those will be Dr. Nourse, Chief of the Agricultural Division, Institute of Co-operation, Washington, D. C.; Clyde L. King, of the Wharton School of Finance; Professor J. T. Horner, Dairy Research Bureau, Detroit; C. B. Denman, President National Live Stock Producers Association, Chicago. The Alberta Wheat Pool will be represented by Geo. Bennett, Mannville, J. R. Love, M.L.A. the Dairy Pool, and the Livestock Pool by A. B. Claypool, president. In addition to these Premier Brownlee, Dr. Wallace, president of the University of Alberta, Dr. H. W. Wood, Hon. Irene Parlby, and Mrs. R. B. Gunn, will deliver addresses. It is expected that Hon. R. G. Reid will open the convention and deliver the address of welcome. He may also act as chairman for a number of the meetings. Other chairmen selected are Mrs. R. B. Gunn, Wm. Irvine, E. S. Stearns and H. A. Craig, Deputy Minister of Agriculture. The whole convention is designed to study co-operative methods as they apply to Western Canada.

A year ago when the Institute was held at the University of Alberta. Many hundreds of people attended the convention. Three similar institutes are being held this year at Vermilion, Olds and Lethbridge, in order to reach as many people as possible.

The Vermilion School of Agriculture and the U. F. A. are each allowed twenty junior delegates whose railroad and other expenses will be paid while attending the convention. The V. S. A. students have already been notified, while the names of the U. F. A. juniors are being received. Anyone who is interested and who may wish to do so may register as a delegate, and by sending in $1.00 with their registration will receive a badge which grants the privilege of the convention floor, and will also assure them of a complete printed report of the addresses and discussions. All registrations should be in the hands of the undersigned by June 15th.

Those who wish to stay right in the large dormitory at the School of Agriculture, which has a capacity for 200 and the rate will be $1.00 per day. Many will undoubtedly drive into the meetings each day and may prefer to bring a picnic lunch and eat same on lawn. Single meals may be had in the dormitory at 40c each. It is expected that the large gymnasium at the school of Agriculture will be filled to capacity. There will be community singing, other entertainments and a concert with a banquet and dance for the delegates on Friday evening, June 28th.

All are invited to study for a few days this co-operative movement that is coming to be such a prominent thing in our Western Canadian life.

The Vermilion committee of the Co-operative Institute will appreciate the newspapers making these meetings known as widely as possible.

W. J. Elliott,
Registrar, Vermilion Institute

THIRD FORTNIGHTLY CROP REPORT

Issued by Department of Agriculture, Government of Alberta, Edmonton, June 5, 1929.

Crop conditions throughout the greater part of the province are very satisfactory and grain is making splendid growth, according to telegraphic reports received by the Department of Agriculture on Friday for the third fortnightly crop report of the season. Moisture requirements for some weeks have been supplied by the heavy rains which visited the southern section of the province over last weekend, and all crops are growing rapidly.

Prospects in the Peace River district are very promising and any immediate danger of drouth has been removed by frequent rains during the past three weeks. Crops growing on land newly broken last season are looking exceptionaly well.

In the Edmonton district and for some distance south and east the continued absence of precipitation is beginning to cause some concern, although in very few localities has the drouth as yet seriously reduced the prospects of a crop. In some limited areas high winds have caused damage from soil drifting, but this is by no means general. Breaking on new land has been retarded to some extent in this section of the province by the absence of moisture in the soil, while in the south a larger acreage than usual is being broken in readiness for next season's crop.

Early sown wheat in most localities is now covering the ground, and an exceptially good stand of fall wheat is reported from many districts in the south. Alfalfa and sweet clover are making a vigorous growth, and prospects of an increased tonnage of sugar beets are excellent. Livestock generally is in good condition and in a number of districts increased numbers of farmers are making a start with a small flock of sheep.

CELEBRATE DAY OF GREAT CHARTER

Saturday, June 15, will be celebrated throughout the British empire as the 714th anniversary of the signing of Magna Carta, the "great charter" which formed the foundation of British civil liberties and was the basis of the whole political structure of the English speaking world.

In the United States too, the importance of this occasion is recognized, and in many cities of that republic the anniversary will be observed.

Mayor Bury of Edmonton has called attention to the historical significance of the event, though insofar as is known no definite arrangements have been made for celebrating the occasion.

AT THIS YEAR'S EDMONTON EXHIBITION, JULY 15 to 20

Since the attractions for the Edmonton exhibition were arranged for, some very interesting features have been secured as "extras" in line with the policy of the management to make the 50th Anniversary of Western Canada's first exhibition the most attractive ever staged. For the exhibition which opens in Edmonton on Monday July 15th, Capt. Walters' observation balloon has been secured: this will recall army days to many. In addition to carrying passengers, it will each night give a display in fireworks depicting Niagara Falls, from 1000 feet in the air.

Two loan exhibits of paintings are being brought to the Edmonton Exhibition at considerable expense, and will be displayed on the top floor of the Manufacturers' Building: contrary to custom, no extra charge will be made to view these paintings, which include a number of historical works: all told there will be about 150 paintings by celebrated artists; one exhibit is from the Royal Canadian Academy of Art in Montreal, and one from the Ralph Clark Stone collection in Toronto.

WEEKLY NEWS BULLETIN

Issued by Publicity Commissioner, Department of Agriculture Edmonton, Alberta, June 8th, 1929

Increased Automobile Registration

The number of Automobile licenses issued in Alberta during the first five months of 1929 exceeds by over 3000 the total number for the year 1928, it is announced by E. Trowbridge, Deputy Provincial Secretary. Already this year over 90,000 cars and trucks have been registered as compared with 87,221 last year. A considerable increase in the consumption of gasoline is also indicated in Mr. Trowbridge's report which shows that the revenue from gasoline tax for the first five months has exceeded that of the same period in 1928 by some $170,000.

New Wool Growers Association Organized

The Eastern Alberta Wool Growers Association has been formed with headquarters at Hanna and a membership comprising about 100 sheep owners in the district between Drumheller and Oyen. It is estimated that some 10,000 fleeces will be shipped through the association this year, the majority of the clip being marketed through the Canadian Co-operative Wool Growers. Dr. W. G. Anderson of Wardlow is the president of the newly formed organization.

Regulations for Visiting Motorists

After July 1, 1929, any automobile being driven in Alberta with foreign license plates must carry on its windshield a sticker showing that the car bears a non-resident permit to be operated in this province. These permits which may be secured from provincial police officers, parks officials and others who come in contact with the travelling public, will provide a definite record of the number of cars visiting the province each year and the points of origin. The permit when issued is good for three months from date of issue and must be applied for within seven days of entrance into the province.

Serious Forest Fires in North

Reports from the McMurray district in northern Alberta indicate that forest fires have swept a considerable area and that the rangers of the Dominion Forestry Service are with difficulty keeping the fires in check. Little rain has fallen in the area between McMurray and Peace River and a number of small fires have rapidly assumed serious proportions.

Rural Planning Advisors Named

Appointments to the Advisory Council of the Alberta Town and Rural Planning Board have been made by Order-in-Council as follows: C. L. Gibbs M. L. A., Edmonton; H. M. E. Evans, Edmonton; P. Turner Bone, Calgary, H. E. G. H. Scholefield, Calgary, Mrs. R. B. Gunn, Lloydminster, Mrs. Wellington Huyck, Strome and W. H. Fairfield, Lethbridge.

To Study Conservation of Natural Gas

Dr. R. C. Wallace, president of the University of Alberta and A. A. Carpenter, chairman of the Board of Utility Commissioners, are the Alberta members of a committee who will co-operate with Dr. Chas. Camsell Deputy Minister of Mines, Dr. A. W. C. Wilson and C. Ross appointed by the Dominion Government to investigate the possible conservation of natural gas at present going to waste from oil and gas wells in this province. The committee will look into such matters as the conservation of gas by storage underground and the utilization of gas as a fuel or as a source of other materials such as oil, carbon black and various chemical products.

Government Collecting Agricultural Statistics

The co-operation of farmers and others throughout the province is urged during the present month in the agricultural survey being conducted by the Dominion Bureau of Statistics. On cards which are circulated through rural schools, farmers are asked to report the number of acres of the various crops being grown this season and the number of livestock of various classes kept on their farms. It may be pointed out that the information when supplied to the government is of a confidential nature as far as the individual farmer is concerned, and that those supplying the information asked for are greatly assisting the government in compiling its agricultural statistics from which crop estimates and other reports are later issued.

Farm Young People's Week Successful

Some 160 girls and boys have been in attendance at the recent farm young people's week at the University of Alberta. Interesting lectures and demonstrations dealing with the various phases of farming and homemaking were provided by members of the University staff and a number of enjoyable features of an entertaining nature rounded out what has come to be considered an important annual event in the life of the rural young people of the province.

Cream Prices Paid by Creameries

Effective Monday and Tuesday, there was a general decline of two cents per pound of butterfat, and the following prices were reported paid by the creameries during the rest of the week ending June 1, and at the points shown, according to figures compiled by the Dairy Branch of the Department of Agriculture.

Bonnyville, Special Grade, 35c. Number One, 33c. Macleod, Special Grade, 31c. Number One, 29c. All other points, Special Grade, 33c. Number One, 31c. Number Two, 28c. Off Grade, 23c.

Sheep Poisoned by Death Camas

Following reports received from the Jenner and Atlee districts in south eastern Alberta, Dr. P. R. Talbot, Provincial Veterinarian, recently visited these localities and found that the death of a number of sheep had been caused by their eating a weed known as Death Camas. This weed which grows commonly in a number of districts in the south has been more prevalent than usual this season owing to the climatic conditions. Its effects appear to be more serious when the sheep are hot and hungry. The Death Camas belongs to the lily family, grows on sandy soil and is usually found on the slopes of hills facing south, and sheep eating it show the following symptoms: frothing at the mouth, twitching of the muscles and convulsions followed by death. Shepherds are advised to keep their flocks away from areas where this plant has been discovered.

A very satisfactory antidote in cases of poisoning from this weed consists of one dram each of Potassium Permanganate and Aluminum Sulphate dissolved in a pint of water, this quanity being sufficient for about 12 sheep.

You will like the Easy-Riding Comfort of the Ford Car

THE FORD car is one of the easiest-riding cars on the road because of its low centre of gravity, minimum unsprung weight, Houdaille hydraulic shock absorbers and the unique construction of its transverse springs.

Furthermore, you are as comfortable in mind as in body when you drive the Ford car. You have confidence in the performance of the car because you know something of the quality that has been built into it.

Remember these two points when you select your next car. These are combined to an uncommon degree in the Ford.

Come in and drive a Ford car yourself through thickest traffic, up steepest hills over roughest roads. A thirty minute demonstration will convince you that there is nothing quite like it anywhere in simplicity of design, quality, price and performance.

Here and There

[illegible] The biggest shipment of live muskrats ever to be shipped from Canada, a thousand in number were carried by Canadian Pacific Express Company from Oak Lake, Manitoba to Hamburg Germany recently. They were trapped in the breeding grounds on the Manitoba rat farm and shipped in boxes each box holding twelve pairs. They were shipped on C. P. Freighter Beaverford from Montreal and the muskrats were in good condition with a minimum of casualties when they reached destination.

The Royal York Hotel Toronto, largest hostelry and highest building in the British Empire will be opened by His Excellency the Governor-General June 11. The following day will be reception day for guests and the hotel is booked to capacity. The whole water front of Toronto is rapidly resembling that of New York with the building of immense structures of which this is the outstanding.

On the authority of an official report recently issued it appears that the bicycle is gaining in popularity in Canada. In 1928 production of bicycles in Canada reached a new record with the selling value of products 52 per cent higher than in 1927. Last year 27,000 wheels were sold valued at $800,000.

Within the next few weeks the largest [illegible] so far made by the Ontario Government will be under way in the planting of [illegible] trees in the Thessalon [illegible] near the Soo. This is to be largely experimental and as a guide to schemes under contemplation for the future in different parts of Ontario.

W. F. Wilford will assume the title of [illegible] agent Canadian Pacific Railway, Toronto according to an announcement recently given out by H. W. Roberts, general [illegible] of the railway. Mr. W[illegible] have most of the work in connection with the Royal York Hotel purchases. He joined the company as a clerk in the purchasing department in 1900.

Fourteen cases of orchids were carried from England to Japan recently under the auspices of the Canadian Pacific Express Company to the order of the Emperor of Japan, the Empress and members of the Imperial Court. They are sent out from England about three times a year and are highly prized by the Japanese Royal Family and Court.

A new wheat known as H-40, may be the long awaited rust-resistant wheat. Canadian Government plant breeders have long been experimenting in an effort to develop a variety of wheat that will resist rust and at the same time be of high grade [illegible] quality. [illegible] which [illegible] large rather [illegible] strain of the wheat family which has seemed to be [illegible] has been crossed with Marquis wheat and the progeny again crossed with Marquis resulting in a grain which is [illegible]

JAMES ROOKE PLEADS GUILTY TO STRIKING TWO GIRLS WITH HAMMER

At 2 p.m. today James Rooke was sentenced to six months' incarceration at Fort Saskatchewan jail for medical observation at the end of which time he may be deported.

Arrested Wednesday evening as he was coming out of the bush between Ellerslie and Clover Bar, James Rooke, alleged assailant of the two daughters of John Pohalka, farmer, near Ellerslie, who had formerly employed Rooke, gave himself up to a provincial police posse, without resistance, and appeared before Magistrate Primrose Thursday morning charged with assault causing grievous bodily harm.

When arraigned Rook admitted striking the two girls as charged. He appeared unable to give a coherent account of the affair, saying only that he had believed one of the girls was about to hit him with a stick. He had hit the other by "accident" he declared. The magistrate will pass sentence upon the man at the afternoon session of the court.

The girls, Bessie and Mary Pohalka, were in the court room. Their heads were swathed in bandages.

No reason for the assault can be assigned. There is no evidence of criminal intent, and according to Rooke's story, he was talking to the two girls at the kitchen door of their home on Tuesday afternoon, when he made a playful "pass" at one of them —a 11 year old girl—with a nail file which he was using at the time.

The girl, he claims, was carrying firewood into the kitchen at the time, and made a gesture as though to strike him with one of the pieces of wood. He picked up the hammer—an ordinary domestic hammer—from the kitchen, and struck the girl with it.

An older sister, age 20, hearing the scuffle, ran out, and she also was struck. Neither girl was seriously hurt.

Following the assault, Rooke rushed into the brush and disappeared. A.P.P. Detectives Coggins and Rathbone were at once dispatched in search of the fugitive, and they were later joined by Detective Trickey.

The hunt was maintained throughout Tuesday evening and all day Wednesday and traces of the wanted man led the officers to believe that he was still hiding in the bush, and that he must soon be driven forth by hunger.

While he was in hiding a cordon of police and farmers including C. Hoffman, A. McEachern, B. McEachern, H. Scott, J. Cooper, J. Seyrelock, M. Pohalka, P. Grove, A. Bouillot and W. Sutherland was thrown about the vicinity of his hiding place.

The surmise proved correct, for the fugitive broke cover at dusk on Wednesday, and was heading down the road in the direction of the mines at Clover Bar, when the police posse sighted him.

Rooke, who was in an exhausted state from lack of food and sleep, offered no resistance, and was placed under arrest and brought back to Edmonton. He has worked around Ellerslie district for some time, and varies his farm work with occasional spells at coal mining. He told the officers that he was on his way back to the mine, when arrested.

3rd Avenue (Near the Scales) - TOFIELD, Alta.

General Automotive Work

Day after day use of an automobile, truck or tractor must necessarily wear some of the moving parts. It is real economy to have your car checked over by an expert mechanic once or twice a season so as to detect minor troubles which if allowed to go would become major troubles with added expense. At the first sign of trouble, bring your car to the McLaughlin Garage and we will be pleased to report on it for you. Our work is reliable and our charges are reasonable.

A GOOD DANE AND ARTHUR COMEDY

"All At Sea"

This picture will raise a laugh out of the most serious minded people. If you feel blue, take Dane and Arthur's treatment, one is enough and it just cost [illegible]

LOCAL AND PERSONAL

Born.—To Mr. and Mrs. Ole Hansen, on June 19th, a daughter.

Born.—At Camrose, to Mr. and Mrs. Tebo on June 18th, a daughter.

Mr. and Mrs. Lovell attended Rebecca Lodge at Ryley Monday night. Mrs. Lovell has been made Vice-Grand of that lodge.

Dr. and Mrs. Law motored to Bawlf on Sunday.

Mr. and Mrs. Plumb motored to Camrose on Tuesday to visit Mrs. Tebo and baby.

Mr. McCarthy who is working at Bruderheim was home over the week end.

The United Church Concert which was recently presented at Tofield, was presented at Ryley on Friday night last with success.

Miss Lorett Ross spent Wednesday in the city attending the wedding of friends there.

Mrs. Calvert returned from an Edmonton hospital on Saturday.

Rev. Wilson passed through Tofield on Thursday morning, June 20th. He sails from Montreal on July 19th on the "Duchess of York."

W.I. NOTES

All those having room in cars to take passengers to Ryley on June 26, are asked to let Mrs. Latourneau know, and anyone wishing to ride should 'phone her at 'phone 64.

LARGE NUMBER ATTEND MARJORY CRAIG'S FUNERAL

On Friday last at two o'clock the funeral service and interment rites were held over the mortal remains of the late Marjory Craig. The service was held at the United Church, and so large was the number present that the church was soon filled to overflowing. There were many who were unable to get inside the building. The Rev. Gordon rendered an impressive address and the following favorite hymns of the departed were sung: "Wonderful Love", "Shall we Gather at the River", "The Great Physician Now is Near."

The pall bearers were Marjorie's girl friends and members of the Tofield senior C.G.I.T. group. They were attired in the C.G.I.T. uniform and along with other members of the group sang "Taps" at the graveside.

The floral tributes were very numerous and beautiful.

The following were the pall bearers: Hazel Sears, Enid Cory, Margaret McCauley, Edna Campbell, Ruth McLaughlin, and Annie Swift.

THANKS

Mr. and Mrs. C. J. Craig and family desire to thank the following many friends who so kindly sent beautiful floral tributes.

Tofield public school, Junior C.G.I.T.; Senior C.G.I.T.; United Church Ladies' Aid; Palestine Lodge A.F. & A.M.; United Church Sunday School; Tofield Ladies' and Men's Curling Club; Tofield Women's Institute; Women's Missionary Society; Palestine Mason's Lodge; Ionic Chapter O.E.S.; twenty of Marjorie's boy chums; Rev and Mrs. J. A. Leitch; Rev and Mrs. J. A. Caldwell; Mr and Mrs. Thos. Caldwell; Mr. and Mrs. Will McKinley; Mr. and Mrs. Henry Forbes and family; Mr. and Mrs. R. B. Paul; Mr. and Mrs. Robert Moore, Father, Mother, and family; Miss Florence Kendall; Gertrude and Rebecca Bearisto; Miss Marie McLean; Mr. and Mrs. J. W. Chapman; Mrs. H. Emery; Nora and Glenn Wood; Mr. and Mrs. Chas. Thompson and family; Mr. and Mrs. T. E. Seale; Mr. and Mrs. A. J. H. McCauley; Cousins Verna and Bill; Edward and Joe Kallal; Mr. and Mrs. Bulloch; Mr. and Mrs. Galoway and family; Mr. and Mrs. Thomas Cory and Enid; Ethel and Harvey McClyment; Mr. and Mrs. E. M. Hardy and family; Mr. and Mrs. R. B. Wilson and family, Mr. and Mrs. Geo. McLaughlin and Ruth; Mr. and Mrs. F. H. Griswold; Mr and Mrs. Will Webb; Mr. and Mrs. Jas. Barr. And also to those who sent beautiful letters of condolence. Also all who so kindly supplied cars, and all those who so kindly assisted us in any other way.

U.F.W.A. NOTES

The regular meeting was held at the home of Mrs. J. B. Warner on June 13th.

There were 23 members and several visitors present. One of the latter joined the local.

The secretary read a letter from the Department of Public Health stating that Miss Lonsdale would hold a baby clinic in Tofield on August 17th, from 10 to 4. All children under school age welcome.

The following were appointed delegates to the Federal Constituency Convention to be held in Vegreville on July 13th, Mrs. Johnston Ferguson, Mrs. Warner, Mrs. Morton, Mrs. Bigland and Mrs. Murray. Substitutes, Mrs. Booth and Mrs. Phillips.

It was decided that the next meeting be held at the home of Mrs. Morton on June 27th and that Mr. Pincott be asked to address the meeting.

After some discussion it was decided that some sewing or knitting might be done at the meetings for some needy persons or charitable institutions. Mrs. Morton was appointed to make arrangements for a quilt to be made.

The lunch comittee for the next meeting is Mrs. Barnes, Thompson, Bigland, C. Ingram and W. Lee.

RYLEY DEFEATS TOFIELD BASEBALL NINE

On Friday evening last the Tofield Intermediate baseball team journeyed to Ryley to play an exhibition game and were defeated by the score of 19—11.

As the score would indicate, it was a fine batting contest with Ryley fielding brilliantly and Tofield very loosely.

Errors spoiled the downfall of the Tofield boys. They did not seem to be able to do anything right, while Ryley did nothing wrong.

The feature of the game was the home run hit by Doyle Kures of Ryley. This was an honest to goodness clout. The Ryley boys are coming to play in Tofield just as soon as the exams are over and the locals hope to make a better showing.

The Tofield line-up was a follows: E. Hill, pitcher; W. Worton, catcher; 1st base, J. Kallal; 2nd base H. Bowlrk; short stop, K. Stall; 3rd base, S. Worton; right field R. Martin; centre field F. McLean; left field, N. Phillips.

KETCHAMOOT

Work goes on just the same on the farm in spite of no rain, hopes are still held out for a crop, but very few gardens are up. Breaking is being done, Mr. Wideman is breaking for Mr. Whillans; Mr. D. Turner for Chester Coombes and Lorne Lee for Mr. Sears.

Mrs. Last of Edmonton is visiting her friend Miss F. Fawcett at the Shultz home.

Our sincere sympathy is extended to the Craig family in their sad bereavement. Many from our district attended the funeral on Friday.

Mrs. Mary Murdoch and little son of Killam are visiting a few weeks at the home of Mrs. Murdoch's mother, Mrs. A. Johnson.

Mr. and Mrs. A. J. Williams and son James, motored to the city on Thursday, returning home in the evening.

Master Jimmie Ingram and Charlie Sears rode their bicycles to Lakeshore district on Saturday spending over night at the home of their sister and cousin, Mrs. T. D. Ferguson.

The Wm. Lee family are busy building a very nice house on the farm.

Mr. L. J. Limburgher, a Swedish lad who has been working over the spring months at the W. K. Mitchell home, returned to his home in Sweden on Thursday.

Mr. Wilson of Killam was through our district last week, taking orders for trees and shrubbery.

Mr. L. Carlisle took stock to Edmonton in his motor truck on Tuesday.

The home of Mr. Peter Lee was a busy place on Wednesday afternoon, when the ladies of the M.A.S. met for their monthly meeting. Arriving before dinner, which was served cafeteria style by the members, some twenty members and visitors were present. Quilting their autograph quilt was the order of the day which was finished, making a beautiful quilt. A short business session was held when plans for the annual picnic was made which will be held on Wednesday, July 3rd. Tea was served by the hostess, assisted by Mrs. Roger Ray, which brought a pleasant and profitable afternoon to a close.

IMPOUNDED

Bay horse, black points, white spot in forehead, on S.E. 36-51-19.

S. BETHEL, Poundkeeper.

AMISK CREEK

A picnic will be held by the church on July 3rd, in the afternoon. There will be baseball and softball, horseshoe tournament and some horse races. Ice cream and lemonade will be served. The ladies' aid will serve supper.

A meeting of the ladies' aid was held at the home of Mrs. E. A. Moen on Wednesday of last week. There was very good attendance, several of the Ladies from Ryley were out. Mrs. I. C. Olson was elected delegate for the W.M.F. convention held in Camrose last week.

Mr. Ollund arrived from the U.S. last week. He visited at the I. Anrubo home for a few days and left for Grande Prairie on Sunday evening.

Mr and Mrs. R. O. Berg and Alice, Mrs. P. O. Flaaten and Gunvald, Lillian Patterson and Olive Olson, Olsen and Marinus Anderson motored to Camrose on Friday evening and attended the Graduation exercises of the Lutheran College. Miss Ruby Berg was one of the gradutes.

Jacob and Hugo Stromme, Arvid Betten and Gunvald Flaaten left last Tuesday morning on a trip to Cold Lake, where they intend to look for homesteads.

The church looks nice with a new coat of paint. Mr. Conegard did the work.

Robert Berg and Alfred Patterson started on a motor trip to the Radium Springs in B. C. last Monday morning. They intend to be away for three or four weeks.

Mrs. E. A. Moen is suffering from an attack of rheumatic fever. We are glad to say she is on the road to recovery.

Miss Olive Olson who is attending school in Edmonton, visited her parents for a few days last week, returned to the city on Sunday evening.

Mr. and Mrs. P. J. Aas and G. Thompson from Tofield visited at the R. O. Berg home last Sunday.

Mrs. P. O. Flaaten and Gunvald motored to the city on Wednesday of last week.

M. and A. Eggenheim and Carl Erickson were city visitors last week. M. Eggenheim left for Grande Prairie where he intends to look for a homestead.

Miss Lena Anderson of Ryley is assisting with the house work at the E. A. Moen home until Mrs. Moen gets stronger.

Mrs. P. O. Flaaten visited at the J. Nelson home last Sunday.

LINDBROOK

Keep on commenting on dry weather, Mr. Editor! we've had a few drops of rain since your comments, but can do with lots more if there is to be any hay or crops this year. The ground is about as dry as it can be so carry on!

The sympathies of Lindbrook are extended to Mr. and Mrs. Craig and family in their sad bereavement.

The crops being in, perhaps but a little green feed, road work is in swing. The approaches to the new bridge north of Lindbrook are filled and to Mr. R. Burton comes the honor of being the first team, barring of course the fresno horses on the job. Some work is being done on the new road south of Mr. Corbin's also on the one by Mr. Emile Gonbault's.

Sheep shearing has been under way here lately, Mr. Norman Ellis seemingly is the official shearer.

Church service was to be held here last Sunday, also Sunday School. Well, Sunday School was attended by the children but no adults at all turned out for the service after. Now this is too rough on the clergyman to come out here, bring the books etc., and then no one turn out; its not at all right. Surely if children can go, grown ups can, so see that from now on that it doesn't happen again. It is the same thing as making an appointment and most of us don't usually break those.

Another week of school and then the holidays and queer thing too, some of the children don't seem overjoyed at the thoughts either, why.

Lady Rodney of Fort Saskatchewan and a friend accompanied by the Rev. R. J. Symes of Tofield visited Mr. and Mrs. Smith and family who are located on the Carlson farm. Lady Rodney is interesting herself in the welfare of these British Legion emigrants. Also the boys' immigration scheme.

KINGMAN

Mr. and Mrs. H. R. Kelly of Calgary visited Mr. and Mrs. A. Asp for a few days.

Kingman boasts of a new sidewalk running along first avenue north. Mr. [illegible] Melvik has done the work.

Mr. and Mrs. A. Asp and family motored to New Norway on Thursday evening.

A number of Kingmanites attended the circus in Camrose on Friday.

Mr. M. D. Stutzman has commenced work on his new house, a semi-bungalow and when completed will be modern in every detail. The lumber is being supplied by the Manning Sutherland Lumber Co. Ltd.

A very nice shower of rain fell in Kingman and district at 10 A. M. Sunday which lasted about two hours. It was very beneficial for the suffering crops.

A number of the Kingmanites spent the weekend fishing at Dried Meat Lake.

Mr. and Mrs. E. Erickson visited with Mr. and Mrs. E. Carlstrom of Hay Lakes on Sunday.

Mr. and Mrs. P. Rodnunsky and family, Mr. and Mrs. A. Johnson and daughter Inga and Miss Mary Welsh attended the wedding in Edmonton of Miss Ray Hardin of Kingman and H. Sorokes of Lamont.

A dance in the Kingman hall on Friday June 21st, music by the Martin's Orchestra of Edmonton.

Mr. and Mrs. Lewis Erga visited at the home of Mr. and Mrs. J. Benson on Sunday.

H. Sparby spent the week end at his home in Bawlf.

BARDO

Mr. and Mrs. Palmer Anderson and children arrived at Bardo for a visit on Thursday. They came by car travelling from Minneapolis in six days.

Little Olaf Johanson had a finger crushed so badly that it was necessary to take him to Camrose to have part of it taken off. He is getting on nicely.

Several people attended the meetings held at Camrose last Friday, Saturday and Sunday. Of special interest to Bardo people was Sunday afternoon, when Palmer Anderson was ordained as a minister.

Mr. Foshaug and Mable motored to Lamont on Saturday to meet Miss Borghild Foshaug who returned home with them after a five months stay at Vermilion.

The Dodds baseball team journeyed to Bardo last Friday evening to match their skill at baseball with the Bardo boys. They proved themselves to be the better of the two teams defeating the local boys by a large score.

Mr. and Mrs. A. Steen and Mrs. Nita Kindley motored to Edmonton on Saturday, returning the same day.

GANGSTER CHIEFS IN BATTLE

The underworld is its own worst enemy.

Statistics show that more thugs are killed by other gangsters than are ever shot by police or put to death by law.

The crime code of revenge is dramatically shown in Ben Hecht's powerful drama "Underworld" arriving at the Variety Theatre on Saturday June 22nd which was directed by Josef Von Sternberg under Hector Turnbull's supervision for Paramount.

Fred Kohler gangster is shot and killed by George Bancroft, rival gang leader, to avenge the former's attentions to Evelyn Brent. Gang killings and battles with the police are vividly portrayed. From the feuds and fights only Miss Brent, Clive Brook and Larry Semon, among the principal players, emerge with whole skins.

CARD OF THANKS

Mr. and Mrs. Giffen extend their thanks to their friends for the many expressions of sympathy and floral tributes received, and assistance rendered on the occasion of their recent sad bereavement.

HOLY TRINITY CHURCH

Sunday June 23rd, 1929

11:00 a.m. Matins and Holy Baptism.

7:30 Evensong

Rev. Symes.

The Carlson house has been refloored and the upstairs finished also some outside finish put on, Mr. E. W. Hooper being the contractor, work being done for the S.S.B.

Cream Shippers

The busy season will soon be here and most of you when in town will want to combine your business in quick time so as to make every minute count.

"IF THE MOUNTAIN WILL NOT COME TO MAHOMET, MAHOMET MUST GO TO THE MOUNTAIN."

In explanation let us say that we have an arrangement with the Farmers Supply whereby those wishing to do so can leave their cream there. The Creamery truck will call at the store TWICE DAILY and take the cream up.

Phone the Creamery and leave instructions as to your cream hauler.

Job Printing

Every business man requires a certain amount of printed matter. Such things as Letterheads, Envelopes, and Statements are as necessary to modern business correspondence as a telephone is to a modern business office. The Mercury Office is equipped to turn out all kinds of job printing. The next time your supply is running low, call us up and a representative will be at your place of business in a short time to receive your instructions and take your order. Prices fair and just.

The Tofield Mercury

WHEAT POOL NOTES

The Alberta Wheat Pool has fixed July 15th as the closing date for the 1928-29 Pool. There are quite a number of Pool farmers who have still a little wheat on hand and they are advised this must be delivered by July 15th, otherwise it will go in with next year's Pool.

* * * * * * * *

The Supreme Court of Canada has decided in favor of the Alberta Wheat Pool contention in the H. W. Kerr suit. The Supreme Court judgment sustained the judgment of the Supreme Court of Alberta which was that the matter in dispute was one for arbitration and not for legal action.

* * * * * * * *

According to reports from Ottawa the Federal government is bringing into effect legislation which will greatly reduce mixing of wheat in terminal elevators. The Wheat Pools have strongly urged that the government should take steps to limit the mixing evil.

* * * * * * * *

The Canadian Journal of Commerce in a recent issue states "Despite the large crop of last autumn Wheat Pool members have excellent reasons to be thankful that their crop was not subject to the vagaries of the members of the Chicago and Winnipeg Grain Exchange whose primary object is quite naturally, and under former conditions quite properly to buy and sell at a profit to themselves."

* * * * * * * *

The Alberta Wheat Pool has discontinued broadcasting for the summer months, as has been its custom in the past. The Pool will resume radio work this coming fall.

THE VALUE OF CLOVER OR ALFALFA RANGE FOR GROWING CHICKS

(Experimental Farms note.)

A well constructed brooder house equipped with a modern coal-burning brooder stove has largely solved the problem of handling large numbers of baby chicks from the time of hatching until they are old enough to do without artificial heat. At this time chicks usually require more space in which to take exercise. If this additional space can be given in the way of green paddocks it gives the chicks an excellent means of getting green feed, insects, etc., which they pick up from the range.

At the Dominion Experimental Station, Kapuskasing, Ontario it has been found that either clover or alfalfa, particularly the latter, makes a very excellent range on which to grow the chicks. One of the big advantages of the alfalfa over the red clover is the very rapid growth made by the second crop of the alfalfa, which in some instances has averaged over 1 inch per day. This keeps the the birds supplied with young tender shoots as green feed until quite late in the autumn and also furnishes them with a certain amount of shade and protection from hawks.

If at all possible, new clean range should be provided each year in order to avoid the danger of intestinal parasites.

A TRUE JOKE ON A LOCAL SCOTCHMAN

On June 3rd three of our local young men decided to attend the sports at Westlock and share the car expenses. They brought the car up in front of Shaper's Garage and one ordered the gas, the other ordered the oil and the Scotchman says, "Well I guess I'll order the water."

VISITING SUNNY ALBERTA'S CRIPPLED CHILDREN

Rows of little white cots out of doors in the sunshine, wheel chairs in the shade, big boys and small girls on crutches and little toddlers and smaller crawlers, such was the sight that met the view of Red Cross visitors on a June afternoon in Edmonton as they gazed at the crippled children who are patients in the Junior Red Cross unit of the University Hospital.

It was of special interest to observe the nationality of the little folk. A little form sat up in bed with all the dignity and immobility of a bronze Budda and stared calmly at the strangers. It was little Cherry Blossom from Japan whose mother is in the T. B. sanatorium and whose father travels in from his work in the country to visit his little three year old girl. Daily getting better, Miss Japan has made great strides since entering the Red Cross ward.

From the slow smile of her almond eyes we turned to the dark skinned southerner with wooly curls closely cropped leaning over his cot to point his toy gun at some tiny toddlers. Smiling from ear to ear and [illegible] ing glistening pearls of teeth Sambo assured us he is "Fine, Thank you".

On then to a little Scandinavian maiden whose only [illegible] is her gentle manner and her sunny smile, for not a word of English can she speak. Nurses teach her how to say "Thank you and Please" and she is learning the Canadian greeting "Hello."

Round one bed is a group of older girls all of whom are taking lessons daily from the visiting school [illegible]. Grades from one to eight are taught and according to their several ability the children progress. The tedium of life in hospital is thus greatly relieved, while at the same time a thorough education is given.

The last visit was paid to the nursery where a tiny baby girl was making eyes at a little boy of a year old. Both babes had deformed feet, and yet true to tradition were trying to reach the little toes that peeped out from the cast of plaster. The visitors were delighted with what they saw and standing by the "Tiny Tim Cot" resolved to do their part

BABY CHICKS—Canada's Bred-to-Lay, 100 per cent alive. RAIN BADLY NEEDED

AT NO time during our sojourn in Alberta has rain been needed in the Tofield district as at present. If our memory serves us right, in the years 1908 to 1915, if anything, more rain than was necessary fell, and we can well remember with what degree of satisfaction northern peoples used to discuss the relative conditions of northern or rather central Alberta with those of southern Alberta. Stories of dried out areas in the south were common; while here, anything else might happen to us, but we never suffered from drought. From 1916 onward, while we have not suffered from drought, there has been seasons when rain was scanty enough, and at no time was the seasonable precipitation anything like the years previously mentioned. We frequently read that weather conditions occur in cycles, and past records seem to bear this out, but we were of the opinion that the climax of the dry years had been reached some years ago, and as each year passed we were gradually getting into the old time "wet Junes," or "rainy seasons." But here it is dryer than ever and to say the least it is serious.

But all is not lost yet by any means. But even if rain does not come now, the early sown crops are going to be effected by the dry weather of May and June. The later sown wheat and other crops may yet be good, providing rain comes and early frosts stay away. And this is important. Frost last year came in August and while the damage done was not fully recognized at the time, it was later learned that real damage had been done. To make matters worse many of our farmers were hit by hail and suffered loss from this cause. If the frost stays away this year as in 1919, there is every likihood of some good yields yet.

"KING OF KINGS"

The art of the showman is almost as old as humanity itself; the art of the moving picture director is scarcely thirty years old; yet between the two there is a close connection, almost an affinity. Hitherto references to religion from the stage has been frowned upon by many people as being unworthy of human thought. It remained for Cecil de Mille, famous moving picture director to produce "King of Kings" and place with one great movement a subject distinctly reverent and religious, within the showman's realm. With the exception of the early history of Mary Magdalene and her connection with history of Mary Magdalene and her connection with Judas, as portrayed on the scene, everything was as one, who being taught the scriptures early in life, would imagine it to be. The treatment of the subject was reverent and there was no hint of levity throughout the whole eleven reels. It is over two years since the picture was produced in New York, London, Berlin and other famous centres of civilization, but its entry into Canada is of comparitively recent date. Many are the expressions of approval by divines of all denominations. There are many too, who doubt the wisdom or rather propriety of using such a sacred subject as the ministry of Jesus as a moving picture production. It can be argued, and rightly too, that the material profits derived from the thousands of presentations of this picture, do not go towards building up HIS kingdom, (except as each individual connected with it desire) but rather to build up the material fortunes of actors and moving picture men in general. It can also be truly said that one does not go to a theatre to worship, or even in a devotional state of mind, but rather to be entertained, and also unless the spirit of sacrifice is connected with Christian activity, there is little real Christianity; for the foundation of Christianity is the supreme sacrifice. Yet while the above is true, there are literally millions who have been brought closer to the gospel story than ever before, through the showing of "King of Kings." And moreover, if men and women should enter a theatre with no other object than that of being entertained, and seeing this picture, leave with a desire to learn more of the gospel story, much good will have been done.

The vivid presentation of the Divine Jesus and the twelve disciples; the portrayal of Jesus making the lame walk and the blind to see; the raising of Lazarus; Jesus clearing the temple; the Last Supper; the scene in Gethsemane; the trial and crucifixion; and the ascension; all these scenes, for two thousand years, described by poets' pen and painters' brush, is now being shown to the people the world over by means of moving pictures.

By the time these lines are read the opportunity for Tofield and district people to see this picture at Tofield will have passed, but were it to come again, we would say, go with a reverent mind, but go and see it.

THE SASKATCHEWAN ELECTION

THE RECENT Saskatchewan election in which the Conservatives came within an ace of being returned to power, came as a great surprise to most Albertans. Like the liberals in Alberta, before being deposed by the U.F.A. party, the Saskatchewan liberals have held office since the province was formed. Now with a majority opposition of conservatives, independents, etc., the life of the liberal party is likely to be short lived. Premier Gardiner will carry on the government and take chances of defeat in the house, which as there are 26 liberals, 25 conservatives, one independent conservative and nine others, seem to be the proper thing to do. At least, after being in the minority so long, the conservatives are likely to make themselves heard and some interesting sessions will most likely be held. What effect, if any, the rise of the conservative party in Saskatchewan will have on Alberta politics, it is hard to say. In this province the long time service of the liberal party was brought to a close years ago by the U.F.A. A number of former conservatives were among the U.F.A. members elected, and while at the last election they had plenty of candidates and were very ably led, they met with indifferent success. No doubt the success of their brethren of the same faith in Saskatchewan, will urge them on to greater efforts, and it is even possible, considering the political fortunes of war of different parties in the past and the variable nature of electors in general, that they at some time or other be placed in power.

Here and There

(261)

The Prince of Wales has again extended his patronage to the Banff Highland Gathering and Scottish Music Festival to be held this summer at the Banff Springs Hotel in the Rockies. Pipers, dancers, and athletes from all parts of the [illegible] compete in these popular games.

Two baby black bears were great attractions recently at the Detroit Sportsmen's Show. They were from Phil Lamothe at Mattawa, Ontario and were escorted to their destination by a member of the C. P. R. general tourist department, who had sundry scars to show in proof of the existence of the babies first teeth.

Enough flowers are planted by the Canadian Pacific Railway each year to beautify a couple of cities. The floral branch each year sends out to station agents and employees along its line plants, bulbs, shrubs, seedlings, and seeds by the tens of thousands to decorate the company's right-of-way.

Five railway cars were required to move the equipment of the mammoth Casavant Organ recently installed in the new Royal York Hotel in Toronto. The hotel is the tallest building in the British Empire.

MERCURY ADS PAY!

—Biggest Value "dollar-for-dollar"

When you invest in an engine, the biggest value is the one that gives you the most dependable service, lasts the longest and costs the least over a period of years.

That's why a half-million farmers have bought "Z" Engines. These famous power plants are made in the world's largest and finest engine factory. The country's foremost engineers design and develop them. The "Z" has such features of advanced design as the new Fairbanks-Morse Rotary High Tension Magneto, built complete and fully guaranteed by Fairbanks, Morse & Co., and many other improvements.

Sizes from 2 to 20 horsepower. Come in and let us show you why the "Z" is the biggest dollar-for-dollar value!

F. O. BALL
TOFIELD ALBERTA

THE FORD CAR FUEL SYSTEM

Simple—Safe—and Dependable

THE Ford car fuel system is simple because it is direct. Gravity flow does away with forced feed. A short feed line with a minimum of elbows and connections is easy to service and eliminates approximately 100 parts required by the vacuum tank or fuel pump system.

The nine gallon tank is so placed that it is well protected from front or rear end collision. Any overflow runs off on the ground with no serious results, since the only point of possible spark contact is the rear end of the exhaust. Three screens instead of one, as in most fuel systems, prevent foreign matter reaching the tank. A solid steel dash separates the Ford gas tank from the engine.

The gas guage on the dash of the Ford car is controlled by a simple float as shown in diagram, being more direct, simple and accurate than any other type. Another point of driving convenience made possible by the gravity flow system is the ease with which the tank may be filled, while the driver supervises the operation without moving from behind the wheel.

NOTICE

The annual meeting of the Boorse Cooperative Livestock Market Association will be held in the Lake Isle Rink, Tofield on Wednesday the 26th, 1929, at 2 p.m. All members attending the meeting are requested to attend. Business of importance will be transacted at the meeting.

J. W. McMULLEN, Secretary

H. THOMAS, Secretary

LABRIDGE

Mrs. J. H. Johnson entertained the Ladies' Aid Society on Wednesday of last week. There was a splendid attendance and several new members were added to the roll.

Miss Edna Gray was unfortunate in badly scalding her hand on Tuesday. It was necessary to call medical assistance she is staying with her sister, Mrs. Lester Noland.

Mr. and Mrs. Gilbert Branten of Lindbrook were Sunday visitors at the R. C. Phillips home.

Mr. and Mrs. Jack Johnston and daughters attended the circus in Edmonton on Saturday.

Lutheran Church Services were held at the Henry Tasdemon home last Sunday. Rev. C. Kintner of Holden officiated.

Mr. and Mrs. A. N. Booth motored to Coronation and visited Mrs. Booth's brother and family over the week-end.

BIRCH CREEK

Mrs. Dan Williams and daughter of Edmonton are visiting Mr. and Mrs. Weston Osborne for a few days.

Quite a large number of young people from here attended the barn dance held at Mr. Peter Gaston on Friday last. All reported an enjoyable evening.

Miss Ila Irene Odlerup, Mrs. Wynona Osborne and Mrs. Orma Williams visited at the Chas. Simpson home on Sunday evening.

Choir has was postponed on Sunday afternoon owing to the rain.

Miss Mable Sampson visited over the week-end with Miss Grace Wood.

Miss Janet Harris who has been assisting Mrs. Alex Ford with housework for the past few months left last Tuesday for Bonnieville Park Hall where she will board at Rosen.

Mr. Elmer Sagmoen left on Friday last for Saskatchewan where he expects to work until fall.

HIGH POULTRY HONORS FOR MRS. J. W. COOKSON

The following taken from the "Family Herald and Weekly Star" is an excellent compliment to Mrs. J. W. Cookson as a poultry woman, and her stock.

"At Tofield, a town of about fifty people, 41 miles east of Edmonton, on the Montreal-Vancouver line of the C.N.R., is Mrs. J. W. Cookson's poultry farm. The first 300 reg Leghorn hens to be registered by the Canadian National Poultry Record Association in Canadian National Livestock Records, at Ottawa, was hatched and reared at this farm, and qualified at the Lethbridge contest 1923-24. In order to be eligible for registration, a bird must be typical of the breed, free from standard disqualifications, and produced during the contest year 200 eggs or more that average 24 oz. per dozen, after the first 24 hours of laying.

Mrs. J. W. Cookson at present has a pen of white Leghorns in an official egg laying competition in B.C., the only privately owned Alberta registration. At present we are pleased to say that they are leading out of 46 entries. The competition has been running since last October.

PUBLIC

Auction Sale

White Shadows of the South Seas

LOCAL AND PERSONAL

Born.—To Mr. and Mrs. R. D. Sproule's, on June 21st, a daughter.

Mr. and Mrs. Brind of Ellerslie visited at the Ross home over the week 'end.

Mrs. Law of Innisfree, is a visitor at the home of her son. Dr. Law of Tofield.

Mr. and Mrs. Carp and Mrs. Hammond motored to Camrose on Saturday, attending the ball game between a colored aggregation and a Camrose picked team.

Mrs. Napier and daughter, Joan, of Edmonton, are visiting Mr. and Mrs. Hammond.

Mr. and Mrs. Clutterham and Blake attended the ball game in Edmonton between a colored aggregation and an all star Edmonton team. Bill Worton new umpired them.

The Mason Chris Abbott and Mattinger practice and a spectacular final exhibition furnishing a real exciting moments of suspense. There is also a thrilling and unfortunate fire which call out a mob of maniac citizens to quench it. During this action both Dane and Arthur make some spectacular reasons.

First Evening a Chautauqua "THE PATSY"

The opening night of Chautauqua at Tofield on Wednesday July 10th will be the presentation of "The Patsy" a real comedy drama, which has been called the "perfect Chautauqua play."

The story of "The Patsy" has to do with the younger daughter of a household, who is a combination of Flapper and Cinderella. She is slighted by her mother, dominated and bullied by her more gifted, cruel sister. Only her father truly loves and can understand her and since he was away most of the time on a travelling salesman, this wasn't a very extravagant comfort for the girl of "Patsy."

"The Patsy" is three acts of comedy, romance laughter and pathos, telling a most appealing love story, giving the Martin Frum Players one of the finest cating opportunities ever enjoyed in Chautauqua plays.

PICNIC TO BE HELD AT ROSS CREEK JULY 1st.

We understand that the baseball club of Ross Creek are preparing for a big green at Ross Creek on July 1st. There will be the usual number of snappy ball games and in addition there will be races of all kinds for old and young. A lunch booth will be on the grounds and an orchestra, soft drinks, lemonade and all that one man that the east North is going to have an old fashioned good time. Everybody welcome.

Mrs. Chambers of Ladysmith, B.C. who has been visiting her parents, Mr. and Mrs. Bailey of this district, left for her home on Monday afternoon.

Holy Trinity W.A. and Logan W.A members and their families have invited by the Lindbrook ladies to meet at the home of Mrs. Glenn's at 10 a.m. on Wednesday, July 3rd. After a short business meeting they will proceed to Hastings Lake (weather permitting) where a happy time is assured all. The local ladies and families will meet at Holy Trinity church at 10:00 a.m. It is hoped as many as possible will attend and once more enjoy a get-together picnic.

CORRECTION

A printers' error occured in the list of floral tributes for the late Marjory Craig, appearing in last week's issue of the Mercury. Mr and Mrs. Chas. Thompson was listed whereas is should have read, Mr. and Mrs. Chas. Hobson.

FUN AND THRILLS FEATURE ROLLICKING COMEDY

"ALL AT SEA"

Karl Dane and George K. Arthur are together again in "All at Sea" which is coming to the Variety Theatre on Saturday night June 29th.

After this famous pair of funsters made "Brokenly Love," they were separated for awhile, Dane playing with William Haines in "Alias Jimmy Valentine," and Arthur taking a vacation jaunt to Europe.

This new co-starring vehicle which brings them together again, is from the pen of Byron Morgan who started Dane and Arthur in most comedies when he wrote "Brokenly Love." Now who should we ever expect superior to the story of such a production than who was best qualified to write it? Why, of course, Byron Morgan, the man who made "Brokenly Love" and "Wood" a big success here on locus here. No business man Dearth without patronage and that applies to all our stores.

Dane and Arthur are in the industrial first class.

CHURCH PRESENTS PEN TO MINISTER

After the evening service on June 16th the congregation of St. Stephen's church, Edmonton gathered in the church hall to say farewell to Rev. and Mrs. Hammond. Mr. Hammond has been called to Vancouver and Victoria, where she will visit her sister, Mrs. Urquhart.

Messrs. Geo. Agnew and Laurie Scott are touring in the Peace River country.

Mr. and Mrs. Ensley and family and Miss Gertie Blake are spending two week at Cold Lake.

Mr. and Mrs. I. Hooks of Drumheller are guests at the McLaughlin home. Mrs. Hooks is Mrs. McLaughlin's sister.

Miss Rita Burnett who has been spending several months in Vancouver returned home this week.

Miss Margaret Ennis of Leduc visited at the home of Mr. and Mrs. C. H. Rowe over the week end.

Mr. A. C. Sanburn left for Prince George on Tuesday.

Mr. and Mrs. Chas. Hobson attended the football game in Edmonton this week, when a visiting Welch team were given a hard run by an Edmonton all star team.

Mr. and Mrs. Hershey Hall are guests at the F. O. Hall home.

Mr. and Mrs. Hay went to Edmonton on Sunday. Mrs. Hay entered a hospital there undergone an operation. Latest reports that she is doing as well as can be expected.

Messrs. Bert Wallis and Glasgow were Tofield visitors on Sunday.

Rev. McCarthy has gone to Ryley where he will be assistant station agent.

Mr. and Mrs. McIlroy attended the Oddfellows picnic in Edmonton last week.

On Wednesday night a party was held at the curling rink in honor of Miss Abbot and Miss Hector Cowper who are leaving shortly for Europe. Those present had a very nice time and were entertained in wishing the guests of honor bon voyage and a safe return.

A pleasant afternoon was spent on Tuesday of last week at the home of Mrs. Wallace Herndon, when she entertained a few friends in honor of Mrs. T. Herndon, it being her birthday. Mrs. T. Herndon was the recipient of many nice gifts and the hostess served a delightful lunch.

Mrs. Chambers of Ladysmith, B.C. who has been visiting her parents, Mr. and Mrs. Bailey of this district, left for her home on Monday afternoon.

Holy Trinity W.A. and Logan W.A members and their families have invited by the Lindbrook ladies to meet at the home of Mrs. Glenn's at 10 a.m. on Wednesday, July 3rd. After a short business meeting they will proceed to Hastings Lake (weather permitting) where a happy time is assured all. The local ladies and families will meet at Holy Trinity church at 10:00 a.m. It is hoped as many as possible will attend and once more enjoy a get-together picnic.

COMMUNICATION

I have noticed recently in the papers articles boosting the Peace River country and one place in particular. We caught my eye that Tofield was their battery. Now they are not any better daily. And I, a citizen of the people of the district was just getting our little battery. I would like to know why all articles of interest are not considered as worthy as to any place. The Peace River is growing every day and they are putting out at present as good land as anywhere else, at as cheap a price and on as easy terms. Starting up in a new district is a pioneering proposition at best and I for one am willing to help my district along. Let us boost Tofield and the district around it.

Yours truly,

Interested.

AMISK CREEK

Remember the picnic that will be held by the Amisk Creek Church on July 3rd, Wednesday of next week There will be baseball games and other sports. Try and come and have a good time Refreshments will be served. Purse starts at nine o'clock Come and will serve supper Everybody welcome

Mr. and Mrs. E. A. Moore were visitors at the Moline home last Sunday evening.

Mr. A. Patterson and Arthur visited at the P. J. Ans home near Tofield on Sunday evening.

Several young people from here motored to the young people's meeting held at the Lagerquist home north of Ryley last Sunday evening.

The Misses I. and M. Ansems from Calgary were visitors at the Mrs. P. J. and A. Ans home last week.

Mr. A. Anderson is assisting at Mr. J. A. Wood's home. Mrs. Moen is ill and we do not have to be sure of any time

MR AND MRS. F. W. HILLS HAVE SETTLED

The following taken from the Gregson paper will be read with interest by many friends of Mr and Mrs. F. W. Hills, who left the Leeds settlement last year to take up residence in United States.

A transaction of interest last week was the sale of Mrs. Leslie Runyon's home at the corner of Kenney street and Cedar avenue, to Frank-lin E. Hills from Tofield, Alberta, Canada. Mr. and Mrs. Hills, who moved into their new home Saturday, have been all over the western part of Oregon and have picked Gregson as the best place to live.

Several members and friends called on Mr and Mrs. F. W. Hills, Tuesday evening, taking with them gifts for a kitchen shower, and best wishes from those in their new home. Mr. and Mrs. Hills recently came here from Canada and most of their friends know them there.

CHAUTAUQUA MEETING— OFFICERS APPOINTED

The organization meeting of the Tofield chautauqua was held at the Curling Rink on Friday night last. There was a goodly number present and the young lady advance agent of the organization outlined the forth coming programme

Mr J. Chapman was elected president and Mr Craig secretary, this being the combination that worked well last year.

Different committees were appointed. The recent rain has brightened the outlook considerably and what appeared to be a horrendous task will be easily accomplished with a little extra work and hard work.

"PEG O' MY HEART"

Opinion is altogether unanimous in pre-declaring this the best Irish Comedy ever staged. This will be presented on the Fifth Night of Chautauqua.

Cream Shippers

The busy season will soon be here and most of you when in town will want to conduct your business in quick time so as to make every minute count.

"IF THE MOUNTAIN WILL NOT COME TO MAHOMET, MAHOMET MUST GO TO THE MOUNTAIN."

In explanation let us say that we have an arrangement with the "Farmers' Supply" whereby those wishing to do so can leave their cream there. The Creamery truck will call at the store TWICE DAILY and pick the cream up.

Phone the Creamery and leave instructions as to your cream cheques.

ALWAYS at your service.

85 DEGREES IN THE SHADE & BABY

It is 85 in the shade as this is being written with every prospect of being warmer. Half an hour ago a young mother was giving her baby an airing in its buggy. Mister baby was far from happy and didn't mind letting every one know it. Mother was dressed in a cool white sleeveless dress and wearing a shady hat. Baby was wearing a hot woollen close fitting hood tied under his protesting little chin. He was tucked tightly in to the buggy with several layers of blankets and on top of that a nice warm wooly shawl, and although they could not be seen, it is almost certain he was wearing woollen stockings. Compare mother's warm day outfit to baby's, is it any wonder his protests were loud and long!

Baby feels the heat just as much as mother does and suffers more because he cannot make himself comfortable. He has to wait until some one else thinks to do it.

In the summer heat baby's clothes should be the minimum. If a mother has any doubt let her slip her hand inside the baby's clothes and if the little body feels moist then he is too warm. Clothe lightly and cover lightly so that the air may circulate freely over his skin. This keeps him cool. Give him cool boiled water between feeds. He gets thirsty too during hot days.

Do these things and a happy, contented baby will be the result.

For "Sumer Care of Babies" send to the Canadian Red Cross Society, 107 Civic Block, Edmonton, Alta.

Week Ending June 29th, 1929

JUNIOR CONFERENCE OF THE U.F.A. HELD AT EDMONTON FROM JUNE 5th to 11th

At the recent conference for J.U.F.A. delegates held at Athabasca Hall in the University Buildings at Edmonton, 165 delegates were present from North, South, East, West. As far north as Van Rene, Peace River, and as far south as the border.

The sessions opened on June 5th, with an address of welcome given by Mr. Corbett. Mr. Schofield then gave a very interesting address on Junior Branch Work. Miss Jessie Montgomery, of the Department of Extension spoke on "Extension Work."

A course of history and literature was given by Miss Dickie of the Edmonton Normal School; 14 boys and girls took this course. A public speaking contest was held on the Wednesday evening and was won by Miss Archibald of Ponoka. A course of lectures on Animal Husbandry was given by one of the University staff. Prizes for the grain judging contest was awarded to the following: Gordon Jenkins of Bon Accord, 1st; Perry Howe, Rivercourse, 2nd; Paul Alberg, Wetaskiwin, 3rd.

The election of officers and other business was held on Saturday afternoon and evening when Mr. C. Mills of Fleet was re-elected President. He spoke in the interests of J.U.F.A. at Barrhead some few weeks ago and made a big impression on his hearers. Miss Mollie Copeland was re-elected Vice-President. Miss Edna Johnson, Miss P. Fryer, and Mr. R. Critchlow with the president and vice-president comprise the executive for the Junior locals. The directors for the various constituencies are as follows: Arcadia, Edna Johnson; Athabasca, P. Fryer; Peace River, R. Critchlow; Battle River, W. Miller; Bow River, Miss W. Monner; Camrose, J. Toole; Calgary, J. Patterson; McLeod, Miss M. White; Vegreville, Miss V. Gordon; Wetaskwin, Miss E. M. Jones.

Reports of old directors were read and showed good progress, 30 new locals having been organized last year. Mrs. Warr president of the U. F. W. A. gave a prize for the largest increase of members to Miss Greta Isaacs of Acadia; 2nd prize went to Mr. Miller of Battle River. Peace River should have come 2nd, six locals being organized, but owing to failure to register were discounted. On the last day in the afternoon the delegates met in the field of sport. The northern delegates winning over the southern. Miss Annie McCulloch won the cup for athletes in general proficiency. The baseball game was won by the north with a score of 6 to 2. In the 100 yards dash the north won the first and second place. The running broad jump, also hop, step, and jump was also won by the northerners. Ross Bacon coming in at the last won the high jump in two jumps. The tug of war resulted in the prize going to the north. The Conference closed with a banquet which was given by the University Staff and attended by all. The special speakers were Premier Brownlee, Mrs. Warr, Mrs. Wyman, and Professor Wallace. This was followed by a big dance. The efficiency banner was won by the Waskatenau local.

DRIVERS WARNED OF DANGERS DUE TO HITCH HIKERS

All over the country war is being declared on "hitch hikers" or "ride beggars." The feeling among motor clubs is that this is something that must be stamped out and the sooner the better.

The season is now about to open for these "thumb oturists" so motorists are warned to be on their guard, no matter how sympathetic they may feel toward the road applicant. It is from all standpoints a pernicious practice, fraught with great dangers to the car owner who has nothing as to the identity of the stranger.

Officials of the Alberta Motor Association have on numerous occasions sounded a warning to this "picking up" practice which, no doubt, is just as common in this province as in other parts of the country. Too often, owners of cars have found themselves looking as calmly as possible into the barrel of a revolver, or finding it necessary to lose no time in turning the car over to the mercies of the stranger.

Genuine cases, in which lifts would no doubt be justified, doubtless have been discovered from time to time. But the facts that grave dangers are risked in a large number of cases make it imperative that car owners be urged to utilize the space in their machines for themselves, their families or their friends.

KINGMAN

Oscar Thompson and W. Christensen made a fishing trip to Cold Lake last week.

Mr. Thor Harte of Daysland is back in Kingman remodeling his house and will move here in a couple of weeks with his family, as he will take charge of the Pool elevator.

Mrs. Hillman of Edmonton is visiting with Mr. and Mrs. Jack Erickson for a couple of weeks.

Quite a number of Kingmanites were visitors to South Cooking Lake on Sunday.

Mr. and Mrs. Andrew Johnson and daughter Inga spent the week end visiting with Mr. and Mrs. Thor Harte of Daysland.

Mr. and Mrs. W. McIntosh were the guests of Mr. and Mrs. George Welch on Sunday.

Mrs. P. Radmusky attended the wedding of her brother, Dr. Sam Hardin of Vegreville at Saskatoon on Sunday.

Miss Lily Erickson returned from Edmonton on Monday where she has been taking music for the past two years.

On Tuesday night and Wednesday a welcome rain fell which will help a great deal as the crops were badly in need of rain.

A dance will be held in the Kingman hall on Friday, July 5. Music by the Holroyds orchestra of Camrose.

LAKESHORE

The strawberry social held at the R. C. Phillips home on Friday eveni'g under the auspices of the ladies aid society was very sucessful financially some thirty-one dollars being realized.

Mr. and Mrs. T. E. Seale took Sunday dinner with Mr. and Mrs. A. N. Booth.

A number of young people from this district attended the dance at the Summer School House on Saturday evening and report the usual good time.

Mrs. Walker and Mrs. Abernethy were callers at the Johnston home on Sunday afternoon.

Melvin Bethel attended the dance at Deville on Friday night.

The Lester and Evertt Noland families motored to Deville on Sunday and visited friends and relatives there.

The Eaton families picniked at Elk Island Park on Sunday.

BARDO

The Bardo basketball girls met the Kingman team in their first game of the summer last Monday evening. They were defeated by a large score.

The baseball team defeated the Dodds team in an exciting game last Friday evening, the score being 6 to [illegible].

A ladies aid meeting was held in the church basement last Thursday afternoon, a large crowd was present. The next meeting will be at the home of Mr. and Mrs. Haugseth on Thursday, July fourth.

The home of Mr. and Mrs. Haukedal was the scene of a very pleasant party Saturday afternoon, when a miscellaneous shower was held on Miss Mildred Lawson, a popular bride-to-be. A very large crowd of Ketchamoot and Bardo ladies were present, and Mildred received many nice gifts. A delicious lunch was served by Mrs. A. Haukedal, Mrs. Sigrid Johnson and Miss Borghild Foshaug.

Mr. and Mrs. Palmer Anderson left for a short visit to Grande Prairie on Thursday. Raymond Nordlms and Botolf Bjornsoro left for that country last Friday they are travelling by car.

Mr. and Mrs. G. Hendrickson, Mr. and Mrs. Jevening and Mrs. Steen were visitors to Edmonton on Friday.

Examinations are the chief topic of conversation these days. Those writing Departmental Examinations at Bardo are: Grade Nine; Mabel Foshaug, Juliet Jevening, Margaret and Thelma Moen. Grade Eight; Lavanda Yoder, Martha Roth, Ralph Whillans and Leif Foshaug. At the Grand Forks school Elva Yoder and Lavoy Roth are writing Grade Eight.

A number of the Bardo people attended the surprise on Mr. and Mrs. Bartness at Kingman on Sunday.

The Y. P. S. meeting on Sunday night was well attended. New officers for the coming term were elected. Ben Anderson as president, Mabel Jevning as Vice President, Alice Finseth, secreta'y-treasurer and Sigrid Johnson, Anna Jevening and Edward Steen program committee.

KETCHAMOOT

June 25th

Owing to crop conditions, it has been decided we will not hold our annual picnic as previously announced. It will be necessary to economize as much as possible. But should we get rain we may hold one later on in the summer.

School will close this week much to the joy of the pupils and no doubt teacher too. Four pupils are writing on grade eight, Gertrude Ingram, Harold Coombes, and Harold and Alvin Shultz.

Mr. W. K. Mitchell is building the other half of their barn this summer. Messrs. Sullivan and W. A. Mitchell are doing the carpenter work.

Miss Rosie Spohan of Strome is assisting at the Frank Hull home.

Mrs. Sheppard returned to Edmonton on Friday. She was accompanied by her little grand-daughter, Joice Whillans.

Mr. and Mrs. L. Carlisle motored to Edmonton on Tuesday in their truck, returning home in the afternoon.

Miss Edith Riley returned to her home after spending a month at the Hull home.

Practically all the ladies and girls of our community attended the miscellaneous shower given at the Haukedal home in Bardo on Saturday in honor of Miss Mildred Lawson, bride elect of June. Many were the gifts received which testified to the love and high esteem of her many friends who all wish her much happiness in her new home.

Mr. and Mrs. Joe Brown and baby Mr. and Mrs. G. A. Soars and Albert, Mr. Geo. Yager were Sunday afternoon visitors at the A. J. Williams home.

Mrs. Jim Johnson and little son accompanied Mrs. Mary Mrieckh home to Killiam last week and spent a few days visiting at the Mrieckh home. Jim Johnson is disking land near Killiam.

Mr Roy Lee will finish his new house this week which is quite an improvement to the neighborhood, on his farm west of Mr. Barnes, the house is a five room semi-bungalow. Messrs Plants and Maurice McGinitie also the Wm. Lee men folks are doing the carpenter work.

Noxious Weeds:—

- Are unsightly in fields and gardens and along roadsides.
- Rob the soil of valuable plant food.
- Occupy space which should produce grain.
- Reduce the grade of the threshed crop.
- Cost money to thresh, haul and ship to market.
- Entail heavy losses in dockage.

The first week in July has been designated as

WEED WEEK

and a special campaign urging the eradication and control of noxious weeds will be conducted.

Watch for articles in the press and for announcements of meetings and radio addresses.

FORD CAR HOUDAILLE HYDRAULIC SHOCK ABSORBERS

Positive—Smooth—
Double Acting—

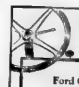
HOUDAILLE Hydraulic Shock Absorbers, four to every Ford car, are entirely defensive in their action since they remain inactive and in neutral position on smooth roads. Let a wheel encounter the slightest depression or bump, however, and they respond with the velvet precision of a cat's paw.

Houdaille Shock Absorbers were not adapted to the Ford car after it was built, but were part of the specifications laid down by the Ford engineers as they planned the car. Therefore, Houdailles, their powerful operation coordinated, became integral parts of the complete chassis. It is for this reason that they function with such perfect efficiency on the Ford car.

Houdailles absorb both the upward and downward thrust of the shock through slowing the spring action by means of a heavy glycerine solution, which is forced through a small valve from one compartment to another. They check the rebound of the car softly, exert no tension on the springs and are always ready to offer resistance to the blow when and as required. In fact, the more severe the shock, the more effectively Houdailles operate.

Different from any other shock absorber, the Houdaille connecting link between the frame and the axle of the car is a steel arm, not just a fabric strip to wear out and be replaced. Adjustable to suit differing road conditions and various loads, the Houdaille is more than a shock absorber and more than a snubber.

Inspect the Ford car carefully part by part. Then know the thrill of driving it. By its performance you will realize the easy riding comfort of an Houdaille equipped Ford.



Drive it Yourself—there is no Better Test

THE LIGHT RUNNING NEW

John Deere Grain Binder

The great success of the Light-Running New John Deere Grain Binder—its widespread popularity in every grain growing section of the United States and Canada—is the result of remarkable improvements in grain binder construction.

In all of the escentials so important to you—in saving of grain, in quality of work, in durability, in convenience of operation, in draft—this New John Deere will go far beyond your expectations—so effective are the improvements built into it.

This year, when the crop promises to be rather poor and the straw short, it is necessary to use a good binder in order to get every bit there is in the field.

LOCAL AND PERSONAL

Born.—To Mr. and Mrs. William H. Smith, on July 3rd, a son.

Miss Lorett Ross spent Monday at St. Albert, attending the sports there and visiting friends.

Miss Ethel McClymont of the local telephone staff is on holidays and Miss Annie Booth is taking the position of night operator.

Mr. and Mrs. Thompson and family motored to Red Deer on Monday.

Sewing and dressmaking done at reasonable prices.—Miss Rita Burnett.

Mr. and Mrs. C. Lee spent the week end in Red Deer.

The Misses Clara Abbott and Marion Cooper left on Sunday morning for a trip to Europe. They will be gone about two months. Bon voyage! and a safe return!

Among visitors to the city the week were Mr. and Mrs. McCauley, Mrs. Firth, Mr. and Mrs. McLaughlin, Mr. and Mrs. Calvert, Mr. and Mrs. T. Hooks, Mr. and Mrs. M. B. Ness, the Misses P. Napier and L. Gray.

Mr. and Mrs. Bissett visited in the city over the week end.

Four pupils wrote grade nine examinations at Ingram school, they were Lizzie Johnson, Thora Haugen, Edna and Stella Zook.

SPECIAL THANKSGIVING SERVICE FOR THE RECOVERY OF THE KING ON SUNDAY

On Sunday, July 7th, a special thanksgiving service will be held for the restoration of His Majesty King George V. to health and strength, in all Anglican churches throughout the Dominion.

Service will be held at Holy Trinity Church, Tofield, at 7:30 p.m., to which service all are cordially invited to attend.

Rev. R. J. Symes will conduct the service.

WELL KNOWN YOUNG COUPLE UNITE

In the presence of only the immediate families, a pretty wedding took place at the Geo. Lawson home on Saturday, June 29th, at 4 o'clock, when Mildred May Lawson, second daughter of Mr. and Mrs. Geo. Lawson, became the bride of Mr. Roy William Lee, third son of Mr. and Mrs. William Lee. Miss Mabel Lawson, sister of the bride, was bridesmaid, Mr. Lorne Lee, brother of the groom was best man, and Rev. Thos. Gordon officiated.

The weding took place before an arch of evergreens hung with white wedding bell and pink and white streamers. Miss Viola Lee played Lohengrin's wedding march.

The bride looked sweet in pale pink georgette and satin, the bridesmaid was dressed in amber rose georgette.

After the signing of the register, Mrs. Herman Lawson sang "O Perfect Love" accompanied by Mabel and Martin Lawson. A wedding supper was served at six o'clock after which the newly weds left on the evening train for a short honeymoon in Edmonton.

The bride and groom are both popular young folk of our community and their host of friends join in congratulations and wishing them many years of happiness.

They will reside on the groom's farm at West Ketchamoot.

TOFIELD CADETS IN CAMP

On Wednesday morning ten Tofield cadets left for camp at a point about 15 miles out of Calgary, where they will stay a week. The boys were chosen according to seniority. The Tofield cadet corps was started some two years ago by Mr. A. B. Evenson and Mr. R. McCullough. Mr. Evenson was the instructor. This year, Mr. H. Lundie was the instructor. A certain number of drills have to be attended by the boys at home and some target shooting done. The corps is inspected yearly by Major Miller of Calgary.

There will be about five hundred boys at camp, those from Tofield being, Arthur Beirnes, Jack Swinton, Sidney Worton, Wesley Taylor, Harry Bowick, Ross Craig, Blake Clutterham, Allison Scott and Ray Martin. We understand that they drill and march for three hours in the morning and the afternoon is spent in athletic sports of different kinds.

TOFIELD CHAUTAUQUA OPENS NEXT WEDNESDAY

What promises to be the most outstanding programme of the past ten years will open at Tofield Wednesday evening next. The opening program, "The Patsy," a real comedy [illegible] "perfect [illegible]."

[illegible] "The Patsy" has to do with the [illegible] daughter of a [illegible] family [illegible] nation of [illegible] slight [illegible] her mother, dominated and bullied by her unprincipled, shrewdish sister. Only her father truly loves and can understand her; and since he was away most of the time as a travelling salesman, this wasn't a very extravagant comfort—hence the title of "Patsy."

The Patsy [illegible] three acts of comedy, romance, laughter and pathos, [illegible] appealing love story, [illegible] the Martin Erwin Players one of the finest acting opportunities ever enjoyed in Chautauqua plays.

From the first program to the closing [illegible] will present a var[illegible] that could [illegible] Tofield under any [illegible].

TOFIELD WORKER GETS ELEVEN DAYS

Railway Camp Fight Case is Concluded in Court

Bill Shelwer who was charged with assaulting Ed. Boyd at Tofield on June 15th, was sentenced to 11 days in jail after he had pleaded guilty before Judge Green, Saturday, to unlawful wounding. The sentence started from the date of Shewber's arrest and he was given his freedom.

The men were working in a railway construction camp, where, of the 120 men, only three Britishers were with using a club studded with nails when he and Boyd became involved in a quarrel.

"SWIM, GIRL, SWIM" AT THE VARIETY FOR SATURDAY

On Saturday the patrons of the Variety will be treated to a fast moving comedy drama of college life that will chase away all the blues that ever were. The light heartedness of college life combined with the more grim realities of this existence, give [illegible] an opportunity to both laugh and ponder over the unexpected happenings of life.

Cream Shippers

The busy season will soon be here and most of you when in town will want to transact your business in quick time so as to make every minute count.

"IF THE MOUNTAIN WILL NOT COME TO MAHOMET, MAHOMET MUST GO TO THE MOUNTAIN."

In explanation let us say that we have an arrangement with the Farmers' Supply whereby those wishing to do so can leave their cream there. The Creamery truck will call at the store TWICE DAILY and pick the cream up.

Phone the Creamery and leave instructions as to your cream cheques.

ALWAYS at your service.

CANADIAN NATIONAL Making Low Cost Vacations

Possible for thousands of Residents in Western Canada

IN ARRANGING low fares for prairie residents, we regard this part of our work as a great and important public service. [illegible] always ready with men, equipment plus the experience which enables us to care for [illegible] movement with smoothness and efficiency.

THIS SUMMER—escape for a little while from the dull sameness of succeeding days. Our low fares from May 15th to Sept. 30 (with a final return limit Oct. 31, 1929) make it easy.

OUR TRAINS pass through a territory replete with scenic grandeur; of historical and educational value to the traveler. Nothing superior to our sleeping and dining car service. Radio, an added feature on through trains.

Suggestions: Jasper National Park, Pacific Coast, Alaska, Minaki, Ontario, Quebec, Maritime Provinces, Overseas Tour

THINK IT OVER!

Whatever vacation section you have in your mind, our local agent will be pleased to give every assistance. He will be glad to quote lowest fares and make all arrangements for you—or write

THE TOFIELD MERCURY
A Weekly Newspaper Published at Tofield, Alberta.
W. Worton, Publisher.

WEEKLY NEWS BULLETIN

Department of Agriculture, Edmonton

Issued by Publicity Commissioner, ton, Alberta, June 29th, 1929

Old Age Pensions Board Operating

Applications will now be received from those eligible for assistance under the terms of The Old Age Pensions Act, it is announced by Alex Ross, Chairman of the Board. Application forms are available for all persons desiring to apply for pensions and arrangements have been made by the Board whereby applicants will be enabled to do so with the least possible difficulty. Applicants residing in Calgary and Edmonton are asked to call at the Workmen's Compensation Board offices in those cities. In rural districts applications will be received by the secretary-treasurer of municipalities and in the cities of Medicine Hat, Lethbridge, Wetaskiwin and Red Deer applications will be dealt with at the civic offices. In unorganized districts application forms may be secured from the office of the nearest detachment of the Alberta Provincial Police.

Good Prices Paid for Northern Lands

Prices averaging approximately $30 per acre were paid for the lands comprising the Indian Reserves adjoining the towns of Berwyn and Fairview disposed of on Saturday last by the Department of Indian Affairs. The highest price recorded was $40 per acre paid by a Saskatchewan buyer for three quarter sections in the Beaver Reserve near Fairview. Widespread interest had been shown in this sale and a number of parcels were secured by buyers from various parts of the United States and Canada.

Extensive Road Building Program Under Way

Fifteen separate road building contracts are now underway throughout the province in addition to the work being done on the Peace River highway which is on a part contract and part day work basis, it is announced by Hon. O. L. McPherson of the Department of Public Works. The total expenditure by the Alberta Government on roads this year as represented by the above contracts and other items will be in the neighborhood of $3,235,000. There will be $2,650,000 of capital expenditure alone of which $1,500,000 will be for new highway construction now under contract, the Peace River and Jasper highways and various grading and improvement projects and $1,150,000 for district and secondary roads in aid of municipalities. In addition some $650,000 will be spent on maintenance of roads, bridges and ferries and $500,000 in grants to municipalities out of income and $1,430,000 in carrying charges.

Alberta Men Named on Agricultural Board

H. E. G. H. Scholefield of Calgary, vice-president of the United Farmers of Alberta, and Senator D. E. Riley of High River have been named as Alberta members of the National Committee on Agriculture of the Canadian Chamber of Commerce. This committee will have under consideration such questions as agricultural programs for Boards of Trade and Chambers of Commerce, the extending of agricultural district representatives' services, the analysis of the cost of distribution of farm products and similar problems affecting the agricultural industry of the Dominion.

FOURTH FORTNIGHTLY CROP REPORT

Issued by Department of Agriculture, Government of Alberta, Edmonton, June 29th, 1929

Crop conditions through the central part of the province have been considerably improved by rains during the past week, and in southern and northern sections there is satisfactory promise of a good crop, according to telegraphic reports received on Friday by the Department of Agriculture for the fourth crop report of the season.

The prolonged drouth during the latter part of May and the first three weeks of June has considerably reduced the prospective yield over the area comprising the central part of the province and in a few localities early sown wheat has been pastured or plowed down. Later sown crops, however, on breaking or summerfallow have been able to weather the dry period, and as a result of the recent rains will give a fairly good yield.

The southern part of the province has received sufficient rainfall to promote continued growth. An exceptionally good stand of fall wheat is reported and spring wheat and the coarse grains are coming along well. The first irrigation of the season has been completed and a start will be made with the cutting of the first crop of alfalfa during the coming week.

Slight injury to crops and gardens is reported in a few localities as the result of frosts on June 19th and 23rd. With the exception of a few limited areas, insect injury has been very slight.

The Peace River district continues to show promise of a very satisfactory crop, although some localities will require further rains shortly.

Pastures are making better growth and the feed situation has been considerably improved by the past week's rains, and as a result dairy production will show an increase in many sections of the province.

Alberta Assessment Commission Named

Appointment has been announced by Hon. R. G. Reid, Provincial Treasurer and Minister of Municipal Affairs, of W. D. Spence, John Gair of Killam and J. J. Duggan of Edmonton as members of the newly constituted Alberta Assessment Commission. Mr. Spence who for the past several years has been Deputy Minister of Municipal Affairs will relinquish this position to devote his entire time to the chairmanship of the new commission. Robert English, Assistant Deputy Minister, has been named Acting Deputy Minister of Municipal Affairs. The commission will have power to deal with appeals from assessments from a court of revision under the provisions of The Town Act, The Village Act, The Municipal District Act and The Improvement Districts Act. In addition it has power to establish equalized assessments for all municipalities, to make any assessments which the commission is by any other statute required to make, to make rules and prescribe forms for the transaction of business and the conduct of hearings before the commission and to make recommendations to the minister as to standards and methods of assessment. The whole question of assessments will be referred to the commission which will supplant the Assessment Equalization Board.

In thus setting up a commission, the Government has provided for one reviewing body for the whole province by which appeals will be heard whereas in the past such appeals could be heard only by judges of the district court.

Transfer Northern Railways July 2nd

Joint management of the Northern Alberta Railways comprising the Edmonton Dunvegan & British Columbia line and the Alberta and Great Waterways line will be assumed by the Canadian Pacific and Canadian National railway systems on Tuesday, July 2nd, it is announced by Hon. V. W. Smith, Minister of Railways. E. W. Beatty, president of the Canadian Pacific will also be president of the new company with Sir Henry Thornton as vice-president and John Callaghan who has been general manager of the lines under the operation of the government will continue in the same capacity under the new management. D. C. Coleman, vice-president of Canadian Pacific Railways and W. A. Kingsland, general manager of the Canadian National Railways, will under the direction of the board, supervise operation of the northern

TENDERS For SCHOOL BUILDING

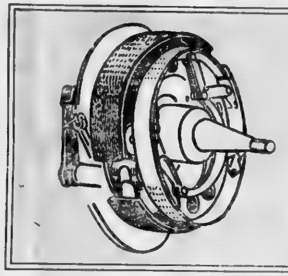
THE FORD CAR SIX-BRAKE SYSTEM



Grips with Silent Power

THE greatest safety feature on any automobile—the braking system—has been developed on the Ford car to a degree that insures absolute driving confidence. Being fully enclosed, the internal expanding brakes on all four wheels are free from any danger of impaired performance from mud, sand, road dirt, grease or other foreign matter entering the mechanism or between the bands and drum.

The four wheel system is operated by a foot pedal, while the emergency or parking system of two brakes, one on each rear wheel, is distinct and separate, operated by a hand lever. This added security is made possible through the unique design of the Ford steel spoke wheels to which drums are fitted to accommodate two sets of internal brakes on the rear wheels.

The smooth, even braking of the Ford car yields more advantages than maximum safety at all times, since it makes tires last longer and adds immeasurably to riding ease and driving comfort.

Drive it Yourself—there is no Better Test

Ford Car Features
Choice of colours
Full balloon tires
Fully enclosed six-brake system
Shatterproof glass windshield
Reliability and low upkeep

Be Here On The Opening Day

LIVE STOCK EXHIBITS GOOD AT EDMONTON FAIR

While agricultural and live stock exhibits receives the first attention of the Edmonton Exhibition Association and these will be fully up to standard at the big fair which opens in Edmonton on July 15th, it is the attractions features, however, which are necessary to draw the crowds, and these will be the best ever seen at any Western Canada Fair. The payment "Arabian Nights," put on by 1000 Edmonton men, women and children will be better than any pageant yet put on—and all have been wonderfully popular with patrons. Microphones will be used to tell the story to the grand stand audiences as the pageant progresses.

A special added feature is the captive balloon—known by those who served overseas as a blimp; this will carry passengers, and every night will depict Niagara Falls in fireworks from 1000 feet in the air. In addition, a gorgeous display is given in front of the grandstand, will be a nightly feature.

Herco Recco, vaudeville acts, fresh from New York and English circuses, the ever popular Johnny J. Jones Midway Shows, and all the other departments of a well-rounded Exhibition will be present at the Shows.

A special treat to art lovers will be the exhibit from the Royal Canadian Academy of Arts, in the manufacturers building. New Provincial and Federal Government exhibits, and a baby clinic, will be included. A horse shoe pitching tournament will be popular with devotees of this game.

It is expected that many visitors from country points will motor to the Exhibition and take advantage of the free camping ground adjoining the Exhibition grounds.

TOGRVILLE BEAT TOFIELD IN DOMINION DAY BALL TOURNAMENT

On Monday, July 1st, the Tofield intermediate baseball team journeyed to Vegreville to take part in a baseball tournament. There were four teams entered: Vegreville, Mundare, Ryley and Tofield. Ryley did not appear, so a draw was made for a bye, Tofield drawing it, and were scheduled to play the winners of the Vegreville-Mundare game. Vegreville won this game by the score of 5-1.

At 3:30 Tofield took the field against Vegreville. This game was brilliant in places and at other times fielding and batting was very poor, Vegreville continued their winning streak by collecting four runs in the 1st inning. At no stage of the game did Tofield take the lead. E. Ball replaced Ed. Hill in the pitcher's box in the 8th inning. The hitting features of the game were home runs by E. Ball and E. Hill and a three base hit by W. Warton. The Tofield line-up was as follows: pitcher, E. Hill; catcher, A. Fraser; 1st base, E. Wayne; 2nd base R. Bowick; 3rd base J. Kalla; Short Stop, K. Ball; left field, W. Warton; centre field E. McLean; right field E. Martin.

The trip was made possible through the courtesy of manager Craig and Mr. Hill who supplied cars and drove the boys over.

The team take part in a game at Ryley on July 10th, in connection with the Ryley Sports.

Leonard P. Woodhams, optometrist will be at Tofield on July 8th. Those desiring to consult him will find him at the Royal Alexandra Hotel. Mr. Woodhams has both the necessary experience and training and Tofield-ers may consult him with every confidence.

THE LIGHT RUNNING NEW
John Deere Grain Binder
The great success of the Light-Running New John Deere Grain Binder—its widespread popularity in every grain growing section of the United States and Canada—is the result of remarkable improvements in grain binder construction.
In all of the essentials so important to you—in saving of grain, in quality of work, in durability, in convenience of operation, in draft—this New John Deere will go far beyond your expectations—so effective are the improvements built into it.
This year, when the crop promises to be rather poor and the straw short, it is necessary to use a good binder in order to get every bit there is in the field.

LOCAL AND PERSONAL

Born.—To Mr. and Mrs. Otto Johannsen, on July 9th, a daughter.

Mrs. Sinclair and daughter motored to Banff and Lake Louise last week.

Rev. R. J. Symes is camping at Hastings Lake with a number of Tofield boys. At present we do not know just who the boys are, but we will have this information for next week.

Mr. and Mrs. Carey and family are camping at Cooking Lake.

Thelma Noland returned Sunday from the coast.

Mrs. Ward spent the past week at the Noland camp at Bruce, visiting Mrs. Noland.

Mr. and Mrs. Galloway and family are visiting at Kerrobert, Sask.

Mrs. Rosalia, visited friends at Dalberne this week.

Mrs. P. M. Webb is visiting Calgary and Medicine Hat. At the latter city she will meet her daughter.

Mrs. Fawcett and daughter have returned from a short stay in the city this week.

Sewing and dressmaking. Reasonable prices.—Mrs. Rita Bourque.

The boys who left for camp at Cochrane last week arrived home on Monday morning. Reitzes, Martin and Sidney Worton stayed over at Calgary and attended the stampede. Ray Martin was the guest of a relative there and Arthur Beirnes and Sidney Worton were the guests of Arthur's uncle.

Rev. Gordon returned last week from attending the ordination of Rev. John A. Geeson, M.A., B.D., at Irma. Rev. McPherson of Holden presided. Rev. Lobb addressed the minister and Rev. Gordon addressed the congregation.

Hugh Gordon, who has just written musical examination for the Toronto Conservatory of Music, at Camrose, we are pleased to announce, passed with good marks. Hugh was a pupil and was prepared by Mrs. Percy of Tofield.

Rev. Mr. Lobb of Ryley will preach at Tofield on Sunday at 8:00 p.m. Rev. Gordon will occupy the Ryley pulpit.

Mr. and Mrs. Fred Robinson and family of Olympia, Wash., visited relatives at Tofield last week. They left for their home by car on Wednesday morning.

Mr. and Mrs. Roy Rook and children were among those who motored to High River to attend the Mennonite Conference which was held there last week.

Miss Dorothy Baptist is spending her holidays with friends in Calgary.

Mr. and Mrs. Carl Blake motored to Edmonton on Thursday of last week returning home that same evening.

PRESENTATION TO MRS. PLUM

On Tuesday, July 9th, a goodly number of Anglican W.A. members and friends met at the home of Mrs. McCarthy in honor of Mrs. Plum who is shortly leaving for Artland, Sask. with the afternoon. After a pleasant social hour, during which a delicious lunch was served, Mrs. Baptist presented Mrs. Plum on behalf of the W.A. members with a beautiful silver flower basket which contained lovely red and white carnations (a gift from her friend Mrs. Rose). In a well chosen words our president expressed regrets at Mrs. Plum's departure and hoped she would make many more friends and be happy in her new home. Mrs. Plum suitably responded very feelingly and said she had enjoyed working with us very much.

After joining hands and singing "Auld Lang Syne" and "For She's a Jolly Good Fellow", the gathering dispersed.

Mrs. Plum has been a very loyal, faithful and energetic member for the past two years or so. We shall miss her very much at our meetings, and we have very pleasant memories of her stay with us. Our best wishes for health, happiness and success go with Mr. and Mrs. Plum and Doris to their new home and we will always be glad to welcome them again at Tofield whenever an opportunity occurs. The hostesses for the afternoon were Mesdames Tucker, McCarthy, Glover, Rose, Sinclair, and Baptist.

COMMUNICATION

EXPLANATION

To Whom Concerned:

Mr. Editor:

If you would favor me with space in your paper to give my views re shipment of my stock, September 19, 1926.

There were 83 head of cattle sold, 81 being my own and two belonging to my son George.

When the returns came back it was sent me on ONE statement showing actual selling price $10089.79. MY CHEQUE after all expenses deducted showed $7884.02, leaving a balance of $2005.77 which I had the impression was for expenses or costs, at first conclusion for 21 head of cattle as a separate cheque came for George's two head of cattle. George's two have different markings for shipment than my own, so I am now of the opinion had the secretary issued TWO statements he would have saved considerable discussion and misunderstanding, for the shipper and myself know those cattle were being shipped for two different persons.

I find now after a few days, that this $1082.79 was the actual selling price for 23 head of cattle, not 21 as I have always been under that impression. Hence I begs the cause for up the misunderstanding regarding mode of shipment.

As for the shrinkage it applies to the same farm as the expense of shipment. Taking the total shrinkage which I had considered was on my 81 head of cattle covered all and taking George's two head of cattle extra was where we made the mistake with the misunderstanding in the statement.

The shipper, Mr. Ferguson knew since after the shipment that there was some misunderstanding about this shipment and has been asked on previous occasions for a clear explanation, but it never seemed to be forthcoming. But it is on the prophet of old hath said "There is none perfect, no not one" ourselves included. Hoping that this explanation will meet with the approval of shipper, secretary and others, I remain.

Yours truly,
A. J. WILLIAMS

TOFIELD BALL TEAMS LOSE TO RYLEY

On Wednesday, July 10th two ball teams from Tofield journeyed to Ryley to play ball in connection with the Ryley sports day.

In the first game the Tofield juniors, (16 years and under) met the the Ryley juniors, this was a fast close game with the youngsters playing a good brand of ball. The final score 12 to 10 in favor of Ryley. It was anybody's game up till the last inning when Ryley got two runs to break the tie and win the game.

Following this game the Tofield intermediates took the field against the Ryley intermediates. This was the well-known kind of a game anybody could wish for up to the seventh inning with Tofield having a little of the advantage.

Tofield took the field and put the Ryley players out for the one, two, three runs. At their turn at bat, Tofield failed to get a hit got a single, stole second and came home on a hit by E. McLean. This was the only scoring in the first inning. In the second inning Ryley scored two runs to take the lead, but this was short lived however, because Tofield came right back and annexed two runs to again take the lead 3 to 2.

From here on it was a see-saw battle until the seventh inning. During this time Tofield got one more run and Ryley got two more and the score was tied. But the lucky old seventh was not so lucky for Tofield when a couple of overthrows and some loose fielding and the timely hitting of the Ryley batters ran in six runs for Ryley while the best Tofield could do was to get two more runs. The final score was 12 to 6 in favor of Ryley.

Ed Hill who pitched for Tofield and Otto Anderson who pitched for Ryley pitched good ball and were recieving good support from their fellow players.

The winners recieved ten dollars and the losers five dollars. In the junior game the winners recieved seven dollars and the losers three dollars.

RETCHABOUT

Several nice showers has fallen in our district the past week, which appears to be more encouraging. This has settled the dust and will be lots of good, but more is needed.

Mr. Frank Shupe accompanied Mr. and Mrs. Davison and children to the Peace River district. They are motoring through.

Mr. and Mrs. Roy Lee returned on Wednesday from their Wedding trip spent in Edmonton.

Mrs. Keitha Oliver and little daughter, Irene, returned home on Tuesday from near St. Paul de Metis, where Mrs. Oliver was engaged in teaching school

Miss Betty Henderson and Percy Owen motored, over from Holden on Sunday and spent the evening at the Sears home.

Miss Marjorie Lee is spending her holidays at the parental home after finishing her term of school near Wainwright.

A pleasant afternoon was spent at the Fawcett home on Friday afternoon when friends of Miss Fawcett gathered to spend the afternoon with her and bid her goodbye before her departure for Edmonton. Miss Fawcett made many friends while in our district by her quiet christian character being always willing and ready to help in any good cause. In appreciation many pretty handkerchief's were presented to her, after a short address by Mrs. Gordon to which Miss Fawcett replied very fittingly. Refreshments were served by the visitors. Mrs. Frank Hull was able to be present after an absence of two years through illness.

Some fifty or more friend of Mr and Mrs. Roy Lee gathered at their new home on Thursday evening to offer congratulations. An enjoyable evening was spent socially and a delicious bunch was served, after which they were presented with a purse of money.

Mr. and Mrs. Graves and family motored up from Calgary on Saturday evening and spent the night at Mr. and Mrs. J. W. McMullen's home in town. Mr. and Mrs. J. McMullen and family and Paul McMullen accompanied them back to Calgary on Sunday.

LINDBROOK

Continued on back page

The Rev. Symes of Tofield has opened a boys camp at Hastings Lake and the capacity at present is 18 some of whom are local boys. The usual camp routine being followed and all are enjoying themselves.

Mr. and Mrs. A. Gill and family that is last Lawrence are at the Calgary stampede this week having motored down from here.

Mr. R. Clarke has leased the Lancaster farm from the S. S. B. and is moving on to same shortly.

Mr. Wm Gray has leased the N. E. 19 and is moving that way as soon as haying starts and living quarters are erected.

Lindbrook advances another notch ahead, the store here having purchased a new ton and a half chevrolet truck. They are prepared to have anything whether alive or dead or inanimate. This will be a great convenience to all here in town as it is found to be so in the short time that they've had it; so please them if you need any trucking done; support home industry! All together for Lindbrook with apologies to Edmonton.

Mr. H. Low took a truck load of Lindbrook wood to Edmonton this week also one of cattle.

Mr. Jas. Hooper has leased the portion of 7 north of the C. N. R. tracks here, amounting to approximately 160 acres.

Mr. Lyndon Hooper motored with friends to Calgary to take in the stampede on that city.

CARD OF THANKS

We wish to thank most sincerely all neighbors and friends with so kindly assisted us during the illness and death of our dear departed. We also wish to thank all and everyone for the floral tokens and "In Memoriams" and for the beautiful singing rendered at the church.

Mrs. Clara Jevning and family.
Mr. and Mrs. Arnold Steen.

OBITUARY

John N. J. Jevning, son of N. J. Jevning and his wife Maren, was born at Barde, Norway, on June 18th, 1870, passed away at Tofield, Alberta district on July 1st, 1929, aged 59 years and twenty days.

He came with his parents to Red River Valley, Minnesota, in 1876, here he grew up to manhood.

In the spring of 1896 he came to the Barde district where he homesteaded and lived up till his death. The old-timers will remember the Northern Pct. of which John Jevning was postmaster. In 1905 he was married to Karen Johnson who predeceased him fifteen years ago.

In 1919 he was married to Clara Eide who with two sons, Milton and Clifford and three daughters of former marriages, Mabel and Juliette all survive him.

He is also survived by three brothers, Olaf M. Jevning, Bellingham, Wash., Andrew A. Jevning, Calicoan, and Johnny Jevning of Ryley Alberta. Two sisters, Mrs. Arnold Steen, Tofield, Alberta, and Mrs. Gus Lind of Lawrance, Wash.

The funeral took place from the Barde Church on July 6th, Rev. Mr. Bjelde of Ryley officiating, when a large gathering of relatives and friends paid their last respects to the deceased.

Six old timers acted as honorary pall bearers, P. B. Anderson, Geo. Bruce, J. W. Cookson, W. Simonson, P. O. Thoreen and P. A. Lee. Active pallbearers were, Joe and Reuben Eide, Edward and Alvin Steen, Axel Kindley and Selma Johnson.

Interment took place de the Barde cemetery

BARDO

A surprise party was held on Miss Hannah Jevners, at the home of Mr. and Mrs. Joe Hauffer the evening of June 20th, the occasion being her birthday. An enjoyable evening was spent.

A very large crowd of people from Bardo and surrounding communities gathered at the home of Mr. and Mrs. Hampreh last Sunday afternoon to bid farewell to Mr. and Mrs. P. M. Haugen who left for the coast last Tuesday.

Miss Betsy Ness left for a short visit to Grande Prairie last Thursday.

Miss Gudrun Ness arrived home from Minneapolis for a visit last Saturday.

Mr. and Mrs. Palmer Anderson arrived home from Grande Prairie last Saturday.

A number of Bardoites attended the picnic at Dodds and Amish Creek

The Anderson, Hendrickson and Foshaug families motored to Hinton Lake to fish last Monday. A very enjoyable day was spent, although no fish were caught.

Quite a number from Bardo are attending the services at Camrose, which are being held all of this week.

The Steen, Jevning and Kindley families and Mrs. Nordus, were dinner guests and Mr. and Mrs. Reuben Eides on Sunday.

AMISK CREEK

A large crowd attended the picnic held here last Friday. Good sport was provided by the Ryley, Bardo, Dodds, and Shonts ball team. The Shonts girls played the Bardo girls a soft ball game, which was won by Shonts. Everyone seemed to have a good time.

Miss Gladys Olsen, while visiting her aunt, Mrs. I. Wilson, of Edmonton, was taken ill with the measles. Her parents motored up to the city last Saturday. Mr. Olsen returned Sunday morning, but Mrs. Olsen will stay with Gladys until she is able to return home. We hope Gladys will soon recover.

Ruby Berg, Hennie Annebo, Olive Olsen, Astrid and Olaf Moline, have all returned home from their schools.

Gunder Demeland from Grandforks, Minnesota, is a visitor at the Erickson home this week.

A. Pattersons and R. O. Berg returned home last Thursday from their trip to Banff They report having an enjoyable trip

Mr. and Mrs. C. Foome from Bellingham, Wash., were visitors at the Annebo home last Saturday.

THE TOFIELD MERCURY

A Weekly Newspaper Published at Tofield, Alberta.
W. Worton, Publisher.

WEEKLY NEWS BULLETIN

Issued by Publicity Commissioner, Department of Agriculture, Edmonton, Alberta, July 6, 1929.

Alberta Exhibits for American Fairs This Season

Alberta will again be advertised this season by an exhibit of agricultural products and natural resources to be shown at a number of state and country fairs through the middle western States. Arrangements have been completed by the Publicity Branch of the Department of Agriculture to show this display at fairs in Minnesota, Iowa, Nebraska, and Kansas during August and September. A marked increase in the interest shown in the opportunities for settlement in Alberta and in emigration to the province is reported from the [illegible] which other exhibits have been shown during the past few years.

Five Lumen Heavy in Alberta

Alberta's most highest among the provinces of Canada with a per capital loss of $9.74 caused by fires during the year 1928 according to figures compiled by the Dominion Fire Commissioner. The total fire loss in the Dominion during the year is given as $102,897,849.

SUMMER FAIR SEASON OPENS

The Calgary Exhibition and Stampede being held during the week of July 8 to 13 opens the season for summer fairs in the province. The Edmonton Exhibition and Pageant will occupy the following week. Dates assigned to Class B fairs are as follows: Lethbridge, July 17 to 20; Red Deer, July 22 to 24; Camrose, July 29 to 31; Vegreville, July 29 to 31; Vermilion, August 1 to 3; Rhodywhere, August 5 to 7. The first of the class "C" fairs will be at Bonalta, July 16 and 17, and these will continue for the following two months finishing with Priddis and Millgrville on September 13.

To Start Northern Aerial Service

Plans are announced by the western Canada Airways for the opening of an office in Edmonton with Lieut. C. H. Dickens, holder of the McKee trophy, as district superintendent. This move is in preparation for northern extension and the establishment of air mail service on the prairies during the coming fall. Two of the company's planes, it is stated, will fly on regular schedule between Edmonton and points on the Mackenzie River providing service for the far northern areas where much exploration work is being carried on.

[illegible]

FOR SALE.—About 2 doz. white Plymouth Rock hens. As pullets these will lay and lay over all fall and winter—entered at local fair last year. These also were awarded three firsts at the Edmonton winter poultry show [illegible] each, or will trade for sucking calf, value for value. Also White Plymouth Rock cockerels and pullets, R.O.P. stock. Also young mare, broken to saddle and driving, aged, 1200 lbs.; McLaughlin buggy, sleigh and harness; cutter bed; nearly new electric washing machine; large Jiffy tent, cost $75.00 new, no reasonable offer refused. Apply to Rev. Thos. Gordon, 'phone 19, Tofield.

(Continued from front page)

Several from this neighborhood attended the funeral of the late J. Jevning of Bardo on Thursday of last week.

The Misses Astrid and Dorten Sorenson and their brother, Alfred, from Pen, were guests at the R. O. [illegible] home last Sunday evening.

Mrs. I. Annabo is in Camrose with their youngest boy, Palmer, who is at the St. Mary's hospital, troubled with high blood pressure.

Ruby Berg is motoring with the work of the home at Mrs. E. A. Moon's.

The Shouts boys played the Bardo boys a friendly baseball game at the Bardo ground last Monday evening. The score was in favor of Bardo.

M. Johnson and daughter from Viking were visitors at the Paulsen home last Sunday night on their way to Edmonton.

In my last correspondence there was a misprint when it read Minnie Ide and Mabel Amone from Shouer. This should read Ide Minnie Ide and Mabel Amone from Kriley and P. Johnson from Shouer.

Connie Erickson spent a week with friends in Edmonton.

LOST.—Ladies' rose colored Parker fountain pen. Reward. Finder please return to Miss Enid Cory, Tofield, Alta., or to Mercury Office. 30p

Here and There

(35c)

Four hundred thousand bales have been born at Bonff during the past fortnight. It is not the time mountain air that accounts for the phenomenon, but the mountain visitor, and the babies are in some trust from the Dominion Government Fish hatchery on the banks of the Bow River. They will be stored in the vaults and streams of the Rocky Mountain Parks

Canadian Pacific Railway Points Ontario No 1 team, are champion revolver shots of the Dominion. After winning the Chief Constables Association Trophy in May, the team shot against the Lethbridge detachment of the Royal Canadian Mounted Police which had won the championship for Military forces, and defeated them 1412 against 1378. Possible score was 1500. The victorious team is composed of Inspector K. O'Brien, Sudbury; and Constables H. H. Girvan, Port McNicoll; J. H. B. MacDonald, Toronto; D. Prendergast, Sudbury; and W. E. Thapman, White River, Ont.

With a population that ranks 20th among the countries of the world, Canada is fifth in total exports and third in total turnover of trade.

Charles Olson and Raffaele Mantilari, rival round-the-world racers, are trying to make a trip circling the globe in less than 30 days using only regular modes of transportation. Olson left Victoria on Canadian Pacific Empress of Canada on June 15, and Mantilari arrived at Vancouver on the Empress of France June 22. Airplane runs within the term of the contract since both men have already used them. The race at time of writing is very close.

A problem that has defeated the learned for centuries—the squaring of the circle—has apparently been solved by L. W. Hartman, Canadian Pacific Railway timekeeper at London, Ont. Hartman claims he devised a geometric method by which to reproduce the exact area of a circle in the shape of a square. University professors are now examining the solution. He was born in Rumania and never saw a serious but speaks English, French, German and Rumanian fluently.

Adelard Goulet, head bayboy of the Banff Springs Hotel, had what he regards as a close shave the other day when he was cut off during the golf links and met a black bear. He topped his drive and the animal bent a hasty retreat. Goulet's reports made are very home in this district this year.

Of the 3,750,000 acres taken up by settlers in Canada in 1928 eight per cent was in such northerly districts as Prince Rupert, Saskatchewan, and the Peace River district, Alberta. The attraction northward was more pronounced in the Peace River region, where 4,000 homesteads were taken up last year. In this district there are still available 1,000,000 acres of fertile land, capable of [illegible] millions of dollars to the [illegible] of the province.

RINGMAN

Mr. and Mrs. A. Asp motored to Wetaskiwin last Tuesday.

Mr. and Mrs. W. Hartzheim and family spent the week end in Edmonton.

Mr. and Mrs. Thor Horte and Mrs. E. Erickson motored to Edmonton last Tuesday returning on Wednesday.

Mr. A. Asp made a fishing trip to Cold Lake last Wednesday.

Simon Simonson is attending Summer school in Edmonton.

The Brownsmen boys of Bardo defeated the Kingmen girls in basketball on Thursday with a score of 27—26. The same evening the Bardo boys defeated Kingmen in baseball the score being 5—4.

Helen Styrbert of Camrose spent a couple of days with her parents here.

Ester Rodinusky returned on Friday after a three week stay in Edmonton.

Mr. and Mrs. H. Bray moved to Victors Lake on Monday where the former has accepted a position with the Alberta Pool Elevators Ltd.

Mr. and Mrs. Lars Larsen of Camrose visitors with Mr. and Mrs. Geo. Welch on Sunday.

Miss Lily Erickson spent a few days visiting with Irene Horte of Daysland.

The crops in the district have made a marked improvement after receiving a few good showers again, although some of the early sown fields are beyond recovery.

SALE AND REDEMPTION OF IMPOUNDED ANIMALS

Notice is hereby given under Section 68 of the Domestic Animals Act (Municipalities) that one horse, bay, white spot in forehead, short points, was impounded in the pound kept by Samuel Bethel on Thursday, the 13th day of June, A.D. 1929, and that the said animal was sold on the 29th day of June, 1929, to Abraham Penner of Tofield, and that said animal may be redeemed by the owner or on his behalf within a period of thirty days from the publication of this notice in The Alberta Gazette, upon payment of all fees and costs due to the municipality and the purchaser of said animal.

A THRILLING OF THE SOUTH SEAS AT THE VARIETY ON SATURDAY

Love under the tropic moon—grim shadows of the money hungry white man—fantastic scenery, inflaming progress, but terrible—a thrilling drama of a dying race

These factors all contribute to make W. S. Vandyke production, "White Shadows of the South Seas" which will appear at the Variety on Saturday July 13th, a picture that is human, natural and different The Van Dyke has taken an idea; namely that the white man, wherever they find their way around the world, bring with them a shadow which does thrown over primitive races, result, in disease, destruction and death for the simple savage On this new but simple theme he has woven a never- drama, violent and terrible but tragically beautiful

Show commences at 9 p.m. sharp.

For information apply to the undersigned

J. O. A. LETOURNEAU,
Hon.-Treas., of the Municipality of Cornhill No. 487.

Over one-half of all Canada's industries depend on wood as a raw material. When the forests are destroyed mills must close down, railways carry less freight, trade must stagnate and prosperity must vanish.

Issued by authority of Hon. Charles Stewart, Minister of the Interior

THE FORD CAR STEEL BODY

Combines Strength with Beauty

THE 14th grade steel used in building Ford car bodies gives maximum of lasting protection. Beauty of design has been combined with the rugged strength in these all-steel bodies. The wood parts shown in the diagram are used only for attaching the interior trim and roof material.

If this body—that of the Tudor Sedan in this instance—mounted on a Model "A" chassis, were turned over and rushed on the road, it would support the chassis, engine and all without even bending the narrow window pillars. Such is the strength and high safety factors of Ford engineering.

Vision obstruction is reduced to a minimum by the use of narrow steel pillars. Lower rear panels, including the wheel housing, are made in one piece. This unusual feature on body construction gives additional strength.

Electrical welding adds greater rigidity and reduces the possibility of squeak and rattle. Panels and frame sections are welded or riveted. In assembly of large units where bolts are necessary, strips of anti-squeak material are used between sections. Sound deadening material is also used. Soft roof construction, of heavy padding over galvanized mesh wire, provides an additional element of quietness.

Drive it Yourself—there is no Better Car

Ford Car Features
Choice of colors
Safety plate glass on four doors
Powerful power engine
Full balloon tires
Fully enclosed brake system
4 Hydraulic shock absorbers
Easy steering
Go up to 30 miles per gallon of gasoline
Waterproof cloth windshield
That's proof against rain
Reliability and low upkeep

LAKESHORE

Mr. and Mrs. A. J. Vocke and four sons of Tippecanoe, Ohio, visited with Mr. and Mrs. T. R. Murray from Thursday until Monday. Mr. Vocke and Mr. Murray being friends of long standing and hadn't met for a number of years, consequently the visit was much enjoyed by both parties. The Vocke family entrained for Winnipeg on Monday where they had left their car and will motor from there to their home at Tippecanoe.

Mrs. T. E. Seale entertained at a shower for Miss Elsie Kendall, a bride of this month. A number of friends were present and Miss Kendall was the recipient of a number of useful and beautiful gifts.

Mrs. Horace Rollins of Viking, with her children, have been visiting at the Wood home.

Mr. and Mrs. R. C. Phillips and Geo. Abernethy motored to Edmonton on Monday.

Mr. and Mrs. T. A. Jones motored to Edmonton one day last week.

LINDBROOK

Well, we've enjoyed a little rain which has helped considerably, and whilst the harvest may not be bounteous it will be something to go on with. More and more rain is needed, probably when haying starts it will rain in torrents. Several reasons have been given for the rain coming here, they are as follows: we predicted a real drought failure; secondly, someone took a mower out to cut horse feed; thirdly, the holiday season started; fourthly the opening of the boys' camps and the militia training camps; and fifthly, the Lindbrook store purchasing a new Chevrolet ton and a half truck. You can pick from these which suits and try it again when rain is needed.

The Women's Auxiliary of Lindbrook (Anglican Church) invited their sisters-in-arms (not literally) of Tofield and surrounding districts to a picnic at Hastings Lake last Wednesday. The day was fine but a strong steady wind from the N.W. kept up all day, lashing the lake waters until the breakers rolling in looked somewhat like the sea. The rendezvous was Mrs. W. Glenn's and several carloads left from there in column of route for the lake. Whilst there a rather unusual service was held, to wit, an open air baptismal service, Miss Dolly Westlake being baptised by the Rev. R. J. S. Symes of Tofield Anglican church. The men folk saw to the boiling of water for tea and the ladies looked after refreshments, quite a task too, there being over 100 people present. Despite the wind several went bathing but those were chiefly of the younger generation. Encore, Mesdames!

TENDERS For SCHOOL BUILDING

Sealed tenders will be received by the Board of Trustees of the Lake Shore School District No. 937, until noon, Wednesday, July 17th, 1929, for the erection of a frame school building. Plans and specifications may be obtained from the secretary-treasurer. The lowest or any tender not necessarily accepted.

THE LIGHT RUNNING NEW
John Deere Grain Binder

The great success of the Light-Running New John Deere Grain Binder—its widespread popularity in every grain growing section of the United States and Canada—is the result of remarkable improvements in grain binder construction.

In all of the escentials so important to you—in saving of grain, in quality of work, in durability, in convenience of operation, in draft—this New John Deere will go far beyond your expectations—so effective are the improvements built into it.

This year, when the crop promises to be rather poor and the straw short, it is necessary to use a good binder in order to get every bit there is in the field.

CANADA

(By Nathaniel A. Benson in the Canadian National Magazine)

I have seen her in the quiet of the evening in the fields,
I have sensed her in the dusk-time that the star-decked prairie yields;
She has poised on purple mountains when my lonely step drew near,
When the North's green fires at mid-night were her altar-lights austere.

Her voice is in the thunder of the raptured Falls of Bow,
In the memory of Daulac dying greatly, long ago;
I have heard her in the singing of awakened April rills,
She whose spirit walked with Lampman on his silent wooded hills.

In the ancient lonely churchyards of the pioneers asleep
She broods in voiceless twilight where eternal memories creep.
Where the dark heroic headlands stand the wintry ocean's roar,
She sits thinking of the seamen who will come to port no more.

On the red earth of the vinelands, through the orchards in the spring,
She smiles and feels with heart and hand her beauties blossoming—
And again she wanders weeping beneath an alien sky
Where her many sons are sleeping, and her young lost legions lie.

She is one with all her gladness, with our wonder, and our pain.
Living everywhere and nowhere in the heart and soul and brain.
She our mother, we who made her, she the daughter yet to be,
Who walks these mortal roads of death to immortality.

Indivisible and lovely, she, the maiden of our thought,
She the empress robed in beauty from our deepest dreaming wrought;
She whose centuries are storied, whose young banners far outborne
Are the heralds of a splendor in the ages yet unborn.

LOCAL AND PERSONAL

Mr. and Mrs. Tom Bradbury arrived by car from Rossland, B.C. and are spending the summer vacation with Mrs. Bradbury's parents, Mr. and Mrs. Wm. Thomson.

Sewing and dressmaking. Reasonable prices.—Miss Rita Burnett.

Mr. A. P. Harold, Murray McHeffey and Willie Worton left on Thursday night for a two week holiday at Jasper.

Many Tofielders are attending the Edmonton Exhibition this week.

The town have started to gravel its main street, Mr. T. Wallington doing the work.

Miss Loret Ross left for Cavell Sask. on Thursday for a two week holiday.

Many people from Tofield visited the Y. M. C. A. camp at Hastings Lake on Sunday, where some of the Tofield boys are camping.

Mrs. Burnett, Ted, Rita and Mrs. Worton visited Edmonton on Thursday.

Mr. Beirnes sr. is visiting at the Beirnes home.

Mr. Stanley Yakabuski visited the city on Wednesday.

The two noted golfers of Edmonton who were expected to play on the Tofield links Sunday did not arrive.

Mr. and Mrs. O'Harra and children visited the capital city this week.

Mrs. McCauley left for Yorkton and Moose Jaw this week for her holidays.

Mr. Williamson of Wetaskwin is visiting at the Jobb home this week.

Mr. and Mrs. Thompson left for Gull and Sylvan Lake on Tuesday for their holidays.

Mr. Clutterham, Blake Clutterham, Mrs. H. E. Rogers, Coach and Douglas Rowe and Max Rogers motored to Edmonton on Wednesday.

Mr Laurie Scott was in Edmonton last Sunday andplayed ball for the Edmonton all stars against an all star team from Calgary.

Mr. Mike McCusker was a visitor to Edmonton on Wednesday of this week.

Mr. and Mrs. Farman and Marion were among those who visited the capital city this week.

Mr. and Mrs. Burchardt and Miss Lucille Gray attended the Edmonton exhibition this week.

Mr. McCarthy is spending his vacation at home. He is at present on the C.N.R. station staff at Bruderheim.

Mr. and Mrs. Hobson motored to Edmonton on Sunday last.

MR. JOHNSTON FERGUSON APPOINTED MANAGER OF CO-OPERATIVE STORE

At a recent meeting of the board of directors of the Tofield Co-operative store, Mr. Johnston Ferguson was appointed manager of the new venture.

It will be remembered that a short time ago we reported that the association had purchased the stock and business of the Tofield Farmers' Supply Ltd., and would commence actual operations in October of this year.

IMPORTANT MEETING ON TUESDAY, JULY 23rd

An important public meeting will be held in the Tofield Curling rink on Tuesday July 23rd, at 8:00 p.m. when Hon. Perrin Baker will be present to deliver an address on the education question which is so much to the fore at present.

The meeting is being sponsored by the local branch of the U.F.A., but it is a public meeting in the fullest meaning of the term.

It is to be hoped that a good attendance will turn out to hear Hon. Perrin Baker speak.

BEDNAR—KENDALL

At three o'clock in the afternoon of Tuesday, July 16th, a quiet ceremony united in marriage Elsie Mae second daughter of Mr. and Mrs. H. A. Kendall and William Martin son of Mr. and Mrs. J. Bednar of Ponoka. The service took place at the bride's home, the Rev. T. Gordon officiating.

Given in marriage by her father the bride looked charming in a lovely gown of white satin trimmed with creamy lace and white bridal roses. With this she wore a crown of beads and orange blossoms and carried a shower bouquet of ophelia roses. Her only ornament was a diamond and white gold pin, the gift of the bridegroom. After the ceremony a buffet lunch was served to the guests.

Mr and Mrs. Bednar are taking a three weeks motor trip, the bride travelling in a sand colored suit with French blue overblouse and hat to match. After the honeymoon they will reside on their farm near Ponoka.

TOFIELD GIVES RYLEY REAL TRIMMING—AVENGE FORMER DEFEATS WITH 13 to 4 SCORE

Well, it has been done, the Tofield intermediate ball team defeated Ryley, after taking two defeats in former games.

The game was played on Friday night and it was seen from the start that Tofield were not going to be beaten.

Glen Wood, who did mound duty for Tofield, had the Ryley batters breaking their backs in trying to connect with his assortment of curves, while the Tofield batters knocked Oslund's offerings to all corners of the lot.

Tofield made two snappy double plays, Ball to Worton to Kallal, and Hill to Worton to Kallal. It would be hard to pick any stars from the Tofield line-up as they all played bank up ball, with Wood pitching real ball.

Tofield started in the field and put the Ryley batters out by the one two, three route in their half of the inning. Tofield collected one run and from here on kept adding to their list at will. There was a fair crowd of fans to watch the ball tossers go through their paces, but towards the end of the game, when it was apparent who was going to win, most of these left, so that they would not be late for chautauqua. The final score was 13—4 in favor of Tofield.

The Tofield lineup was: Wood, pitcher; Hannan, catcher; Kallal, 1st; Worton, 2nd; Hill, S. S.; Ball 3rd; McLean, L. F.; Francis, C. F.; Martin, R. F.

LIFE SAVING

During the summer months there is nothing that youth enjoys so much as outdoor bathing. Whether the water is clean or the particular stretch of it is safe is really a matter of little importance to it. Youth rarely takes time to consider consequences, and is rather scornful of the individual whose motto is "Safety First". In consequence summer after summer young lives are lost that can be ill spared. Young lives wasted in almost every case.

Every child should be taught to swim. The younger the pupil the easier is he taught. Quite small children rather resemble frogs, they instinctively strike out in the correct way when they find themselves in water. Instruction in swimming should form part of the education of every boy and girl.

It is a healthful exercise. It is a safeguard against accidental death by drowning. It may be and frequently is the means of saving life for others.

First aid to the apparently drowned is nearly as important as the ability to swim. Instruction in the one means instruction in the other. Help protect the youth of Alberta by learning to swim. Literature on First Aid can be had free of charge from the Canadian Red Cross Society 407 Civic Block, Edmonton, Alta.

should make a will. He was given a hearty vote of thanks.

It was decided to appoint Mrs Morton to see to the getting of material for the quilt we are planning to make.

The next meeting will be held on July 25th at the home of Mrs. Phillips. The Meedames W. Lee, Carlisle, Murray, G. Walker, will serve lunch.

KINGMAN

Mrs. A Shultz was pleasantly surprised on Wednesday afternoon by a number of lady friends, previous to her departure for Norway

Mrs. A Asp has been visiting for a week with relatives at Falun

Mr. Grahn of Hay Lakes has been visiting with his son, Thor Grahn for the past three weeks

Miss Irene Berte and Johnnie Johnson of Daysland spent a couple of days in Kingman last week.

Mrs. Charles Lindberg returned from Edmonton on Friday, where she spent a week with her sister, Mrs Kortzman.

Mrs. Vedin and Mrs. Joberg visited with Mrs. E. Erickson on Friday.

Mrs. Oberg of Forestburg, is visiting with her sister, Mrs. Ed. Tulleson for a few days.

Mrs. Sorokin of Winnipeg and Mr and Mrs. F. Hardin and family of Bruce, are visiting with Mr. and Mrs. R. Rodnansky.

Mr. and Mrs. Axel Larsen of Bawlf visited with Mr. and Mrs. E. Erickson on Sunday.

Mr. and Mrs. W. Jardine visited with Mr. and Mrs. A. Klimp of Camrose on Sunday.

A number of Kingmanites motored to Dried Meat Lake on Sunday.

Mr. and Mrs. Thor Grahn left for Banff on Monday, by car, where they will spend their vacation.

There will be a dance in Kingman on Thursday, July 25th. Music will be furnished by the well-known accordeon player of Winnipeg, Helge Anderson.

LAKE SHORE

Born to Mr. and Mrs. Owen Eaton on Tuesday, a son. Congratulations.

Mrs. T. D. Ferguson visited friends and relatives in Edmonton and Clover Bar from Wednesday until Saturday She was accompanied by her small son.

Miss Alma Tiedeman went to Golden Spike on Monday to visit her sister Mrs. Theodore Waach.

The Noland family visited Mr. and Mrs. Ben Jacobson near Ryley on Sunday

Miss Alma Bethel returned to High River on Friday after visiting relatives for a week or so.

Friends of Miss Emily Ferguson will be sorry to hear she is in Lamont hospital. She underwent an operation for appendicitis on Tuesday.

Among those who attended the U. F. A. and U. F. W. A. Convention at Vegreville on Saturday were Mr and T. E. Seale, Mrs J. Warner, Mrs. Booth and Geo. Abernethy.

The D. W. Warner family of Clover Bar visited in the district over Sunday

U. F. W. A. NOTES

The regular meeting was held on June 27th at the home of Mrs. Morton. A large crowd was in attendance and one new member joined the local. Plans were made for the constituency conference to be held here on the 23rd of this month. In addition to the regular business of the conference an exhibition of home crafts and arts will be a feature. This part of the program is in the capable hands of Mrs. Morton and Mrs. Burchard. In the evening the Hon. Perrin Baker will give an address and it is hoped a good crowd will be out to hear him.

Mrs. Price, 2nd vice-president of the U.F.W.A. will speak in the afternoon and the conference will open at 10:00 a.m. in the curling rink.

Mrs. Murray and Mrs. Geo. Francis are the entertainment committee and are giving it their best attention.

Meedames Booth, Carlisle, Wildman, Munro and M. Seale are the lunch committee

We are very sorry we omitted to mention in our report of the last meeting the excellent paper prepared and read by Mrs. T. E. Seale on "How to Make our Organization Most Effective". Some very splendid ideas were expressed and will no doubt play a part in making up the program for next years work.

Mr. Piercott gave a very interesting talk on why every person

Make Every Dollar Count

The dry season is making it necessary for farmers to spend their money wisely and also to EARN AS MUCH AS POSSIBLE.

HARVESTING AND THRESHING BARLEY FOR MALTING

(Experimental Farms Note)

A sample of barley for making malt must be pure as to variety, uniform as to maturity, and thoroughly mature; a mixture of varieties will give lack of uniformity. The sample must not be injured and must be free from other grains and weed seeds.

Presuming that the crop to be harvested is from pure seed of a known variety, much can be done now to insure a good sample from the maltster's viewpoint. Firstly the grain must be fully matured, in other words, "dead ripe"; there must be no green kernels or immature kernels in the sample. If necessary, save for the malting sample, only the field that are free from signs of greenness, and put the rest of the grain in a separate bin. This extra work insures a sample that the maltster will buy, and consequently commands a better price. The grain after cutting, should be allowed to cure in the stook for a short time but must not be left too long as owing to the inclement weather often experienced at this time, injury may occur from sprouting in the stook, or [illegible] discoloration.

Careful threshing is just as important as careful harvesting. Many a good crop has been ruined by careless threshing. Good barley must be free from broken or skinned kernels, too close threshing will cause this. It is better to have a little of the awn adhering to the kernel than by close threshing to have the hull skinned off, as this injury allows the entrance of moulds, and a consequent deterioration in the malt produced from the grain. By the use of proper screens in the thresher, many of the weed seeds can be removed, thus lessening the work in recleaning the grain up to the required standard for malting.

TANKAGE FOR HOGS

(Experimental Farms Note)

Maximum development of the growing pig is not possible without a certain amount of protein and mineral matter being supplied in the food. The cereal grains which form the basic ration for hogs are deficient in both protein and mineral matters. Skim-milk or buttermilk has been found to be the most satisfactory for supplying the needed protein and mineral matter in the ration. No substitute seems to give as good results, or combine in as available form, the elements necessary for optimum growth of bone and muscle.

This matter of protein and mineral supplements is of great importance in view of the fact that on many farms in Western Canada no skim-milk or buttermilk is available, or or they are available in such small quantities as to render their good effects almost negligible when divided among the pigs being fed. When these are lacking what will take their place?

Of the various substitutes for skim-milk or buttermilk which have been tried in experiments at the Dominion Experimental Station, Lacombe, to date, tankage has given the best results. In fact, results have shown without exception that where skim-milk or buttermilk is not available throughout the year, tankage ranks very high as a substitute feed and should be fed as a supplement in a ration lacking milk. This is particularly the case where oats and barley are being fed. Pigs weighing between fifty and sixty pounds, when placed on a ration consisting of grain alone tend to become unthrifty and as a result make slow and comparatively expensive gains as compared with pigs whose rations are properly supplemented with the dairy by-products or tankage.

Many experiments could be cited to show the effect of using tankage when skim-milk or buttermilk is not available. In a test conducted during the summer of 1928, a group of pigs receiving a ration of oats and barley was compared with one receiving 8 per cent tankage in addition to this grain. Both lots were self-fed in dry lots. The results of this test in terms of dollars and cents, valuing oats at 55 cents per bushel and barley at 75 cents per bushel, show that while tankage cost $2.50 per hundred pounds had an actual value of $12.97 per hundred pounds on the basis of grain saved. On the other hand, the results of a similar experiment conducted the same summer, except that both lots had access to good brome pasture throughout the whole feeding period, showed tankage to have an actual value of only $2.77 per hundred pounds on the basis of grain saved. Apparently the brome assisted in supplying the growth promoting food constituents.

Tankage is a protein and a mineral rich supplement consisting mainly of sterilized, powdered meat and bone scraps and is for sale at most abattoirs and some feed stores. It may be fed in either of two ways. One is to expose the tankage in an open box or self-feeder in the pen and allow the pigs to help themselves, while receiving at the same time a satisfying ration of grain. The other system is to feed the tankage mixed with chop feed in a proportion of 5 to 10 per cent by weight of the total grain ration.

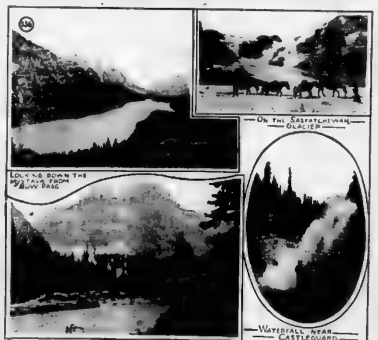
Provincial Minister of Education
will address the meeting on
Rural Education In Alberta
Outlining the Proposed Changes in the Rural School Act

The general public are earnestly invited to attend this meeting which will be of much interest to all residents

GEO. ABERNETHY, Pres. T. E. SEALE, Sec.

Riding on the Roof of the Rockies



SHADOW LAKE UNDER THE SHADOW OF MT. BALL

Among the most spectacular of the Trail Rides ever attempted in the Canadian Rockies will be the one proposed to start August 8 and lasting 12 days, to take in a long canoe ride to the Columbia Icefield from Lake Louise. [illegible] Valley Trail from [illegible] North Saskatchewan River [illegible] Alexandra River Valley [illegible] Castleguard and the Columbia Icefields. Only Trail Riders holding at least the silver button, [illegible] emblematic of completion of 100 miles of trail riding, will be permitted to [illegible] the expedition [illegible] taking part must satisfy the committee that they will not prove a burden to the rest of the party. For less experienced Trail Riders, or those who cannot spare the time, there will be a four-day ride starting from Banff August 1 and ending at Castle Mountain Bungalow Camp. [illegible] Shadow Lake and [illegible] Ball will be the camp site of the riders on the second day out and, in all, seven glacier-fed lakes will be on the route of the trail.

ONE HUNDRED OR BUST

It is with great pleasure that we extend hearty and sincere congratulations to the president of the 1929 Chautauqua committee, Mr. John Chapman, upon the signing up of the 1930 chautauqua contract. Rarely, if ever, at Tofield has a project been started under less favourable circumstances. With a short crop facing the people, and the fact generally known that guarantors had been called upon to pay a deficit almost every year for the past eleven years, and everyone saying at the commencement of the endeavor, "it can't be done", makes the sucessful culmination of the effort one of the outstanding achievements of community effort in Tofield. It was not easy.

Mr. Chapman was assisted by Mr. Will Spilsted and when on the fifth night of chautauqua it was stated that there were seventy eight signers and twenty-two more were needed, there were many who doubted if the hundred mark would be reached. The first twenty-five were relatively easy, the next twenty-five required effort, the next twenty-five took real work to get them to sign, but the last twenty-five, "oh boy", what amount of persuasion had to be made and arguments endured. There is one thing sure; that if ever Mr. Chapman does not want to sign a chautauqua contract himself, he will have a choice stock of negative arguments.

As the number kept creeping up, eighty, eighty-five, ninety—the effort assumed real community interest, and at least one man was awakened from sleep to be informed that "Chappie" had ninety signers. But the last ten! Mr. Chapman had arranged to go to Edmonton on Wednesday, but cancelled the trip to make the grade—and he made it. One by one, their names were added until fully one hundred and two names were signed and chautauqua is assured for 1930.

Mr. Chapman has earned the congratulations of the community and of the chautauqua organization as there is no question in our minds, that it was his enthusiasm, aggressiveness and determination, that brings chautauqua here next year.

While offering praises to Mr. Chapman, one must not forget the work done by Mr. Craig as secretary. A secretary's work is never very spectacular, but has to be done in a careful and painstaking way nevertheless; secretary to the chautauqua committee involves the handling of six or seven hundred tickets, around $1500.00 in money and much other detail work. Mr. Craig has occupied this position for two years here and had previous experience elsewhere. His services are appreciated, as every man on the chautauqua committee from the president down, will testify to the excellent and orderly manner in which the business of the chautauqua was kept.

THE RED MAN'S BLOOD

The Indian claims to be the true American. He is likely to be able to make a more striking claim if he wants to, according to a group of scientists who are seeking to determine racial origins by means of blood tests. It has been accertained that there are two distinctive elements in human blood, specified as "a" and "b". And it has been established that element "a" is found mostly in the blood of oriental races, while element "b" is always present in that of western peoples. And now comes the strangest discovery of all, that neither of these elements is found in the blood of the North American Indian. Does this mean that we are unable to link the Red Man with any Old World race, and that we must give up the notion that he strayed westward across the lost continent of Atlantis when the human family was in its infancy? The mystery is deeper than ever, but the Canadian scientists are said to be hot on the trail. Meanwhile, proud, and more inscrutable than ever, the Red Man looks out across the plains and dreams of "the land of the returning buffalo," whilst his race gives constant sign of perishing.—The New Outlook

A FIVE DAY WEEK

The secretary of the American Federation of Labor declares that opinion is growing steadiyl in industrial circles in favor of a five day working week. There are various reasons given for this development. Production tends to outrun consumption labor-saving machinery is playing an ever-increasing part in both manufacturing and farm industry. New markets canot be discovered or developed on short notice, and consequently multitudes are going to be out of employment in the near future. So it is suggested that the working days of the week be reduced to five. There is, of course, another reason put forward, based on the fact that "Man doth not live by bread alone", and ought to hvae time to attend to mental and spiritual development. Organized labor has always demanded opportunity to cultivate the things of the soul, but it has had to fight hard every step of the way. Now it looks as if economic pressure were going to force the dreams of labor to come true.—The New Outlook

TWO DOLLAR WHEAT CRY IN WINNIPEG

Near Panic Conditions Prevail During Opening Monday

WINNIPEG, July 16. "Two dollar wheat" that was the cry on the Winnipeg exchange Monday. Conditions almost of panic proportions ruled with the opening. Seven cents advance was registered immediately. One sixty-three followed reports of torrid weather all over the prairies and much damage over the week end by heat and dry winds. And through it all, orders to buy poured in from small towns throughout the west. Even some of the old conservative heads of grain firms are talking of possible two-dollar wheat before the new crop is harvested. Coarse grains too, are following the sharp advance.

There were scenes in the trading pit Monday resembling those that occurred a few days before the government took charge of all grain sales as a war measure. Even holders of acual wheat are not inclined to sell at even the present stiff advances. Frankly asserting they are holding for the two-dollar price, with the struggle are repeated stories of small dealers all over the prairies having made large amounts on paper at least as a speculative proposition since the advance started.

Export agents simply stepped aside today and let the market alone on the exchange. Even the most optimistic among the millers admit [illegible] lower prices with the drouth conditions so general and all stubble wheat in the west being plowed under as a total loss.

87 IN SHADE MONDAY; HOTTEST DAY THIS YEAR

New Heat Record for Year Set on Monday; 100 at Medicine Hat

It's done it!

Toiling manfully upward, the fluid in the [illegible] tube reached 87 above zero at 5:00 p.m. Monday, to set a new heat record for the year. The hottest day previously was June 8th when a mark of 86 above was touched.

Shortly after its record shattering feat, the weather abandoned its tranquility and a wind and dust storm of considerable proportion blew up. The gale reached a velocity of 25 miles an hour and at 6 o'clock, and the temperature dropped two degrees.

Later in the evening at eight o'clock to be exact a still stronger windstorm was experienced, a velocity of 32 miles an hour being attained. The wind was from the southwest.

With a temperature of 63 above at [illegible] a.m. the weather Tuesday morning again gave every indication of being warm, and fair official were hopeful of another good day.

While Edmonton was experiencing its hottest day of the season, cities throughout the west also were sweltering.

Medicine Hat was the "hot spot" of the prairies, the mercury touching an even 100 degrees. Moose Jaw reported a maximum temperature of 98, Regina, 97, and Swift Current 94. Calgary and Lethbridge both experienced temperatures of 90.

FOR RENT—Six roomed bungalow, as from August first. Apply R. Pincott, Tofield, Alta. 21c

Apply to Rev. Thos. Gordon 'phone 19 Tofield.

ESKIMO FINDS FAMILY SLAIN IN SNOW HOUSE

Story of Northern Tragedy Reported to R. C. M. P., Who Will Investigate

In June 1929, the R. C. M. Police at Cambridge Bay Detachment on Victoria Island, received a letter from a trader at Peterson bay, King William Island, to the effect that Eskimo Alogoek had come into that post and reported that his partner [illegible] and old man of sixty, and all his family, a boy Navarana about fifteen years, a second son [illegible] about eleven and a girl four and a half years, all were dead.

Alogoek explained that after a day sealing on the ice he returned to the snow house and found all four dead inside. As is the custom with Eskimos he threw out all the personal effects and sealed the snow house up with the bodies inside before going into the post to report.

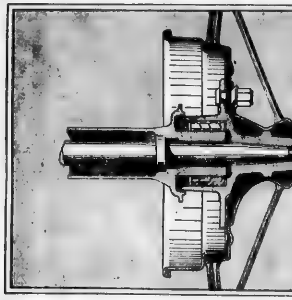
THE FORD CAR REAR AXLE



Expense no object in Achieving Perfection

THE rear axle of the Ford car is of the three-quarter floating type with spiral bevel gear. The pinion hub is exceptionally heavy, and, as the pinion is carried on double taper roller bearings, perfect alignment of the gear is always assured. The rear axle has a total of four roller bearings which add considerably to the cost of manufacture but are a protection for the owner against wear.

Special care is taken to insure silence in the pinion and ring gears. These are made up in sets and carefully matched, each set being run in to eliminate all possibility of noise in operation.

The differential side gears are forged integral on the rear axle shafts and the teeth then cut. This permits of lighter and more simple construction. The shafts are unusually strong, and, as the centre line of the wheel comes over the bearings, there is no overhang of the axle shaft, and it has no weight to support.

The use of malleable castings is eliminated in this new axle housing which is made entirely of steel. Bell forgings welded to steel tubing make up the shaft housing which is bolted to an all steel differential housing. The care and skill devoted to the manufacture and assembly of rear axle parts is typical of the high standards of Ford engineering.

SPECIAL EVANGELICAL SERVICES TO BE HELD AT SALEM MENNONITE CHURCH

Special services will be held at the Salem Mennonite Church, near Tofield from July 29th to August 4th. Rev. Derstine, of Kitchener, Ontario, will be the evangelist and will speak from an assortment of themes, a list of which we give below.

The general public are invited to attend these services and listen to the inspiring addresses.

"Christianity an Evangelical Sport in the Home Church."

"Why I Believe the Bible is the Word of God"

"Youth turning the Gauntlet of the Foe."

"Would Blessings in the Sanctuary."

"The Devils Partners."

"The Seven Greatest Needs of The Community"

"A Remarkable Night Interview"

"Soul"—Night With the Witch of Endor."

"The matchless Psalm Revealing Three Life Secrets."

"A Modern Message To Our World Today."

"Conditions Demanding Hell."

"Building an Ideal Christian Church How."

"Immortality What Lay Beyond the Veil"

"The Seven Master Tricks of the Devil."

"Crossing the Dead Line."

"The World Tomorrow."

"The Man of Galilee Was Jesus Christ Divine?"

"Forty Servants and Engagement."

"Tossing Rusty Heart Strings."

"The Portents of the Second Coming of Christ."

"The Church, Her Removal, Martyrdom, Resurrection, Eternity."

The Evangelist reserves the right to change from this list, but expects to select from this list according to the needs of the Church and Community.

LOCAL AND PERSONAL

Miss Lorett Rose is spending her holidays with friends near Edmonton, Sask.

Mrs. Gray and Clarence are visiting our Mr. and Mrs. Marix of little Gem, Alberta.

Mr. and Mrs. J. W. Warner and family are taking a motor trip through the mountains.

Second girl of D. Jacobs was treated to the hospital Wednesday for an operation for appendicitis.

Percy Keen and family of Mt. Pearl de Morin visited with Miss Theima Soland Tuesday and Wednesday of this week.

Mr. and Mrs. Carver spent a few days at Banff last week.

Mr. and Mrs. Abbott are visiting at Regina.

Mrs. McCauley is visiting friends and relatives at Regina and Yorkton.

The Red Cross ran out west through Tofield early Monday morning en-route for Wainwright, to give help to the Wainwright people.

The junior and senior C. G. I. T.'s are camping at Cooking Lake.

Everett McLean returned home from Millet this week.

Mrs. C. Baptiste, Beatrice and Kenneth are spending several days in Edmonton.

Mr. and Mrs. T. Bradbury and Miss Hallie Thomson motored to Edmonton last week and visited with Mr. and Mrs. T. Pinnell.

HON. PERRIN BAKER SPEAKS TO LARGE GATHERING ON PROPOSED SCHOOL ACT CHANGES

As a fitting windup to the P.U.F.A. Conference which was held on Tuesday of this week, a mass meeting was held in the curling rink in the evening.

The first part of the meeting was given over to entertainment, in which Miss Nees gave two charming vocal solos and Mrs. Pinnell two excellent violin solos. There was also some community singing.

Geo. Abernethy presided.

The second half of the evening was taken up by an address by the Hon. Perrin Baker, Minister of Education, who outlined at some length the proposed changes in the rural school act. At the close of his address a number of questions were asked and satisfactorily answered.

An outline of Hon. Perrin Baker's address will appear next week.

BARDO

Several families from Bardo spent last Sunday at Miquelon Lake.

The Ladies' Aid was held at the church home on Mrs. Thomson's very enjoyable afternoon was spent.

Mr. and Mrs. S. Johnson of Tofield and Mrs. Ereen of Bardo, left for Procerville, Saskatchewan, last Wednesday. They visit Mrs. Carey Kvern, formerly of Bardo.

Mr. Raymond Northus and Basil Dyrmont have returned from Grand Prairie on Monday.

Mr. and Mrs. B. Anderson, Mr. and Mrs. George Jones and Mr. and Mrs. L. Foshang, spent the latter part of last week fishing at Baptiste Lake.

Mr. and Mrs. Palmer Anderson and Mrs. Reeves, visited at Bawlf last Thursday.

Miss Hannah Jensen left for Camrose last Friday where she will be for some time.

Mr. and Mrs. Dryland of Lacombe are visiting at the Jorgen Jensen home.

A few friends and relatives gathered to wish Mabel many happy returns of her birthday.

Services were held at Bardo Church Sunday morning and in the evening Mr. Chester Fewings gave an address on Christian Education.

There will be a young people meeting in Bardo Sunday evening July 28th.

A part of the roof and wall of Mr Reeve's barn was blown off during the wind storm on Saturday

Forty Raymonite young people motored to Miquelon lake for a picnic last Friday. They all reported a good time.

Moved by Councillor Verge that Arch. Rowland be given a 1929 hay lease on the west half of section 7-51-20 W4th, upon payment of $6. Carried.

Moved by Councillor Verge that application of J. C. Corbett for removal license on the N. E. 32-51-20 W4th, be approved.

Moved by Councillor Verge that Mr. H. J. Williams be granted a lease for 1929 on the following road allowances between the N. E. of section 21-50-20 W4, and that said secretary be instructed to call for tenders to hold water on her piece at a later date or during wet season.

Moved by Reeve Williams that secretary write pondkeeper, Samuel Bardo, requesting that sum of $16 and to him under protest in 1927 be refunded. Grisvold and Gallery for damages claimed by Mr Hay be paid into the district treasurer

That secretary be requested to charge Lyons with $11.50 and credit division 5 with said amount being an advance of municipal road funds

Moved by Councillor Christenson, that secretary write Mr. E. Craig to the effect that the council do not consider

(Continued on back page)

GOVERNMENT OF THE PROVINCE OF ALBERTA
Department of Public Works
Tofield, Alta., July 23rd, 1929

Sirs:—

I have the honour to make application for a lease of the following road allowance or public highway under the regulations prescribed with reference thereto.

The road allowance or portion of the public highway which I wish to lease is more particularly described as follows:

Road allowance on east side section 21-50-20 w4 and also the road allowance on west side of N W ¼ section 21-50-20, w4

The facts regarding the manner in which adjacent land owners, or the travelling public generally, will be affected by the closing up of the road allowance or public highway in question are as follows:

Road allowances are not opened and are impassable

I own the following land:
N.W. quarter 30-50-19 w4
W. half section 25-50-20, w4
N.E. 25-50-20, w4
S.E. 25-50-20 , w4

Your obedient servant,
A. J. Williams, Applicant

The Minister of Public Works,
Edmonton.

AMISK CREEK

A. Erickson is now back from the hospital after being there for two months. He is now visiting with his daughter, Mrs. C. Maring in Ryley.

Conrad Patterson arrived home last week after being away for two months, engaged in passing grain elevators in Alberta and Saskatchewan.

Mrs. R. O. Berg, Alice, Ruby, Lily and Arnold, also Hermus and Wilbert Anderson and Elmer Moen visited at the P. O. Flaaten home last Sunday evening.

Edna Moen spent Monday visiting with Lily Berg

Conrad Paterson is assisting Mr. Berg in running the tractor while summerfallowing Arthur Haugen is sick with the measles.

ESPEDEL AND HIS BI HOME BOY ACROBATS VISIT TOFIELD

On Tuesday night, July 16th, Mr. Espedel and his school boy acrobats from Czar, Alberta, gave a short program before chautauqua. There was quite a large crowd present.

During the month of May Mr. Espedel was motoring through the country making dates in the various towns to bring his troupe of boys. When he arrived here he found that the hall would be unable to be had up by chautauqua. So he did not plan on putting on a program here but when he was passing through he was persuaded to put on a little exhibition before chautauqua which he consented to do. The boys ranged in age from eleven years to eighteen years old and are all pupils of his in both acrobats and daily school of which he is their principal. After their performance of balancing, dancing and tumbling Mr. Espedel took some of the Tofield boys and showed them some tricks and stunts. He has had a book printed entitled, "Health-building Exercises" and those desiring same can obtain it from Willie Watson at $2 00 each, and contains in carefully graduated lessons as much material and advice as some advertised courses costing forty or more dollars.

A CAMPING VACATION

The school term ended, the funds in splendid condition the car running with a contented purr is a combination that just naturally lends itself to a camping vacation

The people of Alberta are so fortunate in having many natural beauty spots, a short ride from the back door, that this form of holiday is becoming most popular every year It is economical and it is healthy if everyone precautions are taken.

Care should be taken to find out if all drinking water is pure If there cannot be assured then the water should be boiled or chlorinated. The latter is a very simple proceeding, any druggist will supply the lime and give the few necessary instructions.

If there is a baby or toddler in the party who must have milk, it is a wise proceeding to pasturize it. No one can be sure if the milk brought has come from an infection free cow.

Before diving into a likely looking spot look for the morning splash be sure there are neither rocks nor roots. It would add to the safety if at least one member could swim well. Carry simple First Aid Kit.

Literature on First Aid can be obtained free from the Canadian Red Cross Society 497 Civic Block Edmonton, Alberta.

LAKESHORE

Mr. and Mrs. T. R. Murray was very pleasantly surprised last Thursday by a visit from Mr. W. H. Hansford and daughter, Ed and Charlie from Coronation. The Hansfords are old friends of the Murray family, particularly the late Mr and Mrs Hawley who resided at Coronation before coming to the Tofield district. It will be remembered that Ed. Hansford spent a year or more in this vicinity some years ago there

Mr N. Noland has been on the sick list for the past few days we are sorry to say

Mr. Jim Francis spent Monday with her sister Mrs. Geo. Frances.

Joe Carter came down from Bellis last week to spend some time with his sister, Mrs. Everett Noland and family

Among those who took in the exhibition last week were, Geo. Abernethy, Mrs. Walker and daughters, Lloyd Wood and Lloyd Gray.

The contract for building the new school has been let to Mr A. Moen and will be begun immediately and will be finished for occupancy by October 1st

Mr. and Mrs. J. H. Johnston visited in Camrose on Sunday.

Miss Georgina Craig spent several days last week visiting her friend Miss Beulah Johnston.

KINGMAN

Mrs. Dorothy Thompson spent a week in Edmonton with her cousin, Dorothy Scrimshal

Gladys Pederson, of Edmonton, visited last week with her parents, Mr. and Mrs. C. Pederson.

Mr. and Mrs. F. Lyman and daughter Sonata, visited with Mr and Mrs. E. Erickson for a few days last week.

P. Rodenusky made a business trip to Edmonton last week.

Gordon and Ila Sosna left on Tuesday for the States

Mrs. Joberg and Mrs. Weyde and sons, left on Thursday for Seattle, after a months visit with their uncle, A. Rosenau. After a short stay in Seattle Mrs. Joberg will leave for her home in Norway.

Misses Alice Sorenson and May Welsh spent a few days in Edmonton last week.

Mr and Mrs Thor Hertz and family returned to Kingman on Thursday, after being in Tofield for a year. We welcome them back to our midst.

Miss Lillian Lindberg is sporting a new Ford roadster Here's your chance for a good ride, boys maybe

Mr. and Mr. Ted Severson and two sons, of Clyde are visiting with relatives here for a few days

Mr and Mrs. W. W. Jardie and Mr and Mrs. W. Hartsheck attended the Edmonton Fair on Thursday

Mr and Mrs. Pete Sosa, and Miss Martha Sandby of Edmonton, spent the week end with Mr and Mrs. Thor Hertz

Mr. and Mrs. W. Jardie and Mr and Mrs. E. Erickson visited with Mr. and Mrs. W. Hartsches on Sunday

Mr. and Mrs. P. Rodenusky and family were Sunday visitors at the home of Mr. and Mrs. Simovitch of Round Hill

Guests at the Ed Tuffetson home on Sunday were Mr and Mrs. Geo. Webb, Mr. and Mrs. Oscar Thompson and family, Mr. and Mrs. Ted Severson and sons of Clyde, and Mr and Mrs. Lillo of Ryley

Miss Lillian Lindberg, Sam Cunningham and Mr and Mrs McIntosh were week-end visitors at Edmonton canal.

Helen Anderson, the famous accordian player of Winnipeg, will hold another dance in the Kingman hall on Friday, August 2nd

---

We are compelled to omit two lots of correspondence this week. It will appear under proper dateliness next week.

Make Every Dollar Count

The dry season is making it necessary for farmers to spend their money wisely and also to EARN AS MUCH AS POSSIBLE.

By hauling or shipping your cream to us you will be getting every cent there is in it. We give you the highest grade and test possible.

If more convenient we will call for your cream at the Farmer Supply Co. Ltd. Store, where it ...

During the summer it is vitally necessary to take extra good care of your cream. Make an extra dollar by being extra careful.

"Z" Engine

—Biggest Value "dollar-for-dollar"

When you invest in an engine the biggest value is the one that gives you the most dependable service, lasts the longest and costs the least over a period of years.

That's why a half-million farmers have bought "Z" Engines. These famous power plants are made in the world's largest and finest engine factory. The country's foremost engineers design and develop them. The "Z" has such features of advanced design as the new Fairbanks-Morse Rotary High Tension Magneto, built complete and fully guaranteed by Fairbanks, Morse & Co., and many other improvements.

Sizes from 2 to 20 horse-power. Come in and let us show you why the "Z" is the biggest dollar-for-dollar value!

95 STORES AND RESIDENCES DESTROYED BY FIRE AT WAINWRIGHT

Loss $750,000; 25 Families Are Homeless

HIGH LIGHTS ON THE WAINWRIGHT FIRE

Fire Starts at 6:40 a. m. Sunday.

Hurricane wind at forty miles an hour spread flames.

Entire business section, over two blocks square is destroyed.

Fire loss estimated by Mayor Forster at $750,000.

Total of 95 business places, stores, residences, barns, destroyed.

Twenty five families homeless.

Only one restaurant in town left standing.

Business firms starting up in tents, with stock rushed by express, to cater to immediate needs of the citizens.

The business section of the town of Wainwright is no more.

Fire which started in a rubbish heap at the rear of a shack, fanned by a forty mile-an hour wind, spread so rapidly through the town, that no fire-fighting force on earth could have coped with it.

Only four business premises have survived the fire—the Empress Cafe, Goulet's Machine Shop, Manning-Sutherland Lumber Yard, and E. E. Tory's implement shop. Other premises not in the path of the flames, and so still standing, include the telephone exchange, depot, new federal customs building, new Wainwright Star building, the school, several churches, and the residential section of the town.

Hotel Guests Had Narrow Escape

Occupants of the Wainwright and Park hotels, which went up in an inferno of flames within twenty minutes of the outbreak escaped with such clothes as they could throw about themselves.

Fanned by the forty mile an hour gale, burning debris from the Atlas Lumber Yard—the first business place to go—were carried across the town, and so intense was the wind pressure that burning boards were held tight against wooden walls, until the walls burst into flames, and the buildings in a few minutes went roaring skyward.

Valuable Skating Rink Is Destroyed

One such building was the municipal rink valued at $25,000, and considered the finest skating rink of any small town in western Canada. More than two blocks from the point where the fire started, blazing debris hurled by the hurricane was held tight against the wooden walls, and in twenty minutes from the time when this 80 feet by 180 foot building caught fire, there was not a stick standing.

The most remarkable thing of all is the fact that not a single life was lost, and not a single peron seriously injured. A few minor cases of burns and some cases of shock, are being treated by the local doctors and hospital but otherwise the people of the stricken town are able to start life anew strong in health and equally strong in determination to rebuild a better town on the ashes of the old one.

Fire Started From Rubbish Heap

It was behind the rear of John Nordstrom's shack, that the fire is believed to have originated. Nordstrom's family had been burning rubbish at the week end, in an iron container, and the fire was believed to be out safely.

A lodger at the Nordstrom home also a railway employe, who came back to the house at 1.00 a. m. Sunday, states that there wasn't a sign of fire at that time and all was quiet.

Lumber Yard Fence Quickly Ablaze

Between the rubbish pile behind the Nordstrom place, and the Atlas Lumber Yard, there was but a narrow lane, some six feet wide, with a wooden fence around the lumber yard.

In a few moments from the time when the flames were first seen, this fence was ablaze, and it was but a matter of seconds before the piles of lumber in the yard were burning fiercely.

The hooting of the fire siren at the town hall on the main street roused the town residents. Fire Captain Harley Renville and his men were at the scene of the blaze within a few minutes, and with a chemical engine while the pump was put on the water supply on Main Street.

Out of the west roared the hurricane, rising to height of forty miles an hour, and in front of it, screeching across lots and jumping whole blocks ran the fiery furnace of the flames.

Fire Hose Melted before Intense Heat

By the time the fire brigade arrived at the Atlas yard, the flames were so intense there that the very hose melted, while the yellow flames licked the engine and scorched the hands and faces of the men.

To fight such a fire, no matter with what equipment, in the face of the raging hurricane, was an utter impossibility, and the firemen turned their attention to rousing the citizens and doing all in their power to shut off the flames ere they reached the centre of the town.

Out across the block streamed the flames, while the air was a mass of blazing debris. The roaring holocaust licked round the park hotel on Main Street, and within a few minutes it was no more.

Residents grabbed clothing and fled into the howling inferno of wind, smoke and flames without. Mrs. George Doherty, wife of the proprietor of the hotel, lost everything, even to her wedding ring. Mr. Doherty, well known hotel man, formerly of Lacombe and Gull Lake, was out of town and was later wired to by his wife.

Autos In Street Are Burned

Three autos standing in front of the hotel were reduced to flames in a few seconds. The Doherty car was backed out of the garage beside the hotel in the street. Flames licked round the driver and set his clothing on fire. He jumped to safety as the car went up in a burst of gasoline fumes.

Out over the doomed town went the red messengers of destruction, across two full blocks, to where the municipal rink lay in the full path of the wind and flames. Twenty minutes later, this building was a smouldering ruin.

Dr. Johnson occupying Dr. Wallace's house in the absence on holiday of the latter, rushed in his auto to the office on main street and loaded it with drugs as the flames melted the glass in the windows of the building. He was sucessful in getting a quantity of drugs out, ere he, too, had to depart leaving building and equipment to the mercy of the fire.

Water Made No Impression

The fire pump meantime was hooked up to the 40-000-gallon water tank opposite the fire hall, and through that, to the 100-000-gallon railway stand pipe on the C. N. R. tracks. It was like pouring water into Dante's Inferno with a child's cup, and in a few moments this even had to be abandoned.

THROUGHOUT CANADA

To CANADIANS in every walk in life there is insured by the organization of the Bank of Montreal an adequate and dependable banking service, available through more than 600 Branches distributed in every province throughout the Dominion, from the Atlantic to the Pacific, and from the international boundary to the shores of Hudson Bay.

Each Branch, no matter where situated, has behind it the full resources of the whole organization, which has Capital and Reserves of over $70,000,000, and Assets exceeding $900,000,000.

THE WAINWRIGHT FIRE

The citizens of Tofield and district received word of the Wainwright fire with sincere regret. Being in the path of the gale it is easy to imagine the rapidity with which fire would sweep through a town, and to fully appreciate the tremendous task the firemen and citizens were faced with.

As in most calamities, there is in this one a lesson to be learned. The fire commenced from a rubbish pile that was believed to be out, but which instead, brought to life by the fierce fanning of the gale ignited neighboring buildings. The towns along this line mostly use gas as fuel and consequently there is at times some difficulty in disposing of old wrapping paper, cardboard containers, etc. About the only thing that can be done with refuse of this kind is to take it to the rear of the lot and burn it. Most places, especiallly the business places along main street at Tofield, generally have a metal container of some kind, frequently an old coal heater. Even so one must exercise great care as a wind approximating the velocity of Saturday night and Sunday morning will cause even the containers to be dangerous.

When one has viewed the frequent burning of rubbish at the rear of lots in town, one is forced almost to the realization that it was more good luck than good judgement that saved Tofield from a similar catastrophe. The lesson to be learned by Tofield from the Wainwright conflagration is carefullness. If you have burned rubbish during the day time, before retiring for the night see that all is safely out.

SPORTS DAY

Up to the present we have heard nothing regarding a 1929 sports day for Tofield. Every year since the writer can remember at least one day has been set apart as "The Big Day" of the year. Prior to 1927 the day was organized by a local committee, which more often than not was the baseball team or immediate supporters. This year there is no organized senior baseball team and this perhaps accounts for the lack of any mention regarding a sports day. The 1927 sports day and celebration was of a patriotic nature, celebrating the diamond jubilee of confederation, and was sponsored by the Tofield Town Council and the Rural Municipal Council. The 1928 celebration was a straight town council affair; but who or what body will assume the leadership in 1929?

THAT PESSIMISTIC FEELING GONE

It is with no small degree of pleasure that we note the extreme feeling of pessimism so much in evidence just over a month ago has given way to one of optimism. It is not our intention to write "bunk" just for the sake writing or to make things appear better than they are. But we have seen some really good samples of wheat, which providing normal development takes place will produce fair yields. Of course these come from breaking. The truth of the matter is that the condition in general did appear dark—until the rain came. The rain we received, while not so much as we would have liked, gave a new life to the growing crops. Some were to far gone to be much benefitted, while other fields converted the moisture into real wealth for the owners. In addition to this, the price of wheat has gone up to a point that if any quantity of grain is harvested off a field at all, there will be a fair revenue for the owner. On the top of this is the resiliency of the Western Canadian character. When economic conditions do not appear to be very good, the Western Canadian farmer lets out a lusty howl, but when conditions are really bad, he just tightens his belt and grins, and begins to count the dollars he is going to make next year. The Western Canadian farmer's spirit is like the willows which grow on his farm, easily bent but mighty hard to break.

The real estate agent was endeavoring to interest a fair prospect in a house of her own. "Why not," says he, "purchase a home?"

"Home!" says she. "I'll say not. Why, I couldn't use one. I was born in a hospital—educated in a college—courted in an automobile—married in church—we dine at restaurants—spend the morning on the golf links—the afternoons over a bridge table—the evening in dancing or at the movies. And when I die I expect to be buried from the undertaker's. So, all we need is a garage, with maybe a bedroom above it.—Hardware Age.

THE FEEDING OF POULTRY ON RANGE

(Experimental Farms Note)

In order to produce good poultry stock, it is necessary to induce a continuous growth throughout the growing season. To accomplish this, keep the flock comfortable, well supplied with good food and abundance of water.

At the Central Experimental Farm, Ottawa, the growing stock is cared for as follows: the pullets and cockerels are put on separate fields of clover or Alfalfa which have been free of poultry for at least three seasons, during which time a series of crop rotations have been practiced. When possible this range of succulent green food is generally located beside a field of corn, or sunflowers, or an orchard, where the chicks can get extra green food, and grubs, and have lots of shade during the hot days. The movable range house, one that keeps the birds cool and comfortable during the warm and sultry evenings is so constructed as to make fresh air the limiting factor. Plenty of roosting space is provided. The water utensils are placed in the shade near the self-feeding hoppers. Five foot double hoppers, partitioned for mash, grain, shell and grit are conveniently located. The growing mash is composed of: bran, middlings, finely ground yellow corn and oat flour, equal parts, 1 per cent fine table salt 1per cent cod liver oil and (on good range) 5 per cent animal feed mixture of ground meat scrap, bone meal, fish meal, milk powder and cod liver meal. The animal feed is varied according to the season or the rate of sexual development required. The grain mixture consists of cracked corn, and wheat, equal parts, and one half part of plump oats. This method of feeding avoids waste and minimizes labour. However, if sparrows are quite numerous it is good economy to close the whole grain section of the hopper and practice hand feeding. The water vessels and hoppers are moved to fresh ground occasionally.

A copy of Bulletin No1, "Poultry Feeds and Feeding" should be in every poultry keeper's possession. It may be obtained, free from the Publications Branch, Department of Agriculture, Ottawa, Ont.

WHEAT POOL PLANNING $1.00 FIRST PAYMENT

Calgary July 23rd.— One dollar a bushel will be the interim payment on wheat for grain delivered to 1929-30 crop according to an intimation made Tuesday at the Alberta wheat pool office. Last fall when a bad slump in wheat prices occurred the initial payment was lowered from $1 to 85c, but the previous interim payment will be issued this fall.

Rumors of an interim payment to ... have been circulated throughout the country but the wheat pool officials would make no comment upon the rumor.

WESTLOCK CROPS HIT HARD BY HAIL AND WIND STORM

Strip Five Miles Long East of Town Is Badly Damaged

A wind storm here on Saturday afternoon accompanied by hail did considerable damage in the area to the west. No loss was reported to the east.

A five mile strip west of town, covering a width of a couple of miles hit some crops hard. Losses are reported to range from 5 to 50 per cent. Another strip of growing crops two miles long to the west of Pickardville was struck by hail. The average loss for the storm is put at 10 per cent.

The wind storm blew down the new superstructure of the United Church in Westlock, but the loss is small as the building operations were at an early stage.

A second wind storm swept the town on Sunday but the loss was confined largely to the trees, little or no damage to the growing crops being reported.

WASTE GAS ISSUE NATION PROBLEM

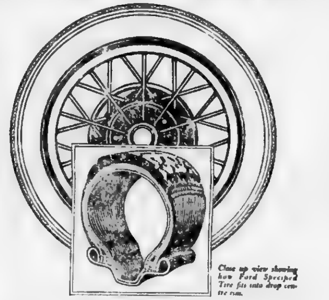
The Research Council Will Investigate Big Problem This Year

OTTAWA.— Waste gas from Alberta's oil field, loss from fermentation and other problems of the Canadian honey industry and the "use, optimum iodine content, and control of iodized salts in Canada" will be investigated by the national research council. Decisions to undertake his new work, in addition to the 100 or more other problems now under investigation were made at a council meeting here.

seeking a solution of the Alberta gas problem, which includes a wastage of 100,000,000 cubic feet per day, will be represented on the associate committee of the council that will probably hold its first meeting in Edmonton early in October.

Dr. Charles Camsell, deputy minister, and other representatives from the Dominion department of mines, Dr. G. S. Whitby, professor of chemistry at McGill university; representatives of the university of Alberta, who have given considerable study to the situation, and Dr. H. M. Tory, chairman of the national council, will be included in the personnel.

THE FORD CAR STEEL SPOKE WHEELS



Close up view showing how Ford Spexiped Tire fits into drop centre rim.

Greater Strength and Durability

THE Ford Steel Spoke (Drop Centre) wheel is an advanced step in engineering and the result of exhaustive experimental tests. It is smart in appearance, extra strong, having a lasting finish, easy to clean and provides a simple method for mounting and demounting the tire without tools and in a fraction of the time previously required.

The steel rods or spokes, 1/4" in diameter, are electrically welded to rim and hub shell. The finish is enamel baked on steel. Possessing great resiliency and being one solid piece, these wheels have a sturdiness not approached by any other type.

The Ford wheel eliminates loose, squeaking spokes and rims, pinched tubes, chipped or peeling finish, necessity of tire flap, misalignment of tires due to carelessly mounted rims, and a host of other wheel and tire ills formerly encountered. It permits of easy steering and no drumming sound is created by the wind.

There is an enormous amount of careful work necessary to build strength and service into the Ford Steel Spoke wheel, and the results justify the engineering study and skill devoted to this feature of the Ford car.

Drive it Yourself—there is no Better Test

Ford Car Features
Choice of colours
55 to 65 miles an hour

U. F. W. A. CONFERENCE

The second annual conference of the U F W A was held in Tofield on July 23rd. The Birch Lake, Lamont, Minnesh, Bardo and Tofield bands were represented. About seventy five women were present altogether. Mrs. McNaughton our director occupied the chair. The meeting opened about eleven o'clock a. m. and a lively discussion followed, re the advisability of holding a conference every year. It was decided to make it an annual institution and to hold it on a day apart from other conventions the 3rd Tuesday in July was named as a very suitable day and next years conference will be in Vegreville on that day.

There was an exhibition of Home arts and crafts which proved interesting.

Next year a competition of the kind at this conference will be a feature of the day. Each local to exhibit a collection of ten articles of Canadian Handcraft. 1st and 2nd prizes will be given for the two best collections. The prizes will go to the locals.

The afternoon session was opened with an address by Mrs. Pryce, 2nd vice president of the U F W A. Mrs. Pryce spoke on the subject, "Building Up A Nation". This of course dealt largely with immigration. Mrs. Price has made an intensive study of this problem and presented a very interesting talk. She was pleased to answer a number of questions asked by the members of the audience.

This was followed by some community singing conducted by Mrs. Murray.

Mrs. Seale read a paper on "Making our organization more effective" and received hearty applause.

Mrs. Nees of Bardo sang very charmingly indeed and very graciously responded to the applause with an encore.

The Hn. Perrin Baker then appeared on the scene and gave a brief outline of the proposed changes in the rural educational system, after which the local ladies served tea and the meeting adjourned.

TOWN COUNCIL MINUTES

(Continued from Front page)

be was using sound judgement in driving 20 to 25 miles per hour on a road it was evident to anyone was under construction or repair and other motorists had been passing successfully immediately prior to his accident.

Moved by Councillor Wood, Councillor authorize secretary to send a letter of approval to Hamburg-American line re Albert Mertz's mother entering this country.

Some accounts were presented, passed and ordered paid.

Meeting adjourned to meet on August 3rd at 2 p.m.

TAKING A CHANCE

LOCAL AND PERSONAL

Miss Polly Napier is holidaying in the city and South Cooking Lake.

Mrs. Davison and family, W. Sinave and Mr. T. Shupe returned on Monday after motoring as far as Pine St. John.

Mr. and Mrs. Blasott sr., and Mr. and Mrs. Hamby and son of Edmonton were visitors at the Geo. Blasott home at Tofield last week end.

Miss Minnie Wood, formerly head telephone operator at Tofield has been transferred to the main office at Edmonton.

Mr. and Mrs. Abbot returned on Sunday after a two weeks holiday at Regina, Calgary and other points.

Mr. and Mrs. Reeve spent last week at Banff, the next two weeks will be spent at Sylvan Lake with the family.

Mr. and Mrs. Warner returned from their vacation on Sunday.

The Geo. McLaughlin and Calvert families are holidaying at Banff.

Miss Lovett Rose who has been holidaying, returned home on Thursday morning.

Mr. Clotterham and Blake are away on a week's motoring trip east.

The regular monthly meeting of Holy Trinity W.A. will be held at the home of Mrs. Baptie on Wednesday, August 7th at 2:30 p.m.

THE REWARD OF ENDEAVOR

This week the two exhibitors who made the best showing at the school fair last fall, will spend a week at one of the agricultural colleges. The girl who thus distinguished herself is Isobel Robinson and the boy, Thomas Jacobs. Tom will go to Olds and Isabel to Vermilion.

KETCHAMOIT

There will be no preaching services on Sunday school throughout the month of August. Rev. Gordon and family being away on their holidays.

Mrs. Davison and family, Messrs. Sinave and Shupe returned Sunday evening from their motor trip to the Peace River District.

Mr. W. A. Mitchell left Tuesday evening of last week for Bruce, where he is employed on the gas line.

Willie Ingram, Ralf Barnes and Albert Soens motored to cooking lake Wednesday for a few days outing.

Mr. and Mrs. J. McIlmtie, Mr. and Mrs. Henry Kallal and family, Mr. Ed Bruha motored over to Ryley Sunday evening.

Miss Viola Lee returned home Monday evening after a weeks visit with her friend Miss Bailey at Bashaw.

Lloyd Cockeon, son of Mrs. B. Cockeon had his tonsils taken out at the Camrose hospital on Tuesday.

Mrs. B. Wildman, Mrs. B. Cockeon and son, Misses Lillian Cullick and Gertrude Ingram, and Messrs Carlisle and J. H. Cockeon were Camrose visitors on Tuesday.

Rev. Mrs. Gordon and family were Sunday dinner guests of Mr. and Mrs. Wm Lee.

Mr. and Mrs. Pottage of Sedgewick visited their cousin Mrs. Chas Whitlam and family over Sunday after attending the Camrose Fair.

Mr. and Mrs. Ray Gunderson motored to Camrose fair Saturday afternoon being the guest of Mr. and Mrs. Harold Smith who accompanied them home Sunday, also Miss Marie Lawson returned home after a week's holiday spent with her aunt Mrs. Smith

Master Arthur and Billie Graves of Calgary are spending their holidays at the McMullen home.

Mr. and Mrs. John McGinnis entertained a number of guests Sunday in honor of Mr. and Mrs. Bradbury. Those present were, Mr. and Mrs. Bradbury, Miss Mabel and John Thompson, Mr. and Mrs. Maurice McGinnis, Mr. and Mrs. Henry McGinnis, Mr. and Mrs. Leslie McGinnis and Jason Henderson.

Mrs. John Brown entertained the W. A. S. at her home Wednesday afternoon of last week. A goodly attendance was present, who enjoyed the afternoon as it was more of a social gathering. A nice lunch was served by the hostess. The August meeting will be held with Mrs. Geo. Lawson.

U.F.W.A. NOTES

The regular meeting was held on July 25th at the home of Mrs. Phillips. About thirty members and visitors were present. Mrs. South gave the report on the convention held in Vegreville on the 19th. Mrs. Jas. Francis read a splendid paper on making salads and Mrs Barnes one on furnishing a room for girls.

These ladies were given a hearty vote of thanks. The next meeting will be held at the home of Mrs. Abernethy on August 8th. The roll call will be answered with what to do in case of poisoning.

Mrs. Geo. Francis will give a paper on well balanced meals.

The final arrangements will be made for the child welfare clinic on August 13th. This will be conducted by a public health nurse and is free of charge. All children under school age will be welcomed. Mrs. Hull, our invalid member would like a small scrap of wool dress goods from each member for a friendship quilt she is making. The pieces may be sent to Mrs. Hull direct or to the secretary, who will see that she gets them. Please pin a slip of paper to them with donor's name on so Mrs. Hull will know who sent each one.

LAKESHORE

Wm. Henry, Emil, Bessie and Alma Thedeman motored to Holden on Sunday and visited Mr. and Mrs. Chris. Thedeman of that place.

Mr. Geo. Abernethy and Maggie Wood motored to Viking on Sunday and spent the day with Mr. and Mrs. Homer Rollins.

Mr. and Mrs. Everett Noland entertained the Louise Noland, Thomas Noland and Carter families on Sunday.

Rev. Garden and family were callers at the Geo. Francis home on Tuesday.

Mr. Jack Johnston suffered injuries which will confine him to the house for several day when on Saturday his team of horses hitched to the morning machine ran away. He was thrown from the machine and one leg was cut and bruised quite severely.

Mrs. R. C. Phillips entertained the U.F.W.A. on Thursday of last week. About thirty members and visitors were present.

Mr. and Mrs. Jacobs attended the Cigarette Exhibition on Tuesday.

Nick Sherstiuke of Mundare was a visitor at the Phillips home on Tuesday.

KINGMAN

Mr. and Mrs. Oscar Simonson spend a few days in Edmonton last week.

Mr. and Mrs. Horte and family spent the week-end with Mr. and Mrs. John Nees of Edmonton.

A number of Kingmanites attended the Camrose Fair.

Oscar Thompson motored to Cold Lake on Friday.

Dorothy Scrimstead of Edmonton, is spending part of her holidays with her cousin, Dorothy Thompson.

Mr. and Mrs. A. Schultz and family spent the week-end with Mr. and Mrs. Carl Tallefson.

Mr. and Mrs. C B Shubert spent he week-end with Mr. and Mrs. Clausen of Camrose.

Mr. and Mrs. W. Hartscheon and children motored to Edmonton on Tuesday to meet the latter's mother, Mrs. Grave, formerly of England. Mrs. Grave has been travelling extensively since she arrived in Canada about a year ago, having journed from Edmonton to Panama, via Los Angeles, and then from the latter point to Edmonton. Mrs. Grave intends to make her home in Canada.

Carl and Allan Hartson of Edmonton visited at the E. Erickson home on Sunday.

CORRECTION

Moved by Councillor Verge that A. Williams be granted a lease for 1929 on the following road allowance between sections 21 and 22 and also that portion lying north of the lake between N.E. qr. of sec. 20 and N.W. of 21, all in Tp. 50, Rg. 20, w4.

FIRE DESTROYS MR. WARD'S HOME ON TOFIELD COAL CO'S. PROPERTY

On Monday, just after one o'clock the fire alarm was sounded in town, the outbreak being at the home of Mr. H. T. Ward, on the Tofield Coal Co's property just south of town.

A spark from one of the Diesel steam locomotives had lodged in the roof and in a short while a fire of considerable proportions was burning. The town chemical was taken out by fire chief P. Lethelma and while it was unable to save the house itself, it was instrumental in saving the garage and other buildings near by. The house burned to the ground but the furniture from downstairs was saved. Most of the furniture upstairs was a total loss.

There was a light breeze blowing and everything being very dry it was only a short time from the time of the alarm before the building was a smouldering heap.

There was some insurance carried.

VOICE RECITAL TO-NIGHT (FRIDAY)

Don't forget the voice recital to be given at the Variety Theatre on Friday night, August 2nd, by Miss Gudrun Ness.

Miss Ness has already pleased many audiences with her splendid singing and a rare treat is in store for those who attend. Miss Ness is a local girl who has recently graduated from St. Olaf's College, Northfield, Minn.

LINDBROOK

July 22nd, 1929

The recent rains certainly improved things here, but we need lots more yet, not that it will help the crops much now, but will freshen up the pastures a bit, which will reflect in the milk pails and fattening of the stock. The ground now has no reserve of moisture in it at all.

There is some talk of a meeting to be held somewhere here for the purpose of discussing the new sign up for membership in the livestock pool. The aims and object of this are well known, but there may be a few points on which you need enlightment so it will pay to attend same date and time will be notified by phone, notices, or in this paper when settled.

Mr. W. Glenn had the misfortune to lose a cow the other day, she seemed bone struck by an auto travelling we should imagine from the evidence of a remarkable speed. This happened not so far from Glenn's in fact they heard the noise of the impact, and by the time they could get out, they had disappeared. The stork was phoned immediately in an effort to obtain the number, but no car went past there. Shortly afterwards someone who didn't know of the accident saw an Edmonton service outfit towing a disabled car in, evidently the car. But! Lindbrook is not without "detortative" service, oh no! Just a little chap under 12 years old, and of a well known farmer here saw a car parked in the bush off the road and saw it was damaged, also blood on it so he took the number, so the "bush and scrub detroit" may hear of it yet, brought to book by a child.

Mr. B. Clarke and family have moved on to the Lasmster farm.

Mr. W. Gray has also moved to his quarter which adjoins it and at present is residing with the Clarke's.

We forgot to mention that the Lindbrook store has been repainted and does much beautify our city.

We hear that Miss Clara Abbott arrived safely in Scotland and is now enjoying the sights of Europe.

Mr. L. Hooper returned home from a trip taking in the Calgary Stampede and afterwards going to Banff. He reports it a most enjoyable trip.

Most of the folks here took in the obstacle race at Tofield also the Edmonton Exhibition.

Mr. P. Lepine shipped cattle per the stave truck last week and also took in the fair. Business and pleasure eh!

ARBIL CREEK

Mr. and Mrs. R. O. Berg entertained a number of young and older people last Friday evening. The time was spent in playing games and other amusement. A tempting lunch was served about midnight.

Mr. and Mrs E. A. Moen and family, Miss Ruby Berg, Lillian and Pearl Patterson, Marmon and Vilbert Anderson were all guests at the W. Anderson home north of Tofield last Sunday.

Mr. and Mrs. J. C. Olson and family and Mrs. J. B. Olson motored to Lamont last Sunday to visit with Mr. and Mrs. Blackburn.

Mr. and Mrs. J. Anneke, Hennie, Agnes and Maggie motored to Edberg last Sunday to visit home friends.

Mr. and Mrs. R. O. Berg motored to Viking last Saturday and visited with Mrs. Berg's sister north of town.

Gunvald Flaaten spent Sunday with friends at Miquelon Lake.

The Y.P.C. presented a program in the church last Sunday evening. The audience was not very large as many were away on other appointments.

Lilly Berg is visiting with Ellen Sand in the city for a few days.

Among those shipping cattle to the Pool on day, Tuesday, from Shanta are L. C. Olson and P. O. Flaaten.

The Pasterson young people and Nora Finley motored to the city last Monday.

Mr. and Mrs. E. A. Moen invited a number of young people to spend a social evening at their home last Monday evening.

Mrs. P. Flaaten and Gunvald and Lily Berg motored to the city last Monday and returned the same day.

A CAMPING VACATION

The school term ended, the roads in splendid condition the car running like a contented purr, is a combination that just naturally leads the thoughts of a camping vacation.

The people of Alberta are so fortunate in having many natural beauty spots a short ride from the back door, that the form of holiday is becoming most popular every year. It is economical and it is healthy if certain precautions are taken.

Care should be taken to find out of all drinking water is pure. If this cannot be assured then the water should be boiled or chlorated. The latter is a very simple proceeding, any druggist will supply the lime and gives the few necessary instructions.

If there is a baby or toddler in the party who must have milk, it is a wise proceeding to pasterize it. No one can be sure if the milk brought home come from an infection free animal.

Before diving into a likely looking hole for the morning splash be sure there are neither rocks nor posts. It would add to the safety if at least one member could swim well. Carry simple First Aid Kit.

Information on First Aid can be obtained free from the Canadian Red Cross Society, 407 Civic Block Edmonton, Alberta.

GOVERNMENT OF THE PROVINCE OF ALBERTA
Department of Public Works
Tofield Alta., July 22nd, 1929

Sir,—

I have the honor to make application for a lease of the following road allowance or public highway under the regulations prescribed with reference thereto.

The road allowance or portion of the public highway which I wish to lease is more particularly described as follows:

Road allowance on east side section 21-50-20. w4. and also the road allowance on west side of N.W. ¼, section 21-50-20 w4

The facts regarding the manner in which adjacent land owners, or the travelling public generally, will be affected by the closing up of the road allowance or public highway in question are as follows:

Road allowances are not opened and are impassable

I own the following land:
N.W. quarter 30-50-19, w4.
W. half section 21-50-20, w4.
N.E. 27-50-20 w4.
S.E. 28-50-20 . w4.

Your obedient servant.
A. J. Williams, Applicant.
The Minister of Public Works, Edmonton.

Make Every Dollar Count

The dry season is making it necessary for farmers to spend their money wisely and also to EARN AS MUCH AS POSSIBLE.
By bringing or shipping your cream to us you will be getting every cent there is in it. We give you the highest grade and test possible.
If more convenient we will call for your cream at the Farmer Supply Co. Ltd Store, where it can be left.
During the summer it is vitally necessary to take extra good care of your cream. Make an extra dollar by being extra careful.

"Z" Engine

—Biggest Value "dollar-for-dollar"
When you invest in an engine, the biggest value is the one that gives you the most dependable service, lasts the longest and costs the least over a period of years.
That's why a half-million farmers have bought "Z" Engines. These famous power plants are made in the world's largest and finest engine factory. The country's foremost engineers design and develop them. The "Z" has such features of advanced design as the new Fairbanks-Morse Rotary High Tension Magneto, built complete and fully guaranteed by Fairbanks, Morse & Co., and many other improvements.
Sizes from 2 to 20 horsepower. Come in and let us show you why the "Z" is the biggest dollar-for-dollar value!

Here and There

[illegible] act of goat getting [illegible] at Banff with 25 [illegible] Mountain goats trapped [illegible] in the same [illegible] July. They are enticed [illegible] by salt licks of which the [illegible] immoderately fond. Some are to add to the wild life of California others are for exhibition purposes and for zoos.

Concrete work on the new Saint John elevator has commenced and will require about 25,000 cubic yards of concrete. Grain business through Maritime Provinces ports is growing largely every year.

Statistics gathered by the New Brunswick Government Bureau of [illegible] and Tourist Travel [illegible] increase of 25 per cent. in [illegible] number of motor tourists from [illegible] United States entering Canada [illegible] points of this Province [illegible].

[illegible] has been received by J. M. [illegible] general publicity agent, [illegible] Pacific Railway, that His [illegible] the Governor-General of Canada will extend his patronage to the Canadian Pacific series of [illegible] concert tours of British and [illegible] music to be given across [illegible] commencing in the fall of this year and continuing until the spring of 1930.

Products of the fisheries of Canada in 1928 had a total value of $[illegible], an increase of $3,474,-[illegible] compared with 1927. These figures comprise the value as marketed whether sold for consumption fresh or canned, cured or otherwise prepared. The salmon fishery is the most important, with a total value in 1928 of $17,867,063.

The Canadian Women's Press Club, consisting of 100 delegates came by Dominion Atlantic Railway special to Digby recently stopping at Annapolis Royal and Grand Pre en route. A number of outstanding writers were in the party and all expressed their admiration of the Evangeline Country and the Annapolis Valley.

A notable beauty spot is being recalled to public notice this summer by the Alpine Club of Canada which is holding its annual camp from July 15 to July 31 on the site of the old railway village of Rogers Pass near Glacier, B.C., at the western opening of the Connaught Tunnel on the main line of the Canadian Pacific Railway. The camp commands a magnificent view embracing Mount Sir Donald, Mounts Macdonald and Tupper, the Illecillewaet Glacier and many other fine ranges and valleys.

On the first anniversary of their wedding, Mr. and Mrs. Cornelius Vanderbilt, Jr., recently left the Banff Springs Hotel in the Canadian Rockies for a motor trip through western Canada. He was most enthusiastic about the scenic scenery and accommodation in the Rockies.

SOME FACTS ABOUT BREAKING BROME GRASS SOD

(Experimental Farms Note)

Brome grass has a strong creeping root-system and is somewhat difficult to eradicate, particularly in moist seasons or on heavy soils.

For a number of years past three methods of breaking brome grass sod have been under test at the Dominion Experimental Farm, Indian Head, Saskatchewan. In each of these methods wheat follows the brome grass and oats follows the wheat.

In the first method the sod is ploughed early in the spring and summer-fallowed throughout the year. Taken over a five year period the wheat following this method has averaged thirty-five bushels to the acre and the oats fifty-six bushels. The brome grass in this case merely received a set back, recovering to a greater extent later.

In the second method a crop of hay was removed before the sod was ploughed, after which the plot was disked and worked as required. The wheat following this method averaged about twenty-one bushels to the acre and the oats forty-eight, while in addition, there were two tons of hay. This treatment only partially destroyed the brome grass.

The third method was by far the most effective in getting rid of the grass. This was similar to the second except that the plot was backsetted about the middle of September. The wheat after this method averaged twenty-two and a half bushels and the oats fifty-two, while there was a ton and three quarters of hay.

If the important consideration is to get rid of the grass the writer is of the opinion that two ploughings are necessary in the average year, the first being shallow, during a dry period of the summer and the second deeper, as late as possible in the fall. Much depends on the weather as a wet spell during the first ploughing may render the work useless.

CEREAL CROP FIELD DAY AT Dominion Experimental Station, Lacombe, Friday, August 9th

Although the year 1929 weather conditions are about the worst on record the crops at the Experimental Station have stood the severe test remarkably well. The trying crop season has brought out prominently the results of different methods of cultivation, different rotations and different varieties and more may be learned than in a really good year.

A cereal crop field day is being arranged for Friday, August 9th, at which addresses will be given by men prominent in various lines of crop improvement. During the day a trip will be made about the many lines of experimental work at the Station. Following a banquet at 6.30 addresses will be given by speakers who are recognized authorities on their subjects. This will be an interesting and profitable day for every one who can visit the station.

SWEET NOR'-WEST NIGHT

(By Harold F. Cruickshank)

I trod a path which led through peaceful vale,
Then on, to where the grainfields kissed the sky;
The sun's bright rays gave place, to shadows pale:
The day was done! The twilight hour was nigh.

A purple cloak was spread o'er path I trod;
The evensong of birds was muted low.
It seemed I walked within the realm of God,
A hallowed silence hushed all earth below.

No harshness came there in the wake of day;
No aftermath of toil to break the charm.
In silence did the shades of even' play—
With grace they skipped about my nor'-west farm.

I came to wooded copse; it was the home—
The sanctum of the squirrel and his love.
No movement there save prank of shadow-gnome,
Who, with his kindred, haunted every grove.

A softened zephyr, fresh from out the west
Bestirred the latent woodbine to impart,
A fragrance rare—a wealth of sweet delight.
I lingered there, with wildly pulsing heart.

And so the night, the sweet nor'western night,
A prince, who reigned with graceful sway,
Ruled o'er the earth—a monarch infinite,
From twilight hour, until the break of day.

WINTER SHELTER FOR FALL PIGS

(Experimental Farms Note)

As a result of experiments it has been found that there is little difference between inside and outside shelters for fall pigs. Expensive buildings are not absolutely necessary therefore uneconomical. Ordinary cabins well covered over with straw, or a straw pile will be found quite satisfactory. To obtain best results with fall pigs the sows should have access to pasture, preferably, late sown oats. Rape and fall rye sown towards the latter end of June make excellent pasture for young pigs at weaning time.

Experimental evidence at Indian Head also indicates that August and September are the best months to have fall pigs farrowed, therefore, it is important in the production of two litters per year to plan matings accordingly. To insure best results the spring litters should be farrowed in March or early in April to permit the breeding of sows for early fall farrowing.

During the fall and winter of 1928-29, twenty one pigs were divided equally into three lots. Seven were retained in a comfortable piggery, seven were wintered in straw-covered cabins outside, and the remaining seven were placed in a run with a straw pile for shelter. These pigs were fed the same ration throughout one hundred and eighteen days on trial. At the conclusion of the trial the lot housed in the piggery had made an average gain of 1.0 pounds per day. The lot in the straw covered cabins made an average gain of 0.90 pounds per day, and the lot allowed to run at the straw pile showed an average gain of 1.05 pounds per day.

It is obvious from the results at Indian Head which cover a period of years, that fall litters (August and September) can be housed and fed quite economically in outside shelters. The main consideration is to keep sleeping quarters clean, dry, well bedded and free from unnecessary draughts.

Over a Century in Railroading

Sixty-one active years in railroading is the unique record of W. J. Grant, district freight agent of the Canadian Pacific Railway at Hamilton and this length of service is claimed never to have been reached by any other railwayman in the Dominion. Mr. Grant has just retired and 46 of his 61 years of service have been with the C.P.R. At the same time Mr. J. P. Clancy, assistant foreign freight agent of the C.P.R. at Toronto, has also retired after 45 years of service with the Allan Steamship Line and the Canadian Pacific. Between them they have completed 106 years in railway service. Photographs show, left, Mr. Grant; right, Mr. Clancy; below, J. W. Maguire, who succeeds Mr. Grant as district freight agent at Hamilton.

THE PROPOSED RURAL SCHOOL CHANGES

(1) SCHOOL DISTRICTS.

The school district, as at present constituted, will continue to be the basic unit of organization. Its present property, assets, and liabilities will in no way be affected. The local board will retain all its present powers and duties, except with respect to engaging and paying the teacher. Local funds will therefore be needed. The local board will make up its annual budget and requisition the amount from the municipality, or in case the district lies in an improvement district, from the Department of Municipal Affairs. The municipality or the Department will make the necessary levy and pay the money of the local board, as is now done in collecting municipalities.

(2) DIVISIONS

Larger units of administration will be established, by grouping the 3,000 rural school districts of the province in twenty divisions of approximately 150 districts each.

In each division there will be a board of five directors elected by the ratepayers. These divisional boards will have the engaging, placing, and dismissing of all teachers in their respective divisions. The directors will be paid a per diem allowance and mileage.

Each division will have its superintendent, who, with two assistants or supervisors, will constantly supervise the work in the schools.

The superintendent will advise the divisional board with respect to all appointments and dismissals. The authority, however, will be vested in the elected boards.

The superintendent will direct the work of supervision, and will be jointly responsible to the Minister and the divisional board for the efficiency of the schools and the general progress of education within the division. He will be the representative of the Department of Education, replacing the inspector, and will be appointed by the Minister, after consultation with the divisional board, and paid by the Government. The supervisors will be appointed in the same way and paid out of Government grants.

(3) ONE GENERAL TAXING AREA

For raising the money for teachers' salaries, the twenty divisions will unite, forming one taxing area embracing all the rural districts of the province. There will be a general board, composed of twenty chairmen of the twenty divisional boards. This general board will fix the rate of pay for all rural school teachers, draw up its annual budget, fix a common mill rate for the entire area, and then requisition the money from the municipal authorities. Each division will send in its monthly time sheet and the pay cheques of all rural teachers will be issued from the general office.

The levy will be made on the equalized assessment for the supplementary revenue purposes, and the machinery now in use will be employed for collection. Every ratepayer will receive but one tax notice. It will show all his taxes, whether provincial, municipal or school. Each tax notice will show two school rates the local rate, varying in accordance with local needs as determined by the local boards; and the general rate, uniform throughout the entire area comprising the rural school districts of the province. The proceeds from the local levy will be paid by the municipality to the local board.

The general levy will be used by the general board for the payment of the salaries of all rural teachers, both elementary and high school. School grants, including equalization grants, will still be paid by the province, going into the general fund for the payment of salaries. Grants to some of the weakest districts are as high as $828 per annum.

Elections

(1) Local boards will be elected in the same manner as at present.

(2) Divisional boards—Some time in the fall there will be a convention of the division, to which each local board will be entitled to send one accredited delegate. All matters having to do with education throughout the division will be proper subjects of discussion at these annual conventions. At a fixed hour the delegates from each of the five wards into which the division will be divided for election purposes will be segregated and will nominate candidates for the board of directors of the division. The names of the persons so nominated for each ward will be voted upon by the electors of all the districts composing the ward, at the annual school meetings of the local districts. The ballots will be sent to the secretary of the division, counted and result announced.

(3) The general board will be composed of the chairmen of the twenty divisional boards.

The rural administrative system will then consist of:

(1) School districts as at present constituted.

(2) Divisions—twenty in number, each embracing approximately one hundred and fifty districts.

The corresponding administrative authorities will be:

(1) The existing local boards.

(2) Divisional boards of five directors.

(3) A general board composed of

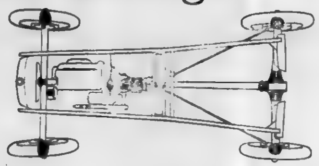
24 BALL and ROLLER Bearings



Reduces Friction and Makes for Ease of Operation

LAVISH use of ball and roller bearings in the Ford car greatly reduce friction and contribute to easier operation and longer life of the car. Note the coasting ability of the Ford car as compared to any other automobile in its weight class.

Examination of the chassis will at once show the advantages of these bearings. On the rear axle pinion and differential all the taper roller bearings are held to such close limits that adjustment is unnecessary, pinion and ring gear always being held in proper mesh.

Spiral roller bearings are used in the rear hub because of their large bearing surface and ability to carry heavy loads. One is also used on the drive shaft at the universal joint end, to assure perfect alignment.

Taper roller bearings in the front wheels have a simple adjustment. Roller thrust bearings on the spindle bolts make for easy steering. Two bearings, one above and one below, take up the thrust on the steering worm.

The fan shaft operates on a roller bearing. The generator, the transmission, the connection between the spline and drive shaft, the clutch, the flywheel—all these important parts are made more efficient and enduring through the use of ball and roller bearings.

These bearings form a striking illustration of the engineering skill and care used in building the Ford car.

Drive it Yourself—there is no Better Test

(Continued from page 4)

the twenty chairmen of the divisional boards.

The powers and duties of the several authorities will be as follows:

(1) The local boards, except with respect to the employing and paying of the teacher, will retain the powers and duties they now possess, including the control of religious instruction and the teaching of languages other than English.

(2) The divisional boards will be responsible for the engaging and placing of teachers throughout their respective divisions. To assist them in this they will have at their command the professional knowledge of schools and teachers possessed by the superintendents and supervisors. Other functions, not now being performed, will in time be taken on by the divisional boards.

(3) The provincial board will establish a salary schedule applicable to all rural teachers. It will fix the initial salary to be paid to the holders of the various classes of certificates, the conditions on which increases will be given, based on experience and efficiency, and set the maximum. It will annually draw up its budget, strike the mill rate required and requisition the amounts from the municipalities. It will appoint a competent secretary-treasurer, and send out from its office the monthly pay cheques of all rural teachers.

BARRHEAD FARMERS SMILE 35-BUSHEL WHEAT IN VIEW

With 35-bushel wheat crops expected on many farms, agriculturists in the Barrhead district at least are not spreading any "blue rain" gospel these days.

Great everywhere as in the district looks good, according to C. G. Austin, manager of Empire Life Assurance company, who has returned to Edmonton from a tour of this locality, in the Barrhead district at least are not spreading any "blue rain" gospel these days.

Mr. Austin brought to the city a sample of wheat 4 feet two inches high and with well-developed heads, taken from the farm of Louis Holm, three miles northeast of Freedom.

Mr. Holm has seventy acres of wheat like this, according to Mr. Austin, and he expects a yield of at least 35 bushels per acre. Many other farmers in the district have equally high hopes.

Around Clyde, crops are also good, states Mr. Austin, and both here and in the Barrhead district a real spirit of optimism prevails.—Edmonton Journal.

RETCHAMONT

July 22nd, 1929

Chautauqua has come and gone another year and we are pleased to hear it is coming back. About one third of the people attended and all years well satisfied with the program and thought that they were better than former years, also the splendid rain at the opening and sunshine and good roads afterwards helped to make a good chautauqua spirit.

Miss Hazel Sears was employed at the Lake office during the chautauqua week.

Mr. Harris of Lamont was guest of her sister Mrs. A. Harrison Chautauqua week.

Born—To Mr. and Mrs. James Sutton on Sunday July 14th a little daughter.

Mr. Roger Ray and family stayed at the parental home over the week of chautauqua.

Mr. Groves, Mrs. E. McMullen, Mrs. J. H. Ingram and daughter Kathleen, Mr. and Mrs. C. Coombes and family, Will Ingram and Johnie Green motored to Bawlf Sunday to spend the day at the Archie Brown home

Mr. and Mrs. Wm Lee, Viola and Lorne, Mr. and Mrs. Herman Lawson and family, Mr. C. A. Ingram and Christy Sears attended the Edmonton Exhibition one day last week

Mr. Jim Johnson brought his breaking outfit home on Friday from near Killam.

Mrs. Howard and daughter of Lamont are visiting at the Harrison home. Mrs. Howard and Mrs. Harrison are sisters.

Miss Mabel Lawson and niece Marie Lawson were passengers to Camrose Friday to visit at the Harold Smith home. Miss Marie stayed for a week's holiday with her aunt, Mrs. Smith.

Miss Mildred Ingram spent two weeks with her friend Mrs. Art Young of Tofield.

Miss Helen Schultz spent chautauqua week with her aunt Mrs. J. Appleby.

The Kingman Junior ball team and Ketchamont Junior team played ball on the Ketchamont diamond Monday evening. Quite a large crowd gathered to see the game which caused quite interesting judging from the fans. At the finish the scores were 13-5 in favor of Ketchamont

Miss Gertrude Ingram was the guest of her friend Miss Lena Bowlby during chautauqua.

Mr. R. Wildman has been a patient at the Camrose hospital for some time, where he underwent an operation and he will undergo a second operation as soon as he is able.

Mrs. Henry Sutton was confined to bed for ten days, she being threatened with a stroke, but is now able to get around a little.

Miss Hazel Sears along with the other C. G. I. T. are enjoying a ten day holiday camping at Cooking Lake.

Miss Viola Lee returned Tuesday for Bashaw for a few days visit with her friend Miss Bailey

Paul Thompson commenced work as junior clerk in the local branch of the Bank of Montreal this week.

Moved by Councillor Verge, acquisition of cancelled road allowance between the S.E. 13-51-21-w4M and ner. 7-52-20-w4M, be sold to Mr. Alex McDermid for $5.50 per acre, approval already having been granted by Department of Public Works.—Carried.

Moved by Councillor Verge that Alex Morrow be granted restaurant license, together lots 16 and 17, Sb. 7, North Cooking Lake.—Carried.

Moved by Councillor Wood that Peter Hamlin's account for relief to him during 1928 and 1929 be charged against the Tofield Municipal District.

MR. B. P. WILSMAN PASSES AWAY

We regret to announce the death of Mr. B. P. Wildman an old time resident of this district.

The unfortunate event we were expected as while he was in the Camrose hospital having undergone an operation, he was considered to be progressing as well as could be expected. He heart, however, was unable to stand the strain and he passed away last Wednesday evening.

Mr. Wildman was born at Croydon, England and came to Canada in 1887. He has been a resident of this district for the past 22 years, and while he was of a quiet and retiring disposal then, he has made many real and permanent friendships.

He leaves to mourn his loss, a wife and one daughter, age seven years.

The funeral was held on Friday last, the service being conducted by the Rev. Lovereday, in Holy Trinity Church (Anglican).

There were many present to pay their last respects to the departed and the flowers were numerous and beautiful.

Interment took place in Tofield cemetery.

VOICE RECITAL

On Friday night last at the Variety Theatre, Miss Nona of Bardo, gave a voice recital.

Miss Nona sang charmingly and received hearty applause at the conclusion of each number.

Unfortunately there was only a very few present, the programme clashing as it did with other attractions before they, the Council, will consider any liability.—Carried.

The following was the programme:

Classical Group—

1. Ahl Je ruis virre (Romeo and Juliette), Gounod.
2. Elizabeth's Prayer (Tannhauser), Wagner.

Sacred Group.

1. Here Lovely are The Dead, Hugo. Liddie.
2. Just For Today. Abbott.
3. Alleluja. Mozart.

Folk Songs

Fairest Summers (Swedish)

The Sandman (German).

The Last Rose of Summer (Irish).

Group by more contemporary—

Danny Boy by Weatherby

Little Jack Horner by Herelu.

The Sweetest Story Ever Told by Stults.

As We Part, by Bayefeits

Mrs. D. Thompson has been visiting in Rosalind for a week

Mr. A. Brenneman motored to Holden on Wednesday.

Mr. and Mrs. Sam Olson of Sedgewick, were visitors with Mr. and Mrs. Tommy Welsh on Wednesday.

Miss Mavel Simonson of Coronation arrived in Kingman on Friday. Mabel and her mother, Mrs. P. Simonson left on Sunday for a trip to Grand Prairie.

Visitors at the Roy Modrick home on Thursday evening were Mr. and Mrs. Chas Lindberg, Mrs. C. Kortman, of Edmonton, and Mr. and Mrs. E. Erickson.

Mr. and Mrs. C. Benning and family of Camrose, visited with Mr. and Mrs. Thor Bierte on Friday evening.

Ed Tuffelson motored to Cold Lake on Friday.

Monroe, Ina and Pearl Kortzman of Edmonton are visiting at the A. Lindberg home.

Mr. and Mrs. E. Linden and son, and W. Rehn, of Edmonton, visited with Mr. and Mrs. E. Erickson on Friday.

Mr and Mrs. Thor Berte and son, and Mr. and Mrs. Andrew Johnson motored to Obetaha on Sunday. Mr. Berte will attend the Wheat Pool Convention in Calgary at the same time.

Mr. and Mrs. Oscar Thompson and family motored to Banff on Sunday, where they will stay for a week.

Evelyn and Vivian Berte are visiting with relatives in Edmonton for a couple of weeks.

Mr. and Mrs. W. Hartzehen and family and Mrs. Grace were dinner guests with Mr and Mrs. J. Erickson on Friday.

Mr. Crockett, of Edmonton, is visiting for a couple of weeks with Mr and Mrs. Jack Erickson.

BARDO

Miss. Irene Rode returned from a two weeks camp at Cooking Lake on Monday.

The services at the Mennonite Church last week were very well attended. Mr. Derstine is an eloquent speaker and his sermons were much enjoyed.

Little Corrine Beadsheal had her tonsils removed at the Camrose Hospital last week. We are glad to report that she is feeling fine again.

Mr. and Mrs. S. Johnson, and Mrs Eggen returned from Saskatchewan on Friday. They report a lovely trip.

Mr. and Mrs. Kauffman and sons, Loyal and Joseph, returned from an extended tour of the central States, last Friday.

Miss Betty Ness returned from Grand Prairie on Saturday.

Mr. Haine Haukstad and Ole Hegeland of Grand Prairie were Bardo visitors last week. They left for Banff on Monday.

A number of Bardoites motored to Camrose on Wednesday last, to work on the grounds at the Camrose College. A number of ladies were also, and served a tempting dinner and lunch, making it, altogether, a very satisfactory day.

Mrs. Adelia Andersen returned from a weeks stay at Wetaskiwin, on Saturday.

Mr. Leon Sparrow, of London, England, was a visitor at the Jensing home a few days last week, while enroute for Vancouver.

Miss Gudrun Ness will give a recital at Bardo church on Sunday evening, August 17th.

Mr. and Mrs. Ole Hegeland motored to Camrose on Wednesday last, to attend the Variety Theatre on Pan Films latest roaring drama of the west, "Taking a Chance," featuring those youthful cowboy, Rex Bell

Who is this lone bandit that defies, single handed, the bad men of the west"

Rex Bell, as Joe Courtney, the happy-go-lucky cowboy, who joins the preacher to establish a mission in Calmony Gulch, a tough border town, aware that he will capture "The Law of Fear," dead or alive and remove support from the head of his aged partner

A thrilling ride through the night, a vow of vengeance on the part of Joe and the tracking of the famous bandit only to discover it is the girl he loves, are high points in the story.

It is based on "The Saint of Calmity Gulch," by Richard Bret Harte.

LAKE SHORE

Born on August 2nd, to Mr and Mrs. Joe Jones, a son.

Mr and Mrs. Thos Noland and sons Everett and Lester left by motor on Saturday for Oregon, where they will visit their daughter and sister Mr. and Mrs. L. Reinhardson for two or three weeks.

Mr and Mrs. H. Rose of Lindbrook visited friends in the district on Sunday.

We extend to Mrs. Widman and little daughter the sympathy of this community in their sad bereavement

Omar Pollock was a Sunday visitor at the R. C. Phillips home.

Mrs. T. Shields of Orville spent Monday with Mrs. Everett Noland.

Mrs. R. C. Phillips and sons and Mrs. Jos. Barton motored to Vegreville on Wednesday and attended the exhibition being held there. Mrs. Morton and Mrs. Phillips had a number of entries in the needle work section and were successful in winning a number of prizes.

Miss Jessie Stevens of Edmonton is spending a few weeks at the Bethel home. Miss Stevens taught at the Lake Shore school for a year or two some eleven or twelve years ago.

Neal Phillips was successful in passing seven out of nine subjects in the departmental examinations.

Work on the new school house is making good progress and the district will soon have a building of which it may well be proud.

Born.—To Mr. and Mrs. J. Jones, on August 2nd, a son.

The W.M.S. of the United Church will meet with Mrs. Lorbecke on Thursday, August 15th, at 2 p.m.

KETCHAMONT

The monthly meeting of the W.M.S. will be held next Wednesday, August 14th at the home of Mrs. Geo. Lattman. A cordial invitation is extended to all.

Friends of the Widmans family were very sorry to hear of the death of Mr. Widmans and extend sympathy to Mrs. Widmans and little daughter

Mr and Mrs. J. Younie and Mrs. D. H. Mitchell of Edmonton motored down for the funeral of the late Mr. Widman on Friday.

Mr and Mrs. John McGinnis were guests of Mr. and Mrs. C. C. Ingram for dinner on Sunday.

Mrs. J. J. Hamilton and little son and sisters Eunice and Lois Mellett of Calgary are spending a week's holiday with their grandparents, Mr. and Mrs. Frank Hull and aunt, Mrs. Al Barnes

Miss Hilda Nomeland is spending her holidays visiting friends at Grande Prairie, also at the home of her parents Mr. and Mrs. S. Nomeland

Mrs. D. H Mitchell of Edmonton is spending a few days with her friend, Mrs. L. Widman.

Miss Viola Lee spent the week end visiting her friend Mrs. V. D. Ferguson of Lakesbury.

Mr. Lyle Gladwin and two boy friends motored through from Vancouver and spent a few days at the Jack Mellett home.

Miss Hazel Sears returned home on Wednesday evening after a pleasant camping trip with Cooking Lake

MYSTERIOUS BANDIT REPORTED NEAR HERE

"The Law of Fear," mysterious masked bandit, will thunder through the screen next Saturday at the Variety Theatre on Pan Films latest roaring drama of the west, "Taking a Chance," featuring those youthful cowboy, Rex Bell

Who is this lone bandit that defies, single handed, the bad men of the west"

Rex Bell, as Joe Courtney, the happy-go-lucky cowboy, who joins the preacher to establish a mission in Calmony Gulch, a tough border town, aware that he will capture "The Law of Fear," dead or alive and remove support from the head of his aged partner

A thrilling ride through the night, a vow of vengeance on the part of Joe and the tracking of the famous bandit only to discover it is the girl he loves, are high points in the story.

It is based on "The Saint of Calmity Gulch," by Richard Bret Harte.

Make Every Dollar Count

The dry season is making it necessary for farmers to spend their money wisely and also to EARN AS MUCH AS POSSIBLE.
By bringing or shipping your cream to us you will be getting every cent there is in it. We give you the highest grade and test possible.
If more convenient we will call for your cream at the Farmer Supply Co. Ltd Store, where it can be left.
During the summer it is vitally necessary to take extra good care of your cream. Make an extra dollar by being extra careful.

Low Cost Vacations

Possible for thousands of Residents in Western Canada

IN ARRANGING low fares for prairie residents we regard this part of our work as a great and important public service, always ready with men, equipment plus the experience which enables us to care for any movement with smoothness and efficiency.

THIS SUMMER—escape for a little while from the dull sameness of succeeding days. Our low fares from May 15th to Sept. 30 (with a final return limit Oct. 31, 1929) make it easy.

OUR TRAINS pass through a territory replete with scenic grandeur; of historical and educational value to the traveller. Nothing superior to our sleeping and dining car service. Radio, an added feature on through trains.

Job Printing

Every business man requires a certain amount of printed matter. Such things as Letterheads, Envelopes, and Statements are as necessary to modern business correspondence as a telephone is to a modern business office. The Mercury Office is equipped to turn out all kinds of job printing. The next time your supply is running low, call us up and a representative will be at your place of business in a short time to receive your instructions and take your order. Prices fair and just.

"Z" Engine

—Biggest Value "dollar-for-dollar"

When you invest in an engine, the biggest value is the one that gives you the most dependable service, lasts the longest and costs the least over a period of years.
That's why a half-million farmers have bought "Z" Engines. These famous power plants are made in the world's largest and finest engine factory. The country's foremost engineers design and develop them. The "Z" has such features of advanced design as the new Fairbanks-Morse Rotary High Tension Magneto, built complete and fully guaranteed by Fairbanks, Morse & Co., and many other improvements.
Sizes from 2 to 20 horsepower. Come in and let us show you why the "Z" is the biggest dollar-for-dollar value!

SUGGESTIONS ON HOW TO HARVEST

The short strawed crop found at many points in the province this year has brought many farmers face to face with the problem of how best to save the crop which they have. They are anxious to save what feed they can and also to secure every possible bushel of grain and that without undue expenditure for equipment, which may be of little use in average seasons.

As a result of this condition active steps are being taken by the Alberta Department of Agriculture to meet the situation, and the following announcement by the Hon. George Hoadley, Minister of Agriculture, will be of great interest to farmers who are faced with this problem.

Many of the farmers in the south several years ago had to meet the same problem and solve it without the expenditure of much capital. A few leaves from their experience may be of value now to those faced with similar conditions.

The ordinary grain binder is but poorly adapted to the harvesting of such crop. Some of the cut grain is lost in elevating and more by the time it passes the packers; sheaves are poorly bound or not bound at all with the result that much of the grain is lost in handling. To overcome the drawbacks of the binder for harvesting such grain, the header has been invented and is now used extensively in some districts, but since the present conditions are not likely to be soon repeated, the purchase of headers would not be justified. It is possible however, to make certain changes in the binder at low expense that will enable it to do similar work to that done by the header. Such changes are outlined below:

First remove the sheaf carrier and binder parts and the idle roller. An extension elevator is then added to the ordinary elevator, so that instead of using only one elevator canvas three are employed. The front and rear sides of the extension are built similar to the original elevator. The drive is from the upper rollers of the extended elevator. This drive is secured by bolting to the upper front end of the extended elevator another gear assembly like the one on the upper front of the short elevator. The two gear assemblies are connected by a square rod with a universal joint at each end. It will be found necessary in the upper gear assembly to key the front end of the lower elevator roller shaft to the gear otherwise the gear would unscrew from the roller shaft, as the strain is reversed on the threads. This may be done by drilling a hole into the roller shaft and half into gear. Tap the hole, and screw in a bolt for a key. The lower end of the extension elevator is hinged on one bolt at each side to permit of flexibility in up and down motion. The extension elevator is suspended in proper position by means of a rod attached to a bail at the upper end. The rod extends from the hole to the platform frames behind the grain wheel.

It is an advantage to increase the speed of the canvas to insure more effective delivery of the grain. This is effected by wrapping the driving rollers with one thickness of narrow belting and by putting on a speed sprocket, which can be secured from the various machine companies. In order to brush the heads on to the platform canvas more effectively and keep the guards clear the reel slats should be widened about three inches by nailing on them some flexible material such as linoleum or very heavy canvas. A more durable arrangement is to hinge another reel slat to each regular one by means of three narrow strips of belting. For windy weather a canvas hood may be attached over the upper end of the elevator.

Two ways of handling cut grain are suggested. The one involving the least expense for equipment requires the use of ordinary wagon racks as receptacles for the cut grain, a wagon being drawn along the side of the converted binder. It will be necessary to make the bottom, sides and ends of the rack tight, and it may be advisable to lower the side of the rack next the binder, so that the elevator may project well above it.

Two such racks would be necessary so that while one is unloading the grain at the stack the other would be in use with the binder. Stacks of headed grain are usually built rather narrow—10 or 12 feet—but may be as long and high as convenient. Spoilage in stacks is very infrequent unless a lot of green weeds are cut with the grain, provided of course that the grain is reasonably mature.

The other method of handling the cut grain calls for the use of what is known as a header-barge which has been in successful use for several years in sections of the province.

The barge is specially constructed portable form about seven feet square which moulds the stack as the grain pours into it from the binder. A man in the barge spreads the grain and tramps it, and when it is full and topped off, making a stack about eight feet high, the barge is tilted back and the grain is slid out. The stacks are left with perpendicular sides and tops that shed the rain. The grain cures well in these small stacks and produces a good grade.

There are three ways of threshing these stacks,—first they may be arranged in groups so that the separator may be set among them; second they may be placed in rows and a portable thresher or combine move from stack to stack, or third they may be arranged in rows and moved by means of a pull rake or other contrivance to the separator.

Those interested in building a barge may secure blueprints and specifications by writing to the Department of Agriculture, Edmonton.

Elevator extensions ready for attachment to the binder may be secured from a number of farm machinery companies in the province, or the average farmer may construct this equipment himself at a very reasonable cost, and the necessary expense will be repaid many times over in the additional amount of grain saved by harvesting in this way.

A number of machines are being equipped for demonstration purposes and these will be located at various points in the province. These may be seen during the coming week at Vegreville, Vermilion, Sedgewick, Coronation, Camrose, Swalwell, Stettler, and at the Provincial Government Farm at Oliver. Each of the machines will be in charge of a representative of the Department of Agriculture who will be glad to assist farmers in the district in similarly adapting their binders to harvest short grain.

SIXTH FORTNIGHTLY CROP REPORT

Issued By Department of Agriculture, Government of Alberta, Edmonton, August 3rd, 1929.

Cutting of wheat will start early next week and will be fairly general a week later in a number of districts in the province, according to telegraphic reports received on Friday by the Department of Agriculture for the sixth crop report of the season. Winter wheat cutting is well under way in the south of the province and a very satisfactory yield is reported. A good crop of spring wheat is also ripening and will yield as high as 30 bushels to the acre in some southern districts.

As the result of continued dry weather and hot winds during the past two weeks the prospective yield particularly throughout the central part of the province, has suffered a further reduction. The wheat crop especially has been affected and much of the grain is so short in the straw that it cannot be harvested satisfactorily by the ordinary methods. The Department of Agriculture, however, is demonstrating at a number of points in this area a binder attachment which will make it possible to save practically all of this short grain and many farmers are adopting this system with very satisfactory results.

Encouraging reports are received from the Peace River where the crops have been improved by additional rainfall. The oat crop in the north gives promise of a good yield of a quality suitable for seed.

The livestock situation has been affected in some sections of the province and cattle are being disposed of in view of the limited prospect of winter feed. In a few districts it will be necessary to make provision for additional feed to carry breeding stock and work horses over winter, but arrangements can be made to ship this in from localities where hay and feed have been less seriously reduced.

Cutting of the second crop of Alfalfa has startd in the south, and a somewhat lighter yield than usual is being put up. Sugar beets are being irrigated regularly and a good crop is promised.

HOW TO VISIT THE EXPERIMENTAL FARM

(Experimental Farms Note)

A visit to an experimental farm should be pleasurable. It should also be highly profitable. The degree of of pleasure and profit will depend largely upon how it is undertaken.

To wander casually about the premises looking at things without learning their scope or purpose, nor the significance of accumulated data, is to make the least of the opportunity. Greatest benefit can be derived only under the guidance of some one competent to explain the work.

The writer has never forgotten his first visit, as a boy, to the Ontario Agricultural College, upon one of the annual farmer's excursions. After luncheon, followed by an awakening address by President Mills, Professor (now Dr.) Zavitz took the excursionists through the field plots, uncovering a wealth of data and inspiring an eager interest in what was to be seen. The late William Rennie discussed "June conditions in the winter stable" and so on. These men had the fervor of zealots and created an undying impression of knowledge, enthusiasm and hope. A visit to any experimental farm should yield something like that.

To this end group attendance is necessary. In most cases tens of thousands of people visit each of these institutions annually. Desirous as are the staffs of meeting and greeting the public, it is a physical impossibility to give adequate attention to all individuals visitors.

On the other hand large crowds are unwieldy. The people scatter too much and get out of hearing.

The ideal way is to organize a neighborhood group, a number of schools, a club or any body with common interests, and visit the institution at a time appointed, taking along a picnic luncheon to be eaten on the grounds.

A whole day should be spent and if there are phases of the work in which the visiting party are especially interested the staff should be advised of this in advance.

Arrangements can usually be made to give special attention to such groups and the pleasure will be mutual.

There is something to learn at each of these institutions. Resolve to learn it. Follow the explanations. Ask questions. Listen and observe. The zest of learning and comparing notes will add keen interest to the occasion.

When a man ceases to learn he commences to wither. Let us keep alive.

TENNIS STARS TO VISIT CAMROSE

Dr. Jack Wright and Willard F Crocker, by all odds the greatest Canadian tennis players of today and for the last several years mainstay of the Canadian Davis Cup team will appear in Camrose on Friday, August 16th, in a series of singles and doubles matches at 6:15 p.m.

The two great players are making a tour of Alberta under the auspices of the Alberta Lawn Tennis Association, the object being to carry into all corners of the province an idea of tennis as it is played in the "big time" and to encourage the younger players to develop their games so that Canada will have ample Davis Cup material for the future.

Dr. Wright is the present Canadian singles champion, having won the title for the second time, by defeating Frank Shields of New York at Toronto on Saturday last. With Crocker, Wright also won the doubles title which they have won together several times. Crocker is a former Canadian singles champion.

Both players have many fine victories to their credit. Wright, in Davis cup play has defeated such stars as Takeichi Harada, who a short time before had defeated Rene Lacoste and has taken the giant Gerald Patterson, twice Wimbledon winner to five sets. Crocker's victories and matches have been equally impressive.

The two Davis Cup players are touring in company with Cecil Gould, noted Edmonton tennis organizer, who is acting as tour manager and with Andrew A. Menzies, secretary of the Alberta Lawn Tennis Association acting as tour secretary.

DISAPPOINTING

THE PEOPLE of Tofield and immediate districts certainly cannot be congratulated upon the attendance at the Variety Theatre on Friday night last when Miss Gudrun Ness gave a song recital.

Quite frequently, one goes to events of this kind, not so much for the brilliance of song presentation but to support and place one's approval on high merit and endeavor. Especially so when the performer is of local birth and early education. In this case however, it was not necessary to assume the role of martyr in a good cause, for as regards last Friday nights meagre attendance, the loss was not so much the management's, but rather the loss of those who did not attend. Not to hear Miss Ness sing was a much greater loss than fifty cents will cover.

It is often said that there is no sentiment in business, which is sometimes true. It depends upon the men and business concerned. But we are of the opinion that business in its entirety is not absolutely logical and cannot be confined strictly to the realms of arithmetic.. Friday night last, gave Tofield an opportunity of solidly supporting Bardo's buckling star, and with the exception of very few indeed, the opportunity was missed.

Miss Ness and her accompanist went through with her program before less than two dozen people with the same fidelity as if there were two hundred; this in spite of the fact that it is harder to sing to empty seats than full ones.

Those present however, were more than pleased with the renderings, and if the applause was not exactly "thunderous" it was hearty, spontaneous and prolonged.

We venture to say, were Miss Ness again to appear in Tofield, there would be a different story to tell.

"SEGREVILLE"

Vegreville is, as well it might be, pretty well "het up" over a recent article in the "News of The World", a London, Eng., newspaper. The article in question describes the town as being a hotbed of vice, horse and cattle stealing, conditions being so bad that the (evidently few) remaining respectable people have banded together to help the "mounted police" to maintain law and order. That the report is ridiculous in the extreme is without question. Nevertheless, the News of the World has a very large circulation in England and probably numbers running into millions read the article in question.

The Observer, Vegreville's newspaper, of course defended the town in an editorial but the article was so outrageously ridiculous that one could not attack it with logic. The unfortunate feature is that while stories of rampant vice, horse and cattle stealing, and vigilant committees in connection with Vegreville are ridiculous to Alberta people they are not so ridiculous to English people. It is a common trait to believe ill of people and doubt their goodness, and moreover humanity is very credulous. As may be surmised by those who know Vegreville and district the "News of the World's" article was directed towards what many are pleased to dub the "foreign" population, and in replying to a correspondent who asked for stronger newspaper retaliation on the part of the Observer, Editor Horton writes to the effect that it was probably part of a concerted attack upon the nationality of the majority of the people of his district.

Quite likely the Observer had in mind the series of articles sent out last year by Bishop Lloyd of Saskatchewan. These articles were received and read by us, but not published by us. The Bishop without question is a very estimable gentleman and a great deal of truth was contained in his article, yet there is a great deal more to changing these prairies from vast unproductive plains to cultivated producing units, than zealous patriotism. Of course if it were possible to people these prairies with a portion of the well to do people in England, and have fine homes on every quarter section or half section, it would be better than seeing numerous log houses, mud plastered and whitewashed. At least it would be preferred by an Englishman. At the same time, so far, we have not heard of any preference being given to a non British subject when it comes to homesteading—the first man to file gets it. The fact of the matter is, the development of the country demands the payment of a price either in money or a life's labor. Very few people put in money—but many put in labor. So far, perhaps due to a lower standard of living, central and southern Europeans have been more willing to take up this burden of a life's labor than Britishers, but the opportunity has been open to all. The one shining feature is the splendid example those Britishers who have "lived the life" give us. When the Britisher does set out to transfer virgin lands to cultivated fields and create a home, he does so with a thoroughness and finesse that is pleasing to behold.

There is another angle to this. Great Britain has been built up not only by those who stayed at home but also by those who came away—not always from England. For decades ships have gone laden to the British isles with wheat, cotton, wool, iron, lead, silver, gold, rubber and even in times of stress coal. We do not think the British miller is inclined to differentiate between Vegreville, Camrose and Lloydminister wheat even if he could. It is all grist to his mill even as all imports for centuries have been grist to the British industrial mill.

The "News of the World" gave Vegreville a healthy slam. They should be more than willing to make amends the best way they can.

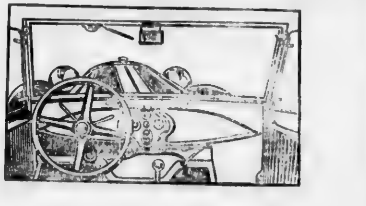
THE FORD CAR SHATTERPROOF GLASS WINDSHIELD



Protection with Clear Vision

THE shatterproof glass windshield on all Ford cars is one of many important safety features that contribute to the pleasure and comfort of all Ford Model "A" owners. The peace of mind and feeling of security made possible by this factor of safety is further enhanced by the clear vision roof pillars, six-brake system, ¾ irreversible steering, one piece gas tank and all-steel body.

The Ford car shatterproof glass windshield does not splinter under the impetus of a direct blow. In case of a collision there is no flying glass to endanger driver or passengers.

The vision is clear and unobstructed with the Ford shatterproof glass windshield. At the same time the driver realizes that this windshield is a protection and a factor in creating driving confidence and owner enthusiasm.

TRAIN SMASHES AUTO AT TERRIFIC SPEED ON GRADE CROSSING

Three Members of Ference Family of St. Paul de Metis District Meet With Sudden Death

[illegible] when the car in which they were driving stalled on the track. John [illegible] Pauline Ference, [illegible] Mary Ference, daughter in law, [illegible] instantly killed, while Jack [illegible] and Sam Ference were [illegible]. The family reside at North [illegible] the St. Paul de Metis District. The train was travelling at a [illegible] between [illegible] and [illegible] miles per [illegible] when the accident occurred.

Did Not See Train

[illegible] of the Alberta Provincial Police. In a statement to Constable Leyland at Red Deer, Jack Ference, driver of the car, said he did not see the train approaching until it was very close and he stopped his machine to allow the train to pass but the auto stopped with the front two wheels over the railway tracks and the rear part of the car between the rails.

It was only a matter of a second before the car was struck and the three passengers in the rear seat killed. Sam was riding with his brother in the front seat and both were knocked unconscious.

The party left Edmonton at 11 o'clock Saturday night and reached the crossing three miles north of Red Deer at [illegible] Sunday morning.

The road crosses the tracks east and west and the auto was crossing [illegible] when the fatality occurred. It was raining heavily at the time and all the windows of the sedan automobile were up.

According to Constable Leyland the train had left Wetaskiwin 20 minutes late and was making up time. The car was struck with terrific force and was completely destroyed by the force of the impact.

Knocked From Car

The three victims of the fatality [illegible] the rear seat and received [illegible] the full force of the collision. The fact that the front wheels of the auto were over the tracks was all that saved the other two members of the party. Jack and Sam were knocked [illegible] of the car and regained consciousness before help arrived on the scene.

The bodies of the three were horribly crushed and the victims were taken to the Orme funeral establishment at Red Deer. The two injured were rushed to the Red Deer hospital.

Dr. Sharp, coroner of Lacombe, was called, and a coroner's jury empanelled on Sunday afternoon.

The jury viewed the bodies Sunday and an inquest will be held at Red Deer Monday evening.

The train crew comprised Richard [illegible] of Calgary, engineer; J. R. [illegible] Calgary, conductor; James Carswell, Calgary, fireman; and [illegible], Edmonton, brakeman.

Banff Athletic Centre of Canada

[illegible] A fast twenty foot quarter mile race track [illegible] up and surfaced like a tennis court will be ready for the [illegible] [illegible] and it is expected that [illegible] of the athletes will be present during the gathering in order to accustom themselves to the new surroundings in which they will compete. Highland pipers [illegible] from all parts of Canada will be present at this [illegible] giving a Scottish flavor to the national championships this year.

LOST — A roll of blankets with strap around it. Reward. Finder please notify the Alberta Provincial Police, Tofield, Alta.

Here and There

Another carload of Jersey heifer calves, [illegible] in number, has been shipped from Lennoxville to New Brunswick for distribution to Chatham and St Stephen. This makes a total of five cars 142 head of high class Jerseys brought into New Brunswick during the last two months from Quebec.

A fast twenty foot quarter mile race track built up and surfaced like a good tennis court will be ready for the 10th annual Dominion track and field championships to be held at Banff September 2 next. The infield has been specially prepared and resown and the grand stand enlarged to accommodate four hundred people. The meet in the fall will be the first time the Dominion championships have been held in Alberta since 1922. The Highland Gathering and Scottish Music Festival held every year at Banff will precede and coincide with the championship meet.

Fourteen hundred Bibles bound in linen with red edges piled across the front of the stage in the spacious concert room of the Royal York Hotel Toronto was the sight that greeted a congregation of over 2,000 people who crowded the big hall of the hotel at a Bible dedication service recently held there. They were for placement in every room of the hotel by the Gideon Association whose Canadian president [illegible] Stewart and international president Samuel Fulton of Milwaukee were both present at the function.

A reduction of fifteen per cent in the acreage planted of seed potatoes in New Brunswick this year as compared with 1928 is noted in the official crop report issued recently by the Soils and Crops Division New Brunswick Department of Agriculture.

Calgary building records went over the million dollar mark for the month of June when 216 permits were issued for a total value of $1,106,965. In June 1928 permits issued numbered 136 to a value of $488,295.

Record crowds attended the Brandon Exhibition held early in July and according to official statements receipts at the main gate were fifty per cent greater than last year while those at the grand stand were 300 per cent greater. The livestock entry was the best ever shown according to many of the old time visitors.

CANARIES FOR SALE—Good singers. Apply to Mrs. A. Hosler, Phone 114 (local) Tofield, Alta.

WHOSE CAR?

When it's newly washed—Mother's.

When it's just overhauled—Son's.

When there's a dance on—Daughter's.

When it needs repairs, fresh paint, new tires and a tank full of gas—Dad's.

The doctor's little daughter was watching wide-eyed as he tested the heart and lungs of a patient. Suddenly she spoke: "Getting any new stations, daddy?"

Disastrous Fire Destroys Eight Business Houses

BLAZE OF UNKNOWN ORIGIN BREAKS OUT AT BUTCHER SHOP AND MAKES CLEAN SWEEP TO THE NORTH

Very Slight Wind Blowing But Chemicals Inadequate For Size of Blaze

On Friday night last Tofield suffered the worst conflagration of its history. Somewhere about 12:30 one of the Chinamen around town discovered fire at the rear of Hobson's Butcher Shop. Constable Carr, A. P. P. who was on duty also discovered the fire about the same time and immediately went to the town hall and rang the bell. As soon as there were enough men to move the chemical extinguisher it was taken to the fire and an effort made to extinguish the blaze. It was however impossible to subdue the flames, the fire having got too firm a hold to be put out by the chemical's stream. They were, however, effected and had there been another chemical at the most observers believe the fire would have been confined to the butcher shop. As it was it spread from there to the Cookson building just vacated by Mac's Bakery and then on and on, taking H. E. Rogers, E. Rogers building, Mrs. Letourneau's building, the Prairie Cafe and T. W. Taylors. Few people thought that it would jump the 66 foot road to the building recently moved to the corner by F. O. Ball, but the heat was so intense that almost without warning the side of the building burst into flames, thus making a complete sweep of that side of the street from the point at which it started.

Citizens toiled manfully. Owing to the lateness of the hour almost all the citizens were in bed, and the crowd was rather slow assembling for a fire crowd. However by the time McLean's was burning there were a large number of citizens around and most of these worked very hard in saving the valuable stock of H. E. Rogers and E. W. Rogers. Both these stocks were very valuable and a great deal of merchandise was taken out before the building ignited. The speed with which it had to be removed however was responsible for much damage.

Mr. G. W. Brace generously opened his store and handed out pails wherewith to form a bucket brigade, and he and other business places on that side of the street threw open their doors and the goods from other places were piled in. The available inside space was quickly filled up and thousands of dollars worth of goods were piled along the sidewalks on the west side of the street. After the fire had burned itself out these were removed to other places of safety.

The entire loss is approximately $60,000, with about 50 per cent covered by insurance. The insurance adjusters were on hand early in the week and adjustments are being made as rapidly as possible. In the case of the buildings, this is fairly simple, but much labor has to be done in order to adjust the insurance on the stock.

The general run of citizens worked like Trojans. The more active and younger fellows were on top of roofs and around buildings trying to save them. There were a number of fellows on F. O. Ball's roof right up to the time the building burst into flames. They had kept the roof from igniting by drenching it, but the heat ignited the sides. There were also a number on the roof of the drug store, but fortunately this building was saved although the windows in it were broken with the heat, as were the windows in the post office, Mr. McCauley's, the Henwood block and the Pool Room.

On numerous occasions the goods saved from the buildings and piled on the opposite side of the street caught on fire but these outbreaks were quickly extinguished.

The situation was very critical when Taylor's store was burning. At this time the house of Rufus Wilson was in great danger and had there been any wind from the west it surely would have burned. By this time the fire fighters were tired, water very scarce and just a little chemical left. By spraying the side of the building the situation was saved. When it was seen that the fire was too great for Tofield's equipment to handle, a call was put in to the Edmonton fire department for aid. Owing to the distance to travel (50 miles) the destruction was complete before a motor chemical from the city arrived although they made the trip in record time.

The Edmonton papers quickly had men on the scene and a group of remarkably fine photographs by the Journal photographer, copies of which are hanging in the post office, were taken.

As we have stated above there was a great deal of fine work done by the citizens, and also we regret to say, there were also things done that were not so fine.

Quite a lot of stealing and pilfering was done. It seems incomprehensible that adults, knowing that the owners of goods were sustaining heavy losses would stoop to pilfer salvaged goods.

Rebuilding Plans

Up to time of writing it is very hard to make a definite statement regarding rebuilding arrangements. At the informal citizen's meeting at the town hall on Monday night, it was stated that there would be no immediate rebuilding. This is because of two reasons. Firstly, it will take several days for final insurance adjustments, on various stocks and secondly, Mr. Seymour, town planning expert will be at next Monday night's council meeting and advise regarding building restrictions to prevent any such catastrophe again.

LOCAL AND PERSONAL

Born: To Mr. and Mrs. Peter Kipgik, North Cooking Lake on August 11th a daughter.

Born.—To Mr. and Mrs. E. Fontaine, on August 12th, a son.

Mr. and Mrs. Ball, Virginia, Kenneth and Winnie Werton visited Edmonton on Monday.

Mr. L. C. Hay was a visitor to the city on Monday.

Mr. L. Forman and son Ted and Mr. Foster of Claresholm visited at the Forman home on Friday.

Mr. Bulloch, the local school principal was in town on Monday and Tuesday of this week. He and Mrs. Bulloch left for a trip to Jasper on Wednesday.

In giving the list of successful grade eight students last week, we omitted Norma Ball. We trust Norma will excuse us, and we hope this announcement will make amends.

Miss Grace Hulbert of Ryley, visited with Miss Mary Hardy during last week.

There will be service in Holy Trinity Church (Anglican) at 7.30 p.m. on Sunday, August 18th. T. W. Teape, sr., will take the service.

Mr. A. E. F. Cary, will relieve the manager at the Mundare branch of the Bank of Montreal, while the latter is away on his vacation.

Lucille's Beauty Parlor will be closed next week, Aug. 19—24.

Mrs. Tribbens is visiting her sister, Mrs. (Dr.) Law.

Mr. and Mrs. McLaughlin and family returned from Banff on Saturday last.

Mr. and Mrs. Calvert returned from their vacation spent at Banff, on Saturday.

Miss Polly Napier returned on Saturday after spending two weeks in the city.

Miss M. Kallal and J. Mountifield are visiting with Miss Kallal's parents, Mr. and Mrs. Ed. Kallal.

Miss Dorothy Hay is spending a week with her parents, Mr. and Mrs. L. C. Hay.

Mr. Harold Curry is holidaying in town this week.

Mr. J. Whyte and family motored to Edmonton last Sunday to visit Mrs. Whyte who is in the hospital there. She is progressing as well as can be expected.

Mrs. Lott of Edmonton was in town on Sunday visiting relatives.

Mr. and Mrs. K. S. Hounsom, 214 Kennedy street, Nanaimo, B. C. announce the engagement of their eldest daughter, Florence Isabella, to Mr. James Lowell Gray of Tofield, Alberta. The wedding will take place about the middle of October.

Charles Kallal and Margaret McBee who wrote Grade eight examinations and Eleanor Weeks who wrote Grade Nine in the Amisk Creek School all passed successfully with averages above 70, Margaret passing with honors.

A THUNDER STORM WITH HAIL

On Wednesday night an electrical storm descended upon the district, accompanied with a very heavy downpour of rain and some hail. As far as we can learn there was little damage done by the hail though it was heavy it was only of a few minutes duration, at least in Tofield.

Later reports inform us that some damage was done south of Tofield near Dodds and some north. As usual the hail path was erratic and actual losses are hard to locate.

KINGMAN

A number of girls surprised Miss Mary Welsh on Wednesday, August 7th, on the occasion of their twentieth birthday.

Mrs. Frisken of New Norway has been visitin gwith her sister, Mrs. A. Asp for a few days.

Mrs. E. Erickson had some dental work done in Camrose last Tuesday and Thursday.

Mrs. Anderson of Alliance is visiting with her sister Mrs. Thor Grahn for a couple of weeks.

Mr. and Mrs. Paul Thomas and children of Ranfurly visited with friends in the Kingman district for a couple of days last week.

Mrs. Ed Thompson and Miss Ida Thompson motored to Cold Lake on Friday.

Miss Lillian Lindberg, and Miss Minnie Kortzman, spent the week end in Edmonton.

Sar Cinnamon motored to Ponoka on Sunday.

Mr. and Mrs. E. Erickson and family motored to Red Deer on Sunday.

Mr. and Mrs. John Ness, Edmonton spent the week end at the Thor Horte home.

Mr. and Mrs. Jack Erickson and Connie, visited with Mr. and Mrs. Crockett of Edmonton, for a few days last week.

Mr. and Mrs. H. Reiger, of Tofield, and Mr. and Mrs. Joe Munsen and family of Camrose, visited with Mr. and Mrs. C. R. Blyckert on Sunday.

Mr. and Mrs. Thor Horte returned from their trip to Calgary and Okotoks on Sunday accompanied by Miss Inez Thorson of Okotoks.

Those successful in passing their departmental examinations in all subjects were:

Grade VIII—Lloyd Lindberg, Agnes and Gladys Christenson, Marina, Merlin, and Clifford Simonson, Stanley Bagnone and Borghild Hole.

Grade IX— Verba Stutzman, Lloyd Oseroe, Minnie Simonson and Inez Erickson.

Grade X— Evelyn Welsh, Percy Simonson, Gertrude Asp and Florence Bonne.

Grade XI— Eddie Lindgren.

There were only three failures in a class of twenty, and we think the teacher, Mr. Sparby, deserves real credit.

CARD OF THANKS

Mr. and Mrs. Cary desire to thank all those who assisted them to move their furniture on the night of the fire. The assistance was greatly appreciated.

CARD OF THANKS

Mr. and Mrs. R. Wilson desire to express their sincere thanks for the great effort made to save their home on the night of the fire. Also those who assisted in moving out the furniture.

CARD OF THANKS

We desire to express our sincere thanks for the valued assistance, floral tributes and expressions of sympathy, extended to us during our recent sad bereavement.
Mrs. B. F. WILDMAN and daughter

Mr. and Mrs. Ben Hobson and Miss Annie Hobson visited at the Hobson home at Tofield on Sunday.

Mrs. Robinson and Edith visited the city on Monday returning Tuesday with Isabel, who has been at Vermilion agricultural school for a week. Isabel reports a splendid time.

Make Every Dollar Count

The present season is making it necessary for farmers to spend their money wisely and also to EARN AS MUCH AS POSSIBLE.

By bringing or shipping your cream to us you will be getting every cent there is in it. We give you the highest grade and test possible. It more convenient we will call for your cream at the Farmer Supply Co. Ltd Store, where it can be left.

During the summer it is vitally necessary to take extra good care of your cream. Make an extra dollar by being extra careful.

Job Printing

Every business man requires a certain amount of printed matter. Such things as Letterheads, Envelopes, and Statements are as necessary to modern business correspondence as a telephone is to a modern business office. The Mercury Office is equipped to turn out all kinds of job printing. The next time your supply is running low, call us up and a representative will be at your place of business in a short time to receive your instructions and take your order. Prices fair and just.

The Tofield Mercury

BAKING

Alben Sloan is ill with the measles. We hope that he will be well soon.

The Ladies' Aid at Peoham's was very well attended and a pleasant afternoon was spent. The next meeting will be held at the Ende home, on Wednesday, August 21st.

Miss Anna Jorrang left for Edmonton last Wednesday. She will be there for some time.

Mr. and Mrs. George Hendrickson motored to Calgary on Monday returning on Wednesday.

Mr. and Mrs. Haraldsid left for Calgary and Banff last week.

Miss Mary Lehman is in the Camrose hospital recovering from an operation for appendicitis, we hope in haste of a speedy recovery.

A pleasant afternoon was spent at the Hendrickson home last Friday when around forty relatives gathered to honor Mr. and Mrs. Palmer Anderson, who are shortly leaving for China.

Julius and Frankie Hagen of Portersburg, and two brothers from Detroit, Minnesota, visited at the Hagen home on Wednesday.

Miss Isadore Ness rented her Sunday school class was very well attended, and was thoroughly enjoyed by everyone.

There will be an all day Mission Festival at the Lutheran Church on Sunday, August 18th. Everyone is welcome.

WINTER RYE AS A FORAGE CROP
(Experimental Farms Note)

As a grain producer winter rye is open to the grave drawback that it is a persistent volunteer, becoming an objectional impurity in crops of other kinds, particularly wheat. The objection has little force where the crop is grown for hay or pasture.

Its peculiar adaptability is in providing late-autumn and early-spring pasture. It may also be made to furnish summer pasture as well if sown in June or July and grazed closely enough to prevent its jointing during the first season.

In certain seeding-down tests on the Beaverlodge Substation winter rye proved as a nurse crop has been needed at fortnightly intervals from the middle of May onward, the areas being grazed closely until August, producing a considerable amount of excellent feed. However, there is not probably much net advantage in thus substituting rye for grass or sweet clover nurse to extend the grazing at such end. This may well be done with old patches of winter rye drifted in July or very early August, (depending upon such season and local...) and pastured judiciously in autumn, then again in the second season until about the first of June, after which it becomes rather unpalatable. The field may then be left to produce a hay crop or two or a grain crop if desired or it may be plowed at once and either sown to oats for green feed or summer-fallowed. Used in this way, rye will serve in helping to clear the land.

A mixture of oats and winter rye makes a good hog pasture, the oats producing the bulk of the early pasture while the rye comes to its support later on.

Where bulk rather than quality is the prime object, winter rye may be employed as a hay crop. If cut as soon as it heads out the quality will be fair. In a number of cases the writer has known horses to refuse Winter rye hay at first but afterwards to change their minds and eat it well. Working quite satisfactorily upon it.

THE FIRE

It is particularly unfortunate that Tofield should have experienced such a disastrous fire this year. A fire at any time is a disaster, especially one of the dimensions of the recent Tofield conflagration, but to have it occur when many business men were, due to last year's and this year's climatic conditions, having trouble enough, is a business set back of the very worst kind.

While reviewing the event one must be thankful that property loss was the only loss. There was no loss of life, nor was there any serious injury. This is fully realized when one recalls the experience of Mr. Jobb, Sid Worton and a number of others while salvaging at E. W. Rogers. A pocket of gas exploded in the cellar forcing the cellar door open and throwing Mr. Jobb down the cellar. Sid Worton who was on the counter was blown to the floor and others (names unknown) were thrown off their feet. It is easy to imagine had the explosion been more forceful one or more being injured. There were many other chances of injury. Men climbing on roofs, running around in darkened interiors filled with smoke etc. So one must be thankful that there was no serious injury to any person.

Another feature was the splendid manner in which the citizens assisted those in danger to salvage their property. Often at great personal risk and always at much physical discomfort the general run of citizens did all in their power to lessen the loss of those whose buildings were burning. That those concerned appreciated this goes without saying.

There is however, a seamy side to this. While the greater number were doing all in their power to assist those in trouble, there were a number who seized upon the opportunity to steal goods. It is hard to imagine that adults, knowing the owner was suffering heavy losses, would stoop to make this loss still heavier. Yet this was done. The excitement of the fire and the unusual event of seeing thousands of dollars worth of goods thrown around unwatched is no excuse. Their duty was to help not to hinder. We do not refer to the cases of "pop" that were drank and the fruit eaten, hard workers deserved this. But when one hears of boots, clothing and even silverware out of homes being stolen, it makes one's blood boil. Those who stole under circumstances such as prevailed early Saturday morning, committed a crime even greater than breaking into a store and taking goods.

It was very unfortunate that the fire fighting equipment was not more efficient. The chemical arriving sooner or a second chemical at the right time would have, so observers say, confined the blaze to the butcher shop or at least to the bakery. We are not blaming anyone. Most all citizens know the town council have their work cut out to finance and it is very hard to create interest in fire protection, except just after a disastrous fire. Even so with the most modern equipment possible, city fires often assume greater proportions than the one we just experienced. There is no question but that the lessons learned in this conflagration will be taken full advantage of.

Rebuilding is still under consideration. It would have been nice if conditions would have warranted rebuilding by all parties immediately. But the most important question is what kind of buildings will replace those destroyed. Our opinion is that as far as safety goes a block of one storey brick stores would best serve the purpose. But it is safe to say that the council will be compelled to impose some restrictions. This will be more fully aired when Mr. Seymour, town planning expert confers with the council next Monday night. The Mercury hopes that rebuilding will be fairly rapid. Furthermore it hopes that the fire will not mean the severance of old established firms from the town's connection, though at present writing indications point that way.

SAVE WHAT YOU CAN

Even previous to the recent fire we had often heard it discussed whether it was, in the event of the contents of a building being fully insured, wise to endeavor to save things when the building was burning or about to burn. We have often heard it said that the best course to pursue was to lock the door and leave things alone. That the policy holder had done all in his power when he had taken every precaution against fire and made every effort to extinguish what blaze there was.

This is absolutely wrong. Policy holders MUST make every effort to remove goods from buildings, burning or about to burn, always of course having due regard for human life. The idea of allowing contents of buildings to burn, was not of course based on the idea of wilful destruction but on a misunderstanding of the treatment the insurance companies would give the policy owner who saved his goods from fire only to have a large portion of them lost or damaged through the moving. One viewpoint was similar to this. Assuming a policy holder has insured up to fifty per cent of the total value of his goods. He saves half of them the value of which would be roughly the amount of insurance carried. The insurance company would, so it was argued pay the damage on the goods saved, claiming the portion burned was not covered. Another argument was that the goods were only insured when in the building. Both these ideas are wrong. If an individual has $1000.00 worth of stock, has insured for $500.00 and in the event of a fire, saves $500.00 worth and $500.00 worth unavoidably burns, the insurance company will pay him $500. The insurance is adjusted to the total stock carried and not to the portion lost or the portion saved. The other point regarding the goods being uninsured when taken from the building in equally wrong. Goods taken from a building during an impending fire are automatically insured for five days.

While the insurance adjusters were in town we made enquiries, so as to be able to make an authoritive statement and the information given above is from the insurance adjuster. Thus it is plain that one must try to save all possible and furthermore, so the adjuster says, if one does not try to save goods when a fire is impending, the person concerned is in the same class as an individual committing arson.

KITCHAMOOT

Gertrude Ingram, Harold Cossette and Harold and Alvin Schultz successfully passed their grade eight examinations.

Mr. and Mrs. Sam Stirrit and baby motored to Edmonton on Thursday returning home in the evening.

The J. H. Ingram young people motored to Elk Island Park on Sunday.

Mrs. Wm. Lee, Miss Viola and Wilfred and Lorne Lee were Edmonton visitors on Thursday.

Mr. and Mrs. W. A. Mitchell and son, Mrs. L. Wildman and daughter, motored to Camrose on Tuesday.

Mr. and Mrs. G. W. Sear and son Stanley and Mrs. C. A. Ingram motored to Viking on Saturday for a visit at the Owen home. They also made the acquaintance of a new son at the Earl Owen home. They were very favorably impressed by the country around Viking and found the Owen family doing very well.

Mrs. D. H. Mitchell returned to her home in Edmonton. She was accompanied by her niece, Miss Margaret Mitchell.

Word was received on Thursday of the death of Mrs. P. F. Ingram of Victoria. Word was received by wire. Mrs. Ingram passing away on ...

AMISK CREEK

The Ladies' Aid held their month[illegible] meeting at the J. Annebo home on Wednesday of last week. A goodly number of visitors and members were present.

Mrs. Anna Sand who was visiting with friends and relatives around here left Thursday morning for a short visit at Camrose previous to leaving for her home at Elk Point.

Haugen Lund and Carl Tank from Viking were visitors at the B. G. Berg home last Sunday.

A number of young people from here were invited to the Sorenson's home near Pea on Tuesday of last week to spend a social evening. They all report having a jolly time. A very appetizing lunch was served at midnight.

Five cars of the Y.P.U. went to South Cooking Lake for a picnic last Sunday. The time was spent in boat riding bathing and swimming. They all report having a good time.

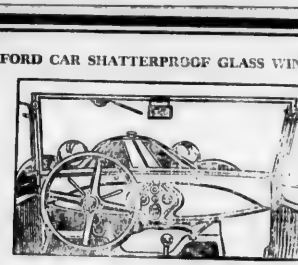
Mrs. J. Nelson and Mrs. P. O. Flaat are accompanied them.

Miss F. Mollins returned from Edmonton last week where she has been attending the summer school.

Mr. and Mrs. B. O. Berg, Lily and Lloyd visited the reserve north of Tofield last Sunday.

Some have already started the harvest. The straw is very short in many places and it is quite a problem to get cut with a binder

THE FORD CAR SHATTERPROOF GLASS WINDSHIELD



Protection with Clear Vision

THE shatterproof glass windshield on all Ford cars is one of many important safety features that contribute to the pleasure and comfort of all Ford Model "A" owners. The peace of mind and feeling of security made possible by this factor of safety is further enhanced by the clear vision roof pillars, fire-brake system, ¾ irreversible steering, one piece gas tank and all-steel body.

The Ford car shatterproof glass windshield does not splinter under the impetus of a direct blow. In case of a collision there is no flying glass to endanger driver or passengers.

The vision is clear and unobstructed with the Ford shatterproof glass windshield. At the same time the driver realizes that this windshield is a protection and a factor in creating driving confidence and owner enthusiasm.

HIGH LIGHTS OF THE FIRE

During [illegible] of the great [illegible] there was [illegible] Mr. Jobb [illegible] cellar door [illegible] other, while others [illegible] were blown off their feet. No one was seriously hurt.

[illegible] life ambition [illegible]. When [illegible] of the buildings [illegible] he said he had always wanted to smash a plate glass window [illegible] through the window.

[illegible] instead [illegible]. An extra [illegible] would have [illegible].

[illegible] the editor [illegible] fire at T[illegible] happen [illegible] have seen [illegible] Edmonton and [illegible] until the [illegible].

[illegible] compared to Mr. [illegible] Mr. [illegible] could see the [illegible] preserved [illegible].

[illegible] arrived [illegible] tough luck [illegible] a fire.

[illegible] discussing the [illegible] the fear [illegible] of the pilferers.

One of the outstanding features of the catastrophe is the splendid manner with which the sufferers are taking their losses. Seeing the result of years of labor reduced to a ruin of tangled debris is sufficient to affect the spirit of any man. Yet one has yet to hear a whimper or bitter complaint.

Frank Ball ran into tough luck due to the fire. He had sold his business and the purchaser was here on Friday taking stock.

The insurance lapsed recently and as the business was changing hands it was not immediately renewed. The building was totally destroyed but much material was taken out, but a considerable quantity of repair parts destroyed.

LAKESHORE

Mr. and Mrs. T. B. Murray and family spent the week end at Cooking Lake with Mr. and Mrs. Payn of Yorkton, Sask. who are spending their holidays there. Tofielders will remember Mrs. Payn as Miss Ethel Sears who taught in the Tofield Public School some years ago.

Mr. and Mrs. Abernethy entertained the Guy Walker and Frank Ball families to dinner on Sunday.

Mr. [illegible] of Deville visited Mrs. Everett Noland on Saturday evening returning home on Sunday.

A number of young people attended the dance at Deville on Friday evening.

Mrs. Warner and Mr. Murray visited Mrs. Wildman of Woodlawn on Wednesday afternoon of last week.

The Eaton families motored to Lamont on Sunday.

A Message of Appreciation

SINCE THE SMOKE OF THE RECENT CONFLAGRATION HAS CLEARED AWAY, OUR OUTSTANDING MEMORY IS THE INVALUABLE ASSISTANCE RENDERED US BY THE PEOPLE OF THE TOWN AND DISTRICT.

TO THOSE WHO FACED FLAMES AND SMOKE AND SCORCHING HEAT IN THE ATTEMPT TO SAVE BUILDINGS AND MERCHANDISE, TO THE BUSINESS MEN WHO THREW OPEN THEIR BUILDINGS FOR THE PROTECTION OF SALVAGE, IN THE FACE OF DANGER AND INCONVEDIENCE TO THEIR OWN INTERESTS, AND TO THE TOFIELD CURLING CLUB WHO KINDLY PLACED THE NEW RINK AT OUR DISPOSAL, OUR THANKS ARE ESPECIALLY DUE.

AS SEVERAL DAYS WILL BE REQUIRED FOR THE ASSEMBLING OF SALVAGE AND THE ADJUSTMENT OF LOSSES, WE ARE NOT ABLE TO MAKE ANY DEFINITE STATEMENT AS TO RESUMING BUSINESS OPERATIONS.

OUR TEMPORARY HEAD QUARTERS WILL BE THE CURLING RINK.

H. E. ROGERS

E. W. ROGERS
FOR THE RELIANCE STORE.

U. F. A. W. NOTES

The regular meeting was held on August 8th, at the home of Mrs. Abernethy. Plans were made for the baby clinic on Aug. 17th and it is hoped that mothers in the town and district will take advantage of the opportunity to have their children of pre school age examined.

Mr. Hughes of Vegreville was present and gave a talk on fattening and marketening poultry co-operatively. This proved very interesting especially to the poultry raisers present and Mrs. Baptist was appointed to further the plan with the co-operation of the members of the local in this district.

The next meeting will be at the home of Mrs. Murray on Aug. 22nd. A grab bag consisting of articles made from flour sacks will be a feature. Each member will bring an article and it was decided that a charge of ten cents will be made for a grab.

Each member is asked to give a suggestion for next year's program. A fine will be imposed if no suggestion is handed in.

Mrs. Francis will give a paper on balanced meals. Mrs. Warner, Peter Lee, Gray, Munro M. Seale and T. E. Seale will serve tea.

Holden Pruden, who has been to the United States returned home this week.

Mr. and Mrs. Cory and Enid are holidaying at Cooking Lake.

CO-OPERATIVE ASSOCIATION BUYS HENWOOD BLOCK

The recently formed Tofield Co-operative Association has purchased the Henwood block on main street.

Mr. Brace, who is occupying the north half, will vacate at the end of September, and we understand the stock of the Tofield Farmer's Supply Co. will be moved over.

Mr. Brace, will we also understand, build a store on main street.

J. W. Ferguson is newly appointed manager of the Tofield Co-operative Association.

A WILD AND WOOLY WESTERN FOR SATURDAY

One of those real westerns is coming to the Variety on Saturday of this week, when Tom Tyler will appear in "The Law of Fear." In this picture Tom does all that is humanly possible for a cowboy to do. Hard riding, coupled with real he man fighting and the tenderest of love-making makes this a picture full of thrills, spills and sentiment. Be sure and attend the show Saturday night—you will like it.

Town Planning Expert Confers With Council

MR. SEYMOUR ADDRESSES COUNCIL and GOODLY NUMBER OF CITIZENS

At a regular meeting of the Tofield Town Council held at the Town Hall on Monday night, Mr. Seymour, Provincial Town Planning Commissioner addressed the Council on town planning in general and particularly with a view to fire prevention.

There were quite a number of citizens present, who followed his remarks with much interest.

Mr. Seymour opened his remarks with a brief outline as to what the provincial town planning commission meant. He stated that as far as possible they hoped to determine just how large each centre will be. To guide them in this they have the United States, as we are now, as regards development where the United States were 100 years ago. It was he said, fairly well conceded that a number of small towns would not become a great deal larger, as when they had reached the point where they were able to adequately serve the farming territory surrounding them, their growth would be quite slow. The commission's work was as far as possible to plan towns so as to make life in them pleasant, and the people happy and contented.

Speaking of our particular problem he stated that solid brick construction costs little more than lumber. He went on to explain the thickness of brick walls which were to be eight inches and party walls 14 inches. He spoke of corniceing and roofing and other technical matters concerning building, the provincial commission having prepared a bylaw covering these matters, a few copies of which he left with the council.

He suggested that a local town planning commission be appointed, the personel of which would act in an advisory capacity to the council. He also suggested a local horticultural association as the work done by such an association was invaluable to the town from a beautifying point of view.

A number of questions were asked, one from Mr Pincott being as to whether the government contemplated making landing fields compulsory in towns, in view of the rapid development of air travel and the consequent risk of human life. Mr Seymour replied that while the commission had considered landing fields from different angles they had not considered it from just that point of view.

Mr. Seymour left on the 9:30 train for Edmonton.

W. Chapman, as secretary, then read portions of the bylaw and it was given its first and second reading, which just introduces it, the bylaw having to be read a third time and passed before it becomes law.

The council then proceded with its regular business.

The minutes of last meeting were read and adopted.

The Medical Officer of Health, Dr. Law, was present and addressed the council regarding the milk supply of the town. He recommended that the town bylaw covering milk distribution be enforced. This bylaw calls for all cows from which milk is taken for distribution in the town be tested for bovine tuberculosis, and that all milk houses etc., be inspected for cleanliness. Also that as far as possible, pasteurization or some method akin to it be adopted. Also that a license be required. These recommendations were adopted and the license fee set at $25.00.

It will take a little time before these regulations are put in force as there are a number of people seling milk now.

The secretary was instructed to write these people informing them of the bylaw in question.

Some accounts were presented, passed and ordered paid.

The meeting then adjourned to meet again on Thursday night when the building bylaw will be further discussed.

Hall Block Sold

MR. GEO. BRACE BUYS LARGE BRICK BUILDING

On Saturday last a business deal was transacted whereby the brick block known as the Hall Block was sold by Mrs. Hall to Geo. B. Brace. R. W. Pincott arranged the sale.

The building was built approximately 20 years ago and was at first occupied by Hall and Kennedy as hardware merchants, later by Jamieson's drug store, post office and telephone office and later by the present owner, Mr. Brace.

After a period of standing empty, it was occupied by Mr. Jobb as a general store and later by Jobb and Brace. This firm disolved partnership some two years ago, Mr. Brace opening up in the Logan block, later called the Henwood block.

Interviewed by the Mercury, Mr. Brace said the deal was completed and he would take possession on October 1st.

This will mean quite a shake-up in businesses in the town. As we have previously announced The Tofield Co-operative Association recently purchased the Henwood block and the stock of the Tofield Farmers' Supply Company, to take possession October 1st

This means that all three general store stocks have to be moved by October 1st.

Interviewed by the Mercury, Mr. Jobb was not in a position to state just what he would do.

LOCAL AND PERSONAL

Mrs. Whyte arrived home from Edmonton, where she has been a patient in the hospital.

Miss Pat Burnett is visiting Mr. and Mrs. Burton for a week.

The Misses Jobb returned home last week from Cooking Lake where they have been holidaying.

Mr. and Mrs. Wilson, Miss Lea, and Mr. Morrison are away on their vacation, taking a motor trip.

Mr. and Mrs. Hobson and family are visiting at Sylvan Lake.

Mr. F. O. Ball motored to the city on Tuesday.

Mrs. Barden visited the Roberge family over the week end.

Mr. and Mrs. Geo. Bissot spent the week end in Calgary.

The McLaughlin family spent the week end visiting Dr. Terwillegar and family at Cooking Lake.

Miss L. Jeffrey, of Edmonton, is visiting Miss Annie Swift.

Mrs. Terwillegar and Stanley motored down to visit Mrs. Gray one day last week.

Mrs. McLaughlin spent a few days in the city last week.

Mrs. S. Hall was in town for a few days last week.

Mr. and Mrs. John Lee of Tofield who are motoring through Oregon and Washington called on Gresham friends one day last week.

Born—To Mr. and Mrs. Geo. Moen, at Gresham, Ore., U.S.A., on August 15th, a son. Tofielders will remember Mr. and Mrs. Moen as being residents of Tofield.

Miss Eva Clutterham has accepted a position in the Chipman branch of the Bank of Montreal. She left for Chipman last Monday night.

Mr. A. P. Harrold returned home on Monday from a holiday of a months' duration. The first half was spent at Jasper and the second half at the Pacific Coast. He took a motor launch trip down the Pacific Coast visiting several places including Bellingham, Wash. On his trip he met several former Tofielders.

Beulah Johnston of the Lakeshore school who was the only one writing departmentals, was successful in passing her grade VIII examinations.

Mr. and Mrs. T. Bradbury left on Saturday for their home in B.C. after spending a month's holiday with friends and relatives in Tofield, also Edmonton and Round Hill.

Mr. E. W. R. Lamont, has accepted a position conducting the McLaughlin Garage. He will be assisted by Mr. A. Shorten. Mr. Lamont needs no introduction from us, he being well known throughout the district. He recently was unfortunate in having his machinery and equipment destroyed by fire at Holden.

W.I. NOTES

The Round Hill W.I. have invited the members of the Tofield W.I. to attend the Camrose Constituency Conference which will be held at Round Hill, August 28th.

CARD OF THANKS

I wish to express my sincere thanks to all those who assisted me on the night of the fire.

My office is now located half block east of Main street on 3rd avenue.

DR. MacLURG

LINDBERGH

Lindbergh's "specials" in the shipping line last week was poultry, quite a few crates going into the city. This week, we think it is "pigs"; the store truck is surely handy for these odd [illegible] at odd times. Cream is [illegible] here but judging from the [illegible] "boss" isn't [illegible] up any too well this dry [illegible] and how about a rise in cream prices, about time isn't it?

Cutting has commenced, but the [illegible] the better seems [illegible] 40 bushel [illegible] we read [illegible] well where are they.

The hay shortage just here will not be so acute, for the mower have gone into places cutting where in an ordinary year it would be passed over.

[illegible] a visit to Mr. and Mrs. Gillis of Ardrossan.

Mr. Ernest Hooper of Edmonton [illegible] a few days with relatives here.

Mr. John Bremner expects home from hospital in Edmonton this week, we trust greatly benefitted by [illegible] there.

Miss Evelyn Glenn returned home from her vacation at Seba.

Mr. Jas. Hooper has gone to [illegible] Alta. for awhile he also bought part of Sec. 7 north of tracks before he went so evidently intends returning soon.

LAKESHORE

Mr. and Mrs. N. Noland and two sons returned on Sunday from a two weeks motor trip to Oregon. Their daughter and sister Mrs. L. Radabaugh accompanied them home for a visit.

Mr. and Mrs. R. C. Phillips and Donald visited friends at Camrose and New Norway on Sunday.

Miss Clara Johnson spent the week end visiting at the W. Abernethy and Dorothy Walker homes.

The Noland families spent Tuesday at Deville with Mrs. Tom Schultz.

The Ladies' Aid Society met at the home of Mrs. Guy Walker on Wednesday.

Arsmon Stumpf is spending his holidays at the Phillips home.

INSTALLED ON MAIN LINE

On the gas main line just west of the station the gas company has installed an automatic valve. The purpose of this valve is to save gas from escaping in the event of a breakage on the line either east or west of the valve.

In the event of a breakage in the pipes, either east or west of the valve the valve automatically closes, thus holding what gas there is in the pipes from escaping.

The valve which is quite a large one is being housed over.

SCHOOL RE-OPENS TUESDAY, SEPTEMBER 3rd

The Tofield public and high schools will re-open for the fall term on Tuesday, September 3rd. Monday is Labor Day and a public holiday.

The staff for the coming term will be the same as last year with the exception of Mr. Lundie, who resigned. Mr. Bulloch will be principal; Mr. Meadows, of Tees, Alta., will take grades seven and eight; Miss Lela Clement, grades five and six; Miss Marion Cooper, grades three and Miss Stella Clement the primary department.

Make Every Dollar Count

The dry season is making it necessary for farmers to spend their money wisely and also to EARN AS MUCH AS POSSIBLE.

By bringing or shipping your cream to us you will be getting every cent there is in it. We give you the highest grade and test possible

If more convenient we will call for your cream at the Farmer Supply Co. Ltd Store, where it can be left

During the summer it is vitally necessary to take extra good care of your cream. Make an extra dollar by being extra careful

Job Printing

Every business man requires a certain amount of printed matter. Such things as Letterheads, Envelopes, and Statements are as necessary to modern business correspondence as a telephone is to a modern business office. The Mercury Office is equipped to turn out all kinds of job printing. The next time your supply is running low, call us up and a representative will be at your place of business in a short time to receive your instructions and take your order. Prices fair and just.

The Tofield Mercury

Building Bylaw Discussed At Special Council Meeting

NO DECISION ARRIVED AT—ANOTHER MEETING MONDAY NIGHT

A special meeting of the Tofield Town Council was held on Thursday night to further discuss the building bylaw.

It was pointed out by Mayor Swift that while the town planning commission bylaw was more elaborate, there was a bylaw on the books that called for practically the same building restrictions. This bylaw was passed in 1913, but had not been enforced.

Considerable discussion took place, the following being the general trend of opinion. The brick or tile building is much to be preferred over the frame building but there is the question of cost. It is to the interests of council and everyone concerned that the buildings be erected, but if restrictions are too severe it may mean that it is impossible for building to take place. The question really simmered down to a question of comparitive costs.

Mr. Craig, who was present at the meeting was asked to give figures, and he gave as his opinion that the tile building would be approximately ten per cent higher. This was, however, a quick estimate on one wall, and he promised to procure complete comparitive figures from Edmonton on a store building of both kinds, frame and tile.

The meeting then adjourned until Monday night.

STAR APPEARS SATURDAY

For Saturday, Manager Wood of the Variety has procured, "Barbed Wire" with Pola Negri taking the stellar role.

Those who have seen this actress on the silver sheet will want to see her once more, while those who have not seen her, will be immensely pleased with her.

"Barbed Wire" is a film of much interest and the story carries one a long from point to point, until a thrilling gripping climax finishes the story.

There is laughter and there are tears, suspense and spechal thrills; love and hate, beauty and ugliness; and the charm of perfect acting

CLOISTER NUNS HAVE GLIMPSE OF THE WORLD

Winnipeg, Man., August 21st.—Twittering like excited birds, a party of middle aged women whose first visit to the outside world in many years, left Winnipeg on the Canadian Pacific this morning for Three Rivers, Que. They were members of the Carmelite order of nuns, a cloistered body, whose convent at St. Boniface is being vacated and the women of the Order are going to the Mother House in the eastern city.

The Carmelite Order was one of the first to be established in Western Canada, the convent in St. Boniface which is now being vacated, is one of the oldest buildings.

Nearly 100 persons were at the station to see the white robed women leave on their three-day journey in the out-side world of travel, after which they will go into the seclusion of their mother house, and live a life of prayer and fasting according to the rules of the ancient Order of Carmelites.

Harvesting has commenced throughout the district, many of the farmers being busy cutting their wheat. It is hard to estimate the yield as while some places the stand is fairly good at others it is very poor.

FIRE BUGS?

THREE LARGE country town fires happening within a few weeks has caused many people to wonder whether they are of incendiary origin, whether some pyromaniac, commonly known as a fire bug, is travelling from point to point, setting light to business houses. To attempt to speak with authority regarding the likelihood of a fire bug doing his destructive work is futile, as, so far, even investigations have proved little.

The Mercury does not hold with the fire bug theory. There are always a number of fires occuring in country towns. There are a large number of country towns in Alberta and the fire risk in most all of them are great. What has created consternation among the people is not the number of fires at country points, but the size of them. This is caused by circumstances in each case similar, but not exactly alike.

The morning the disastrous blaze occurred at Wainwright, a forty mile an hour gale was blowing and this undoubtedly was the cause of so great a spread in the blaze. Everything being exceptionally dry too, caused rapid spreading of the fire. At Tofield, whatever the origin of the fire may be, the size of it was due to exceptional dryness of the buildings and lack of fire fighting equipment at certain moments. At Lloydminster, there was a slight wind at the time of the blaze which accounted for its enormous spread. But even so, prior to the fire, it would be hard to imagine so many buildings burning down at one time, in Lloydminster, where there was water.

If all three fires had only been of moderate proporions, there would have been little concern over a fire bug.

Even so, there are such creatures. Some years ago while working on a Croydon, Eng., paper, the writer remembers a fire incident which occurred there. Croydon is a suburb of London with approximately 200,000 population. For months there had been an epidemic of fires. Two and three times a week fires in different parts of the city would break out almost simultaneously and fire equipment rushed to the scene. Fires became so frequent that large numbers of people would stand at intersections waiting for and expecting fire engines to go by. Suddenly the epidemic ceased and for many months nothing was heard of the matter. Then a chance remark by an intoxicated man in a saloon caused the bartender to communicate with the police. The man was picked up, an investigation held, and one man turning King's evidence, made known the following facts.

There were three men in the party. During the day they would pick places and arrange for fires to be started and in the evening they would each separately start the fires. Thus three fires were going at the same time. There was as far as could be learned, no special reason for setting the fires beyond mere excitement. They were imprisoned for a lengthy period.

"THE LAST ROSE OF SUMMER"

ALMOST ALL of us, have at one time or another, heard rendered that beautiful song, "The Last Rose of Summer". It is very beautiful but a little sad But if there is something sad about the LAST rose, there is nothing sad about the FIRST one.

Each summer now for some years past, several of our subscribers have brought boquets of flowers to the office, thereby adding much brightness to it. It is needless to say that these boquets are much appreciated and the beauty of the flowers are made to last as long as possible. Such favorites as sweet peas, pansies, wall flowers, astors, stocks, sweet Williams and others have come our way, but imagine our surprise and delight when we found in a boquet quietly put in the office by Mrs. J. W. Cookson, a rose of good size and formation. It was grown in Mrs. Cookson's garden where she has others, and she tells us, given care and attention, they are not difficult to cultivate. Still, as Alberta garden products they are very rare, and this particular rose was the first one we had possessed for nearly twenty years

The last rose of summer has its charm, but the charms of the first rose are greater.

THE BUILDING BYLAW

THE BUILDING [illegible] town planning commissioner, left with the Council is very similar to the Tofield bylaw that was passed some sixteen years ago. But while the Tofield bylaw was on the books it [illegible] buildings were allowed to [illegible] result. The question to [illegible] the bylaw should be enforced

To understand the [illegible] know the following facts [illegible] of the Council and ratepayers [illegible] ings as possible be erected [illegible] of swelling tax receipts [illegible] producing, as it is fairly [illegible] itable to hold vacant lots [illegible]

There is no question [illegible] building is best—for [illegible] we are much in favor of [illegible] However, if those business [illegible] ing with brick or tile pr[illegible] of the bylaw means that [illegible] up other questions. [illegible] ed, frame buildings hav[illegible] tempt made to enforce th[illegible] chants have been b[illegible] have salvaged stock [illegible] they build brick or tile [illegible] owned for years [illegible] standing? Our view [illegible] or tile one storey [illegible] do not favor penalizing [illegible] from the fire. So far th[illegible] of rebuilding. Final [illegible] not been made and while [illegible] ination, there is no [illegible] two, for the Council to [illegible]

MILLION DOLLAR FIRE AT LLOYDMINSTER MONDAY

... EDMONTON

With daylight, Monday, residents of Lloydminster, 160 miles east of Edmonton on the Alberta-Saskatchewan boundary, took stock of their losses as a fire which destroyed the business section of the town early Monday morning, causing damages of more than a million dollars.

Forty-seven buildings of all sorts, many stupid sort, together with all stock and equipment. The damage had not been fully appraised at 1 p. m. but it is thought that it will exceed that of Wainwright by more than $500,000.

ORIGIN OF FIRE SO FAR UNKNOWN

The origin of the fire is unknown, it having broken out in the pool room of Boyd and Waddell shortly after midnight Sunday.

Two fire departments were on hand to cope with the flames and only for a help from outside points as the phone communication was impossible.

The alarm was turned in at 12. o'clock but before the firemen could get on the scene the side of the west end had gone and the merchandise, aided by a stiff wind, and obtained a solid on other buildings.

At 10 a. m. the morning fire was still considering but under control and further outbreaks were not expected.

As far as can be ascertained no persons were either killed or injured, MANY IMPORTANT BUILDINGS DESTROYED

Among the building destroyed were the post office, municipal hall, new curling rink, pool elevator, two hotels and the Canadian Bank of Commerce.

The fire it is believed, started from some unknown cause in the pool room of Boyd and Waddell, spreading from there to adjoining structures.

The alarm turned in at 12:30 brought the firemen to the scene in a rush but the flames had secured such a hold that the men were unable to do more than endeavor to save other structures.

Citizens of Lloydminster rushed to the scene and did all in their power to aid the firemen but it was already beyond any fighting. It had secured a hold and the sparks and flames shooting high and far from the all made the city an inferno

BUSINESS AREA SUFFERS MOST

East of Meridian road, the dividing line between Alberta and Saskatchewan, the business section of Lloydminster and it was that suffered. The buildings, one after the other, caught fire and were destroyed, citizens having their homes above offices or store doing their best to save their personal belongings, and get away with their lives. The amount of salvage from the mercantile establishments was small amount to little, if any.

P. was stated that, apart from the destruction of the buildings, hardship is being suffered by the ... people, who lost their belongings the number being in such building being small compared with the total population of 1,700.

Among the buildings destroyed were

Post office
... Bank of Commerce
Municipal hall
Britannia hotel
King George Hotel,
Boyd's and Waddell's billiard hall,
Boyd's barber shop,
W. L. Cameron, general store.
Alberta Pool elevator.
S. E. Erickson store.
Lloydminster Co-operative Association store.
Curling rink.
H. B. Hall and son, general store.
Four Chinese Laundries.
Crawford and McLaughlin, tailors.
J. Solly, confectionery store.
Three other confectionery stores.
G. Birker, butcher.
A. L. Harris' Ganz furriers.
G. H. Potter electrical store.
Turner's bowling alley.
Dr. Anderson's building.
H. Handy, auctioneer.
Tom Baker, conductor
J. H. Stevenson, real estate.
T. A. Wyatt's general store.
Medical Hall Drug Co.
C. H. Mosley, druggist
G. H. Turnbull, jeweler
Palace cafe
Royal George Cafe
J. Nicholas, butcher
J. R. Armstrong tailor
Several smaller miscellaneous buildings.

BUTTERFAT MARKET UNCHANGED

From the Market Examiner of August 18th.

Production of butterfat is holding about steady, according to reports received from cremeries with country point branches. The other cremeries who have only their plant in cities, are finding a small decline, however. The quality of the supplies is very good. The lighter offerings are said to be due to the fact that the weather has been very hot and this is drying the pasture land up. Prices are holding at unchanged levels.

Sales of cream very butter are holding up very well both within the province and at the point where a considerable supply is being shipped. Prices are holding at unchanged levels and no move in either one direction or the other is anticipated for some time to come.

The fancy table offerings to the dairy butter market are running over readily but the other grades are reported still hard to sell. No change is reported in prices.

POULTRY RECEIPTS INCREASING

From the Market Examiner of August 14th.

A further increase in poultry receipts has been noticed during the past week, but as the demand is good they are cleaning up without difficulty. The feed still appears to be in the best condition although many of the breaders handled lately have also been of good size. There is only no said Leghorn broilers arrivine now for which the jobbers appear to be thankful for they state that these birds are so light that it is hard to find a buyer for them. Many of the hens on the scores have reached the end of their laying period and it is believed that this is the reason why they are becoming more noticeable on the market, for the owners are turning them off rather than keep boarders.

There is said to be a good demand existing from hotels, restaurants and housewives, but this does not appear sufficient to take care of the entire supply, so that the jobbers are now getting a chance to put a few birds away for storage in preparation for the winter months. A fairly large supply has already been moved to date and each week is seeing an increase in the number of pounds

KINGMAN

Johnnie Johnson of Hay Lakes visited at the The Harie home on Monday.

Mrs. Thor Harie and Iver Mr. E. Erickson and Lily, were Camrose visitors on Tuesday

Milton and Fred Brown, on a motor trip from Edmonton to Alberta stopped off in Kingman to visit friends for a few days before proceeding further

Harry Erickson is visiting with Mr and Mrs. J. Erickson in Red Deer for a couple of weeks

Mrs. Thor Thorsen and children of Okotoks are visiting for a couple of weeks with friends and relatives in Kingman.

Mrs. C. Lindberg and Lillian Lindberg motored to Pigeon Lake on Friday, returning on Saturday.

Mr. and Mrs. James Carlson of Clyde visited with relatives west of Kingman for a few days last week

Mr. and Mrs. Jack Erickson and Connie, were the guests of Mr and Mrs. W. Hartscher on Sunday.

A number of Kingmanites attended the farewell services for Mr. and Mrs. Palmer Anderson of Burdo, on Sunday, previous to their departure for China.

Irene Horte spent the week end in Daysland.

Mr. and Mrs. John Anderson were Sunday guests at the home of Mr. and Mrs. E. Erickson.

Mr. and Mrs. Wm. McIntosh left for a vacation to Banff on Friday.

Little Bernice Arp had the misfortune to break her shoulder on Friday, when she took a tumble down the red hot steps. She is doing nicely.

There will be a dance in Kingman on Friday, August 23rd, with the Hay Lakes orchestra furnishing the music.

SATURDAY NIGHT

Harvesting has started in earnest, borders and tractors may be heard on all sides; while some fields are very poor take the general run, its a long way from crop failure.

The Sears family, Mr Editor, are also bemoaning the fact of not knowing of the fire until the next morning, as Hazel's school books furniture, personal belongings, etc., went up in the fire, they being in the rooms over Harry Rogers store

Mrs. Herman Lawson underwent an operation for appendicitis at St. Mary's hospital in Camrose. We are pleased to report her condition is considered satisfactory.

Mr W. A. Mitchell spent the week end at home. He is employed on the gas line near Bruce.

Miss Mabel Lawson is staying at the home of her brother Herman, in the absence of Mrs. Lawson.

Mr. Chester Coombes, Ethel and Harold, Mrs. Groves and Johnnie motored to St. Paul de Metis on Sunday returning home Monday. Mrs. Groves and Johnnie returned to Camrose on that place.

Mrs. Geo. Lawson, Mrs. Roy Lee and Herman Lawson motored to Camrose on Saturday.

Mr. Joseph Brown Sr., is building a large new home on his farm.

Mr. John Brown has been under the on Edmonton hospital the past week. It seems he had a cold which settled in his nose, it having to be lanced several times.

Amongst the families from our Vancouver, August 19th

district who spent Sunday at Cooking Lake were, McIntosh, Henderson, Mitchell, Sharpe, Carlisle, Barnes, Nesmeland, Brown and Sears.

Mr. Plants is recharging the school and other repair work before reopening of school.

Friends and relatives of the P. F. Ingram family were grieved to hear of the death of Mary Mitchell Ingram at their home in Victoria B.C. after a lingering illness since last February. Mrs. Ingram was the eldest daughter of Mr. and Mrs. Hugh Mitchell and was married and spent some 28 years in the Tofield district, where she was beloved for her Christian craftsmen, pulling and fast and trying to make others happy. She leaves to mourn her death, her husband, they having celebrated three silver wedding last year) two daughters, Jessie Edna and Stella Irene. Her parents, two sisters, Mrs. Yeomis of Edmonton and Mrs. Dow of Moose Jaw, a brother, W. Hamm and David, two brothers grandchildren, one in Ireland and Robert, a few years ago, besides a host of her relatives and friends who send to the family their sincere sympathy. Interment took place at Victoria

CARD OF THANKS

Mr. wish to express our sincere ... to the citizens of Tofield for their efforts in having our daughter removed from the danger to our day the donations for that object and on large portion of the business section of Tofield on Saturday morning. We are certainly fortunate in having a home to come back to

TOFIELD - - ALBERTA

"Performance Makes Us Popular."

"In Selling Position"

Alberta Wheat Pool members should appreciate what it means to the Central Selling Agency to have Pool wheat in "a selling position."

To make the best sales Pool wheat should be in a position where it is instantly available, and where long and trouble some delays are not incurred.

When Pool wheat is in Pool elevators the Selling Agency can depend upon it being directed wherever it is wanted. For that reason, if for no other, Pool wheat should be delivered to Pool elevators.

Besides this, Pool elevators give Pool members an assurance of fair treatment to an extent rarely known in be days when there was no Wheat Pool.

You can best aid your Selling Agency and your own elevator system by delivering your wheat to Pool elevators.

The occasion was in honor of Mrs. P. B. Anderson and Mrs. Eide's birthdays. Other guests during the day were Mr. and Mrs. J. Benson and Mr. and Mrs. S. Ergo of Kingman.

A very enjoyable party was held at the Ness home last Saturday evening. Quite a large crowd was present

Mr. Otto Johnsson, who has been working at Port McMurray during the summer, returned home last Saturday.

NEW BUILDINGS TO BE ERECTED

In formation is to hand that two new modern store building will shortly be commenced on main street.

Both buildings will be of two storeys and will be of the and brick. Mr. T. W. Taylor will build on the lot owned by him on the corner and Mr. Jobb will build on a lot yet to be decided upon.

Owing to an epidemic of measles and because so many of our members were holidaying, the August meeting of Holy Trinity W.A. was cancelled. The next regular monthly meeting will be held at the home of Mrs. C. Baptist on Wednesday, Sept. 4th, at 2:30 p.m. A hearty invitation is extended to all members.

TOWN COUNCIL PASSES BUILDING BYLAW

At a meeting of the town council on Monday night, and at which there were a number of interested citizens present, the bylaw, the chief object of which is to make it compulsory to erect brick or tile buildings on main street was read a third time and and passed.

The figures quoted as to the relative costs of lumber, tile and brick buildings, showed that the tile was only slightly higher than the lumber, hence the main objection, expressive ness, was removed.

There was little discussion and the vote in favor of the bylaw was unanimous.

ROYAL ALEXANDRA HOTEL SOLD

A deal of major proportions was consummated this week when the Royal Alexandra Hotel was sold by Mr. J. Hannan to Mr. L. Malcolm.

The hotel which is recognized as being the best on this line has been exceptionally well managed and conducted since it was erected by Mr. Hannan in 1913.

Mr. Hannan will remain in Tofield and will attend to his other business interests.

Mr. Malcolm will take charge early in September

Mrs. Cecil Lawson, Mrs. Roy Lee and Herman Lawson motored to Camrose on Saturday.

Mrs. and Mrs. Bruce Ross, sr., motored to St. Paul de Metis on Saturday returning home Monday. Mrs. Groves and Johnnie returned to that place.

Mr. and Mrs. Hallseth visited with Mr. and Mrs. C. B. Hipchert on Sunday.

Visitors at the Thor Horte home on Sunday were; Gesee Meinnes, Oliver Black, Edna and Teddy Eklund of Daysland, and Johnnie Johnson of Hay Lakes.

Mel Stanley and Eddie Lindberg motored to Edmonton on Sunday

Mrs. L. Dahl, Karen and Chester, of Hendon, and Mrs. B. Berendsen of Saskatchewan, are visiting with Mr. and Mrs. W. Jardin for a few days.

AMISK CUTTA

Mr. and Mrs. J. Nilson entertained a number of young and older people on Thursday evening. A jolly time was spent with playing games and other amusements. A tempting lunch was served at midnight

Several from here attended the farewell meeting held in Burdo Lutheran Church for Mr. and Mrs. Palmer Anderson and Ida Groseth who left for China to work on the missionary field.

Doris and Gordon Watt from Edmonton are spending their vacation with their grandmother and uncle in the Mrs. E. H. Olsen and L. C. Olsen homes.

Mr. and Mrs. L. Olsen and daughter from Burdo are out on their vacation.

Arthur Fayerheim left last week for Grande Prairie where he is to work in the harvest and threshing.

Gustav Bjorke from Lac Pak, was assisting with the harvest at Peterson's for a few days last week He spent Saturday visiting with Gustav's parents and left on Sunday for Edmonton.

The E. A. Moen family were visitors at the R. O. Berg home last Sunday.

Miss Ivana Hennig of Golden Spike is visiting Miss Alma Taubenheim.

Mr and Mrs. Phillips motored to Fort Saskatchewan, Lamont and Chipman on Tuesday.

Mr. and Mrs. T. E. Murray and family spent Sunday at Cooking Lake the guests of Mr. and Mrs. Ashton.

Mr. and Mrs. Thos Noland and Mr. and Mrs. Everett Noland visited friends at Deville on Sunday.

Alma, Henry, Bea and Emil Taubenheim and Russel Schultz attended the dance at Ryley on Friday evening.

Mr. and Mrs. H. Ludwig and son of Tofield, Mr. and Mrs. A. Hackethal and daughter of Burdo, were guests of Mr. and Mrs. Chas. Wilkins on Sunday.

Mr. and Mrs. Theodore Yeost of Edmonton, Mr. and Mrs. Cecil Yeost of Lethbridge, visited their sister, Mrs. J. J. Harrison and family on Sunday.

Friends of Mrs. Dawson were sorry to hear it was necessary for her to go to an Edmonton hospital for an operation on Wednesday afternoon and wish for her a speedy recovery.

Miss Mabel Lawson visited friends in Holden and district over the week end. She also spent Monday and Tuesday in Edmonton.

Mr. and Mrs. A. M. Sosna and daughter were guests of Mr. and Mrs. A. Hanson on Sunday evening

Mr. John Brown returned home on Thursday from an Edmonton hospital.

Through the kindness of Mr. and Mrs. L. Carlisle, a truck load of ladies and children enjoyed a trip to Elk Island Park on Sunday. They were Mr. and Mrs. L. Carlisle; Mrs. F. Oliver and daughter; Mrs. Roger Ens and children; Misses Lillian and Belva Carlisle; Misdees and Gertrude Ingram; Helen Shultz and Hazel Sears. The boys were Harold and Alvin Shultz; Roy and Lloyd Williams; Stanley and Charlie Sears, Harold Coombes, Donald and Gene Carlisle

Among those who motored to Elk Island Park on Sunday were: Mr and Mrs. C. A Ingram; Mr. and Mrs. J. H. Ingram; Mr and Mrs. G. W. Sears; Mr. and Mrs. C. Coombes and family; Mr and Mrs. A. J. Williams and Son; Mr and Mrs. J. Appleby and son; Mrs. McKenzie; Mr and Mrs. T. D Ferguson; Mr. and Mrs. E. Soule and daughter; Mrs. Peter Lee; Mr. J Munson and daughter; Sophia Brown and Johnnie Craven. All put their dinners together and ate on one table. The day was enjoyed by all, as it was a treat to see the beautiful scenery which abounds through the park and around Elk Lake. While all did not see buffalo, all were fortunate enough to view them a distance Bathing, boating and riding was also enjoyed

MORDEN & PEARSON, Props.

Before taking that vacation trip in the car, it is wise to have the car carefully checked over and any minor defects in its operation corrected. This will not cost a great deal and will most probably save you considerable trouble and expense while away from home. We have the equipment and the men to do a good job and give you satisfaction.

Make Every Dollar Count

The dry season is making it necessary for farmers to spend their money wisely and also to EARN AS MUCH AS POSSIBLE.

By bringing or shipping your cream to us you will be getting every cent there is in it. We give you the highest grade and test possible. If more convenient we will call for your cream at the Farmer Supply Co. Ltd Store, where it can be left.

During the summer it is vitally necessary to take extra good care of your cream. Make an extra dollar by being extra careful.

CHANGES IN CANADA GRAIN ACT

The Alberta Wheat Pool is publishing this article in order that its members may acquaint themselves with the amendments made to the Canada Grain Act at the last session of the House of Commons. The changes made in this historic act are of considerable importance, and every grain producer, and particularly those who are Pool members, should have a complete understanding of them.

It is a matter of common knowledge that grain producers as a class have not become sufficiently well informed on their rights and privileges under the Canada Grain Act. The result has been that at various times they have been imposed upon. The late state. Pool members were thin

CHANGES IN CANADA GRAIN ACT (Continued)

Alberta Wheat Pool stands ready at all times to give advice and assistance to its members when they are in need of the same in order to secure their rights.

The principle changes made in the Canada Grain Act made at the 1929 session of the House of Commons, may be classified under four headings as follows:

1. Changes in the Board of Grain Commissioners.
2. Re-defining of the rights of the producer under Section 150 (Campbell amendment.)
3. Changes in the regulations governing our order books.
4. Raising of the eastern standards from terminal elevators and the scheduling of mixing.

1. CANADA BOARD OF GRAIN COMMISSIONERS

The outstanding weakness in the old Canada Grain Act lay in the fact he Board of Grain Commissioners was not so constructed as to permit f the contact between the members f the Board and the farmers whose ights they were the guardians. The Agricultural Committee realized this ry reason not alone of the evidence ubmitted before it, but by reason of he many complaints that arose and were undisposed of through the lack f contact between the Board and the producer. The act was therefore amended to set up a Board of Grain Commissioners comprised of three men whose duty it will be to travel around sufficiently to enable farmers to place their views and complaints before them in a practical way. In addition, the act now provides for assistant commissioners who shall devote the whole of their time to the performance of their duties and shall not be engaged at any other office. These be located at Fort William, Winnipeg, Regina and Calgary. They are given authority to deal with complaints subject to an appeal to the board itself. Their function will be to handle promptly all complaints that may arise in the territory to which they are assigned. It was felt that their residence in the grain growing area would enable these men to maintain a contact with the producers' point of view, and to deal promptly with their suggestions or complaints.

The salary of the Chairman of the Board of Grain Commissioners has been fixed at $12,000 per annum. The commissioners will be paid $10,000 each. The salary of the sub-commissioners is to be fixed by the order in-council, but the committee was assured that the remuneration would be sufficiently substantial to attract good men to the positions. These increases were decided upon to enable the Government to secure the services of the best men available.

Realizing that the grain business in Canada is growing rapidly and that producing and marketing conditions grow and alter just as rapidly, the committee made it clear that they considered it would be part of the duties of the new Board of Grain Commissioners to make from time to time the necessary investigations to enable the Board to ask Parliament for such changes in the grain act as are necessary to keep it in tune with development. The Board may now proceed to investigate a complaint in writing. The complaint does not, in the first instance, have to be under oath. The Board may conduct investigations without complaint first being laid by anyone. This is considered of importance, because the knowledge that an investigation of any operation may be taken without complaint and without notice, is probably the best preventative of the doing of improper acts.

2. Changes in Section 150 (Campbell Amendment)

Section 150 of the Canada Grain Act, more popularly known as the Campbell Amendment, was recommended by Parliament in 1927 and the import of it was to give any producer of grain the right to take his shipment to any country elevator, to put it into storage, and when he had paid his storage charges thereon, to direct that it be transported to any terminal elevator of his selection. The amendment provided that the person operating a country elevator should issue to a person delivering grain, a ticket which was to state, among other things, that the grain represented by the ticket was deliverable to the person on whose account it had been taken into store. Most of the private elevator companies took advantage of the closing words to evolve the "hybrid" ticket in order to prevent Wheat Pool members from diverting their grain to Pool terminals. The hybrid ticket stated that the grain was taken into store not on the account of the man delivering it, but on account of the Wheat Pool. The grain having been received on account of the Pool under this construction, the elevator companies took the stand that they could only deliver it to the Pool, because the act stated that the grain was to be delivered to the person on on whose account it had been taken

BRAIN SAMPLES

(Canadian National Railways Magazine)

TWO MEN were discussing a mining prospect a few days ago. With all the limitless and ebullient enthusiasm of the prospector in whom hope never dies, who visualizes great returns and consequence opulence, the owner of said property very evidently desired to convey the impression that it was the greatest boon ever conferred on the human race by a beneficient Providence; indeed, he made this specific statement although in language much more colorful and pungent. He was forced to acknowledge, however, that his glowing predictions were based on what he termed grab samples, that is to say, samples picked up at random. They were not mill tests; not even channel assays. His hopes were based on the insecure foundation of a chance appraisal.

Grab samples! I thought, as I listened from the respectful distance of the uninitiated; is not that what our estimate of life, and movements and man is? Mere instantaneous snap-judgments arrived at without thought, or examination, or testing of any adequate kind. Nine-tenths of us, I reflected, are "grab sample" people and our opinions are often as shallow as they are untried.

Is this not true with regard to people? We instantly form judgments of people whom we meet casually; this one is disagreeable; that one is pleasant; a third is something else; and in the great majority of cases we are wrong, as more intimate acquaintances reveals. For example, when a boy I went to a school where the teacher was apparently one of the most forbidding of men, with his leonine head, and his shaggy eyebrows; they gave him the appearance of being at war with the world. I soon discovered that he was one of the kindliest of men and my association with him will ever remain one of the pleasantest of my early memories. I know another; he is a man of ability and occupies a prominent position but he does not wear his heart on his sleeve; "grab samples" concludes that he is cold and indifferent, though he simply cannot—inhibited by a sensitive nature—show a warmth that the breezy "storefront" individual appears to reveal. He is too refined to be a good fellow at a first acquaintance. There are depths in his character that have to be explored. So there are superficial people that impress on a first meeting, and more profound people that must be known.

Most of us imagine that we are great and exact readers of character; we pride ourselves on this faculty as much as on our sense of humor; and as a rule we are deficient in both gifts. We are, for the most part, chance appraisers of characteristics, not readers of character, for there is a vast difference between character and characteristics. Someone displays some trait—it may be an idiosyncrasy—and we instantly sum him up, yet we have never known the man, nor penetrated to where he keeps those qualities which are the distinctive qualities of a normal human being. So, in our judgment of men we are usually "grab sample" judges.

The same thing is true of movements and ideas, political, social, economic, or any kind whatsoever. How many so called "free and independent" individuals are either free, or independent, or have ever weighed the issues at stake. I affect an 'ism of some cult, or follow the school of some thought, or any other thing which a label might denote. Where did I get my ideas or convictions? Have I ever sat down and out of experience, observation and hard reasoning thought out my position. No, my reader, I have never done anything of the kind and a vast majority of my fellows—free and independent—have not done so either. I am a "grab-sample" man as I either inherit my ideas as I inherit the family plate from my father (who, I may venture to say without disrespect, knew little about such things), or I got them from John Jones, who is my neighbor, and, noble fellow though he is, knows no more about such questions than I do, but who is possessed of a dominating personality and—what is of more consequence—has interests similar to my own.

The same thing is true of such problems as capital and labor, and various other relationships that men sustain to one another. I have known men to labor on such relationships for years, carefully and studiously, and, at the end, find a conclusion difficult, yet your "grab-sample" man, armed with his own raw predilections and supported by a few phrases from his favorite book, or literature, will valiantly wade in where the skilled authority fears to tread.

The final test of a mine is the recovery of ore from the mill: the final test of our idea is, has it been through the mill of experience? Grab samples are not good enough.

The Crop is Light! But Not a Failure!

THE BLUE RUIN TALK OF MAY HAS CHANGED TO ROSY HUED CONVERSATION OF AUGUST. THE CROPS ARE LIGHT—BUT THERE IS A CROP. SOME OF IT CUT AND SOME OF IT STANDING READY TO CUT.

IT MEANS MONEY TO THE FARMERS AND MONEY TO THE FARMERS MEANS BUSINESS TO THE BUSINESS MEN. THERE WILL NOT BE AS MUCH BUSINESS AS TWO YEARS AGO, THERE MAY NOT BE QUITE AS MUCH BUSINESS AS LAST YEAR—BUT THERE WILL BE SOME—AND BECAUSE OF THE LESSER AMOUNT THE LOCAL MERCHANTS NEED THE LARGER PORTION OF IT.

IN THESE DAYS OF KEEN COMPETITION—WHEN TOFIELD AND EACH INDIVIDUAL SMALL TOWN IS COMMERCIALLY ARRAYED AGAINST THE WORLD, BUSINESS DOES NOT COME TO THE LOCAL MERCHANT FOR THE WAITING, BUT FOR THE ASKING—AND LIKE OLIVER TWIST, MERCHANTS THE WORLD OVER ARE ASKING FOR MORE.

TOFIELD AND DISTRICT BUYERS OF MERCHANDISE KNOW THE BIG TOWN MERCHANT THROUGH THE PRINTED WORD; THEIR "SHOPPING TOUR" IS OFTEN BY THE FIRESIDE WITH THE PRINTED WORD TO GUIDE THEM, AND THE MONEY GOES AND THE MERCHANDISE COMES FROM FAR AFIELD.

BUT THE LOCAL MERCHANT NEED NEVER BE SILENT AS REGARDS THE PRINTED WORD. EACH WEEK THEIR LOCAL PAPER GOES INTO THE MAJORITY OF HOMES AND CAN CARRY THE LOCAL MERCHANTS' MESSAGE TO THE BUYERS OF MERCHANDISE AS EACH WEEK ROLLS AROUND. A FRESH MESSAGE EVERY WEEK IF YOU LIKE, OR EVERY TWO WEEKS AND IF BUSINESS WARRANTED IT, THE LOCAL PAPER WOULD GO OUT TWICE A WEEK.

THE PROCURING OR NON-PROCURING OF BUSINESS BY THE LOCAL MERCHANT IS OFTEN PURELY A MATTER OF ASKING—A MESSAGE DELIVERED OR UNDELIVERED. A MESSAGE CONTAINING AN INVITATION; A DESCRIPTIVE MESSAGE; OR A MESSAGE GIVING NEWS OF A BARGAIN.

THE MERCURY DISPLAY ADVERTISING RATES ARE REASONABLE—SO REASONABLE THAT LOCAL MERCHANTS MAY USE SPACE WITH PROFIT.

Advertise For This District's Business--We All Need It!

[illegible] the rights which the amendment particularly sought to [illegible] to all grain producers.

In order to [illegible]

The New Section

The section now reads:

"(1) The operator of any country elevator shall deliver to any individual actually delivering grain for storage or shipment a [illegible] receipt in the name of the individual or [illegible] in the name of [illegible] individuals designated by the individual actually delivering the grain. Such receipt or receipts shall be dated the day the grain was received and specify:

(a) the gross and net weight of such grain.

(b) the dockage for dirt and other cause;

(c) the grade of such grain when graded conformably to the grade fixed by law and in force at terminal points; and

(d) that the grain mentioned in such receipt has been received into store

"2. Such receipt shall also state upon its face that the grain mentioned therein has been received into store, and that upon the return of such receipt, and upon payment or tender of payment of all lawful charges for receiving, storing, insuring, delivering or otherwise handling such grain, which may accrue up to the time of the return of the receipt, the grain is deliverable to the individual or individuals named in the said warehouse receipt, or to his or their order, from the country elevator where it was received for storage or, if he so desires, in quantities not less than carload lots, on track at any terminal elevator in the Western Inspection Division, or at a proper terminal elevator at or adjacent to Duluth, as soon as the transportation company delivers the same at such terminal, and the certificate of grade and weight is returned.

"3. Nothing herein shall prevent the owner of such grain from, at any time before it is shipped to terminals, requiring it to be shipped to any other terminal than as hereinbefore provided."

The operator of the country elevator must now deliver to the individual actually delivering grain for storage or shipment a warehouse receipt in the name of the individual designated by the individual actually delivering the grain.

The act, then, provides that the grain is deliverable to the individual named in the receipt or to his order. The element of ownership is entirely removed. The man in possession of wheat designates the name to be inserted in the receipt. The rights conferred by the ticket are then exercisable by the person named in the ticket. For example, Jones, a hired man working for a grower, Smith, takes a load of the grower's wheat to an elevator. Jones should say to the elevator operator that he wants the ticket issued in the name of Smith. Smith is the person to whom the grain is deliverable either out of the elevator in which it is stored or at the terminal chosen by Smith.

When the owner of the grain is ready to ship his car he should return his receipts to the elevator agent and, in the presence of a witness, tender payment of all charges. This means tendering money [illegible] the right change—not a cheque.

It was also decided to arrange for the printing of a standard grain ticket to be supplied by the Board of Grain Commissioners to all country elevators, this ticket to take the form and appearance of a standard government certificate, and that the [illegible] of any other ticket than that supplied by the Board shall be illegal. This will effectively overcome the practice of elevator companies of [illegible] ing tickets printed to their own ideas but which may not be in conformity with the desire of parliament.

3. Re Car Order Book

The old car order book failed to make a fair distribution of cars mainly because of the abuse of proxies. The Brown Commission, having taken evidence throughout Saskatchewan and some portions of Alberta made a recommendation to Parliament for a new car order book system which has been incorporated in [illegible] year's amendments to the Canada Grain Act as section 2[illegible]. Its salient features are:

The car order book is open all the time. There is no other way of getting a car than through the car order book.

No one can act as agent for more than one person at a time. If Jones orders a car as Smith's agent, then Jones cannot act as agent in ordering a car for any other person until the car ordered by him for Smith has been delivered. Jones can get a car for himself, but he cannot have an order for more than one car on the book unfilled, at any one time.

The agent of an elevator company may have two cars allotted to him when his name is reached on the book. This is intended to give the elevator companies more cars with which to handle street wheat (or wagon load lots) as it was objected that the car order book made it impossible to handle street wheat at any point where the proportion of street wheat was large in comparison to wheat handled on the other basis.

The act also provides that where a car is spotted for an applicant who cannot then fill it, it shall become available to fill the order of the next man on the book calling for a car to be spotted at the elevator where the unused car is then spotted. This is intended to overcome the delay which occurs at points where there are several elevators, making it impossible to move a car from one elevator to another until the switching crew comes the next day. It was thought that this would overcome delays for from twenty-four to forty-eight hours, and would remove the temptation to load a car improperly because it was standing there idle.

APPLICATION FOR BEER LICENSE

(Liquor Control Act of Alberta)

Public notice is hereby given that the undersigned intends applying to the Alberta Liquor Control Board for a license to sell beer by the glass or [illegible] bottle for consumption in conformity with the provisions of the government liquor control act of Alberta, and regulations made thereunder with respect to the following premises:

Royal Alexandra Hotel, lots 11 and 1[illegible], Block 10, Plan [illegible], Main Street, Tofield.

Dated at Tofield, Alberta, August 29th, 1929.

THOMAS L. MALCOLM
Applicant

COMMUNITY MARKETING OF POULTRY

At a recent meeting of the U.F.A. Local, Mr. J. McK. Hughes, of the Alberta Co-operative Marketing Association, outlined an attractive proposition for the marketing of dressed poultry in the Tofield district.

The scheme was listened to with much interest and poultry producers expressed their approval of the plan, and their desire to avail themselves of it.

The plan, which has been in successful operation in Manitoba and Saskatchewan, also in some parts of Alberta, for some years, is, in brief, as follows:

Provided a sufficient number are interested, a car will be placed at Tofield, to receive dressed poultry on a convenient date.

Producers will be notified from three to four weeks in advance to allow time for crate or pen fattening.

The fattened poultry will be assembled at Tofield in a suitable building, and an expert killer will be provided.

The producers will be expected to help finish the dressing.

The poultry will be cooled, weighed and graded by a government grader.

It will then be packed in boxes, loaded in car, and shipped direct to eastern markets.

Those who used this plan of marketing are enthusiastic over profitable results and never go back to the old method.

It has the advantage of minimum handling and transportation charges. Shrinkage will be eliminated and grade improved, thus a satisfactory price is assured.

Any healthy poultry, irrespective of breed or variety is eligible, but all should be fattened.

A sample fattening crate will be on view in Tofield.

Instructions and advice as to ration and method of fattening will be available on request.

The U.F.W.A. appointed Mrs. C. Baptist, as convenor for this district and any information available will be cheerfully given.

VARIETY THEATRE

PHONE 16

Saturday, September 7th

WALLACE BEERY —in— Old Ironsides

Beautiful and proud, her canvas bellied to the gale, helm down, "Old Ironsides" sails again before your eyes across the magic of the silver screen.

Once more, her portholes belch fire as her cutlassed crew swarms over the enemy's decks.

Here's a soul-stirring tale of the sea ten times as thrilling as anything written by Henty, ten times as inspiring as an Algar story—but posessing the same qualities of glorified youthful daring and pluck that sold those authors' books into the millions.

Saturday September 14th

TOM MIX and TONY THE WONDER HORSE

Rough Riding Romance

Tom Mix's admirers are numbered by the million and all because he presents such a spirit of daring, chivalry and romance such as is contained in this picture.

There is plenty of rough riding, plenty of lovemaking, plenty of tense moments and above all else, plenty of smiles. After the cares of the week, you will leave the theatre rejuvinated.

LOCAL AND PERSONAL

Mr. H. Lee saw a fine deer on Mr. Jebb's land last Saturday.

Miss Genevieve Hutson who has been at home for the past six weeks, left on Saturday last for Metiskow, where she will teach school.

Mr. and Mrs. Laurie Scott left for Fernie, B.C., this week. Mr. Scott is playing in a baseball tournament there.

Miss Mabel Wood left for Penhold last week, where she will stay for some time with her cousin.

Mr. and Mrs. H. E. Rogers visited at the Constantine home at Drumheller last week. Mr. Constantine was a former bank manager at Tofield.

Mr. and Mrs. Lamont of Holden, formerly of Tofield, moved back into town this week.

Mr. and Mrs. Stutzman and Mrs. Stutzman Sr., moved into town last week.

Miss Gertie Blake visited friends in Holden last week.

Mrs. E. W. Rogers spent a few days with Mrs. Hall in Edmonton, returning on Sunday.

Mr. and Mrs. John Lee, sr., returned from a visit to the coast this week.

Mr. and Mrs. Cory and Mrs. Chatterham and Blake returned from a vacation spent at Cooking Lake, on Monday.

A number of ladies of the Tofield Eastern Star Lodge visited Camrose lodge on Tuesday evening.

Messrs. Carver, McLaughlin and Calvert took part in a golf tournament held at Camrose on Sunday and Monday of this week.

Mr. and Mrs. Ross and daughter, of St. Albert motored down one day last week to visit Miss Lorett Ross, of Tofield.

Miss Erickson of Edmonton is visiting her sister, Mrs. Glover, of Tofield.

Mr. Eldridge returned on Tuesday from Camrose, where he has been ill.

Mr. and Mrs. Ross and family returned on Monday from Innisfail where they were holidaying.

Vern Griffin left for Saskatoon, Sask., this week.

Miss Jean Kellner of Edmonton, spent the week end with the Baptist and Hansen families.

TOFIELD SCHOOL FAIR TO BE HELD SEPTEMBER 19th

The Tofield School Fair Committee will meet at 8:00 p.m. on Saturday, September 14th, in the Tofield Town Hall. All members are urged to attend.

HANNA HOSPITAL NOW ENLARGED

Just ten years after the launching of the municipal hospital campaign in Hanna, an extension to the original hospital built in 1921, will be formally opened on September 12th, by the Hon. George Hoadley, minister of public health.

The original hospital provided accommodation for 22 patients; the new wing increases the accommodation to 34 beds and also provides more suitable quarters for the nursing staff.

In addition to providing facilities for the care of the sick during these years, the Hanna hospital has been a financial success. Since 1923, over $30,000 has been expended from general revenue for new equipment, such as X-ray machines, fire protection, and operating room equipment. A sub hospital at Craigmyle has been furnished at an outlay of approximately $8,000 and an accumulated surplus of $[illegible] stands to the credit of the hospital. Furthermore any opposition which originally met the idea in the rural districts has disappeared like snow before a chinook, and when the vote providing for the extension was taken last year, it carried by a large majority. [illegible] ratepayers voted for the extension and 83 against. The increased support came largely from the rural districts.

The rooms in the Hanna hospital which is a three story brick building with full basement are sunny and immaculate. The wards are all private or semi-private. All the equipment found in an up-to-date hospital of its size is found in the Hanna institution.

LAKE SHORE

The Noland family was pleasantly surprised on Friday of last week when Mr. Noland's three brothers, Jim, Finn, and George and a sister, Ellen and sister-in-law arrived from Iowa for a visit. Mr. and Mrs. Everett entertained a number of friends and relatives to dinner on Friday. These included Mr. and Mrs. Josh Noland and Thelma, from Tofield and Mr. and Mrs. Bert Stuman from Ryley.

John Murray of Mirror was in Tofield and district on Tuesday renewing old acquaintances and visiting his brother, T. R. Murray and family.

Mrs. Horace Rollins and children motored from Viking on Thursday of last week for a visit with the Wood families. She and her mother, Mrs. E. Wood were visitors at the J. [illegible] Johnston home on Saturday evening.

Mrs. Dorothy Walker and two daughters spent Sunday afternoon with Mrs. T. D. Ferguson.

School re-opened on Tuesday with Miss Emily Ferguson in charge.

Mrs. Tom Shultz of Deville visited friends in the district the first of the week.

Mr. Nick Sherstiasko and two sisters from Mundare were visitors at the R. C. Phillips home on Saturday.

A very enjoyable dance was held in the new school house in the [illegible] district on Friday evening.

Mr. and Mrs. H. Eaton spent Sunday with friends in the Woodlawn district.

U.F.W.A. NOTES

The regular meeting was held at the home of Mrs. Murray. The attendance was splendid, considering that it was a busy time for farm women.

The committee who had charge of the child welfare clinic reported that 28 children were examined during the day. This was very gratifying. Each member brought a suggestion for next year's program and a varied and interesting program is assured.

Mrs. Booth read a paper which Mrs. Geo. Francis (who was unable to be present) had prepared, on well balanced meals. This was very helpful and interesting, especially to mothers and a vote of thanks was accorded Mrs. Francis.

The grab bag for articles made from flour bags was then opened. These included aprons, scarves, tea cloths, etc., and demonstrated pretty conclusively the various uses to which the humble flour sack may be put.

The next meeting will be at the home of Mrs. P. Lee on September 12th. The hostesses will be Mesdames Bigland, Abernethy, Ball Thompson, C. Ingram, and A. Williams. Mrs. Baptist will give a paper on the benefits of co-operation. The roll call will be answered by baking day hints.

KINGMAN

Mrs. P. Rodnansky, Esther, Harold and Albert motored to Edmonton last Wednesday. The two boys had their tonsils removed.

Mrs. Thor Horte and Gladys Mrs. Thor Thorsen and Inez and Mrs. Andrew Johnson visited with Mr. and Mrs. Julius Hanson and Mr. and Mrs. Chester Ronning of Camrose on Wednesday.

[illegible] Helen Blyckert is home for a couple of months, while her mother Mrs. C. R. Blykert is recuperating from her operation for appendicitis.

Miss Olive Olsen, of Scandia, visited at the Tommy Welsh home for a few days last week.

Mr. and Mrs. Schauline left for Norway on Friday.

Mrs. E. Erickson entertained a few ladies on Wednesday afternoon. Those present were: Mrs. Horte, Mrs. T. Thorsen, Mrs. A. Johnson, Mrs. T. Welsh, Miss Olive Olsen, Mrs. J. Bovess, Mrs. O. Bovess, Miss Irene Horte and Miss Inga Johnson.

Dan Scramstad of Edmonton was a Kingman visitor on Friday.

Lillian Lindberg and Lily Erickson motored to Edmonton on Sunday.

Mrs. F. Erickson and Mrs. O. Bovess visited with Mrs. Martin Lind of Camrose on Saturday.

Mrs. C. Blyckert and Helen, spent the week end with Mr. and Mrs. Joe Munsen of Camrose.

Mr. and Mrs. John U. Erickson of Red Deer, spent the week end at the E. Erickson home.

Mr. and Mrs. John Ness of Edmonton, and Olaf Horte of Grande Prairie, spent Sunday and Monday with Mr. and Mrs. Thor Horte.

Mr. and Mrs. E. Erickson and Mr. and Mrs. J. Erickson were the guests of Mr. and Mrs. John Anderson on Sunday.

Thor Thorsen of Okotoks visited in Kingman on Sunday. He returned home on Sunday evening accompanied by his wife and children, who have been visiting here for a couple of weeks.

Miss Alice Simonson of Holden spent the week end at her home here.

Miss Lillian Lindberg left for her school north of Ryley on Monday.

TO INVESTIGATE GRAIN MARKETING

Winnipeg.—Dr. Robert Newton, professor of field crops at the University of Alberta has been asked by the National Research Council of Canada to make an investigation of the possible reception which would be given in Europe to a system of marketing wheat on a basis of protein content. The report will be prepared for the next session of Parliament.

Suggestion that such an investigation be undertaken was made by the agricultural comittee of the House of Commons last session. The announcement that the work would be done by Mr. Newton was made by Dr. H. M. Tory at a session of a committee of the research council here today.

The report on grading of wheat by protein content, published by the research council for the committee was approved.

KETCHAMOOT

Mr. Wm. Lee started up his threshing machine on his farm on Tuesday.

School reopened on Tuesday, September 3rd, with Miss Mildred Purcell of Camrose as teacher.

A large congregation was present at the reopening of church services on Sunday, all the seats were filled.

Mrs. Keitha Oliver returned to her school near St. Paul on Friday, she was accompanied by her little daughter, Irene.

Miss Mabel Lawson left on Monday for Camrose where she is engaged to teach in the normal school.

Mr. Tom Sutton and daughter of Barrie, Ontario, are visiting at the Sutton home.

Miss June Clark of Holden spent a few days last week visiting her friend Miss Mabel Lawson.

A little daughter arrived at the home of Mr. and Mrs. Leslie Coombes at Red Deer last Tuesday, August 27th. She will answer to the name of Leslie Ruth.

Mr. and Mrs. S. Nemeland and son visited at the Chester Coombes home on Sunday.

Mr. and Mrs. Wm. Lee and Viola, Wilfred, Lorne, Mr. and Mrs. Geo. Lawson, Mabel and Martin, and Mr. and Mrs. Harold Smith were Sunday guests of Mr. and Mrs. Roy Lee.

Miss Gertrude Ingram is staying at the Bowick home and taking grade nine in Tofield school.

Miss Bessie Burrow is staying at the Frank Hul Home.

Mr. J. H. Ingram accompanied Mr. J. Ferguson to Edmonton on Tuesday.

Mrs. Henderson and Jason, Mr. and Mrs. J. Appleby and son, Mrs. W. A. Mitchell and children, Mrs. L. Wildman and daughter were Sunday guests of Mr. and Mrs. Frank Shupe.

The monthly meeting of the M.A.S. will be held next Wednesday, September 11th, at the home of Mrs. E. McMullen. A cordial invitation is extended to all.

CHANGES IN GRAIN ACT

Continued from last week
c. Grain Standards

The question of abolishing the mixing of one grade of grain with another was considered by the Agricultural Committee. Some of the grain trade submitted testimony that the mixing is the most logical method of disposing of Canada's crop. The Wheat Pool submitted that in the mixing of grain the higher grades are deteriorated by putting therein lower grades which lower their milling value and reputation on the markets of the world. After consideration of all the evidence submitted and of the problem of handling Canada's crop, the committee came to the conclusion that as regards the statutory grades of grain, namely, 1, 2, and 3 Northern, which are more or less guiding grades, no good could be done by mixing any other type or grade of grain with them. It was therefore recommended that the general practice of mixing which has been heretofore used, be eliminated in so far as the statutory grades 1, 2 and 3 Northern, are concerned. It was thought advisable however, that there should be some delay in the prohibition of mixing so the regulation will not come into effect until August 1st, 1930.

Parliament decided to accept the recommendation of the Wheat Pools that the outturn standards from terminal elevators be raised. Heretofore the outturn from standard elevators could be, and generally was, a bare minimum of the grade. Hereafter the outturn must be composed of 25 per cent of the minimum of the grade and 75 per cent of the average of the grade of wheat passing primary inspection points such as Calgary and Edmonton. It is common knowledge that wheat passing these primary inspection points varies greatly within the grade. Take the grade of 3 Northern. Many cars may be a very good 3 Northern, just under a two Northern, other cars may be halfway—just midway between a No. 4 and a 3 Northern. Then again, other cars will be just over the line from a No. 4 and the minimum of a No. 3 Northern. It may be readily seen that an average sample from all these cars will be a great deal better than the minimum of the grade. Mixing houses have been taking the advantage of this situation and the general practice has been to degrade the outturn of wheat from the terminals until it is barely within the required grade.

There is a decided opinion on the part of the producers that the degrading of Canadian wheat by mixing houses until it goes out at the minimum of the grade has resulted in lower prices. They contend that if wheat goes out of the terminals on the average run, it will be much better in quality and the producer will get a higher price. It is pointed out that with practically every other product the higher price is obtained for a better article and there is no reason to believe that the same situation should not prevail with regard to wheat.

The Wheat Pool's position in this matter is against the degrading of Canadian wheat and against the idea that the producer is created to serve terminal elevators. Terminal elevators should serve the producer and should earn a fair basis of revenue under a legitimate scale of charges, but not through the degrading of Canadian wheat.

The regulation respecting the 75—25 outturn from terminal elevators went into effect on shipments out of Pool terminals at Vancouver, as such shipments have in the past been maintained at a high standard.

THE MUMPS

IF TOFIELD were situated in some parts of the globe where there live a large number of people who do not have to work for their living, having the mumps might become a passing fashionable craze. As it is an epidemic of mumps such as is raging at present is a nuisance, if not anything worse. For some months now, this complaint has dropped unawares into many homes in the town, in some creating a problem of nursing and care and in others just temporarily inconveniencing the patient. In homes where children have the disease, it is not easy to realise the need for quarantine regulations. The cases among children that have come under our notice have been very mild, with one or two days sickness at the most, then they appear to be as well as ever. To be quarantined for three weeks for such a seemingly slight disease SEEMS out of all proportion to what should be required. Consequently there is little question but that cases have developed without being reported to the Medical Health Officer. To not report a case of mumps is an offence punishable by law.

Apart from the legal aspect of the question, it is both wise and necessary to report the cases. While the disease is of little danger to young children, adults contracting it are quite ill. The disease calls for what is termed modified quarantine. That is, the patient must not leave the premises, but other members of the household may go about their daily business, with the exception of attending school, church, theatres, etc. Our information is, if one has had the disease, the germs cannot be carried, but if one has not had the disease, one can carry the germs and pass it on to another without contracting the disease. It should be remembered the disease is highly infectious but not contagious. That is, one can take the disease from a person, but not from his clothes or other belongings.

At present there is the problem of school attendance to consider. One child, having the mumps, keeps, or according to regulations, should keep, the rest of the family from school, with consequent loss of time and opportunities. However, unless the disease is going to run wild, the school part of the regulations at least should be kept. Either that, or drop all quarantine regulations concerning it.

GETTING ON WITH PEOPLE

(The New Outlook)

MOST OF us have a feeling that we could get along very nicely with people if it were not for the fact that so many of them are quite unreasonable and hard to get along with. If people only had the right ideas about things, had intelligent notions and right philosophies for life, that is, if they agreed with us—then there would be no trouble. But the difficulty is that there are so many queer people in the world, so many who absolutely persist in not seeing things as we do, and, of course, therefore, we have trouble with them, and sometimes find it extremely difficult getting along with them at all. In that case it can scarcely be our fault, can it?

But just as sure as anything, judging from that standard, there will always be a great host of those unreasonable and queer people in the world. Probably ninety-five per cent. of all the people we will ever meet or have anything to do with will disagree with us in a whole multitude of things and cherish ideals and philosophies altogether diverse from ours. And even though we may be sure that our way and our ideas and our philosophies are sounder and better and much more nearly true than theirs, and even though we could prove that before any reasonable tribunal, they will keep on seeing and feeling things differently right to the end of the chapter.

Of course, we can keep on being sure that we are right and they are wrong to the end of the chapter, too, and be very unyielding and pugnacious about it, also; but really that isn't the part of sound judgment and good sense. About the stupidest attitude we can assume toward a world that insists on not agreeing with us is an attitude of unyielding dogmatism, while to seek a way of adjusting ourselves to it, intelligently and reasonably is the effort of a wise man and a Christian. Of course there are some people who seek to elevate all the matters over which they disagree with their neighbors into great matters of conscience, but they seldom deceive even themselves by that subterfuge and never any one else. Men seldom get belligerent over great matters of conscience. And, in the final analysis, it is well to remember this, that there is just about an even chance that this stupid man, who insists on not agreeing with you, may be right. That thought may not make it any easier for you to adjust yourself to him and his point of view, but it furnishes an excellent reason why you should try to do so.

The Crop is Light! But Not a Failure!

THE BLUE RUIN TALK OF MAY HAS CHANGED TO ROSY HUED CONVERSATION OF AUGUST. THE CROPS ARE LIGHT—BUT THERE IS A CROP. SOME OF IT CUT AND SOME OF IT STANDING READY TO CUT.

IT MEANS MONEY TO THE FARMERS AND MONEY TO THE FARMERS MEANS BUSINESS TO THE BUSINESS MEN. THERE WILL NOT BE AS MUCH BUSINESS AS TWO YEARS AGO, THERE MAY NOT BE QUITE AS MUCH BUSINESS AS LAST YEAR—BUT THERE WILL BE SOME —AND BECAUSE OF THE LESSER AMOUNT THE LOCAL MERCHANTS NEED THE LARGER PORTION OF IT.

IN THESE DAYS OF KEEN COMPETITION—WHEN TOFIELD AND EACH INDIVIDUAL SMALL TOWN IS COMMERCIALLY ARRAYED AGAINST THE WORLD, BUSINESS DOES NOT COME TO THE LOCAL MERCHANT FOR THE WAITING, BUT FOR THE ASKING—AND LIKE OLIVER TWIST, MERCHANTS THE WORLD OVER ARE ASKING FOR MORE.

TOFIELD AND DISTRICT BUYERS OF MERCHANDISE KNOW THE BIG TOWN MERCHANT THROUGH THE PRINTED WORD; THEIR "SHOPPING TOUR" IS OFTEN BY THE FIRESIDE WITH THE PRINTED WORD TO GUIDE THEM, AND THE MONEY GOES AND THE MERCHANDISE COMES FROM FAR AFIELD.

BUT THE LOCAL MERCHANT NEED NEVER BE SILENT AS REGARDS THE PRINTED WORD. EACH WEEK THEIR LOCAL PAPER GOES INTO THE MAJORITY OF HOMES AND CAN CARRY THE LOCAL MERCHANTS' MESSAGE TO THE BUYERS OF MERCHANDISE AS EACH WEEK ROLLS AROUND. A FRESH MESSAGE EVERY WEEK IF YOU LIKE, OR EVERY TWO WEEKS AND IF BUSINESS WARRANTED IT, THE LOCAL PAPER WOULD GO OUT TWICE A WEEK.

THE PROCURING OR NON-PROCURING OF BUSINESS BY THE LOCAL MERCHANT IS OFTEN PURELY A MATTER OF ASKING—A MESSAGE DELIVERED OR UNDELIVERED. A MESSAGE CONTAINING AN INVITATION; A DESCRIPTIVE MESSAGE; OR A MESSAGE GIVING NEWS OF A BARGAIN.

THE MERCURY DISPLAY ADVERTISING RATES ARE REASONABLE—SO REASONABLE THAT LOCAL MERCHANTS MAY USE SPACE WITH PROFIT.

HEAP CASH MAYBE COMING TO RED MAN FOR OIL-HOLDINGS

The Stoney Indians on the Morley Reservation along the line of the Canadian Pacific Railway near Calgary, are benefitting by the oil developments in Alberta. Every man jack of the 640 members of the tribe, representing 125 families, receives $10 per annum for oil lease rentals on the tribe's land and should oil materialize will receive a 12½ per cent. royalty on all production, a certain amount of which will be set aside for agricultural implements. They gathered in all their Indian bravery of feathers and finely worked shirts, shawls and moccasins on the occasion of the first payment. Pictures show Chiefs Wolf Teeth, Lost Buffalo and Black Buffalo saluting the derrick, source of their new wealth. Chief Hector Crawler receiving payment from R. Hinton, Indian Agent at Morley; Indian with pipe in mouth is "Wild Man," son of "Wild Woman." Chief Wolf Teeth inside derrick with driller. Squaw Becky Beaver and papoose, counting her money. She looks heap happy.

Mr. and Mrs. Plum and family of Artland, visited at the Ross home of Tofield on Wednesday, and in the evening attended the Eastern Star lodge bridge drive.

Miss Stella Zook is taking grade ten at the Tofield High School. She is staying with Mr. and Mrs. W. Stutzman.

A. E. F. Carey and J. W. Robinson in company with over 100 members of the Anglican Laymen's Society of the diocese of Edmonton met the field commissioners of the Anglican National Commission in a dinner conference on church affairs in the Macdonald on Thursday evening, September 5th.

Miss Marion Cooper and Miss Clara Abbott returned home from an enjoyable trip to Europe. They visited a number of different countries and had many varied and interesting experiences.

Mrs. Brathe and daughter of Red Deer spent last week at the Thompson home returning on Monday via Edmonton. Mrs. Thompson went as far as Edmonton with them.

A grand reunion was held at the Josh Noland home last week, one sister and three brothers of Mr. Noland being at Tofield. They were Mr. and Mrs. James Noland and wife, Woodward, Iowa; Mr. George Noland Woodward, Iowa; Mr. Fin Noland, California; Mrs. Newell, Woodward U.S.A. There were other visitors at the Noland home last week, among whom were included, Mr. and Mrs. Fred Armitage, Edmonton; Mr. Charles Nelson and Mrs. Hill, brother and sister of Mrs. Noland, George Noland and Mrs. Critchly.

THE FEED SITUATION

The department of agriculture at Edmonton is anxious to get an idea as to the feed situation in the province as a whole and in the individual districts. Will those farmers who have hay or other feed to sell, please notify the secretary of the municipality. This enquiry is being made to forestall, if possible any serious feed shortage during the winter months.

New Buildings Rapidly Being Erected

OF SOLID BRICK AND TILE CONSTRUCTION

Will Improve Appearance of Main Street

Bricklayers, masons, carpenters, and labourers are now busily working on two store buildings on Main street.

Mr. J. G. Jobb is having erected a two storey, brick and tile structure on the lots formerly occupied by Hobson's Butcher Shop and McLean's Bakery.

The building will be 50 by 60 feet, the first 30 feet of its length being two storey and the second 30 feet one storey.

There will be two stores. One 20 by 30 feet which will be occupied by Mr. Jobb, and the other 30 by 20 feet which we understand, will be occupied by Hobson's butcher shop. Mr. Jobb will reside above his store and the portion above the butcher shop will be let into offices.

Mr. T. W. Taylor is rebuilding on his former location, having contracted for a two storey solid brick and tile building 25 feet by 60 feet. The lower storey will be used as a store building and the upper storey as a residence. The contractor of both buildings is Mr. Reed of Edmonton.

LINDBROOK

Pardon, folks! for not writing up the Lindbrook items of late but the last mail days the writer has been busting a wandering bull, not shooting it as he usually does.

Mr and Mrs H. B. Hobbs of St. Paul de Metis, late of Lindbrook motored down to visit friends at Lindbrook last week. Whilst here they stayed with Mr and Mrs. Hooper. Mr Hobbs looks as well and as jovial as ever and Mrs. Hobbs, if anything, is growing younger. Whilst here, a picnic was organized at Hastings Lake but the weather was not suitable for it, so it evolved in a series of parties in closed cars, what kind of parties we know not, certainly not petting or necking ones.

A carload of cattle was shipped from here by the Livestock Pool this week, whilst the store truck still takes its quota of hogs, cattle, etc up to town. There are not by any means the herds here now of a few years ago. By the way, we hear that a car of sheep is to be shipped soon.

School re-opened with Miss Anna Sponde of Oxville, nr. Chauvin, as teacher, whilst on this school subject we would like to mention that the foundation of the school has been cemented up and a metal flashing put al round the top.

A party of Lindbrook ladies visited Mrs. Geo. Weatherill last week; this week the party was repeated at Mrs. Hooper's and next one is at Mrs. Pointer's. Say, these must be good, and how about the men folk staging a few stag parties some evenings, smokers you know, with the usual lubricant that goes with same.

Lindbrook has its "trail rangers" only they get lost and a little child accompanied by a faithful dog leads them to a guiding light, but we won't [illegible]

Mr. Fred Wilde unloaded a Waterloo grain separator at the siding this week. Gee Fred! Last year it was hail and you buy a grain truck, this year drought and you get this; if its dry next year I suppose you'll invest in a boat or sailing yacht. Nothing like optimism Fred! Congratulations.

JOHN ROWLAND PASSES AWAY

John Rowland of Tofield, Alberta, passed away in an Edmonton hospital, on Monday, September 9th, aged 86 years. The late Mr. Rowland had been a resident of Tofield for a number of years. He is survived by one sister, Mrs. John Logan, Camrose, Alberta.

The funeral service was held on Wednesday afternoon at Tofield interment taking place in the Tofield cemetery.

A Fast Worker

"Every time I kiss you, it makes me a better man."

"Well, you don't have to try to get to heaven in one night."

KINGMAN

Mr. and Mrs. Haugsoth of Bardo, visited with Mrs. P. Simonson on Tuesday.

P. Rodnunsky was a business visitor in Edmonton for a few days last week.

Mrs. E. Erickson and Lily motored to Tofield on Wednesday.

R. Blyckert visited in Camrose on Saturday.

[illegible] Lindberg boys, Sam Cinnamon, and Lillian Lindberg motored to Edmonton on Saturday evening.

Helen Blyckert and Lily Erickson visited with Mrs. L. Erga on Saturday.

Mr. and Mrs. D. M. Thompson and daughter, motored to Rosalind on Sunday.

Mr. and Mrs. W. Jardie spent Sunday at the Walter Hartschen home.

Mr. and Mrs. S. Simowitch of Round Hill and Mr. and Mrs. Sam Hardin of Vegreville were the guests of Mr. and Mrs. P. Rodnunsky on Sunday.

Mr. and Mrs. E. Erickson, Harry and Lilly, visited with friends in the Bawlf district on Sunday.

Selmer Olsenburg of Camrose is teaching the Farmington school.

Mr. and Mrs. Tommy Welsh and children visited at the Sam Nomeland home on Sunday.

LAKESHORE

Mr. T. D. Ferguson was the unfortunate victim in an accident in which he sustained a broken leg the first of the week. He, with his brothers were moving a granary from his farm to that of his brother when a passing motor car caused him to step between the building and the horses. Medical aid was immediately called and he was taken to Camrose hospital where he is progressing as favorably as can be expected.

On Friday afternoon Mrs. T. R. Murray entertained in compliment to Mrs. Pain of Yorkton, Sask. Mrs. [illegible] will be remembered as Miss Ethel Sears. About eighteen ladies were present and a most enjoyable afternoon was spent. The hostess served a dainty lunch.

Mrs. L. Radabaugh returned to her home in Oregon, U.S.A. on Wednesday of last week after a visit with relatives and friends here.

Mrs. Geo. Francis and Mrs. R. Phillips visited Mrs. L. Wikman of Woodlawn on Thursday afternoon of last week.

Church services are held every Sunday in the Lake Shore School house at 3 p.m. Rev. Thos Gordon in charge. Sunday school at 2 p.m.

Mrs. Geo. Francis spent a day or two this week helping her sister cook for threshers.

Mrs. Horace Rollins and children of Viking, spent several days this week at the Wood home.

Mr. T. D. Ferguson and Mrs. Dorothy Walker called on friends in the district on Friday afternoon.

The Misses Pearl and Edna Gray spent Sunday with their sister, Mrs. Lester Noland.

Mr and Mrs. Keith McIntosh from Kamsack, Sask., are visiting at the Murray home and in Tofield. They motored from their home and arrived here on Monday evening.

Mrs. T. A. Jones and Mrs. J. H. Johnston motored to Edmonton one day last week.

ROGERS BROS. DOING BUSINESS IN THE CURLING RINK

H. E. and E. W. Rogers are carrying on business temporarily in the curling rink. On all salvaged goods that shows any sign of handling they are allowing handsome discounts. There are a great many lines that for all practical purposes are as good as ever.

H. E. Rogers is showing some new fall coats for women that have distinctive style and attractive price markings.

AMISK CREEK

School reopened after vacation on September 3rd, with Miss S. Ostrander from Strome as teacher. She is staying at the home of Mrs. I. C. Olson.

Miss F. Moline left for Southern Alberta, last week. She will teach school near Medicine Hat.

Bessie Annabo and Hazel Hillerude are attending normal school in Camrose.

Agnes Annabo is attending high school in Ryley.

Olive Olsen from Shonts is in Edmonton attending high school. She is staying with her sister, Mrs. Harris.

Mr. A. Erickson visited Edmonton last week. He was compelled to stay a few days at the Royal Alexandra hospital, but we are pleased to say he is now doing nicely.

Miss Ruby Berg wrote an exam at the normal school in Camrose last week.

Harvesting is now nearly completed and threshing is very well advanced. Threshing is not taking much time this year, generally the crop being light and the straw short.

Mr. and Mrs. I. C. Olson and family were visitors to the W. Anderson home north of Tofield last Sunday.

Mrs. E. A. Moon visited with Mrs. P. O. Flaaten on Thursday of last week.

Mr. and Mrs. R. O. Berg, Mrs. P. O. Flaaten and Gunvald, attended a surprise gathering held on the newly wed couple, Mr. and Mrs. Arneberg, in Ryley on Sunday evening.

BARDO

Miss Gudrun Ness left for Minneapolis last Tuesday. She is engaged to teach school there.

Miss Carey Brecken left to teach school at Spirit River last Wednesday.

Mr. and Mrs. Moorad Finseth and Mr. and Mrs. Iver Moen visited at the Stromstad home, Sunday last.

The Ness and Foshaug families spent last Sunday at Cooking Lake.

Mr. and Mrs. A. Kindley, and Mr. and Mrs. R. Eide, visited with Mr. and Mrs. S. Erga of Kingman, last Sunday.

Mrs. Annie Anderson and son Phillip, and Mr. P. B. Anderson, returned from Wetaskiwin last Saturday. They were there two weeks for the benefit of their health.

School re-opened at Bardo and Grande Forks on Tuesday. Miss Rude and Miss Martin will teach at Bardo again this year. Miss Somens will teach at Grand Forks.

Miss Anna Jevning, who is in Edmonton at present, visited her home here, on Wednesday.

Miss Margot Ness returned to her duties at the Royal Alexandra hospital, last Sunday.

There will be a Sunday school concert at the Bardo church on Sunday, September 15th, at two o'clock. Everybody is welcome.

TOM MIX IN "ROUGH RIDING ROMANCE"

For Saturday, at the Variety there is a further appearance of the famous film star, Tom Mix and the most famous film horse in the world, Tony. Tom in this picture stands out brilliantly as a western actor and is only rivaled by his horse. Tony shows a degree of animal intelligence that is astounding. Deeds of daring are Tom Mix's daily fare, and in this picture he has given the spectators something to hold their breath for.

As a stage lover, Tom is unsurpassed and for those who like to see the great romantic element displayed should not miss this showing. Romance, thrills, daring, humor, animal sagacity and loyalty, all these and many others will be presented at the showing of "Rough Riding Romance" at the Variety on Saturday.

Taken Literally

"I asked her if I could see her home."
"And what did she say?"
"Said she would send me a picture of it."

CHAS. ROBINSON

WHEAT POOL NOTES

The Alberta Wheat Pool is making a determined effort to point out to Pool members the importance of delivering Pool grain to Pool elevators wherever it is possible, in view of the light crop in Alberta this year.

****

The introduction of combines and auto trucks has speeded up harvesting on the Canadian prairies to a remarkable degree. The result has been an unprecedented flow of grain to the elevators during a brief period in the fall. In order to restrict this glut as much as possible the Alberta Wheat Pool is offering a bonus of 2 cents a bushel for wheat held on farms until December 2nd, 1929. Wheat producers should realize it is not good business to deliver the crop in such a hurried manner that it has a reactionary effect on the market.

The Wheat Pool has not made a practice of compelling Pool farmers to deliver their wheat crop in one crop year. For instance; some Pool farmers have carried wheat from their 1928 crop past the date of the closing of the 1928 Pool, which was July 15th, and delivered this grain to the 1929 Pool. No objections have been made by the Pool against this practice. A recent news item issued by the Wheat Pool mentioned that action had been taken against a few Pool members who had not delivered their 1928 wheat to the Pool. This has been construed by some to mean that all Pool wheat should be delivered within the Pool year. As a matter of fact the action was taken because the wheat had been delivered outside the Pool.

FOR SALE.—Three purebred Shorthorn cows; wgt. about 1400; with calves by side; two sows with pigs suckling; one sow due to farrow in about two weeks.—Apply to J. Voegtlin, 'Phone 209, Tofield. 32p

GAS FROM CORN STALK LATEST SAYS SCIENCE

Minneapolis, Sept. 10.—Cornstalk gas to light and heat small cities was announced here yesterday. Ordinary sewage and plain corn stalks are combined in a cheap, simple method which produces results like those of Aladdin's lamp.

From these two nuisance wastes, University of Illinois chemists are recovering large quantities of methane gas, plain marsh gas, announced as useful for heating, for operating automobiles in place of gasolene and driving engines producing electricity. They also are recovering the principal ingredients of "dry ice". And they swat the corn borer.

They believe they have an apparatus so simple that it can be installed by any farmer to make his family sewage turn his cornstalks into one of the needs of the farm wives, good, clean cooking gas. It requires no machinery; bacteria from sewage do the work.

The author of the discovery is Dr. A. M. Burwell, professor of sanitary chemistry at Illinois University, assisted by O. S. Baruff.

CANARIES FOR SALE—Good singers. Apply to Mrs. A. Hosler, 'Phone 114 (local) Tofield, Alta.

HON. FRANK OLIVER IS WANTED BY PEACE RIVER

If the Hon. Frank Oliver will accept the nomination for the Liberal federal riding of Peace River it is with the unanimous approval of Liberals throughout the great northern constituency, and a due appreciation of the fitness of things that the Hon. Frank Oliver should again be seated in the Ottawa house as the representative of a frontier riding.

Delegates to the convention of the Peace River Liberal Association held at the Macdonald Friday were heartily agreed in proposing Mr. Oliver, and it was stated that if he could be persuaded to take the nomination no further suggestion of names would be made.

Hon. Mr. Oliver has not been approached in the matter. He left for the east by way of the "Confederation" on the C.N.R. on Monday afternoon, with plans to stop at Regina and Winnipeg before proceeding with Chief Railway Commissioner McKeown to the annual convention of the Canadian Good Roads association, which commences at Charlottetown on September 17th.

While it is not known just what the veteran campaigner's decision would be on the question of re-entering politics, those of his friends who are close to him are quite frank in stating that his inclinations no longer are toward the political arena.

ANGRY GIRL IN FIT OF TEMPER DRINKS LYSOL

Drinking a small quantity of lysol, Mary Boychuck, 9346 106A avenue, was rushed to the Royal Alexandra hospital, Edmonton, on Monday afternoon, where she is being treated for irritant poisoning.

According to city police reports, Miss Boychuk had words with her mother and during a fit of temper poured a small quantity of lysol into a glass and drank it. After she realized what she had done she immediately swallowed sewing machine oil and then took two glasses of water. She informed her mother of what she had done and Dr. Bell was called in and he at once ordered the girl to the hospital.

It was reported Tuesday morning that the girl was apparently in no danger.

BIG INCREASE OF IMMIGRATION FROM BRITAIN

Ottawa, Ont. Sept. 10.—The British preponderance in immigration during the first four months of the present fiscal year has been maintained. When Right Hon. J. H. Thomas arrived in Ottawa for his final discussion on British migration to Canada he found conclusive proof that the Canadian government's policy is having the wished for consummation.

There is an increase of 47 per cent in immigration from the British Isles. Nineteen per cent from the United States and 13 per cent from the northern European countries. On the other hand, there is a decrease of 33 per cent in the immigration from continental Europe and other countries.

It is not believed that any concrete plan of assisted migration was presented by Mr. Thomas when he discussed the matter with the cabinet. Hon. Robert Forke, minister of immigration, is still in Western Canada and his deputy also is away from the capital and good authority has it that the department has not received any details of any specific plan of migration.

NOTICE

IN THE ESTATE OF ANNA STORLI, late of Eugene, Lane County, Oregon, United States of America, deceased.

Notice is hereby given that all persons having claims upon the estate of the above named deceased tate of the above named deceased, who died on the 4th day of March, 1929, are required to file with the undersigned by the 21st day of October, 1929, a full statement duly verified of their claims and of any securities held by them, and that after that date the executor will distribute the assets of the deceased among the parties entitled thereto, having regard only to the claims of which notice has been so filed, or which have been brought to his knowledge.

DATED this 20th day of August, 1929.

LYMBURN, REID & COBBLEDICK, Solicitors for the Executor, 822, Tegler Building, Edmonton, Alberta.

Here and There

Canadian Pacific steamer Minnedosa recently brought over to Canada two fine stallions belonging to the Prince of Wales, "Aldebaran" an Arab and "Crusader" a Clyde, to go the royal ranch at High River, Alberta. The two horses broke their journey at the Toronto Exhibition and later were carried across the Dominion by Canadian Pacific Express. Special accommodation was provided for them on the Minnedosa.

Rt. Hon. L. C. M. S. Amery, secretary for the Dominions in the Baldwin administration, fulfilled his wish recently when he climbed Mount Amery, 10,940-foot peak in the Rockies, to accomplish which he had travelled some six thousand miles by Canadian Pacific Empress of Australia and lines to Lake Louise from England. He fought his way through blizzards and many other hardships to the top of the peak. He was accompanied by a Swiss guide, Edward Feuz, of Lake Louise.

"Mr. Churchill looked very funny working on one of father's threshing machines," said the Hon George Rodney, aged ten, who with his younger brother John recently travelled to England to take up schooling. Winston Churchill is a cousin of Lord Rodney who operates a ranch at Fort Saskatchewan, Alberta.

The fourth game refuge has been established in New Brunswick by the provincial government at Beraguimac, consisting of 43 square miles located in Carleton and York counties. This makes a total in all of about 640 square miles of territory set aside in the province as game sanctuaries since 1919.

Hon J. L. Perron, Quebec minister of agriculture has announced the loan of two-thirds of the purchase price of pure-bred sheep without interest charges, to Quebec farmers. He aims to place 25,000 pure-bred sheep throughout the province to bring in a yearly revenue of $250,000.

A yield of 3,599,996 barrels of apples is expected in Canada this year, as compared with 3,325,270 in 1928. Compared with the five-year average of 2,985,210 barrels this is an increase of 20%, making it a bumper crop.

Homestead entries in the four western provinces continue to run well ahead of last year. For the half year they number 7,129 as compared with 5,165 in the same six months period of 1928. Alberta topped the list with 4,052 filings; Saskatchewan followed with 2381; British Columbia recorded 371 and Manitoba 325.

Sixty-three wells are being drilled in the Turner Valley, 30 miles south-west of Calgary, 21 are just about to be started and 28 are producing crude naphtha or crude oil—a total of 112 wells. Mr Winston Churchill, on his recent trip across the Dominion by Canadian Pacific paid a special visit to the Turner Valley accompanied by Mayor Osborne of Calgary.

Selection is announced of John W. Dafoe, Editor of the Winnipeg Free Press, to act as a commissioner on the part of the United States on the International Commission under the Treaty for the Advancement of Peace between the United States and Germany. Mr Dafoe was selected for this post by the United States Government acting through Hon William Phillips United States Minister to Canada. The International Commission now being set up by the United States and Germany is to have five members, of which Mr Dafoe is the first to be named. All disputes between the United States and Germany, after ordinary diplomatic proceedings have failed, are to be referred to the Commission.

Advertising Is News

MANY MERCHANTS BELIEVE THAT NEWSPAPER ADVERTISING IS NOTHING MORE THAN AN APPEAL FOR TRADE. NEWSPAPER ADVERTISEMENTS ARE AN APPEAL FOR TRADE, OF COURSE, BUT THEY ARE ALSO SOMETHING MORE—THEY ARE NEWS.

AND IMPORTANT NEWS TOO. TO THE MOTHER WHO HAS TO BUY SHOES AND A SUIT FOR JOHNNY, TO SAY NOTHING OF HER OTHER MANY REQUIREMENTS, THE ANNOUNCEMENT OF A NEW AND BETTER STYLE, A LOWER PRICE OR AN IMPROVEMENT OF ANY KIND IS READ WITH AS MUCH INTEREST—AND MORE—AS THE PROCEEDINGS OF PARLIAMENT.

THE PEOPLES' MONEY AND THE GOODS THEY HAVE TO BUY ARE TWO VITAL FACTORS IN THEIR LIVES. FACTORS IN WHICH THEY ARE ALWAYS KEENLY INTERESTED—THEREFORE DOES IT NOT SEEM REASONABLE THAT AN ADVERTISEMENT DEALING WITH THESE THINGS WOULD BE READ WITH INTEREST BY THEM.

YES, ADVERTISING IS NEWS AND THE PUBLIC DEMANDS NEWS—AND THERE IS LITTLE TO CHOOSE AS REGARDS IMPORTANCE BETWEEN NEWS PERTAINING TO THEIR POCKET BOOKS AND NEWS PERTAINING TO THEIR SOCIAL SYSTEM.

TO THE MERCHANT WHO CATCHES A VISION OF THIS REAL MEANING OF ADVERTISING—THERE OPENS UP AN AVENUE FOR SERVICE AND PROFIT, WHICH HAS HITHERTO REMAINED CLOSED.

Advertise For This District's Business—We All Need It!

APPLICATION FOR BEER LICENSE

(Liquor Control Act of Alberta)

Public notice is hereby given that the undersigned intends applying to the Alberta Liquor Control Board for a license to sell beer by the glass or open bottle for consumption in connection with the business conducted in the premises situated on the ground floor of the building known as the Tofield Hotel, Tofield, Alberta, and registered under the name of Tofield Hotel Ltd.

Dated at Tofield, Alberta, August 26th, 1929

THOMAS C. MALCOLM
Applicant

A painful and unfortunate accident befell Jack Ridgeway, one of the employees on J. D. Hannan's farm. He was picking up some old material, in which was a stack of ayrm which exploded in his hand. The hand was badly torn and burned, but it is not expected to still lose any fingers. He was at one time porter in the hotel

THRASHING RETURNS SPOTTY

Thrashing returns during the past week have been very varied. Some farmers have three and yields as high as 50 bushels to the acre others have secured very low yields. The high 12, Block 10, Plan 9208S. Main roads almost invariably come from Street, Tofield the south while the interest any other tract as disappointing as can be said fearing

Applicant quality and quantity will in most cases offset the poor yield.

Tofield Carage

MORDEN & PEARSON, Props.

Before taking that vacation trip in the car, it is wise to have the car carefully checked over and any minor defects in its operation corrected. This will not cost a great deal and will most probably save you considerable trouble and expense while away from home. We have the equipment and the men to do a good job and give you satisfaction.

HUNTERS, RISE AND HUCKLEBERRY

In a few short weeks time the Indian summer will be with us and with it the hunting season. There will be very few of us that will not feel the urge to be up and shooting at dawn.

Right now there is many a spoilt lover oiling his guns and looking over the gear planning for the hunting trip to come. Who doesn't feel the urge for the big Out-doors?

The creeks, the lakes and those frost tinghting invigorating morning pilgrimages to some favourite hunting ground. Forgotten is the hard hot and monotonous of last fall. What of the old car did get bogged down and you had to sleep under a stook or Bill fell in the creek and lost the grub. Many the laugh you have had during the year over the different incidents that happened. They seemed tragic then at 8 a.m. hot, the rain trickling down your neck and the breaking of the cold grey dawn showing frost glistening on your whiskers. You swore "never again"

But here's fall with its keen air and pungent tang of burnt gunpowder, the vision of birds in the open outstrided and the wind whistling through the feathers. You bet! I'm out with the old scatter gun again. Remember last season, how you swore your luckless to survey regarding that secluded lake that was just teeming with fish. Regarded it there for weeks with tales of what a whopper of a bag you would get for them, all great big whoppers too. How last you felt when the gang nominated you chief cook and bottle washer. A dear little wife seemed when you consented but the gang depended on you for leadership. Then the big day arrives and the party stook out early town in the early hours happy and full of hope on the way to your vacant old hunters' paradise.

In the excitement of getting away a corkscrew has been forgotten. How ever that handicap is easily overcome all the old wives just seems to fly along; sure is a great feeling, even a couple of blowouts don't dampen it. "Hey, how far is this lake of yours" enquires one of the buddies in the back seat, judging by the spirit left of in the bottle we must have come twenty miles already what."

To tell the truth you're not quite sure, this trail doesn't look quite right, mustn't admit you're lost though. "That last road sign now that those letters were all jumbled together. Why can't the government in legible signs anyway? Ah! at last, that old barn is familiar" Your just about lost confidence returns and you motor the impatient time only a few more miles boys. Fill up with ammunition." Then a hurried start to do so but you can't locate shells. Oh, well, you're all set for the day anyway but Pete should be more careful when he does of work, shot save does make a large hole when it goes through the top of the car. It's Jim's car anyway and he doesn't mind, says he intended putting a stove in the old coach this winter and now has a dandy stovepipe hole made to order.

"We'll leave the car here boys, the lake is just over that hill. Say you've got to walk." Thought you said we could take the old car right in?" "Oh! only a mile, just through that bushy flat and over the hill. Took the car in last year but came in on the other side of the lake. This is a shorter way." (Never do to tell em that you beat the quick trail)

"Well let's get" Quite a sporty looking bunch decked out in new khaki hunting suits. Thinks vests full of shells and guns shining. "Gee! but its great to get out in the wide open." "Might be snake in that tall grass over there" suggests Jim "dont you think we should take more preventative before we start?" Every, body laughs and eagerly complies with the suggestion and soon away for the distant hill and the hunter's paradise beyond.

In the lead with your new hunting can stock jauntily on one corner of your reunion and thoughts of how the gang will slap you on the back and acclaim you when you get them to the duck hunt of their lives runs sing through your mind. Your eyes are on the ridge ahead when, Think into the mishap up to your knees "Come on gang, don't mind a little mud, grumbles but faithful to the last they follow

Through half a mile of bog that you swear wasn't there last year, mud plastered and sweating you top the ridge. Bill bursts your feelings by saying he came out for a duck hunt, had all the mountain climbing he wanted at Banff.

Down below glistens THE lake ... your hopes and dreams with its bank covered shores shimmering with a hundred colors from the recent frost-ed foliage. Its rush covered bays and creeks the ideal feeding ground for ducks.

Up from below, wafted by the early morning breeze comes the rolling boom of guns. Shot your eyes and you can imagine its more hour at Vimy Ridge again.

"Some sector!" remarks the untidy sweating gasp with one voice, "Guess you told the whole city oh!"

Back home that night trailing a couple of sour nose, for trophys you remark that you just were speaking to the gang again. They have been pulling your leg all day and you're sure somebody must have told about the lake.

"Why you, dear I was telling them at the bridge game just a week ago how clever you were and all about you knowing where thousands and of ducks were at your beautiful lake. They seemed so interested. Have another cup of tea lovey, you look so tired.

Can you forget it? Sure "Jim knows a dandy place and I'm getting some limper loaded with. More ducks, what!"

With the advent of the hunting season comes the usual be said a bit on guns conservation. Its not necessary to preach conservation to the true gun sport. By the "bird butcher" that does the damage and it is up to every sportsman to try and stop the follow. You all have met him. Traveling along the highways you chatter him the "Road Hog" and various ther names. Meeting him during the hunting season you call him "Pot hunter", murder and destruction is his creed. Pot shots at everything in sight. But life doesn't seem anything to "im, just something to perish with handy. Something to blow from tree or bedge, a sense of blood and feathers left lying where it fell. The frequent discharge of his gun seems his idea of sport. Shooting at telephone insulators on motor car shot through road signs or at the farmers rat tickles his childish fancy. Overhead soaring his scatter gun with the business end pointing at some unsuspecting gander's anatomy, or playfully trying the "William Tell" stunt on one of the gaze's hat.

Live sportsmen this is the boy you should step or and step on hard if you don't want our hard lid existence ruined and our game full of shooting accidents and fatalities.

A few words might be said too regarding the hunters that go into the farmer's field and dig gun pits which they forget to fill up. This fault is quite prevalent. Only a few minutes work will fill these pits which if left over might easily mean a crippled animal of broken machinery for Mr. Farmer

Once the average hunter realize how much grain he destroys when he scatters a field and carelessly throws half a dozen or more stooks of wheat into a beautiful bird hide and comfortable bed. The farmer in out of pocket considerable. Two to five bushels of wheat say at $1.50 a bushel. Five or six hunters, figure it out for yourself.

The above is the reason that every fall sees more and more fields pitchforked with non-trespassing signs. Can you blame the farmers? Only knows that the birds eat considerable of his grain and he welcomes the gunner who is after the birds but who is gentleman enough to ask permission before shooting over his farm and considerate enough when he obtains that permission not to destroy willfully, scatter stooks, and leave undfilled pits in the fields.

Courtesy begets courtesy. Try it on the country folk in your hunting run this and you'll find they'll meet you half way.

Ducks, geese and prairie chicken are undoubtedly getting scarcer in the settled districts. They require quiet and secluded lakes and prairie birds to nest and raise their young. However, with judicious shooting and the fairness to stop when enough birds have been secured to meet the needs of the table, there will be ample wild birds for years to come. To ramble house with 50 or 60 birds and then leave half of them to rot in the garage, because of the inability of the family or friends to dispose of them is an unpardonable crime. It is ours like this that are depleting Alberta's bird life.

Considerable comment has been made on the alarming decrease of our Prairie chicken during recent years. The blame has been laid at the door of the Hungarian partridge but given a fairer consideration that the Hungarians are increasing in numbers while it is just the reverse with the Prairie chicken.

It is the undiscriminate shooting and the plowing up of prairie lands in the settled areas that is gradually exterminating this bird. On one quarter of land that was broken this spring more than fifteen nests were destroyed, that means at least one hundred birds gone west.

Every hunter knows how easy it is to put prairie chicken and how on a frosty morning they will roost in a tree or on a stook and allow one to get close to them. In these circumstances and with a small bore rifle or screw of them can be shot down before the balance take alarm.

Compare their ways with the fast and wary Hungarian and you can form some opinion why one species seems to thrive and the other to be gradually on the decrease.

Especially is this the case when cows.

Now remembers that "Mr. Pot Hunter" is on the trail.

When out on the hunting trip this fall try to check the depredations and atrocities of the pot hunter, bowl him out, try and impress on him and instill into him just what true sportmanship means. Our hunting seasons would be greatly improved, wild birds protected and game birds on every hunter's table for years to

The Corner Drug Store

The corner drug store is distinctly a new world institution. A place which stands in every city, town and village, ready to help in times of sickness. Good drugs are a world wide necessity and the preparing of them must be done with the greatest of care. Prescriptions filled at our store are put up by a qualified druggist from the best drugs procurable on the market.

The high mark of excellence which dominates a druggist's career is carried into the lines he carries apart from drugs. These include among other things, candies, stationery, cigars, toilet goods, etc. For high gride quality at a reasonable price, go to the corner drug store.

PUBLIC
Auction Sale

25—HOLSTEIN DAIRY COWS—25

WEDNESDAY, OCTOBER 2nd, 1929

Instructed by Mr. JAMES E. SECORD who is disposing his herd and giving up the dairy business, I will sell by Public Auction without reserve his pure bred herd of Holstein cows. These cows are not registered but are all pure bred. Anyone desiring to have these cows tested after purchase may do so and Mr. Secord will take all responsibility.

On Sec. 8-53-18, being 7 miles south and 1 mile east of Tofield; 17 miles south and 1 mile east of Chipman
Commencing at 1:30 p.m.

Four heifers, age 3, coming fresh; eight heifers, age 2, milking; five heifers, age 1, milking; four cows, age 8, milking; one cow, age 7, milking; two cows, Age 11, milking; one pure bred Holstein bull, 18 months.

These cows milking have freshened since July and are giving a good flow of milk and will be fresh again from March to June.

The above is without doubt one of the best dairy herds in central Alberta as Mr. Secord has been building this herd up and only keeping the good ones. And there is no reserve. If you want dairy cows you can't afford to miss this sale.

LOCAL and PERSONAL

Born.—At Lamont hospital, on September 19th, to Mr. and Mrs. R. L. McIntosh, a son.

Born.—To Mr. and Mrs. Geneshin, on September 17th, a daughter.

Mrs. Walker N. Forman of Edmonton and Mrs. F. O. Foster of Claresholm spent Thursday of last week at the home of their sister and brother, Mrs. W. L. Forman.

Miss Bessie Trent and Miss Rube of Edmonton were Tofield visitors

Miga Ruth McLaughlin left last week to attend school at Edmonton.

Mrs. McLaughlin and Mrs. Calvert motored to Edmonton on Saturday.

Dr. Law and Mr. Belrose motored to Calgary on Sunday. They were accompanied by Arthur Belrose who will attend school there.

Miss Thresher and Miss Abbott spent the week end at Tofield. Miss Thresher is from Edberg.

Miss Beatty is visiting her aunt, Mrs. Lee.

Fall is here and it is time for ladies to don their fall hats. A large new shipment of latest models arrived at Lucille's Beauty Parlor this week.

A number of the members of the Tofield Eastern Star Lodge attended a banquet held in the city last Thursday evening.

FRED MILL INSTALLING NEW GRINDER

C. M. Coombes is installing a new out of machinery this week, having recently purchased a new Massey Harris grinding mill from Wood Bros. of Tofield. Mr. Coombes is also installing a 20 h.p. engine to run the new grinder with. This equipment is larger and more powerful than that which he has been using previously and he will be able to render still better service to his many customers.

"A CITY GONE WILD" AT THE VARIETY ON SATURDAY

For Saturday the Variety is offering a changed bill of fare. "A City Gone Wild," will prove itself to be an absorbing story, with many photographical triumphs.

Thomas Meighan, a screen favorite at Tofield, will be the leading man in this picture and those attending will enjoy every minute of the presentation.

NOTICE

Having disposed of my dental practice to Dr. R. W. Richardson of Viking, I wish to take this opportunity of thanking the citizens of Tofield and district for the patronage they have given me during the past ten years and trust you will give Dr. Richardson the same support.

Dr. Richardson comes well recommended and deserves all the support of the community.

DR. W. C. McCLURE

NOTICE

Having taken over the dental practice of Dr. McClurg, I wish to announce that I will make regular visits to Tofield on Thursday and Friday of each week for the present, beginning September 19th, with the possibility of spending full time there later on.

DR. R. W. RICHARDSON

RECOMMEND A RADIO SIMILAR TO C.N. BLT.

Provincial Members on Board of Control Have One Suggestion

OTTAWA.—Radio broadcasting in Canada should be controlled by a government-owned company. That is the effect of the chief recommendation of the Royal commission which today presented its report to Hon. P. J. A. Cardin, minister of marine and fisheries.

The company would have somewhat similar relations to the Dominion government as the Canadian National Railways has, but would be distinct from that organization. It would have twelve members, three representing more particularly the Provincial governments, and one representative each of the provincial governments. The members of the commission were Sir John Aird, Toronto, chairman; Charles A. Bowman, Ottawa, and Dr Augustin Frigon, Montreal.

Its recommendations provide that the cost of carrying on broadcasting should fall upon the provincial governments of the country.

The present owners of the broadcasting stations would be reasonably compensated should their plants be taken over or dismantled. The existing private necessary for the operation and maintenance of the service should be met by license fees, rental of time on stations for programmes broadcasting indirect advertising and a subsidy from the Dominion government.

FORMER LIEUT-GOV. PASSES TO REWARD

Dr. R. G. Brett, who was Lieutenant-Governor of Alberta from 1923 to 1924, passed away on Monday night in the Holy Cross Hospital at Calgary where he has been lying very ill for the past two weeks. Everything possible was done by Dr. McKechnie, his physician, to prolong life but the age of 78 years, old against recovery in his case. He was 78 years of age.

OLDS SCHOOL OF AGRICULTURE DEVELOPING MECHANICS DRAWING COURSE

The Board of Agriculture at Olds will be part of the Olds School of Agriculture 25th next. The number of applications and enquiries that are being received indicate that there will be a good attendance again this year. The attendance at residence for the past three years has been 251, and it is expected that the attendance this year will be very close to that figure.

The courses that are offered are very similar to those that have been taught in the past. The mechanics, stock, horticulture being strongly stressed. The addition taking on a local interest, in carpentering and farm machinery. The success of this man will be for the purpose of strengthening the mechanics branch of the agricultural course. With the services of an additional instructor, who is especially well qualified in mining instruction in electricity, gasoline engines and farm machinery it will enable the school to give instruction that would rank among the highest in the province in these subjects.

The dormitories are capable of accomodating approximately 175 for board and room. Those who apply early and book their reservations for rooms get the preference at the time of registration; however, those who are not able to get into the dormitories will find very accommodation arranged for by the school management, with good home in the town of Tofield depending of spending full time there later on.

KINGMAN

Edith Wolverine had the misfortune to break her leg and was taken to St. Mary's hospital on Sunday.

Mr and Mrs. Thos Graham motored to Edmonton last Tuesday

Helen Rinehart had some dental work done on Tuesday.

Gladys Pederson of Edmonton, visited hollie on Tuesday, where she will stay for a few months.

Harry Sparby spent the week-end at his home in Bawlf.

Mr. and Mrs. P. Stanley motored to Edmonton on Friday.

Irene Hoste and Isa Lofgren of Camrose Norman, spent the week end at the home of Mr. and Mrs. Hoste

Mr. E. Erickson and Lilly motored to Edmonton on Friday, returning home on Sunday. The latter will leave for Edmonton on Wednesday.

T. Aaberg spent the week-end in Edmonton.

Mr and Mrs. Henry Bray of Bittern Lake spent Sunday with Mr and Mrs. Thos Graham

Mr. and Mrs. Wm. McIntosh were the guests of Mr. and Mrs. George Walsh on Sunday.

Mr. O. Lindberg and Lillian spent Saturday in Edmonton.

Mr. and Mrs. L. Ryan visited at the J. Baines home on Sunday.

Mr. and Mrs. Joe Mooney and family of Camrose, visited at the Rinehart home on Sunday, Mrs. Rinehart, who has been recuperating after her operation on appendicitis, returned with them.

The Round Hill dramatists will present a play, "Always in Trouble," in the Kingman hall on Saturday, September 21st, commencing at 8:30.

There will be a dance in the Kingman hall on Friday September 27th which is non-partisan and a cordial will supply the music

TOFIELD SCHOOL FAIR BIGGER AND BETTER THAN EVER

Tofield School Fair was held on Thursday, September 19th, and despite the unfavorable season, was a complete success. The exhibits were displayed in the town skating rink and there were many parents and others interested there to see them after the judging. A more detailed report will appear in our next issue.

The Children's Corner

THE FAIRY BIRDS

Two little girls went out one day,
To gather flowers in the month of May.
A flower carriage is to be at the church,
So if for flowers they are in search.
They came to a river 'twas rather wide,
And on lovely flowers on the other side.
Oh! said Pollie so do, we can't cross over,
We'd better go back and play with Rover.
But no, just look at that lovely bird,
It hops so funny, and looks so absurd,
Let's try and catch it, I think it is lame,
To leave it to die, would be to our shame.
Well, its disappeared, and where has it gone,
Just listen, I think I can hear his song.
He seems to be saying, come over here,
And so we can, for look right there,
A tree has fallen, across the river,
Be careful in crossing and don't get a sliver.
Our baskets are filled, they cried with a shout,
They they came to a place where the school was just out
And a spell of rude boys, cause shouting and
Well have all these flowers, we want them for selling.
But alas, they were wrong, for some birds came a flying.
And sort all the boys away, shouting and crying.
My clothes are pecked out, oh what shall I do,
I'll lose favor, this day to run.
The little girls stood in blank amazed.
When they heard a voice saying, why are you dazed"
They turned around and saw the bird,
That he spoke so funny and looked so absurd.
He said "You are wondering who we can be,
We're fairy birds which now you see.
Well, once we were children, and lived on the earth.
And had lots of fun, and plenty of mirth.
The fairies took us up to His home above,
Where all is beautiful and all is love.
We and will like the children below
To help if God would let us go.
He said you can go as you like, as birds,
We were just delighted when we heard,
And now we are helping wherever we can,
And to you good girls we've revealed our plan.
Those rude boys now a lesson have learnt,
They will know God will rules on this earth."

—Mrs. A. Cottman, Box 8, Onaway.

LAKESHORE

Mr. T. D. Ferguson who sustained a broken leg a week or so ago was able to leave the hospital on Thursday

Mr. and Mrs. E. Jones of Lacombe motored to and visited at the T. A. Jones on Sunday. Mr. and Mrs. Jones and Mr. and Mrs. Ira Jones were also dinner guests there

Mrs. Francis and children visited Mr. Francis, Francis on Wednesday.

The Lacoste A&C will meet with Mrs. G. Francis next Tuesday afternoon at 2 p.m.

The new school house is nearly completed and will be ready for ... in a week or ten days.

I. S. W. A. NOTES

The regular meeting was held on September 12th, at the home of Mrs. Peter Lee. The attendance was good and a number of visitors were present one of whom joined the local. Mrs. Morton reported the quilt was finished and after some discussion as to the disposal of it, it was decided to send it to the Salvation Army. It was decided to pack a box for "Sunshine" and all members are requested to leave any articles of outgrown clothing, etc. at Mrs. Ferguson's house before the next meeting or if that is not possible to bring them to the next meeting in order that the box may be forwarded as soon as possible.

We were very pleased to have Mrs. Hull our invalid member with us at the meeting. For more than two years Mr. Hull has been more or less invalid but in spite of this she takes a great interest in the activities of the local which is very gratifying.

Mrs. Baptist presented a very splendid paper on "The Benefits of Co-operation." Someone remarked that Mrs. Baptist and co-operation always are mentioned together in the local, and this is indeed true, for Mrs. Baptist certainly "knows her onions" in regard to co-operation.

Mrs. Warner read the September bulletin on social welfare also a letter from Mrs. Bentley convener of social welfare.

The next meeting will be on September 26th, at the home of Mrs. T. E. Soule. The roll call will be answered with current events and there will be a round table talk on how to solve patterns.

The hostesses will be Mesdames Ball, A. Williams, Munro, Gray, Cookson and Johnston.

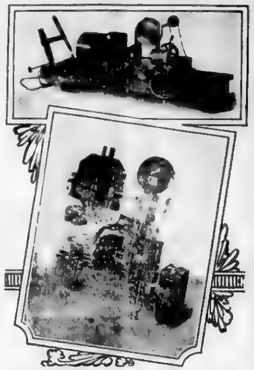
Yesterday and Today



Thirty-five years ago the sixth of June last in a jeweller's shop in a small town across the border, a young U.S. Government clerk, C. Francis Jenkins, using the machine pictured above, which he had just invented, staged the first public exhibition of moving pictures in America.

It remained, however, for the telephone engineer and the scientist, trained in the electrical transmission of sound, to make possible Sound picture equipment.

Apparatus similar in all respects to that which has already been installed by Northern Electric engineers in the leading theatres from coast to coast throughout Canada, has also been placed in the large theatres in England, France, Germany, India, Australia, New Zealand, Brazil, West Indies, Central America, China, Japan and some 2,500 in the United States.

Make Every Dollar Count

The dry season is making it necessary for farmers to spend their money wisely and also to EARN AS MUCH AS POSSIBLE.
By bringing or shipping your cream to us you will be getting every cent there is in it. We give you the highest grade and test possible.
If more convenient we will call for your cream at the Farmer Supply Co. Ltd Store, where it can be left.
During the summer it is vitally necessary to take extra good care of your cream. Make an extra dollar by being extra careful.

SEVENTH SEASONAL CROP REPORT

Issued by Department of Agriculture Government of Alberta, Edmonton. September 14th, 1929

Threshing is fairly general throughout the province, and grain in many cases is yielding higher than was anticipated. Threshing has been resumed in most districts after a period of unsettled weather which delayed operations to some extent, and with continued good weather will be completed somewhat earlier than was the case last year.

From the reports received it is estimated by the Department that the average wheat yield for the province will be between eleven and twelve bushels per acre. This is as close as the estimate can be made with any degree of accuracy until further returns are received from the threshermen throughout the province. The above figures are borne out by the returns which have already come in.

According to an estimate arrived at jointly by the Department of Agriculture and the Dominion Bureau of Statistics, the wheat acreage in Alberta this year has been placed at 7,422,962 acres.

A very satisfactory feature of the present season's yield is the high quality of the majority of the wheat being threshed, many districts reporting a large percentage of No. 1 and No. 2. In some cases, however, the grade has been reduced by the presence of green kernels, but in very few cases is the grade below No. 3.

It is apparent from the reports that there will be a shortage of seed oats available for next year's crop in some districts in the central part of the province, but it is believed this demand can be met satisfactorily by other section of the province where a heavier yield of the coarse grains is being threshed.

Negotiations have been under way between the Alberta Government and the railway companies respecting the free shipment of hay and feed oats into those districts where the crop is so short. These arrangements have now been completed and the plan will be in operation after September 18. Farmers interested in taking advantage of this arrangement are asked to communicate with the Department of Agriculture where full information is available.

A careful survey made by the field representatives of the Department indicates that a comparatively small amount of hay will be required as every available source has been made use of and the dry weather has permitted the cutting of hay on many sloughs which were previously flooded. The amount required will, of course, depend on the length and severity of the winter. There has been quite a demand for feed oats in the area most severely affected by the drought.

THORNTON SALARY BOOST UNDER REVIEW

New Contract Has Been Hanging Fire For Some Time

OTTAWA—The salary of Sir Henry Thornton, president of the Canadian National Railways, is under review by the cabinet. His second contract with the Canadian government expired last October. It is now reported that a salary of $100,000 a year is under consideration.

The president of the National Railways was first engaged in October, 1922, on a three year contract of $50,000 a year. This contract was renewed in October, 1926, at an increase of $15,000, making $65,000 annually.

The second contract expired last October, but the new contract has been hanging fire for some time. It develops that in addition to his $65,000, Sir Henry has been getting $10,000 as travelling expenses, making $75,000 in all.

The president of the Canadian National railways has secured the loyal has secured the loyalty and cooperation of the staff of the road, and the feeling exists here that he is worth whatever salary is necessary to retain his services.

NOTICE

IN THE ESTATE OF ANNA STORLI, late of Eugene, Lane County, Oregon, United States of America, deceased.

Notice is hereby given that all persons having claims upon the estate of the above named deceased tate of the above named deceased, who died on the 4th day of March, 1928, are required to file with the undersigned by the 21st day of October, 1929, a full statement duly verified of their claims and of any securities held by them, and that after that date the executor will distribute the assets of the deceased among the parties entitled thereto, having regard only to the claims of which notice has been so filed, or which have been brought to his knowledge.

DATED this 30th day of August, 1929.

LYMBURN, REID & COBBLEDICK, Solicitors for the Executor, 822, Tegler Building, Edmonton, Alberta.

FOR SALE.—Three purebred Shorthorn cows; wgt. about 1400; with calves by side; two sows with pigs suckling; one sow due to farrow in about two weeks.—Apply to J. Voegtlin, 'Phone 208, Tofield. 32p

Here and There

Statistics gathered by the New Brunswick Government bureau of information and tourist travel show an increase of 25 per cent. in the number of motor tourists from the United States entering Canada at border points of the province starting their vacation in Canada.

His Excellency the Governor-General of Canada will extend his patronage to the Canadian Pacific series of concerts of British and Canadian music to be given across Canada, beginning in September and continuing until Spring of 1930, according to information given out by J. Murray Gibbon, general publicity agent of the railway.

Fishing bowed to chivalry one day recently at St. Ignace Island, Canadian Pacific angling resort in the Georgian Bay, when Judge B. Williams of Jackson, Mich., got a bite simultaneously with his wife, both fishing from the same boat. The guide couldn't handle the canoe so that both anglers would have a chance to land a fish, so the judge put pressure on his catch which broke away. Mrs. Williams, after a half-hour fight landed a fine fish.

Lord Luke of Pavenham, chairman of Bovril Ltd., arrived in Canada recently on the Empress of Australia en route to Australia. His Lordship is operating a settlement scheme in the Argentine whereby farmers rent lands from a company, paying 15 per cent. on the company's marketing of their crops. He is contemplating a similar company in Australia in connection with sheep raising. He will also examine possibilities in the Prairies for a similar settlement organization.

Heavy entries are reported for all classes of athletics, piping and dancing events to be decided at the Highland Gathering and Scottish Music Festival to be held at Banff, August 30–September 2, as also for the Dominion track and Field Championships to be held there Labor Day. A practically new track has been built at Banff to accommodate the sports scheduled.

Dissolution of the present Japanese Government and the advent of a new one within a year is predicted by Viscount E. Mushakoji, Japanese Minister to Scandinavia who arrived at Vancouver recently aboard Canadian Pacific steamer Empress of France on his way to resume diplomatic duties at Stockholm. The present Japanese Premier is not ... control of the Diet.

[illegible]

Advertising Is News

MANY MERCHANTS BELIEVE THAT NEWSPAPER ADVERTISING IS NOTHING MORE THAN AN APPEAL FOR TRADE. NEWSPAPER ADVERTISEMENTS ARE AN APPEAL FOR TRADE, OF COURSE, BUT THEY ARE ALSO SOMETHING MORE—THEY ARE NEWS.

AND IMPORTANT NEWS TOO. TO THE MOTHER WHO HAS TO BUY SHOES AND A SUIT FOR JOHNNY, TO SAY NOTHING OF HER OTHER MANY REQUIREMENTS, THE ANNOUNCEMENT OF A NEW AND BETTER STYLE, A LOWER PRICE OR AN IMPROVEMENT OF ANY KIND IS READ WITH AS MUCH INTEREST—AND MORE—AS THE PROCEEDINGS OF PARLIAMENT.

THE PEOPLES' MONEY AND THE GOODS THEY HAVE TO BUY ARE TWO VITAL FACTORS IN THEIR LIVES. FACTORS IN WHICH THEY ARE ALWAYS KEENLY INTERESTED—THEREFORE DOES IT NOT SEEM REASONABLE THAT AN ADVERTISEMENT DEALING WITH THESE THINGS WOULD BE READ WITH INTEREST BY THEM.

YES, ADVERTISING IS NEWS AND THE PUBLIC DEMANDS NEWS—AND THERE IS LITTLE TO CHOOSE AS REGARDS IMPORTANCE BETWEEN NEWS PERTAINING TO THEIR POCKET BOOKS AND NEWS PERTAINING TO THEIR SOCIAL SYSTEM.

TO THE MERCHANT WHO CATCHES A VISION OF THIS REAL MEANING OF ADVERTISING—THERE OPENS UP AN AVENUE FOR SERVICE AND PROFIT, WHICH HAS HITHERTO REMAINED CLOSED.

Advertise For This District's Business—We All Need It!

APPLICATION FOR BEER LICENSE

(Liquor Control Act of Alberta)

Public notice is hereby given that the undersigned intend applying to the Alberta Liquor Control Board for a license to sell beer by the glass or open bottle for consumption in or with the premises of the Tofield Hotel, situate on Lot [illegible] Block [illegible] Plan [illegible] in the Village of Tofield, and further notice is hereby given that application for the necessary transfer will be made to the said Board at the same time and place.

Dated at Tofield, Alberta, August 29th, 1929.

THOMAS J. MALCOLM, Applicant.

The Board of Directors take this opportunity to bespeak for Mr. J. H. Ingram your heartiest co-operation and welcome commencing his duties as Manager. Mr. Ingram has had ample experience as assistant manager and will continue the Alberta Liquor Control Board's policy of [illegible] and carry on [illegible] satisfied and further business.

Please get in touch with Mr. Ingram for the necessary arrangements to handle your order with respect to Full case shipments.

J. H. McMULLEN, Secretary to the Board.

LOST.—From S.W.R. train about two weeks ago, one fox terrier, answering to name of "Flatiron". Finder please leave at Mercury office. Reward offered. Notable by white patch on breast.

HANDLING THE FALL LITTER

Experimental evidence at the Dominion Experimental Station, Lacombe indicates that fall litters can be raised successfully providing certain principles of breeding, feeding and housing are followed.

For good results, fall litters should all be farrowed not later than September 15th so as to have the pigs well developed and able to stand the cold weather by November. In order to have the pigs born from the first to the fifteenth of September the sows must be bred between May 10 and 25. If she is in season her spring litter before being bred she must farrow during the latter part of March or early in April. A sow which is to raise a fall as well as a spring litter must work harder than the sow raising but one litter during the year and should be particularly well fed after weaning to get her on the up-grade again before breeding her. In many cases, fall litters are small and weak, simply due to breeding the sow too soon, or when in too poor condition.

In formulating rations for fall pigs it is well to remember that the fall pig will not have the run of a green pasture to help balance his ration and unless the ration is well balanced for him, gains are likely to be slow and comparatively expensive. Skim-milk and butter milk when fed in sufficient volume adequately balance corn, bark or a substitute feed and, if used, should make up about two to two and one-half per cent of the ration. Alfalfa and sweet clover hay or roots may be fed with very good results. Middlings or fresh ground oats will be the best grain with which to feed young fall pigs. The newly weaned pigs should be fed at least three times a day for the first month after weaning. The roots object at this time should be to keep the pigs growing and prevent any set back. When pigs average about sixty pounds the middlings may be eliminated from the ration and barley or frosted wheat added in small quantities, gradually increasing the proportion, until, about the time the hogs are ready for market, they are receiving three parts of barley to wheat to one of oats.

At Lacombe, beneficial results has been secured from allowing fall pigs access to pasture, from a hay or H-feeder, to a mineral mixture consisting of 76 lbs. slacked coal, 20 lbs. salt, 3 lbs. air slacked lime & 1 one lb. of sulphur. The hogs will take only sufficient of this mixture to supply their requirements.

Litters are not to over feed the fall pigs. Make them clean up the troughs overfeeding then will put them on feed and will stunt their growth, a condition which quickly eats into profits.

In breeding the main features to keep in mind are cleanliness, suitable ventilation, and the supplying of a reasonably dry sleeping bunk. Expensive and elaborate houses are unnecessary. "A-shaped" portable cabins covered with straw with feed to adjustment, to provide space for limited exercise and the feed trough, have been a decidedly successful method of housing litters at the Lacombe Station.

NEW CHEVROLET

IS ANNOUNCED

Two new Chevrolet six-cylinder models have just been announced by the Chevrolet Motor Company of Canada. Another introduction has come at a time when Chevrolet is enjoying sales far ahead of those ever recorded by a manufacturer of six-cylinder cars; for figures just issued reveal that more than a million Chevrolets have been produced so far this year.

Chevrolet's two new models are the sport coupe and the Imperial Sedan. The former is a smart four passenger car, complete in every detail, and yet moderately priced. The top and rear quarters of this model are solid, a roomy folding seat in the rear deck accommodates two passengers, and the rear window may be lowered to make driving more enjoyable for the whole party. The Fisher body is streamlined and finished in new Duco colors.

The Imperial sedan is also built with solid top and rear quarters, but has a bolder type hood lamps, chrome-plated radiator and one piece full crown fenders. As found on all Chevrolet models, add further to the appearance. The fisher body has many conveyed front pillars with rakishly moulded visor. The standard colors are black with moulding in an ginsw green and striping in tusk ivory.

In these as in the other Chevrolet models, is found the 46 h.p. six-cylinder Chevrolet motor, with its fuel pump, air cleaner, improved combustion chamber and other features.

LAND SETTLEMENT

PLAN IS EXTENDED

The C.N.R. Decide To Offer Facilities To All Canadians

Winnipeg — Extension of the facilities of its land settlement organization to all Canadians, particularly those of the large centres of population who desire farm locations, will be made by the colonization department of the Canadian National Railways, according to an announcement made in Montreal by Dr. W. J. Black, director of colonization and agricultural for the system.

The announcement was made following the conference of colonization officials of the company from over seas and at home, which has been in progress at the head offices this week.

It developed during the conference that the first efforts of the company's land settlement service to assist its facilities to Canadians had been concerned during the past summer and several young Canadians had found locations.

The service will be open to all Canadians who desire to avail themselves of it. During the past two or three years the land settlement organization of the company has been successful in settling nearly 5,000,000 acres of new land in the territory in Western Canada served by the National Rou-

Sell yourself a Chevrolet

CHEVROLET owners sell themselves on Chevrolet. They know, behind the sheet of the New Chevrolet, just what it means to drive a real six . . . a six with a high-compression valve-in-head engine, with smart and stylish Body by Fisher . . . yet a list at the price of a four.

They taste the joys of six-cylinder power and smoothness . . . six-cylinder coup and accelerations. They experience Chevrolet's marvelous comfort and handling ease. They discover that this amazing new Chevrolet gives them every modern convenience feature . . . such as twin-beam, four-controlled headlights; finely upholstered, deep luxurious cushions; high-speed window regulators; Ternstedt quality hardware; completely equipped, indirectly lighted instrument panel, including electric temperature indicator and theft-proof Electrolock.

When you are considering the purchase of a car sell yourself on the car you want. Get behind the wheel of the New Chevrolet and make your own tests. Then decide on Chevrolet only after you have proved to yourself that it offers you more for your money than any other car in the low-priced field.

The Corner Drug Store

The corner drug store is distinctly a new world institution. A place which stands in every city, town and village, ready to help in times of sickness. Good drugs are a world wide necessity and the preparing of them must be done with the greatest of care. Prescriptions filled at our store are put up by a qualified druggist from the best drugs procurable on the market.

The high mark of excellence which dominates a druggist's career is carried into the lines he carries apart from drugs. These include among other things, candies, stationery, cigars, toilet goods, etc. For high grade quality at a reasonable price, go to the corner drug store.

PUBLIC

Auction Sale

25—HOLSTEIN DAIRY COWS—25

WEDNESDAY, OCTOBER 2nd, 1929

Instructed by Mr. JAMES E. RECORD who is dispersing his herd and giving up the dairy business, I will sell by Public Auction without reserve his pure bred herd of Holstein cows. These cows are not registered but are all pure bred. Anyone desiring to have these cows tested after purchase may do so and Mr. Record will take all responsibility.

On Ber. 8-33-18, being 7 miles north and 1 mile east of Tofield; 17 miles south and 1 mile east of Chipman

Commencing at 1:30 p.m.

Four heifers, age 2, coming fresh; eight heifers, age 3, milking; five heifers, age 4, milking; four cows, age 5, milking; one cow, age 7, milking; two cows, Age 11, milking; one pure bred Holstein bull, 18 months.

These cows milking have freshened since July and are giving a good flow of milk and will be fresh again from March to June.

The above is without doubt one of the best dairy herds in central Alberta as Mr. Record has been building this herd up and only keeping the good ones. And there is no reserve. If you want dairy cows you can't afford to miss this sale.

Tofield School Fair Goes Over Big

IN SPITE OF DRY YEAR EXHIBITS MORE NUMEROUS THAN EVER

In spite of dry year the Annual School Fair was a complete success. While the exhibits showed unmistakable signs of lack of moisture, on the whole they were remarkably good. Grains, grasses, vegetables, flowers, all were displayed in abundance and were a real credit to the boys and girls of the district.

The domestic science classes were exceptionally well filled, the girls, and boys too, entering some exceptionally fine exhibits. One may find places other than the Tofield district where the winter is shorter, but judging from last Thursday's display, one cannot find any place where the cooking is better—and they say a man's heart is in his stomach. There were cakes, pies, buns, and other articles of the dining table that would stand up well in any adult exhibition. The school work was very complete and well displayed. Exhibits of writing, art, map drawing etc., occupied the attention of the numerous visitors and many favorable comments were heard. The wood work classes were not quite so well filled as usual.

As stated above the event was a complete success and the officers of the School Fair Association, the teaching staffs of the various schools taking part and the scholars themselves are to be heartily congratulated upon the success of the event.

A good deal of sports were run off in the afternoon in which both town and country schools participated.

The following schools participated in the fair, Bardo, Ketchemonia, McKenzie, Lakeshore, Ingram, Woodlawn, Amisk-Creek, and Tofield.

The judges were: school work, Inspector Russel and Inspector Robinson; garden products and domestic science, Mr. Heckburt and ———; singing, Mrs Pincott, Mrs. Rowe and Mrs. Robinson.

Special mention might be made of the calf and other livestock exhibits, the calf exhibit especially being very good.

The 1930 McLAUGHLIN-BUICK

New Roadshock Eliminator . . and New Steering Gear

makes McLaughlin-Buick the easiest car in the world to drive!

Imagine being able to travel the roughest road at any speed with the greatest ease and comfort! Such are the fine results of two matchless new quality features in the 1930 McLaughlin-Buick—a wonderful new frictionless steering gear, and the new McLaughlin-Buick steering shock eliminator! The steering shock eliminator absorbs jolts and jars and prevents their transmission to the driver's hands.

The new McLaughlin-Buick steering gear, of the effective worm-and-roller type, assures instant, effortless response to the driver's every wish.

Drive this new McLaughlin-Buick. Test these twin features of comfort which make the new McLaughlin-Buick the easiest steering automobile in the world.

DISARMAMENT

Canadian National Railways Magazine

This is a current topic of conversation, and the inspiration of many a newspaper article and pronouncement. It is a healthy topic and a hopeful one because the last great war came pretty near to ending our civilization and the next would most certainly do so; for ruthlessness unrestrained and mad would be its driving force, and with the perfection of engines of destruction the contemplation of results is a ghastly one. Most of us hate war and none more than those who have had experience of it in all its futility, its brutality and insanity, and there are few who would not hail the day when this infernal spectre would be laid forevermore. We are told that the world is war-weary, which is a fact; but not necessarily a very promising fact, because weariness may be overcome.

A man may be work-weary but this is not to say that he will not return to his toil after a period of recuperation; so nations after a period of economic recuperation may be ready for conflict. Weariness is no guarantee against war. The only thing that can prevent war is that most powerful force—the force of public opinion. We can have no patience with the jingo who wants to see a chip always carried on the national shoulder or who is forever daring everybody to "tread on the tail of his coat" His instincts are akin to those of the slum bully. Neither can we have patience with the bloodless pacifist who denounces all force even though it were used for the purpose of self protection. The man who would allow a burglar to enter his home and carry off his property without putting up a struggle, or who would see the defenceless inmates of that home maltreated by a ruffian and would not come to the rescue is a poor poltroon. We believe that aggressive war never accomplishes any good results and we would welcome the abolition of everything suggestive or productive of war if the conditions were favourable, but that is a big "if", and our statesmen, who, it is said, are now engaged in "conversations", should take that into consideration, lest after disarmament has taken place we wake some fine morning to discover that some parts of the world have not advanced as far as we have, and that we have allowed our idealism to run away with our common sense and ordinary prudence.

But between the jingo and the pacifist is the fighting pacifist. He is the man who fulminates against war—that is, war between nations; but who breathes out threatenings and slaughter against certain classes of the community and has a tiger thirst for blood. He is one of our social menaces. Wars are not likely to come to an end either internationally or socially until a new spirit has taken possession of men; and disarmament is not likely to take place until public opinion has a change of heart. Now public opinion is not something that springs up independently of the units that comprise society, and healthy public opinion can only arise from healthy minds, and though it may be a slow process to make the body right by making the individual units right, it seems to be the only way.

Whether or not international disarmament is feasible under present conditions there is as other kind of disarmament which is feasible and can be carried out without risk to any, nay, with untold benefit to all. There is little use in beginning with ships, and guns and poison gas unless something more fundamental is eradicated. Disarmament is not enough for nations nor laws, however stern, for individuals and communities and classes, there must be something to give law its sanction and disarmament agreements their binding force. Kant said one hundred years ago, "We are civilized to the point of weariness but before we are moralized we have a long way to go", and it is this moralizing process which must begin. Disarmament, like charity, begins at home. I am an individual, having relations with, or an attitude towards, all sorts of people, my next door neighbor, my neighboring town, city, province, country, my own race, other races, my own class and other classes. I have a whole fleet of battleships with long range guns which I frequently bring into play, a host of destroyers, and a very respectable number of submarines; these I must scrap, along with an arsenal that fairly bristles with the most destructive weapons. We shall name them jealousy and envy, ignorance and prejudice, hatred and purblind misunderstanding, greed and unrestrained ambition and selfishness and the desire to get with little desire to give. Those are weapons deadly and dangerous. Let me and you my brothers begin by scrapping these and a happier and saner and better world would reap a wondrous harvest of goodwill and generous association. By all means let disarmament come, but let it begin at home.

Tofield versus The World

LESS THAN A SCORE YEARS AGO, AS EACH SUMMER PASSED ALMOST EVERY WESTERN SMALL TOWN WOULD, WITH ITS FLAMING RED POSTER ANNOUNCE ITS ANNUAL SPORTS DAY. A LINE REFERRING TO THE TUG-O'-WAR WOULD IN BOLD AND PROMINENT TYPE OFTEN READ "SMALL TOWN VERSUS THE WORLD."

TIMES HAVE CHANGED, THE TUG-O'-WAR IS NOT SO POPULAR AS IT ONCE WAS—BUT THE SLOGAN "SMALLTOWN VERSUS THE WORLD" IS STILL A LIVE ONE—BUT WITH A DIFFERENT MEANING.

IN THESE DAYS OF KEEN COMPETITION, WHEN THE FORCES OF FINANCE AS EXEMPLIFIED THROUGH THE MAIL ORDER HOUSES, CHAIN STORES, ETC., THE LOCAL MERCHANT WHEN HE HANGS OUT HIS SIGN FIGURATIVELY SAYS "SMALLTOWN VERSUS THE WORLD."

THERE IS HOWEVER, AN ALLY THAT THE SMALL TOWN MERCHANTS MAY SIGN UP WITH THAT WILL HELP THEM CONSIDERABLY. IT IS THE LOCAL NEWSPAPER.

ALMOST WITHOUT EXCEPTION, WHERE THERE IS A LOCAL PAPER PUBLISHED IT IS IN WHOLEHEARTED SYMPATHY WITH THE AIMS AND ASPIRATIONS OF THE TOWN AND DISTRICT IN WHICH IT IS PUBLISHED. IT WILL GO OUT OF ITS WAY—IT FREQUENTLY DOES GO OUT OF ITS WAY TO SERVE THE LOCAL MERCHANTS. BUT THIS IS NOT THE CHIEF CONSIDERATION—THE CHIEF CONSIDERATION IS "PUBLICITY PAYS".

THERE WAS A TIME WHEN COUNTRY NEWSPAPERS ASKED THEIR PATRONS TO "SUPPORT" THE PAPER, NOW COUNTRY NEWSPAPERS SUGGEST THEIR PATRONS "USE" THE PAPER. ADVERTISING MUST BE PROFITABLE—REASONABLY WELL WRITTEN AND OTHER THINGS ABOUT A STORE BEING EQUAL, NEWSPAPER ADVERTISING IS PROFITABLE—TO THE MERCHANT.

HOWEVER STRONG THE FORCES OPPOSED TO THE LOCAL MERCHANT MAY BE, THEY CANNOT BECOME STRONGER THAN PUBLIC OPINION AND PUBLIC OPINION IS MOULDED BY WHAT PEOPLE READ AND OBSERVE—ADVERTISING INCLUDED.

TOFIELD VERSUS THE WORLD—OUR MONEY IS PLACED ON TOFIELD.

NEW BUILDINGS NEARING COMPLETION

The two storey brick building being erected by Mr. Jobb is nearing completion, the roof having been put on and some of the interior work being done. The building being erected by Mr. Taylor, while not quite so far advanced is also rapidly nearing completion and it will not be so very long now before business will be transacted in them.

Both buildings are a fine addition to the town.

We understand R. W. Rogers and J. W. Cookson are seriously considering erecting a one storey brick block between the two stores now being finished. Latest reports are, plans were not quite definite but indications were that they would build.

It is very gratifying to see these buildings erected as they immensely improve the appearance of main street.

PERILS OF THE AIR MAIL WITH BEN LYON, ANTONIO MORENO

Presenting what is described by critics as a most appealing epic of the intrepid flyers who carry the mails across country through storm and stress by night and day, "The Air Legion", F. B. O. production featuring Ben Lyon, Antonio Moreno and Martha Sleeper, comes to the Variety Theatre on Friday and Saturday.

Based upon an original story by James Ashmore Creelman, the photoplay depicts with rare fidelity the hazards that are faced by the air mail pilots on every trip that is undertaken in their fleet but fragile planes, which must go forward in every variety of weather that the mail connections may be maintained.

Against this background is presented a gripping dramatic narrative involving the "ace" pilot of a air mail office and the son of a flying captain under whom the former served in France until the captain's heroic death. The boy develops a "yellow streak in the mail service, which is drastically cured by the ex-soldier, notwithstanding that both are in love with the same girl.

The picture was directed by Bert Glennon, himself a former army flyer and aviation instructor at March Field and the camera work, much of it aerial, was in charge of Paul Perry, who also served on the Cinematographic staff in the making of "Wings" and "Hell's Angels".

Drive It... and let your own experience sell you

No one who has sat behind the wheel of the New Chevrolet Six could ever be contented with less than the quality ... less than the performance that this outstanding SIX provides.

For Chevrolet is the lowest priced six in the world with this remarkable combination of fine car features—

Body by Fisher, with deep, richly-upholstered cushions, Fisher VV Windshield, Ternstedt Fittings, fashionable Duco colorings, smartly beautiful design. Six-cylinder valve-in-head engine, of high-compression non-detonating type, with the extra efficiency of "direct firing" and greater pick-up due to automatic accelerating pump.
New design, ball-bearing steering gear, giving marvelous handling ease.
Efficient braking system of non-locking four-wheel brakes and independent emergency brake.
Long semi-elliptic, shock-absorber springs, parallel with the frame.
Modern Convenience Features, twin-beam headlights, foot-controlled; high-speed window regulators; indirectly-lighted instrument panel, including electric temperature gauge and theft-proof Electrolock.

And all these, plus the established economy and staunch endurance for which Chevrolet is famous, at the price of a four! Drive it and let your own experience sell you on Chevrolet Six!

Everett Ruff, Magician

The Variety TUESDAY Oct. 8

A big evening of mystery and illusions will be that of Tuesday, Oct. 8, at 8.30 p. m. at the Variety Theatre at Tofield.

Everett Ruff, the famous Magician, is coming with his ever popular array of odd and baffling effects. His great mysteries come from the Orient—from Europe—from America. He is famed far and wide for his interesting presentations. Among his feature numbers is the great rope mystery; even magicians have been baffled by this profound mystery.

This is Everett Ruff's first appearance in this community, and a large audience will no doubt witness this rare treat.

ADMISSION
Adults 35c .... Children 25c
(Tax included)

LOCAL AND PERSONAL

Miss Lorett Ross spent the week-end in the city visiting friends.

Miss Ethel McGlymont visited the city on Saturday.

Mrs. Hall was a guest at the Emery home on Tuesday last.

Mr. and Mrs. Bissett visited friends in Athabasca Landing over the week-end.

Mrs. Duguid, of Edmonton is a guest at the J. Noland home.

Mrs. Tucker is visiting her daughter at the coast.

Will the party who took the set of plane knives from the new Jobb building please leave them at the Mercury office. No questions asked. Reward.

Mr. McDevitt, formerly of Tofield and now of Cadomin is a visitor in town this week.

The Ladies Aid of The United Church, who have charge of the plain sewing booth, in connection with their annual bazar, will hold a shower for this booth at the home of Mrs. Rowe on Friday, October 11th. Everyone interested in the work of the church is cordially invited.

Mrs. Pollard, Mr. and Mrs. Pollard and children spent the week end with the C. Baptist family.

Arthur Bowick, young son of Mr. and Mrs. W. Bowick, was taken to the Royal Alexandra hospital suffering from apendicitis two weeks ago. Although Arthur had quite a close call, we are glad to say he is getting along as well as can be expected.

The Ladies Aid of The United Church will hold their annual bazaar on Saturday, November 30th.

The Holy Trinity W. A. are holding their annual bazar on Saturday, Dec 7th, in the Institute rooms. Further announcements will be given later.

There is no telling what a dry summer and three stores moving the same week will do to a linotype operator. Last week we blythely announced that Mrs. Peter Gates was a Sunday visitor to the R. C. Phillips home, this should have read Mr. Peter Gates. We trust we were only a trifle premature. We also gave unexpected honors to Mr. J. H. Ingram when we stated that Mr. Ingram had taken over Mrs. J. Ferguson's work. Mrs. Ferguson is president of a ladies organization, so on this mixup Mr. Ingram was all to the good.

We should of course have stated "Mr. Ferguson's work" as the paragraph referred to shipping cattle.

We have received word from the coast that Mr. A. Chambers is making quite a reputation there as a horticulturalist. At the Ladysmith annual fair he was awarded numerous prizes and was successful in winning a silver cup given to the exhibitor obtaining the largest number of points. He is also becoming quite a farmer for Vancouver Island, having recently added 45 acres to his previous holding of 22 acres. More power to you Alf. Mr. Chambers will be remembered as a former resident of Ross Creek.

MOVING DAY

Wednesday and Thursday was moving day at Tofield, when Mr. Jobb moved his stock to his new store and Mr. Brace moved his stock to the store vacated by Mr. Jobb and recently purchased by Mr. Brace.

The Tofield Farmers' Supply Co's stock will be moved into the store vacated by Mr. Brace, next week.

All stock will therfore be housed in fine brick buildings and when Mr. Taylor's store is completed his stock also will be housed in a fine brick building. Tofield is progressing.

KETCHAMOT

Rally Day services were held on Sunday, a fairly large congregation was present.

Mr. J. McDavitte who is operating mines at Cadomin is spending a few days in our district looking after his farm and mine, he is staying at the Henderson home.

Mrs. Dave Gormley of Edmonton, visited her aunt Mrs. Henderson and cousins over the week end.

Mrs. Davison who has been a patient in the Royal Alex hospital in Edmonton for five weeks was only able to undergo her operation on Thursday of last week, her many friends wish her a speedy recovery.

Mrs. Harold Smith and Miss Mable Lawson spent over Sunday at the parental home.

Miss Lillian Carlisle visited her friend Miss Hazel Sears Monday afternoon.

Mr. and Mrs. Rufus Wilson and family and Mr. and Mrs. C. Nashman were entertained at the Schultz home on Sunday.

Mr. and Mrs. W. A. Mitchell and Mr. John Johnson motored to Edmonton Saturday. Mr. Johnson visited his wife at the hospital where she has been a patient for some time. Mr. and Mrs. Johnson are living on the Wesley Ingram farm.

Mrs. M. Ingram, Mrs. Carlisle and Mrs. Sears visited Mrs. Frank Hall at her home Sunday afternoon.

Mr. and Mrs. McGowan motored to the city on Saturday returning home in the evening.

The monthly meeting of the M. A. S. will be held next Wednesday the 9th at the home of Mrs. Torrie, not with Mrs. Ingram as previously announced. All are cordially invited to attend.

Mr. Erickson and son Carl of Amisk Creek, Mr. and Mrs. Chester Coombs and family, Mrs. McMullen were Sunday guests of Mr. and Mrs. Sears Nomeland.

Mr. and Mrs. Geo. Cookson and family motored to Edmonton Tuesday, Mr. Cookson will remain at the hospital for further treatment.

Mrs. Gormley, Mrs. Henderson and Jason, Mrs. Wildman and daughter were guests of Mr. and Mrs W. A. Mitchel on Sunday.

Mr. and Mrs. Chas. Whilliams visited at the Geo. Cookson home on Sunday afternoon.

Mrs. E. McMullen and Mrs. C. Coombs visited Mrs. G. W. Sears at her home on Tuesday afternoon.

Mr. and Mrs. J. H. Ingram and mother Mrs. M. Ingram, had dinner at the T. D. Ferguson home, the day being both Mr. and Mrs. Ferguson's birthday aniversary.

Messrs H. Thompson, Lorny Harlison and T. Gray left on Wednesday for Ft. St. John where they will spend the winter trapping.

Notice To Thresherman

Owners or operators of threshing machines and combined harvestors are required to have their machines registered with the Department of Agriculture and to send the Department at the end of the threshing season a return showing the number of acres and number of bushels threshed. This applies whether the machine is to be used for custom work or only for the owners crop.

Special forms for these returns may be secured from the
PUBLICITY BRANCH
Department of Agriculture Edmonton.

LINDBROOK

The weather continuing fine, threshing is almost done here for this year and soon the hibernating season will be on us; but say to those who think it is on, we would say that its a myth, this hybernating business. The yields are very poor as a whole but the grades are good.

Mr. and Mrs. Souter and Miss Rose Ramshaw, of Edmonton visited friends over the week end.

Mr. B. C. Clarke went to Edmonton this week on business, also Mr. A. K. Hicks.

We hear that the Lindbrook ladies' party held at Mrs. Swift's of Tofield was quite up to the concert pitch. When and where is the next, and ay boys? How about it?

The bush fires or rather we should say slough fires around here are very much in evidence these days and at night the smoke lies heavy in all the valleys. Mr. Cookson and boys helped Messrs. B. C. Clarke and S. Lamb fireguarding a bad one on the [illegible] quarter north of here this week. Mr. Carr of the A. P. P. of Tofield supervising the job and inspecting some of the other fires.

Mr. Hedley Burton is building an addition to his house.

The road between Tofield and Lindbrook has been the scene of two auto accidents this last week. One occurred at the Lindbrook corner, (not Tottenham, this was a coupe fortunately, the occupants escaped injury. The other accident happened near Tory, this time the occupants did get hurt the car tipping over. The casualties were taken to Tofield by a passing car.

Mrs. Hanna of Ayr Scotland visited Mrs. Scott of Lindbrook, formerly of Ayr.

Mr. W. Paskins is again under the weather and we hope soon that he will be around again, in the meantime his work is being done by Messrs. Andrew and Leon Gougault.

Mr. Andrew Scott had the misfortune to lose sheep bogged in the mud. This water shortage is causing this year several cases of bogged cattle from the north and the section men under Chas Kortzman pulled one out of the sand on the new road.

The Lindbrook people wish Mr. Gray and his bride all the best there is in life for them, long life, luck, health and happiness etc. Mr. Gray arrived here last April from Durham, England and after sizing up the possibilities in this country sent for his fiance also of Durham, England who arrived last week and the two were married by Rev. T. Gordon at the manse at Tofield. They are residing on the Janet farm, which was vacant for the time being. Mr. Gray working out for the present to gain experience before starting on his own.

KINGMAN

Mrs. O. Thompson, daughters Josie and Mae, motored to Ryley Monday.

Dan Scramstad, of Edmonton was a business visitor in Kingman on Tuesday.

Mrs. W. McIntosh visited friends in Edmonton for a couple of days last week.

Herbert Asp was operated on for appendicitis on Wednesday and is now progressing favorably.

Mrs. S. T. Severson and sons of Clyde have been visiting relatives in Kingman for a few days.

Mr. and Mrs. Oscar Thompson and daughter Josie, and Mr. and Mrs. W. Hartchen were Edmonton visitors last week.

Edmonton visitors over the week end were Mr. and Mrs. Jack Erickson and daughter, and Simon and Alice Simonson.

Visitors at the C. R. Blychert home on Sunday were Mr. and Mrs. E. Gustafson, and Mr. and Mrs. M. Heglund of Water Glen.

Mr. and Mrs. W. Jardie and Mrs. E. Erickson motored to Edmonton on Friday.

Mr. and Mrs. C. O. Pederson and daughter were visitors with Mr. and Mrs. E. Erickson on Sunday.

Mr. and Mrs. Ed. Tollefson were the guests of Mr. and Mrs. O. Thompson on Sunday.

Mr. and Mrs. Thor Herte and Mr. and Mrs. J. Benson visited in the Bardo district on Sunday.

Mr. and Mrs. A. Asp and family motored to New Norway on Sunday.

A dance will be held in the Kingman Hall on Friday, Oct. 4th. The music will be furnished by Helge Anderson and Lily Erickson of Edmonton.

LAKESHORE

Miss Hazel Westlake visited at the T. W. Ferguson home last week. Hazel spent considerable time during last spring and early summer in the hospital but we are glad to report that she is much improved in health.

Messrs Todd Gray, Lorne Harlison, and Henry Thompson left on Wednesday for the Peace River where they intend taking up homesteads.

Mr. and Mrs. Wm. Seale motored to Edmonton on Tuesday.

Mrs. Jim Francis visited her sister of this district on Wednesday.

Mr. and Mrs. R. Phillips spent Sunday at the home of Peter Gates of Ross Creek.

Miss Naweda Fry spent a few days last week with her grandparents Mr. and Mrs. Eaton.

On Sunday Oct. 6th the Rally Day service will be held at 2 p. m.

THE YOUNG PEOPLE'S CORNER

First we had better explain what the Young Peoples Society is. It is a society formed last year by the young people of Tofield. Any person 18 years of age and over is elegible to join. Similar societies have functioned in other towns for some years. The Tofield Young Peoples Society is one year old and its year of existance was very successful and it is hoped that the second year will be even better.

The Young Peoples Society held their organization meeting in the basement of the United Church, on Friday, September 27th. This meeting took the form of a supper which the lady members prepared. After all had done full justice to the fine supper set before them a sing song was indulged in ably led by Miss Marion Cooper. The meeting was then called to order by the president Bert Swift, who gave a little address of welcome to the new members and also thanking the old members for their co-operation in last year's programs. He then called on the secretary Miss Stella Clement to give a summary of last years minutes, these were read.

The Young Peoples Society is divided into three groups, i. e., A, B, and C. groups and at the head of each group there is a convener. Nominations were then opened for election of officers and the following officers were elected.

President, Miss Marion Cooper; vice president, Freeman Hill; Secretary, Gordon Jobb; Treasurer, Norman Scott.

Conveners of committees Jack Cookson, Thelma Noland, Stella Clement. Press reporter, Bill Warton.

It was decided that the meeting night would be Monday at 8 o'clock.

The Executive Committee met on Monday night and decided that one group would be responsible for the practical work of the program on one night and the next group the next night and so on. The Devotional part of the program was standardided and will be the study of some book. It was intended by the executive to plan the program for the first quarter, but they did not have time. The month that was planned is as follows.

Monday, October 7th, Roman Legends. Monday, October 14th, a talk by Mr. Beckman of the University of Alberta, with lantern slides. This is not definitely decided, but will be decided for next week's paper.

Monday, October 28th, Halloween social.

The remaining two months program for the first quarter will appear in this space next week. Look for it.

BRITISH GOVERNMENT'S PLAN TO PURCHASE WHEAT IN BULK FAVORED BY PRAIRIE GROWERS

Canadian Wheat Pool Officials Will Discuss Situation at London Meeting

Purchase of wheat by Britain's Government will probably be a topic of the conference of wheat pool representatives in London soon with Right Hon. J. H. Thomas, lord privy seal and minister of unemployment. Although wheat pool heads were silent today regarding the meeting, it is known that the bulk purchase plan is looked on as a last means of solving troubles arising out of grain congestion at Montreal.

Suggestion of the bulk-purchase conference follows outright declaration of Canadian disapproval for a plan for storage of grain in British elevators. It was said that Mr. Thomas planned to construct elevators in Britain as a means of providing immediate work for unemployed and bringing about a steady flow of grain from Montreal elevators to Britain. But western grain men did not hesitate to say that they would not support any scheme of transferring their grain to Britain for storage.

Purchase of wheat in bulk by the British government should such be decided on is an entirely different matter in the opinion of the grain interests. While storage in Britain would mean that prices would drop, the grain men held, no disadvantage would result from wheat purchased by the British government being transferred in bulk lots to new elevators constructed on the other side.

As yet the delegates from the Canadian Co-operative Wheat producers to the London parley have not been named. It is understood that they will be decided on at the next board meeting of the pool, next week. No doubt, officials whose headquarters are at Winnipeg will be selected to journey across to the London conference.

Purchase of Canadian wheat by the British government a means of overcoming difficulties in shipping and marketing was first suggested by Right Hon. J. Ramsay MacDonald, Labor premier of Great Britain, when he visited Winnipeg in June 1928. At that time, as leader of the Labor party in Britain, Mr. MacDonald advanced the idea as possibly being of benefit to growers, market shipper and buyer.

While Right Hon. J. H. Thomas was in Winnipeg early in September he conferred twice with wheat pool authorities. It is understood that objections were immediately raised to what has been termed his plan of building British elevators for grain storage.

Prairies Disapprove

On Mr. Thomas' return to Britain details of the storage elevator idea were made known only to be greeted by disapproval from the prairies. It is considered here that the government purchase plan may have been approved by Mr. Thomas immediately after hearing adverse opinions of wheat pool officials regarding the storage-elevator scheme.

Full Transport of Wheat

The announcement in regard to the wheat pool came in reply to a question put after a speech by Mr. Thomas at the Independent Labor congress concluded. The minister had spoken of the necessity of securing return cargoes if British coal was to be shipped economically to Canada.

"I make no secret of it," Mr. Thomas said. "I had intended to put elevators on this side, if necessary, in order to ensure the free transport of wheat. At the present moment I am still dealing with that stage of the situation."

Questioned at the close of his speech, Mr Thomas said he was not satisfied with the present situation regarding for food supplies of Great Britain. "In the first place there is never more than three or four weeks' supplies of food-stuffs in this country and I do not consider that a satisfactory situation," Mr Thomas said. "In the second place, I think a stabilized price would be infinitely better. In the third place, your farmer here is more handicapped than any one else, because the end of the season the poor devil has to sell his crop in order to get winter foodstuffs for his cattle. All these things are wrapped up with bulk purchase, you have got to buy at the world price.

"The wheat pool is meeting with me in London next month in order to discuss this situation."

ENLARGES HOSPITAL

The rapidly growing mining town of Drumheller. It did its bit, but, no matter how well intentioned, could not cope with the situation. Consequently a three story brick Municipal hospital was erected with accommodation for eighty patients. Nine years have passed since the Municipal hospital was opened and now another ceremony is close at hand— the formal opening of a new wing at a cost of $60,000, and providing an additional sixty beds. Now the residents of Drumheller hospital district, numbering approximately 25,000 persons, view with pride the result of their faith and works— a one hundred and forty bed hospital with the latest hospital equipment and an efficient nursing staff.

Ten years ago, a small emergency hospital, operated by a local doctor, endeavored to meet the [illegible] of

The financing of the new wing offered no problem to the hospital board. During the nine years in which the hospital has made history a surplus of $70,000 accumulated. The new wing was built and equipped out of this surplus, and a sum sufficient to tide over any possible emergency, remains in the coffers.

An agricultural, as well as an industrial area is served by the Drumheller hospital. The residents of the town are largely miners engaged in the rich Drumheller coal mines, but Drumheller lies in the heart of a great wheat growing country of approximately one million acres, the greater part of which is occupied. In the beginning the rural residents were strongly opposed to the hospital and when the first vote was taken defeated it at every poll. But the miners were more concerned. They knew they must have a hospital, and had abandoned their scheme for building a miner's hospital, to join in the erection of the municipal hospital to serve both town and country. They carried the day, the hospital was built, and as soon as it began to operate the opposition died out. The rural people found it a boon to them in time of sickness; and they found that the value of their land increased with the hospital available. Both rural and urban folk also realized that here they had an institution sadly needed— a hospital where maternity cases could have proper care. Now few women remain in their home for their confinement.

The agricultural-industrial combination works well. Short crops do not affect the town of Drumheller or the hospital as they do other towns and hospitals, because Drumheller is largely built up and around the coal mining industry. Frequently men who farm in the summer join the miners in the winter, or even in the summer when the crop is light. But miners seldom go to work on farms in summer. Few of them make good farmers, and they do not like working in the open.

Rural ratepayers in this hospital district approximately forty miles square, are taxed at the rate of 2½ cents peracre for the hospital upkeep; urban property owners pay a tax of three mills on the dollar. In return all secure the hospital treatment for $1.00 per per day for themselves and families. Non-taxpayers who wish to share this privilige may do so by paying $6.00 per year to the secretary treasurer.

Miners secure the hospital services free for themselves and families by paying $9.00 per year per man to the hospital board. Under this plan the miners contribute some $30,000 toward the hospital upkeep, and since many of them are bachelors, and there are also many transient miners, this sum covers their share of the expense.

RAMSAY MacDONALD WILL BE GREETED BY 19-GUN SALUTE

NEW YORK, N. Y., Oct. 1.—Arrangements for an official reception for Right Hon. Ramsay MacDonald, prime minister of Great Britain, when he arrives here Friday, were announced today. The premier will land at 9.40 a. m., and depart for Washington at 11.40 a. m.

A welcoming committee will go down the bay on the municipal tug Macom to meet the steamship Berengaria at Quarantine. The prime minister's party will be escorted by mounted police up Broadway to the city hall where the official party will welcome Mr. MacDonald. At the city hall will be a guard of honor consisting of two battalions of soldiers and sailors.

The president of the United States will be represented by the secretary of State, Henry L. Stimson, James C. Dunne, chief of the division of protocol; Captain Eugene Regnier, aide to the secretary of state; Major-General Hanson E. Ely, [redacted] general of the second corps area, and Admiral Louis R. De Steiguer, commandant of the third naval district.

Sir Esme Howard, British ambassador and his secretary, Michael Wright, will represent the British government.

After the reception at the city hall the welcoming committee will escort the prime minister to the Pennsylvania station.

Orders for a 19-gun salute to be fired in honor of Mr. MacDonald when the Berengaria passes Fort Jay in New York harbor have been issued by the war department. The salute is the one normally given a cabinet member, the 21 gun salute being reserved for heads of states and royalty.

TRY TO INCREASE SENTENCE GIVEN TO CRUEL FARMER

Efforts to establish the inadequacy of a sentence imposed on Nick Popowich, Worcester district farmer, for tearing out the tongue of his horse, were under way today. Popowich was fined $50, given a suspended sentence for three months and destruction was ordered for the horse which could neither eat nor drink.

Royal Canadian Mounted Police have served notice of appeal against inadequacy of the sentence and the case will be heard at Weyburn on October 15th. The Saskatoon branch of the Society for the prevention of Cruelty to Animals has announced that a petition will be circulated and "sent to the proper authorities" asking an increase of sentence.

Prepare
For the Winter

Quite a number of people say that we will have a very cold winter. Others say a mild one is coming but to play safe prepare for the worst. Lay in as much feed as possible and milk as many cows as possible. Generally speaking cream is highest during the winter months and by delivering your cream to us you get every last cent there is in it. Both the money and the feed will be very welcome around January.

Job Printing

Every business man requires a certain amount of printed matter. Such things as Letterheads, Envelopes, and Statements are as necessary to modern business correspondence as a telephone is to a modern business office. The Mercury Office is equipped to turn out all kinds of job printing. The next time your supply is running low, call us up and a representative will be at your place of business in a short time to receive your instructions and take your order. Prices fair and just.

The Tofield Mercury

Artists in British-Canadian Concerts

Brilliant entertainers are to be heard this fall and winter in a nation-wide chain of musical concerts throughout the Dominion, sponsored by the Canadian Pacific Railway. They will appear in a series of six concerts, the outgrowth of the Music Festivals, now internationally known, which have been staged by the Music Department of the railway. Each of these concerts will be given at Toronto, Winnipeg, Regina, Calgary, Vancouver and Victoria with a probability of other cities being added to the list. Among those now taking part in these concerts will be Florence Hood, brilliant Canadian violinist; Mary Frances James, lyric soprano of Montreal; Stanley Maxted, Montreal tenor; Rodolph Plamondon, Canadian-born star of the Paris Opera; and the Hart House Quartette, internationally famous as players of Chamber Music.

CHANCES WHERE YOU ARE

MANY young and some older folks in this country and this town are looking round carefully for some place where there are chances to make good. Most of them are overlooking the opportunities of the old home town. Indeed some never recognise the local chances until outsiders come in and take them. They lay there for years until other folks with enterprise exploited the old home chances. Restless folks might—or might not, of course, be interested in two rather sensible letters which Abraham Lincoln wrote. To a step-brother planning on selling out and moving from Illinois to Missouri Lincoln sent this warning: "What can you do in Missouri better than you can here? Is the land any richer? Can you there any more than here, raise corn and wheat and oats without work? Will anybody there, any more than here, do your work for you? If you intend to go to work, there is no better place than right where you are; if you do not you cannot get along anywhere."

To a young law student who had written him for advice Lincoln wrote: "I didn't read law with anyone. Get the books and read and study them until you understand the principal features. It is of no consequence to be in a large town when you are reading. I read in New Salem, which never had more than three hundred people in it. The books and your capacity for understanding them are just the same in all places."

Banff, "Crag and Canyon".

LIFE'S BEST GIFT

THE SCRIPTURES say something about desiring earnestly the best gifts but if we were put to it to say which were the best many of us would be in a real dilemma. If any group of people was compelled to say what, in the judgment of each, was the best gift that life had to offer a man the answers would likely show a very great variety. And even if the group was made up altogether of earnest and good people, the pick of any community, the divergency would be there just the same. It isn't easy for any man to say with any definiteness what is the best thing life has to offer.

There would no doubt be some, and probably not the most worldly-minded either, who would put plenty of money at the top of any list of life's good gifts. And they would have something to say to justify their choice. Money may be a great good and has been proved so to be many times over, and yet when we look around and see some of the old skinflints that have plenty of it, it looks as if certain risks are run in becoming possessed of a great deal of it. And when we look again and see some men of abounding good will and immense wealth trying to use that wealth for the great and lasting good of the world and having all sorts of difficulty in deciding how to use it, and often making the most palpable mistakes in their decisions, we begin to see that its virtue may easily be exaggerated. No, it isn't easy to make money look like life's best gift!

Some of us would be inclined to find life's best gift in great intellectual endowment or in some skill for fine achievement. To be able to write a great book, or paint a wonderful picture, or design a building that men would glory in and talk about for centuries; to thrill men with charm of words, or rule them with a masterful spirit, or move them with great music—surely the gift to do any of these things would be counted among the finest gifts that life could bestow upon men! What exception could be taken to that proposition? Not much surely.

And yet, without any desire to belittle any of the achievements of the men who have done these great things, we wonder if the gift to do them may be accounted life's greatest gift. If life's finest gift is the one that brings most blessing with it do we find it in great art or great poetry or great eloquence or great music? Is not the gift for human sympathy and appreciation and understanding and friendliness the gift supreme, the gift without which all others stand empty and fruitless of highest good, the gift that added to all others makes them of infinite value? And don't the stories of the lives of earth's really greatest illustrate that? Great art or great poetry or great eloquence or great music do not always bless, but when did great kindliness and sympathy and appreciation fail!

Tofield versus The World

LESS THAN A SCORE YEARS AGO, AS EACH SUMMER PASSED ALMOST EVERY WESTERN SMALL TOWN WOULD, WITH ITS FLAMING RED POSTER ANNOUNCE ITS ANNUAL SPORTS DAY. A LINE REFERRING TO THE TUG-O'-WAR WOULD IN BOLD AND PROMINENT TYPE OFTEN READ "SMALL TOWN VERSUS THE WORLD."

TIMES HAVE CHANGED, THE TUG-O'-WAR IS NOT SO POPULAR AS IT ONCE WAS—BUT THE SLOGAN "SMALLTOWN VERSUS THE WORLD" IS STILL A LIVE ONE—BUT WITH A DIFFERENT MEANING.

IN THESE DAYS OF KEEN COMPETITION, WHEN THE FORCES OF FINANCE AS EXEMPLIFIED THROUGH THE MAIL ORDER HOUSES, CHAIN STORES, ETC., THE LOCAL MERCHANT WHEN HE HANGS OUT HIS SIGN FIGURATIVELY SAYS "SMALLTOWN VERSUS THE WORLD."

THERE IS HOWEVER, AN ALLY THAT THE SMALL TOWN MERCHANTS MAY SIGN UP WITH THAT WILL HELP THEM CONSIDERABLY. IT IS THE LOCAL NEWSPAPER.

ALMOST WITHOUT EXCEPTION, WHERE THERE IS A LOCAL PAPER PUBLISHED IT IS IN WHOLEHEARTED SYMPATHY WITH THE AIMS AND ASPIRATIONS OF THE TOWN AND DISTRICT IN WHICH IT IS PUBLISHED. IT WILL GO OUT OF ITS WAY—IT FREQUENTLY DOES GO OUT OF ITS WAY TO SERVE THE LOCAL MERCHANTS. BUT THIS IS NOT THE CHIEF CONSIDERATION—THE CHIEF CONSIDERATION IS "PUBLICITY PAYS".

THERE WAS A TIME WHEN COUNTRY NEWSPAPERS ASKED THEIR PATRONS TO "SUPPORT" THE PAPER, NOW COUNTRY NEWSPAPERS SUGGEST THEIR PATRONS "USE" THE PAPER. ADVERTISING MUST BE PROFITABLE—REASONABLY WELL WRITTEN AND OTHER THINGS ABOUT A STORE BEING EQUAL, NEWSPAPER ADVERTISING IS PROFITABLE—TO THE MERCHANT.

HOWEVER STRONG THE FORCES OPPOSED TO THE LOCAL MERCHANT MAY BE, THEY CANNOT BECOME STRONGER THAN PUBLIC OPINION AND PUBLIC OPINION IS MOULDED BY WHAT PEOPLE READ AND OBSERVE—ADVERTISING INCLUDED.

BARDO

Mr. and Mrs. Emil Rude have returned from a short trip to Preeceville, Saskatchewan.

Mr. E. Haug was made aware of the fact that he has reached the half century mark last Sunday afternoon when a number of his neighbors gathered at his home to help him celebrate his birthday. A very pleasant time was spent.

The Ladies Aid at Mrs. Nordhus, last Wednesday was quite well attended. Plans for the annual Dinner and Sale were discussed during the afternoon.

The services and Y. P. S. at Bardo were both quite well atended.

Miss Betsy Ness left for Edmonton last week where she will attend the [illegible] here.

Miss Alice Ness left for the Camrose College on Monday.

Mrs. Betquist and family of Bawlf, Mr. and Mrs. E. Rude and family, Mable Jevening, P. Bjornson and Joe Kuh were dinner guests at the [illegible] J. [illegible] on Sunday.

The [illegible] the Bardo district was [illegible] Saturday.

Mrs. George Hector [illegible] spent last week in Wetaskiwin [illegible].

Dr. Trendlegar passed through Tofield last Saturday returning from a hunting trip at Artland, Sask.

Our Last Advertisement

For more than eleven years we have each week sent a message to the Tofield and district public through the medium of this newspaper. Therefore we think it only fitting that upon the completion of our solicitation for business to take the opportunity of expressing our sincere thanks for the very splendid manner in which you have done business with us. As manager of the company, it was a privilege to supply your needs and a pleasure to have you come to us to have them supplied.
